M

M, m (ĕm), *n.; pl.* M's, m's, Ms, ms (ĕmz). The thirteenth letter of the English alphabet, comes through the Latin from the Greek *mu* (*my*), which took it from the Phoenician (Hebrew *mēm*). Its sound, that of a voiced, or sonant, bilabial continuant, is formed by stopping the oral passage at the lips, the soft palate being lowered at the same time so that the sound is given a nasal resonance, whence it is classed as a *nasal* and often described as *labionasal*. In some English words of Greek origin a final *m* has syllabic value, as in *cynicism*, *spasm*. It is silent only when initial before *n* in several words from Greek, as *mnemonic*. See *Pron.*, 171–3. In cognate words English *m* corresponds to German *m*, Latin *m* (or *n*), Gr. *m* (or *n*), Sanskrit *m*, as in *mouse*, G. *maus*, L. *mus*, Skr. *mūs*; *come*, G. *kommen*, L. *venire*, Gr. *bainein*, Skr. *gamati* (goes). See ALPHABET.

2. **a** An instance of the letter M, m, printed, written, painted, etc. **b** A printer's type, a stamp, for the letter M, m. **c** The sound, or any sound, of the letter M. **d** [*cap.*] In Roman numerals, 1,000; or, in a bar, 1,000,000. The original form was ↀ. **e** *Eng.* = 1st EM, 3.

3. Anything having the shape of the letter M.

4. As a *symbol*, used to denote or indicate an M or anything arbitrarily so designated, esp. as the 13th or (see K, *n.*, 4) thirteenth in order or class.

5. As an *abbreviation*: see *Abbreviations*, appendix. — *to have an M under the girdle.* To be courtesy, by using the titles Mr., Mrs., Miss. *Obs.*

M, m, *adj.* **1.** Twelfth or thirteenth (cf. 4th, 1) in order or class; as, Company *M*; quire *m*.

2. [*cap.*] Having the form of capital M.

M′. See 2d MAC.

3. **a** In the theater, an apparatus for the production of stage effects; — chiefly in reference to the ancient stage. Cf. DEUS EX MACHINA. **b** Hence, in reference to literature, any contrivance for dramatic presentation; esp., a supernatural agency or its action.

4. A device consisting of two or more resistant, relatively joined parts which, by a certain predetermined motion, may serve to transmit and modify force and motion so as to produce some given effect or to do some kind of work; kinematically, a chain with one link free CHAIN, n. 9). According to the strict definition, a lever abutting against a fulcrum, a pair of pliers in use, a simple pulley block with its fall, would be a machine, but ordinary usage would hardly include such as these; an implement or tool whose parts have no relative movement, as a hammer, saw, chisel, plane, or the like, would, of itself in any case be a machine. Popularly and in wider mechanical sense, a machine is a more or less complex combination of mechanical parts, as levers, screws, rocket wheels, pulleys, shafts and spindles, ropes, chains and bands cams and other turning and sliding pieces, springs, confined fluids, etc., together with the frame and fastenings supporting and connecting them when it is designed to operate upon material to change its form, in some preconceived and definite manner, to lift or tort loads, etc. A sewing machine, a paper-making machine, a printing machine, a hoisting machine, and a flying machine, are examples. Machines other than those for operating on material are commonly designated by special names, the particular forms of hoisting machines (cranes, derricks, elevators, etc.), heat and hydraulic engines, hydraulic and pneumatic tools, pumps, etc. Specif.: *macbol,* a nonportable power-driven machine partly or wholly automatic in action for milling, planing, turning, grinding, drilling, or otherwise changing the shape of metal by progressively removing metal in the form of chips in some usage, by pressing or stamping; a machine for use in other machines or machinery. When a machine is used as a source of mechanical power, as a windmill, an engine, or an electric motor, it is specifically termed a *motor,* a machine comprising parts which are small and accurately made, as a composite measuring device of precision, usually called an *instrument.* Thus a chemical balance is a *machine* or an *instrument,* a platform scale for weighing wagons and vehicles is a *machine,* a watt-meter is an *instrument,* and so on. Some special machines, as printing presses, are still usually called by the names of their inventors or proprietors. Cf. ENGINE; MECHANISM, 3; PRIME MOVER; SIMPLE MACHINE; TOOL.

5. A person or organization that acts like a machine, as automatically and without intelligence or feeling or through mechanical distribution of functions; as, he is a *machine;* esp., a combination of persons acting together for a common purpose, with the agencies which they use, the social *machine.*

6. The committees or other working bodies, often under the power of a boss, esp. in a political party, through which its policies and activities are directed and its nominations and patronage are often largely controlled, for private rather than partyor public end; also, the leaders or advisers of such bodies; — used disparagingly.

7. *Obs.* A machination; device. **b** An appliance or apparatus.

8. *Hist.* A military engine.

9. *Paint.* A large or pretentious picture made solely or chiefly for exhibition purposes.

mackerel sky. A sky covered with rows of clouds, altocumulus or cirro-cumulus, resembling the patterns on a mackerel's back. See CIRRO-CUMULUS.

Mack′i·naw (mĕk′ĭ·nô), *adj.* [Can. F. *Mackinac*, fr. *Michilimackinac*, fr. Ojibway *mitchimakinâk* great turtle.] Pertaining to Mackinac, Michigan, where stores were formerly distributed to the Indians, or to the Strait of Mackinac. — *n.* **a** Short for MACKINAW BLANKET, MACKINAW BOAT, MACKINAW COAT. **b** [*not cap.*] A heavy double-faced wool fabric used for coats.

Mackinaw blanket. A thick blanket formerly in common use in the western United States.

Mackinaw boat. A flat-bottomed boat with a pointed prow and square stern, using oars or sails or both, used esp. on the upper Great Lakes and their tributaries.

Mackinaw coat. A short, heavy, double-breasted plaid coat. *Local, U. S.*

Mackinaw trout. The namaycush.

Mc·Kin′ley Tar′iff (mə·kĭn′lĭ). *U. S. Hist.* The protective tariff established by act of Oct. 1, 1890 (the **McKinley Act**), introduced by William McKinley. See TARIFF, 1.

mack′ins (*dial.* mĕk′ĭnz), *n.* Dim. of MACK, an oath. *Dial.*

mack′in·tosh (mĕk′ĭn·tŏsh), *n.* [After Charles *Macintosh* (1766–1843), the inventor.] **a** A waterproof outer garment. **b** The cloth from which mackintoshes are made.

mack′in·tosh·ite (-īt), *n.* [After James B. *Mackintosh*, Am. chemist.] *Mineral.* A silicate of uranium, thorium, cerium, and other metals, found in black massive forms.

mack′le (mĕk′′l), *n.* [F. *macule.*] A macule; specif., *Print.*, a blur, or an appearance of a double impression, as from a slipping of the paper. — *v. t. & i.* [F. *maculer.*] *Print.* To blur or double (an impression from type).

Mack′s ce·ment′ (mĕks). [After L. *Mack.*] A cement made by the complete dehydration of gypsum.

ma′cle (mĕk′′l), *n.* [F. See MASCLE.] **1.** *Mineral.* **a** Chiastolite; — from the tessellated appearance of a cross section. **b** A twin crystal; esp., a flat, twinned crystal of diamond. **c** A dark spot in a mineral.

2. *Her.* = MASCLE, *n.*, 2.

Mac·leay′a (mĕk·lā′ə), *n.* [NL., after Alexander *MacLeay* (1767–1848), Brit. entomologist and colonial statesman.] *Bot.* A small genus of Asiatic herbs, the plume poppies (family Papaveraceae), with pinnately lobed glaucous leaves, and tall, showy panicles of cream-colored, apetalous flowers. Syn. *Bocconia.*

ma′cled (mĕk′′ld), *adj.* **1.** *Mineral.* **a** Marked like macle (chiastolite). **b** Having a twin structure. **c** Spotted.

2. = MASCLED.

Mc·Leod′ gauge (mĕk·lōd′). [After Herbert *McLeod* (1841–1923), Eng. chemist.] *Physics.* A sensitive instrument for measuring very low gas pressures.

McLeod tool. In United States Forest Service, a combination hoe and rake.

Ma·clu′ra (mə·klōō′rə; 242), *n.* [NL. See MACLUREA.] *Bot.* A genus of trees (family Moraceae), having as the only known species *M. pomifera*, the Osage orange. Syn. *Toxylon.*

Ma·clu′re·a (mə·klōō′rē·ə; 242), *n.* [NL., after William *Maclure*, Scot. geologist.] *Paleontol.* A genus of Ordovician spiral gastropod shells, often of large size.

Maclurea (*M. logani*). (1/2)

ma·clu′rin (-rĭn), *n.* [*Maclura*, syn. of *Chlorophora* + -in.] *Chem.* A colorless crystalline compound, $C_6H_7(OH)_3COC_6H_3(OH)_3$, found in fustic (*Chlorophora tinctoria*).

Mac·mil′lan·ite (mĕk·mĭl′ən·īt), *n.* [After John *Macmillan* (1670–1753).] *Scot. Eccl. Hist.* A Cameronian, or Reformed Presbyterian.

Mac·nab′ cy′press (mĕk·năb′). A bushy evergreen tree (*Cupressus macnabiana*) of the Pacific coast of N. A.

ma′co (mä′kō), *n.* [After *Maho* or *Mako* Bey, of Cairo, Egypt.] A tree cotton (prob. *Gossypium vitifolium*) cultivated in Egypt from 1820, which by hybridization esp. with sea-island cotton gave rise to the varieties termed *Egyptian cotton*; now, specif., a fine long-staple cotton, used esp. in hosiery and underwear.

Mā′con′ (mā′kōn′), *n.* [From *Mâcon*, town in France.] A red Burgundy wine. See BURGUNDY, 2.

‖**ma′çon′né′** (mä′sō′nā′), *adj.* [F.] *Her.* = MASONED.

ma·crad′e·nous (mə·krăd′ē·nŭs), *adj.* [*macr-* + *adenous.*] Having large glands.

mac′ra·mé (măk′rə·mā), *n.*, *or* **macramé lace.** [Turk. *maqramah* handkerchief, fr. Ar. *miqramah* embroidered veil.] A coarse, usually fringed, lace made by tying threads into knots to form geometrical designs, made chiefly at Genoa, Italy, used esp. for decorating linens and furniture.

macramé cord. A fine, closely twisted cord used in making macramé lace, netting, etc.

macramé knot. The knot from which macramé lace takes its name.

Macramé Knot.

ma·cran′der (mə·krăn′dĕr), *n.* Also **macran′dre** (-dĕr). [*macr-* + *-ander.*] *Bot.* A large male plant (see MACRANDROUS); — disting. from *micrander* (see DWARF MALE a).

ma·cran′drous (-drŭs), *adj.* [*macr-* + *-androus.*] *Bot.* Of certain green algae (family Oedogoniaceae), having male plants nearly as large as the female filaments to which they are attached. Cf. MICRANDROUS.

Mac′rau·che′ni·a (măk′rô·kē′nĭ·ə), *n.* [NL., fr. Gr. *makrauchēn* long-necked, fr. *makros* long + *auchēn* neck.] *Paleontol.* A genus of long-necked three-toed ungulates from the Pleistocene of South America. They had a complete dentition of 44 teeth without a diastema, and the external nostrils were far back. The cervical vertebrae resemble those of camels, the pitted incisors are like the horse's, and other characters suggest existing rhinoceroses. It is typical of a family, **Mac′rau·che·ni′i·dae** (-kē·nī′ĭ·dē). — **mac′rau·che′ni·id** (-kē′nĭ·ĭd), *n.* — **mac·rau′chene** (mak·rô′kēn), *n.* — **mac′rau·che′ni·i·form** (mak′rô·kē′nĭ·ĭ·fôrm), **mac′rau·che′ni·oid** (-nĭ·oid), *adj.*

mac′ren·ce·phal′ic (măk′rĕn·sē·făl′ĭk), **mac′ren·ceph′a·lous** (-sĕf′ə·lŭs), *adj.* [*macr-* + *encephalic, encephalous.*] Having a large or long brain case.

ma′cri·o (mā′krĭ·ō; măk′rĭ·ō), *n.* [F. *maquereau.*] A pimp. Cf. 2d MACKEREL. *Obs.*

mac′ro- (măk′rō-), **macr-.** [See MEAGER.] A combining form, Greek *makro-*, *makr-*, from *makros*, meaning *long in extent* or *duration*; — opposed to *micro-*, as in *macrocosm*, *macrura.* Specif.: **a** *Anat. & Med. An enlargement* or *excessive development*; — chiefly in nouns, as in:

macrobrachia	macrodactylism	macroplasia
macrocephalia	macrodactyly	macroplastia
macrocephalism	macrogastria	macropodia
macrocephaly	macroglossia	macroprosopia
macrocheilia	macrognathism	macrorhinia
macrochiria	macrolabia	macroscelia
macrocoly	macromastia	macrosomatia
macrocornea	macromazia	macrosomia
macrodactylia	macromelia	macrosplanchnic
		macrostomia

b *Bot. & Zool. Having* (a specified part) *unusually large*, esp. *elongated*; — in adjectives, as in:

macrocarpous	macrodactylous	macropetalous
macrocephalic	macroglossate	macrophyllous
macrocladous	macrognathic	macropleural
macrodactyl	macrognathous	macrosepalous
macrodactylic	macromandibular	macrostomatous

c *Cryst. The longer*; — opposed to *brachy-*, as in *macrodiagonal.* **d** [Cf. MACROCOSM.] *An individual* or *unit of greater size in a* (specified) *type*; as, a *macrocyte*; — chiefly in *Biol.* and *Measures*; as in:

macrobacterium	macrofarad	macrostylospore
macroblast	macrogonidium	macrosymbiont
macrococcus	macroseptum	macrozoogonidium
macroergate		

e *Denoting a kind visibly large*; *macroscopic*; as in *macrochemistry*, *macrography*, *macropathology.*

mac′ro (măk′rō), *adj.* = MACRO-.

mac′ro·a·nal′y·sis (-ə·năl′ĭ·sĭs), *n.* [*macro-* + *analysis.*] *Anal. Chem.* Analysis not on a minute scale; — opposed to *microanalysis.* See MICRO-, 4; MICROANALYSIS. — **mac′ro·an′a·lyst** (-ăn′ə·lĭst), *n.* — **mac′ro·an′a·lyt′i·cal** (-ăn′ə·lĭt′ĭ·kăl), *adj.*

mac′ro·ax′is (-ăk′sĭs), *n.* [*macro-* + *axis.*] *Cryst.* The macrodiagonal axis.

ma·cro′bi·an (mə·krō′bĭ·ăn), *adj.* [Gr. *makrobios*, fr. *makros* long + *bios* life.] Long-lived.

mac′ro·bi·o′sis (măk′rō·bī·ō′sĭs), *n.* [NL.] Longevity.

mac′ro·bi′ote (-bī′ōt), *n.* [Gr. *makrobiotos*, adj.] One that is long-lived.

mac′ro·bi·ot′ic (-bī·ŏt′ĭk), *adj.* [Gr. *makrobiotos*, fr. *makros* long + *bios* life.] Long-lived; also, tending to prolong life.

mac′ro·bi·ot′ics (-bī·ŏt′ĭks), *n.* The art of prolonging life.

Mac′ro·bi′o·tus (-bī′ō·tŭs), *n.* [NL., fr. Gr. *makrobiotos* long-lived.] *Zool.* A genus of bear animalcules having the body naked, transparent, and containing numerous fat globules which resemble enormous blood corpuscles.

Mac′ro·cen′trus (măk′rō·sĕn′trŭs), *n.* [NL., fr. Gr. *makrokentros* with a long sting.] *Zool.* A genus of Hymenoptera (family Braconidae), usually regarded as the type of a subfamily, **Mac′ro·cen·trī′nae** (-sĕn·trī′nē). Some species are parasitic on certain noxious insects.

mac′ro·ceph′a·lous (-sĕf′ə·lŭs), *adj.* [*macro-* + *-cephalous.*] **1.** Having a large head; designating a cranium of abnormally large size.

2. *Bot.* Having the cotyledons consolidated; — said of certain dicotyledonous embryos. *Rare.*

mac′ro·ceph′a·lus (-lŭs), *n.*; *pl.* MACROCEPHALI (-lī). [NL.] **1.** A macrocephalic person or skull.

2. [*cap.*] *Zool.* The genus constituted by the wart hogs. Syn. *Phacochoerus.*

mac′ro·chae′ta (-kē′tə), *n.*; *pl.* -TAE (-tē). [NL., fr. *macro-* + *-chaeta.*] *Zool.* Any of certain large bristles occurring on the body of insects, esp. Diptera; — disting. from *microchaeta.* They are used as a basis for classification. See CHAETOTAXY.

Mac·roch′e·lys (măk·rŏk′ē·lĭs), *n.* [NL., fr. *macro-* + Gr. *chelys* tortoise.] *Zool.* The genus consisting of the alligator snapper.

mac′ro·chem′is·try (măk′rō·kĕm′ĭs·trĭ), *n.* Chemistry studied or applied without the use of the microscope or of microanalysis. — **mac′ro·chem′i·cal** (-ĭ·kăl), *adj.* — **mac′ro·chem′i·cal·ly,** *adv.*

---

macr-. See MACRO-.

Mac′ro·chi′ra (măk′rō·kī′rȧ), *n.* [NL., fr. Gr. *makrocheir* long-armed, fr. *makros* long + *cheir* hand.] *Zool.* A genus of crabs of the family Inachidae, consisting of the giant crab.

Mac′ro·chi′res (măk′rō·kī′rēz), *n. pl.* [NL., fr. *macro-* + Gr. *cheir* hand.] *Zool.* A group of birds including the swifts and hummingbirds and sometimes also the goatsuckers; — so called from the length of the distal part of the wing. — **mac′ro·chi′ran** (-răn), *adj. & n.*

mac′ro·co·nid′i·um (-kō·nĭd′ĭ·ŭm), *n.; pl.* -IA (-ȧ). A large conidium. See MICROCONIDIUM. — **-nid′i·al** (-ăl), *adj.*

mac′ro·con′ju·gant (-kŏn′jōō·gănt), *n.* [*macro-* + *conjugant.*] *Zool.* In *Vorticella* and allied ciliate protozoans, the large sedentary conjugant, as distinguished from the small motile microconjugant.

mac′ro·cosm (măk′rō·kŏz′m), *n.* [F. *macrocosme*, fr. Gr. *makros* long, great + *kosmos* world.] The great world; the universe; — contr. with *microcosm*, or man, as an epitome of the macrocosm. — **mac′ro·cos′mic** (-kŏz′mĭk), *adj.* — **mac′ro·cos′mi·cal** (-mĭ·kăl), *adj. Obs.* — **mac′ro·cos′mi·cal·ly**, *adv.*

mac′ro·cos·mol′o·gy (-kŏz·mŏl′ō·jĭ), *n.* [*macrocosm* + *-ology.*] A description of the macrocosm.

mac′ro·cos′mos (-kŏz′mōs), *n.* [NL.] Macrocosm.

mac′ro·crys′tal·line (măk′rō·krĭs′tăl·ĭn; -īn), *adj.* [See MACRO-; CRYSTALLINE.] *Petrog.* Consisting of, or having, crystals large enough to be determined by the eye or a simple lens.

mac′ro·cyst (măk′rō·sĭst), *n.* A large spore case or cyst; specif., *Biol.*, a very young encysted plasmodium.

Mac′ro·cys′tis (-sĭs′tĭs), *n.* [NL., fr. *macro-* + *-cystis.*] *Bot.* **a** A genus of brown algae or seaweeds of the family Laminariaceae. *M. pyrifera*, the giant kelp, found throughout the waters of the Southern Hemisphere and along the Pacific coast of North America, has an immensely elongated thallus, which is reported to reach the length of 700 feet, thus exceeding all other known plants. The slender stipe supports a pinnate frond with floats. **b** [*not cap.*] Any plant of this genus.

mac′ro·cyte (măk′rō·sīt), *n.* [*macro-* + *-cyte.*] *Med.* A very large red blood corpuscle, found especially in the blood in pernicious anemia.

mac′ro·cy·the′mi·a, or -thae′mi·a (-sī·thē′mĭ·ȧ), *n.* [NL., fr. *macrocyte* + *-hemia* (see -EMIA).] *Med.* The presence of macrocytes in the blood.

mac′ro·cy·to′sis (măk′rō·sī·tō′sĭs), *n.* [NL., fr. *macrocyte* + *-osis.*] **a** Production of macrocytes. **b** = MACROCYTHEMIA.

mac′ro·di·ag′o·nal (-dī·ăg′ō·năl; -n′l), *n.* [*macro-* + *diagonal.*] *Cryst.* The longer diagonal; the longer lateral axis in the orthorhombic and triclinic systems. — *adj.* Pertaining to, designating, or developed along, the macrodiagonal. See CRYSTALLIZATION.

mac′ro·dont (măk′rō·dŏnt), *adj.* [*macr-* + *-odont.*] Having large teeth. — **mac′ro·dont′ism** (-dŏn′tĭz′m), *n.*

mac′ro·don′ti·a (-dŏn′shĭ·ȧ), *n.* [NL.] **1.** Macrodontism. **2.** [*cap.*] *Zool.* A genus of beetles (family Cerambycidae). *M. cervicornis* of South America, which is light cream-colored, with reddish-brown markings on the elytra, and brown head, is one of the largest existing insects.

mac′ro·ga·mete′ (-gȧ·mēt′), *n. Biol.* The larger, or female, of two conjugating spores; — disting. from *microgamete.*

mac′ro·ga·me′to·cyte (-gȧ·mē′tō·sīt), *n. Biol.* A gametocyte producing macrogametes.

ma·crog′a·my (mȧ·krŏg′ȧ·mĭ), *n.* [*macro-* + *-gamy.*] *Biol.* Syngamy between gametes not differing markedly in size or appearance from vegetative cells. It occurs among the protozoa and algae. Cf. MICROGAMY.

mac′ro·graph (măk′rō·grăf; 83), *n.* [*macro-* + *-graph.*] A graphic reproduction, usually photographic, of an object, either unmagnified or slightly magnified.

ma·crog′ra·phy (mȧ·krŏg′rȧ·fĭ), *n.* [*macro-* + *-graphy.*] **a** Writing of great size, an indication of nervous disorder. **b** Examination or study with the naked eye; — opp. to *micrography.* — **mac′ro·graph′ic** (măk′rō·grăf′ĭk), *adj.*

mac′ro·lep′i·dop′ter·a (-lĕp′ĭ·dŏp′tĕr·ȧ), *n. pl.* [NL. See MACRO-; LEPIDOPTERA.] *Zool.* The larger Lepidoptera; the butterflies and the larger moths. — **mac′ro·lep′i·dop′ter·ous** (-ŭs), *adj.*

ma·crol′o·gy (mȧ·krŏl′ō·jĭ), *n.* [L. *macrologia*, fr. Gr. *makrologia*, tr. *makros* long + *logos* discourse.] **a** = PLEONASM, 1. **b** Redundancy or prolixity.

mac′ro·ma′ni·a (măk′rō·mā′nĭ·ȧ), *n.* [NL., fr. *macro-* + *-mania.*] *Med.* The delusion that things (esp. parts of the patient's body) are larger than they really are. — **mac′ro·ma′ni·a·cal** (-mȧ·nī′ȧ·kăl), *adj.*

mac′ro·mere (măk′rō·mēr), *n.* [*macro-* + *-mere.*] *Embryol.* One of the larger cells, or blastomeres, resulting from the unequal segmentation of a telolecithal egg; — opposed to *micromere.* See BLASTULA, *Illust.* — **mac′ro·me′ral** (-mēr′ăl), **mac′ro·mer′ic** (-mĕr′ĭk), *adj.*

ma·crom′er·ite (mȧ·krŏm′ĕr·īt), *n.* [*macro-* + Gr. *meros* part.] *Petrog.* An igneous rock with large grains visible to the naked eye. — **ma·crom′er·it′ic** (-ĭt′ĭk), *adj.*

ma·crom′e·ter (mȧ·krŏm′ē·tĕr), *n.* [*macro-* + *-meter.*] An instrument for determining size and distance of objects by means of two reflectors on a common sextant.

mac′ro·meth′od (măk′rō·mĕth′ŭd), *n. Chem.* A method, as of analysis, not involving the use of minute amounts of material; — opposed to *micromethod.*

mac′ro·mol′e·cule (măk′rō·mŏl′ē·kūl; -mō′lē·kūl), *n.* [*macro-* + *molecule.*] *Chem.* A large molecule; specif., a grouping together or combination of simple molecules capable of independent existence, as in polyoxymethylene, or polymerized formaldehyde, rubber, or polymerized isoprene, cellulose, or polymerized dehydrated glucose residues, etc.

mac′ro·my′e·lon (-mī′ē·lŏn), *n.* [NL., fr. *macro-* + Gr. *myelos* marrow.] *Anat.* A division of the brain practically coextensive with the medulla. *Owen.* — **mac′ro·my′e·lo′nal** (-lō′năl), *adj.*

ma′cron (mā′krŏn; măk′rŏn; 277), *n.* [Gr. *makron*, neut. of *makros* long. See MEAGER.] A short, straight, horizontal mark [¯] placed over vowels to denote long quantity. ☞ In the respelling for pronunciation in this Dictionary the macron indicates the regular "long," or name, sounds of the vowels: ā in *dāme*, ē in *ēve*, ī in *īce*, ō in *ōld*, and ū in *ūse.* See *Pron.*, § 73.

mac′ro·nu′cle·us (măk′rō·nū′klē·ŭs), *n. Zool.* The larger of the two kinds of nuclei of many infusorians; a meganucleus; — disting. from *micronucleus.* — **mac′ro·nu′cle·ar** (-ĕr), *adj.*

mac′ro·phage (măk′rō·fāj), *n.* [F. See MACRO-; -PHAGE.] *Anat.* **a** A large phagocyte. **b** Also **ma·croph′a·gus** (mȧ·krŏf′ȧ·gŭs). A clasmatocyte.

mac′ro·phag′o·cyte (-făj′ō·sīt), *n.* [*macro-* + *phagocyte.*] *Anat.* A macrophage.

Mac′ro·pho′ma (-fō′mȧ), *n.* [NL. See MACRO-; PHOMA.] *Bot.* A form genus of imperfect fungi, similar to those of the genus *Phoma* but with larger pycnospores.

mac′ro·pho′to·graph (-fō′tō·grăf; 83), *n.* An enlarged photograph.

mac′ro·pho·tog′ra·phy (-fō·tŏg′rȧ·fĭ), *n.* Photographic production of enlarged copies of a negative or picture.

mac′ro·phys′ics (măk′rō·fĭz′ĭks), *n.* [*macro-* + *physics.*] That part of physics which deals with the larger aggregations of matter, that is, with bodies large enough to be directly and individually observed and measured.

mac′ro·plank′ton (-plăngk′tŏn), *n.* [*macro-* + *plankton.*] *Biol.* Macroscopic plankton, comprising the larger planktonic organisms, as jellyfish, crustaceans, salpas, etc. Cf. MICROPLANKTON.

Mac′ro·pod′i·dae (măk′rō·pŏd′ĭ·dē), *n. pl.* [NL. See MACROPODOUS.] *Zool.* A family of diprotodont marsupials constituted by the kangaroos. It is usually divided into the subfamilies **Mac′ro·po·di′nae** (-pō·dī′nē) (including the typical kangaroos and the wallabies), Potoroinae, and Hypsiprymnodontinae (see MUSK KANGAROO). — **mac′ro·pod′o·dine** (mȧ·krŏp′ō·dĭn; -dīn), *n. & adj.*

ma·crop′o·dous (mȧ·krŏp′ō·dŭs), *adj.* [Gr. *makropous* long-footed. See MACRO-; -PODOUS.] *Bot.* **a** Having an enlarged or elongated hypocotyl, as certain embryos. **b** Long-stalked, as a leaf.

ma·crop′si·a (-sĭ′ȧ), *n.* Also **ma·crop′sy** (-sĭ). [NL. *macropsia*, fr. *macr-* + *-opsia.*] *Physiol. Optics.* A pathological condition of the eye in which objects appear to be unnaturally large; — opp. to *micropsia.*

ma·crop′ter·ous (mȧ·krŏp′tĕr·ŭs), *adj.* [Gr. *makropteros.* See MACRO-; -PTEROUS.] Having long or large wings or fins, as certain birds, insects, or fishes.

Mac′ro·pus (măk′rō·pŭs), *n.* [NL., fr. *macro-* + Gr. *pous* foot.] *Zool.* A genus of marsupials including the typical kangaroos and often also the wallabies.

Mac′ro·pyg′i·a (-pĭj′ĭ·ȧ), *n.* [NL., fr. *macro-* + Gr. *pygē* rump, tail.] *Zool.* A large genus of long-tailed pheasant-like pigeons. See CUCKOO DOVE.

mac′ro·re·ac′tion (-rē·ăk′shŭn), *n.* [*macro-* + *reaction.*] *Med.* A reaction characterized by changes large enough to be seen with the naked eye; — opposed to *microreaction.*

Mac′ro·rham·phos′i·dae (măk′rō·răm·fŏs′ĭ·dē), *n. pl.* [NL., fr. *macro-* + Gr. *rhamphos* beak.] *Zool.* A family of hemibranchiate fishes consisting of the bellows fishes. Syn. *Centriscidae.* See BELLOWS FISH. **a.** The typical genus is **Mac′ro·rham·pho′sus** (-fō′sŭs), syn. *Centriscus.*

ma·cros′ci·an (mȧ·krŏsh′ĭ·ăn), *adj.* [Gr. *makroskios*, fr. *makros* long + *skia* shadow.] Having a long shadow, as a denizen of polar regions. — **ma·cros′ci·an,** *n.*

mac′ro·scop′ic (măk′rō·skŏp′ĭk), **mac′ro·scop′i·cal** (-ĭ·kăl), *adj.* [See MACRO-; -SCOPIC.] **a** Large enough to be observed by the naked eye; — opposed to *microscopic.* **b** Seen in the large, or taken in the large; in terms of large units or elements; as, a *macroscopic* equation. **c** *Petrog.* = MEGASCOPIC, 2. — **mac′ro·scop′i·cal·ly,** *adv.*

mac′ro·seism (măk′rō·sīs′m; -sīz′m), *n.* [*macro-* + *-seism.*] A severe or major earthquake; — opp. to *microseism.* — **mac′ro·seis′mic** (-sīs′mĭk; -sīz′-), *adj.*

mac′ro·seis′mo·graph (măk′rō·sīs′mō·grăf; -sīz′-; 83), *n. Seismol.* A seismograph specially adapted for recording large earthquakes.

mac′ros·mat′ic (măk′rŏz·măt′ĭk), *adj.* [*macr-* + *osmatic.*] *Anat. & Zool.* Having the organs of smell highly developed.

mac′ro·som′a·tous (măk′rō·sōm′ȧ·tŭs; -sō′mȧ·tŭs), *adj.* [*macro-* + *-somatous.*] Having a large body, esp. one abnormally large.

mac′ro·spo·range′ (măk′rō·spō·rănj′), *n.* A macrosporangium.

Ma'gi (mā'jī), *n. pl.; sing.* MAGUS (mā'gŭs). [L., pl. of *Magus*, fr. Gr. *Magos*, fr. OPer. *Magu.* Cf. MAGE, MAGIC.] A priestly caste or order of ancient Media and Persia, probably of Median origin, but holding sacerdotal supremacy throughout the era of Persian rule. Their religion was very similar to that of Zoroaster, who may himself have been a Magus, and included belief in the advent of a savior, which may be the ground for the allusion in Matthew ii. 1 (the word *Magi* being used in the Vulgate where "wise men" is given in the Authorized and Revised versions). The doctrine of the Magi represented the principles of good and of evil as rival deities, both of whom must be worshiped. See ZOROASTRIANISM; THREE KINGS OF COLOGNE.

Ma'gi·an (mā'jĭ·ăn), *adj.* Of or pertaining to the Magi; hence [*not cap.*], magical. — *n.* One of the Magi; a magician. — **Ma'gi·an·ism** (-ĭz'm), *n.*

mag'ic (măj'ĭk), *n.* [OF. *magique*, fr. L. *magice*, fr. Gr. *magikē* (sc. *technē*), fr. *magikos.* See MAGIC, *adj.*] **1.** The art, or body of arts, which claims or is believed to be able to compel a deity or supernatural power to do or refrain from doing some act or to change temporarily the order of natural events, or which claims or is believed to produce effects by the assistance of supernatural beings, as angels, demons, or departed spirits, or by a mastery of secret forces in nature. Magic is not clearly differentiated from science by primitive peoples. It is a part of most primitive religions. With the rise of Christianity to power many magical practices were banned; the Church condemned resort to spirits and demons for knowledge or assistance (as in witchcraft, sorcery, diabolism) not as false but as evil, or *black magic.* Magic which aims to produce death or injury is also called *black magic.* On *white* or *natural, magic* no ban was placed, and largely from this, which also survives in legerdemain, was developed modern natural science. Magical practices are of four types: *Sympathetic magic,* based on the principle that like effects like, or that a desired result may be brought to pass by mimicking it, naming it in spells, etc., and on the belief that things once in contact continue to act upon each other after being separated; *divination,* the various means of gaining hidden knowledge, as astrology, clairvoyance, augury, sortilege, necromancy, etc.; *thaumaturgy* or wonder working, including alchemy, jugglery, legerdemain, and trickery ascribed to demons; *incantation,* the recital of magical formulas or the pronouncement of a word or words of magical power (as the name of a deity), or the performance of a magical ritual procedure. Cf. 1st MAGA.

2. The power or potency brought into play by the arts of magic; hence, any seemingly secret or occult power; as, the *magic* of a great name; also, any insistent or impulsive charm; as the *magic* of the painter's art.

Syn. — Sorcery, necromancy, conjuration, enchantment.

mag'ic (mĭj'ĭk), *adj.* [OF. *magique*, fr. L. *magicus*, fr. Gr. *magikos*, fr. *magos.* See MAGI.] **1.** Of or pertaining to magic; employed in the rites of magicians.

2. Hence Seemingly requiring more than human power; imposing or startling in performance; producing effects which seem supernatural; having extraordinary properties; as, a *magic* lantern; a *magic* square; *magic* skill.

3. Characterized by, or having the powers or effects of, magic; hence, enchanting; as, a *magic* land or scene.

2. Office or dignity of a magistrate; also, the collective body of magistrates.

3. District or jurisdiction of a magistrate.

mag'is·tral (-trăl), *adj.* [From L. *magistralis,* perh. through F. *magistral.* See MAGISTRATE; cf. MISTRAL.] **1.** Of or pertaining to a master; hence, magisterial; authoritative; dogmatic.

2. Concocted or prescribed by a physician; hence, effectual; sovereign. "Some *magistral* opiate." *Bacon.*

3. *Fort.* Guiding; principal; as: **magistral line,** a guiding line with reference to which the drawing for a work is made. In permanent works it is usually the line of the intersection of the scarp and berm; in fieldworks, the interior crest, or bottom of the interior slope, of the parapet.

4. *Pharm.* Formulated for a particular case; — opposed to *officinal,* and said of prescriptions and medicines.

— **mag'is·tral·ly,** *adv.*

mag'is·tral, *n.* **1.** *Med.* A sovereign medicine. *Obs.*

2. *Fort.* a A magistral line (see MAGISTRAL, *adj.,* 3). **b** A principal strategic line.

3. *Metal.* Roasted copper pyrites used in the patio process.

mag'is·tral'i·ty (-trăl'ĭ·tĭ), *n.; pl.* -TIES (-tĭz). Magistral quality, position, or character; *pl.,* special prescriptions; dogmatic teachings. *Obs.*

mag'is·trand (măj'ĭs·trănd), *n.* [ML. *magistrandus.*] In Scottish universities, orig., an arts student in the fourth, or highest, class; later, one in the fourth year; — now used officially only at Aberdeen, and unofficially at St. Andrews.

mag'is·trant (-trănt), *n.* [Cf. MAGISTRAND.] A Russian scientific degree formally corresponding to the degree of master.

mag'is·trate (-trāt; -trĭt), *n.* [L. *magistratus,* fr. *magister* master. See MASTER.] **1.** Magistracy. *Obs.*

2. A person clothed with power as a public civil officer; a public civil officer invested with executive or judicial powers; as: **a** The official first in rank in a government, the *chief,* or *first, magistrate,* — the king, emperor, etc., of a monarchy, the president of a republic, the governor of a State in the United States, etc. **b** A magistrate of a class having summary, often criminal, jurisdiction, as a justice of the peace, or one of certain officials having a similar jurisdiction; as, a police *magistrate,* stipendiary *magistrate* (in England), etc.

mag'is·tra'tive (măj'ĭs·trā'tĭv; -trȧ·tĭv), *adj.* Proper to a magistrate.

mag'is·tra·ture (-trȧ·tûr), *n.* [F.] Magistracy; term or exercise of magistracy.

Mag'le·mo'se (măg'lē·mō'sē; mou'-), *adj.* Maglemosian.

Mag'le·mo'sian (-mō'zhăn; -shăn), *adj.* Also **-mo'sean** (-zhăn; -shăn). *Ethnol.* Of, belonging to, or pertaining to, a late phase of the Azilian-Tardenoisian culture of Europe represented by remains of bone and stone implements found at Maglemose, Denmark. By some it is regarded as a transition period between paleolithic and neolithic culture.

mag'ma (măg'mȧ), *n.; pl.* -MATA (-mȧ·tȧ), -MAS (-mȧz). [L., fr. Gr. *magma;* akin to Gr. *massein* to squeeze, knead, and to E. MAKE.] **1.** Dregs; sediment. *Now Rare.*

2. Any crude mixture of mineral or organic matters in the state of a thin paste.

3. *Geol.* a Molten (liquid or pasty) rock material originating within the earth; the molten material or mass from which an igneous rock results by cooling and crystallization. **b** *Now Rare.* The glassy base of an eruptive rock.

4. *Pharm.* A suspension of a large amount of precipitated material in a small volume of a watery vehicle; as, magnesia *magma* (milk of magnesia).

magma basalt. *Petrog.* Limburgite.

mag·mat'ic (măg·măt'ĭk), *adj.* Of, pertaining to, or proceeding from, magma; as, *magmatic* segregation, the separation of certain minerals within an igneous magma.

Mag'na Char'ta (măg'nȧ kär'tȧ), **Mag'na Car'ta.** [ML., great charter.] **1.** The Great Charter, so called, to which the English barons forced King John to affix his seal June 15, 1215, at Runnymede. The Charter, which was more truly a treaty, was based upon a previous charter signed by Henry I about 1100, but amplified it, and included rights and principles which had later come into existence. It laid a foundation for the security of English political and personal liberty. There were numerous subsequent confirmations, notably: those of 1216 and 1217 during the minority of Henry III, making many important changes; that of 1225 on Henry's coming of age, making only two alterations of importance; and that of Edward I, in 1297.

2. A constitution guaranteeing rights and privileges.

Magna Charta of the Netherlands. = GREAT PRIVILEGE.

‖**mag'na cum lau'de** (kŭm lô'dē). [L.] See CUM LAUDE.

‖**mag'na cus·tu'ma** (kŭs·tū'mȧ). [NL.] = GREAT CUSTOM.

‖**mag·na'le** (măg·nā'lē), *n.; pl.* -LIA (-lĭ·ȧ). [LL. *magnalia,* pl.] A wonder; a marvel. *Obs.*

Mag·na'lĭ·a Chris'ti A·mer'i·ca'na (măg·nā'lĭ·ȧ krĭs'tī ȧ·mĕr'ĭ·kā'nȧ; -kăn'ȧ). [NL.] Literally, the great things (marvels) of Christ in America; — the title of a book by Cotton Mather, 1702.

Mag'na Ma'ter (măg'nȧ mā'tĕr). [L.] *Rom. Relig.* The Great Mother of Anatolia; the Phrygian Cybele. In 204 B.C., in response to the Sibylline oracle, her meteorite symbol was brought from Asia Minor to Rome and a festival established in her honor, the *Megalesia* or *Megalensia,* orig. April 4, later April 4–10.

Mag'na Mo·ra'lĭ·a (mō-rā'lĭ·ȧ). See ETHICS, 1.

‖**ma'gna'ne·rie'** (mȧ'nyȧ'n'-rē'), *n.* [F., fr. *magnan* silkworm.] **a** An establishment where silkworms are reared. **b** Sericulture.

mag'na·nime' (măg'nȧ·nēm'), *adj.* [F.] Magnanimous. *Obs.*

mag'na·nim'i·ty (măg'nȧ·nĭm'ĭ·tĭ), *n.; pl.* -TIES (-tĭz). [F. *magnanimité,* fr. L. *magnanimitas.*] **1.** Quality of being magnanimous; loftiness of spirit enabling one to sustain danger and trouble with tranquillity and firmness, to disdain injustice, meanness, and revenge, and to act and sacrifice for noble objects.

2. A manifestation of magnanimous spirit.

3. *Obs.* **a** Fortitude. **b** Grandiose temperament.

mag·nan'i·mous (măg·năn'ĭ·mŭs), *adj.* [L. *magnanimus,* fr. *magnus* great + *animus* mind. See MAGNATE; ANIMUS.] **1.** Great of mind; elevated in soul or in sentiment above what is low, mean, or ungenerous; of courageous spirit.

2. Dictated by or exhibiting nobleness of soul; honorable; noble; not selfish; as, a *magnanimous* policy.

Syn. — Generous, unselfish, disinterested; lofty, exalted, high-minded. **Ant.** — Mean, vindictive; selfish, ignoble. — **mag·nan'i·mous·ly,** *adv.* — **mag·nan'i·mous·ness,** *n.*

mag'na·scope (măg'nȧ·skōp), *n.* [L. *magnus* large + *-scope.*] *Motion Pictures.* An attachable auxiliary lens to increase the size of the projected picture. — **mag'na·scop'ic** (-skŏp'ĭk), *adj.*

mag'nate (măg'nāt), *n.* [LL. (pl.) *magnates, magnati,* fr. *magnus* great. See MASTER.] **1.** A person of rank; a noble or grandee; a person of influence or distinction.

2. Formerly, one of the nobility, or certain high officers of state belonging to the noble estate in the national representation of Hungary (*Table,* of *House,* of *Magnates*), or of Poland.

mag'ne- (măg'nē-), **magn-.** A combining form from Greek *Magnēs* (see MAGNET), equivalent to *magneto-,* as in *magnecrystallic,* **mag'ne·lec'tric, mag'ne·op'tic.** *Faraday.*

mag'ne·crys·tal'lic (măg'nē·krĭs·tăl'ĭk), *adj. Physics.* Pertaining to the action of a magnet on a crystalline body.

mag'nes (măg'nēz), *n.* [L.] A magnet; also, magnetic power. *Obs.*

mag·ne'sia (măg·nē'shȧ; -zhȧ; 277), *n.* [ML., fr. Gr. *hē Magnēsia lithos,* prop., the Magnesian stone. See MAGNET; cf. MANGANESE.] **1.** *Alchemy.* An ingredient of the magistery, sometimes described as a plasmic saltish fluid or gum, composed of the four elements.

2. *Obs.* **a** Manganese. **b** Amalgam.

3. *Chem.* **a** Magnesium oxide, MgO, a light earthy white substance made usually by heating magnesium hydroxide or carbonate, or by burning magnesium, and then called also *calcined magnesia* or *magnesia usta.* It is slightly alkaline, and is used as a mild antacid laxative. The ordi-

nary magnesia of the pharmacopoeia (*light magnesia*) is very bulky, but a denser variety (*heavy magnesia*) is also prepared. Magnesia is also used in making firebricks and crucibles, in hydraulic cements, as an insulator, etc. **b** Magnesium (in phrases); as, carbonate of *magnesia*. Cf. 1st LIME, 2.

4. *Pharm.* Magnesia alba.

‖**mag·ne'si·a al'ba** (măg·nē'shĭ·ȧ ăl'bȧ; măg·nē'zhĭ·ȧ). [NL.] *Pharm.* A bulky white amorphous substance, consisting of a hydrous basic carbonate of magnesium. It is used as a mild cathartic.

mag·ne'sial (măg·nē'shăl), *adj.* Magnesian.

magnesia magma. Milk of magnesia.

mag·ne'sian (măg·nē'shăn), *adj.* Of or pertaining to the (ancient) city of Magnesia in Ionia or its inhabitants. — *n.* One of the people of Magnesia.

mag·ne'sian (măg·nē'shăn; -zhăn), *adj.* Of or pertaining to, or characterized by, magnesia or magnesium.

magnesian limestone. Dolomite.

mag·ne'sic (măg·nē'sĭk), *adj.* *Chem.* Of, pertaining to, or containing, magnesium; as, *magnesic* oxide.

mag·ne'si·o·fer'rite (-sĭ·ō·fĕr'īt), *n.* [*magnesio-* (for *magnesium*) + *ferrite.*] *Mineral.* A magnetic magnesium iron oxide $MgO.Fe_2O_3$, resembling magnetite.

mag'ne·site (măg'nē·sīt), *n.* [Cf. F. *magnésite.*] *Mineral.* Native magnesium carbonate, $MgCO_3$.

mag·ne'si·um (măg·nē'shĭ·ŭm; -zhĭ·ŭm), *n.* [NL. See MAGNESIA.] *Chem.* A silver-white metallic element, malleable and ductile, and light (sp. gr., 1.74). Symbol, *Mg*; at. no., 12; at. wt., 24.32. Magnesium occurs abundantly but always in combination, as in the minerals magnesite, dolomite, carnallite, epsomite, spinel, and serpentine, talc, olivine, and other silicates; also in natural waters and in organic products, esp. seeds and bones. The metal is obtained chiefly by electrolysis of a fused bath of magnesium chloride with other chlorides or of magnesium oxide dissolved in a fused mixture of fluorides. It burns, forming (the oxide) magnesia, with the production of a dazzling, strongly actinic light (**magnesium light**), which is used in signaling, in pyrotechny, and in photography. It is used structurally as sheet, rod, etc., and esp. in light alloys. It is also used as a deoxidizer of other metals and in organic synthesis. Chemically, magnesium is bivalent, and forms a colorless cation, Mg^{++}. See GRIGNARD REAGENT.

magnesium carbonate. *Chem.* A white, crystalline compound, $MgCO_3$, occurring native as magnesite and also prepared artificially; also, any of several basic carbonates.

magnesium chloride. *Chem.* A bitter white crystalline salt, $MgCl_2$, found in sea and mineral waters and in salt deposits, and usually crystallizing with six molecules of water. It is used as a fireproofing agent, as a filler for cotton and wool goods, etc.

magnesium hydroxide. *Chem.* A compound, $Mg(OH)_2$, occurring native as brucite, and obtained by precipitation as a white, difficultly soluble powder. It is used as an antacid (in milk of magnesia), in sugar refining, and in other ways.

magnesium lime. See 1st LIME, 2.

magnesium limestone. See LIMESTONE, 1.

magnesium nitrate. *Chem.* A very soluble salt, $Mg(NO_3)_2 \cdot 6H_2O$, obtained esp. from crude saltpeter. It is used in pyrotechnics.

magnesium oxide. *Chem.* = MAGNESIA, 3 a.

magnesium sulphate. *Chem.* A compound, $MgSO_4$, occurring native as the monohydrate, $MgSO_4.H_2O$ (kieserite), but commonly prepared artificially as the heptahydrate, $MgSO_4.7H_2O$ (Epsom salts). See EPSOM SALTS.

mag'net (măg'nĕt; -nĭt; 119), *n.* [ME. *magnete*, fr. OF. *magnete*, fr. L. *magnes, -etis*, fr. Gr. *Magnētis lithos, Magnēs lithos*, a magnet, metal that looked like silver, prop., stone of *Magnesia*, a district in Thessaly. Cf. MAGNESIA.]

1. A variety or a piece of magnetite or magnetic iron ore, having naturally the property of attracting iron; loadstone; — called also *natural magnet*. Hence, figuratively, something which attracts.

Two *magnets*, heaven and earth, allure to bliss. *Dryden.*

2. Any body having the property of attracting iron; specif., a mass of iron or steel having this property artificially imparted and hence called an ***artificial magnet***; — called also, according to its shape, a ***bar magnet***, a ***horseshoe magnet***, etc. A magnet usually has two poles of opposite nature, situated near its ends. If a magnetized bar or needle (magnetic needle) is so suspended that it may rotate freely around a vertical axis, as a compass needle, the magnet will assume a direction nearly north and south. The end towards the north is called the north end, or north pole; the end towards the south, the south end or south pole. The earth is a magnet whose poles are not far distant from the geographical poles. See 3d POLE, 4. If a second magnetized bar or needle is brought near the first, the unlike poles will attract each other while the like poles will repel each other. When a magnet is broken in two, each part is a magnet; hence, each molecule of a magnetizable body, such as iron, is itself a magnet, and magnetization is essentially the arrangement of the molecular magnets in a practically parallel array. Soft iron may be temporarily converted into a magnet by contact with a magnet, by induction without contact, or by the influence of an electric current (in which case it is called an ***electromagnet***). For methods of producing permanent steel magnets, see DOUBLE TOUCH, SEPARATE TOUCH, SINGLE TOUCH. See FERROMAGNETIC. See also MAGNETIZE.

Horseshoe Magnet.

Electromagnetic Lifting Magnet.

mag'net, *v. t.* To subject to the action of a magnet, as in extracting a magnetic constituent from a pulverized substance.

mag·ne'ta (măg·nē'tȧ), *n.* A magneto.

mag·net'ic (măg·nĕt'ĭk), *adj.* [NL. *magneticus;* cf. F. *magnétique.*] **1. a** Of or pertaining to a substance that becomes magnetized when it is in a magnetic field; as, a *magnetic* needle. A magnetic body is either *diamagnetic*, or *paramagnetic*. **b** Short for *paramagnetic*.

2. Of or pertaining to, or characterized by, the earth's magnetism; as, the *magnetic* meridian.

3. Capable of being magnetized, as a piece of iron.

4. Actuated by magnetic attraction; as, a *magnetic* chuck.

5. Endowed with extraordinary personal attractiveness.

6. Having, susceptible to, or induced by, animal magnetism, so called; as, a *magnetic* sleep. See MAGNETISM, 4.

mag·net'ic (măg·nĕt'ĭk), *n.* **1.** A magnet. *Obs.*

2. A magnetic substance.

mag·net'i·cal (măg·nĕt'ĭ·kăl), *adj.* Magnetic. — **mag·net'i·cal·ly,** *adv.* — **mag·net'i·cal·ness,** *n.*

magnetic amplifier. *Radio.* An amplifier which amplifies by virtue of the magnetic properties of iron.

magnetic amplitude. = AMPLITUDE, 3 **b** (2).

magnetic attraction. See ATTRACTION, *n.*, 5.

magnetic axis. *Physics.* The straight line joining the two poles of a magnet, as the magnetic poles of the earth.

magnetic azimuth. An arc of the horizon, intercepted between the magnetic meridian and the vertical circle passing through the object. Cf. AZIMUTH COMPASS.

magnetic battery. A combination of magnets with the like poles adjacent, so as to act together as one magnet.

magnetic bearing. The bearing by a compass which has no deviation, or the bearing from the magnetic pole.

magnetic blowout. *Elec.* Extinction of the spark or arc when deflected by a magnetic field.

magnetic brake. *Elec.* A friction brake, as in hoisting or elevator equipment, controlled by means of a solenoid.

magnetic bridge. An instrument for measuring magnetic permeability, in principle like Wheatstone's bridge.

magnetic chuck. *Mach.* See 6th CHUCK, 5.

magnetic circuit. A closed path of the magnetic flux.

magnetic clutch. *Mach.* See 2d CLUTCH, 5.

magnetic compass. = COMPASS, *n.*, 8.

magnetic compensator. A contrivance connected with a ship's compass for compensating or neutralizing the effect of the iron of the ship on the needle.

magnetic conductivity. = PERMEABILITY, 3.

magnetic contactor. *Elec.* See CONTACTOR.

magnetic controller. *Elec.* See CONTROLLER, 4.

magnetic creeping. The slow increase of magnetization under constant magnetizing force. See HYSTERESIS **b**.

magnetic curves. Curves indicating lines of magnetic force, as in the arrangement of iron filings between the poles of a powerful magnet.

Magnetic Curves.

magnetic declination *or* **variation.** = DECLINATION, *n.*, 8.

magnetic degree. *Elec.* An electrical degree.

magnetic density. The quantity of magnetism per unit of surface; the number of lines of magnetic force per square centimeter of normal cross section of magnetic field.

magnetic deviation. The deviation of the compass.

magnetic dip. = DIP, *n.*, 19.

magnetic doublet. Two equal and opposite poles a short distance apart. Cf. DOUBLET, *n.*, 6.

magnetic electricity. Magnetoelectricity.

magnetic elements. *Physics.* The magnetic declination, the magnetic dip, and the magnetic intensity.

magnetic equator. The aclinic line. See ACLINIC.

magnetic explorer. An exploring coil.

magnetic field. The portion of space near a magnetic body (or a body carrying a current) in which the magnetic forces due to the body (or current) are sensible.

magnetic figures. The figures formed by magnetic curves.

magnetic fluid. A hypothetical fluid (or either of two such fluids) the existence of which was formerly assumed in description of the phenomena of magnetism.

magnetic flux. The total amount of magnetic induction across or through a given surface. Specif., in a magnetic circuit, the product of the magnetomotive force by the permeance of the circuit. It is measured in maxwells.

magnetic force. a The force of attraction or repulsion experienced by a magnetic pole; specif., the value of the force acting on a pole divided by the value of the strength of the pole. **b** The intensity of this force (***magnetic flux density***).

magnetic friction. a The retarding effect suffered by a magnetizable body in passing through a magnetic field. **b** Magnetic hysteresis.

magnetic hysteresis. = HYSTERESIS **b**.

mag·ne·ti'cian (măg·nĕ·tĭsh'ăn), *n.* A magnetist.

magnetic inclination. = DIP, *n.*, 19.

magnetic induction. See INDUCTION, *n.*, 6.

magnetic intensity. = MAGNETIC FORCE **b**.

magnetic iron, magnetic iron ore. *Mineral.* Magnetite.

magnetic iron oxide. Ferrosoferric oxide.

magnetic lag. The failure of the induced magnetism in a magnetic substance to keep up with the inducing or magnetizing force. Cf. HYSTERESIS **b**.

magnetic latitude. a The amount of dip of the magnetic needle, measured in degrees of arc from the horizontal, and denoted by an isoclinic line. **b** A system of such isoclinic lines, extending from the aclinic line or magnetic equator to both magnetic poles.

magnetic leak *or* **leakage.** The leakage flux.

magnetic limit. The limit of temperature above which a substance cannot be magnetized. For pure iron it is 768° C. (1,414° F.); for cobalt, 1,150° C. (2,102° F.); for nickel, 350° C. (662° F.); for manganese, 15–20° C. (59–68° F.).

magnetic memory. *Physics.* **a** The deviation of a body from normal behavior under magnetization, due to its previous magnetic history. **b** Magnetic retentiveness.

magnetic meridian. A vertical circle coinciding in direction with the horizontal magnetic needle.

magnetic moment. The product of the distance between the poles of a magnet by the strength of either pole. It is assumed that atoms and molecules may have the properties of small magnets, and hence magnetic moments. On the Bohr theory, the magnetic moments of atoms are assumed to be multiples of an elementary unit called the *magneton*.

magnetic needle. A slender bar of magnetized steel which, when suspended so as to be free to turn, either in a horizontal or a vertical direction, or in both, is used to indicate the direction of the earth's magnetism. It constitutes the essential part of a compass.

magnetic north. The direction indicated by the north-seeking pole of the horizontal magnetic needle.

magnetic oxide, magnetic oxide of iron. Ferrosoferric oxide.

magnetic parallel. An isoclinal line.

magnetic permeability. = PERMEABILITY, 3.

magnetic plug. A spark plug containing its own magnetic make-and-break device.

magnetic pole. Either of the poles of a magnet; specif. [*caps.*], either of two spots on the earth's surface, toward which the compass needle points from any direction throughout adjacent regions, and at which the needle dips vertically. These spots are known respectively as the ***North*** (approximately N. lat. 73° 35′, W. long. 92° 20′) and the ***South*** (approximately S. lat. 70°, E. long. 148°) ***Magnetic Pole***. Isogonic lines converge at them (see DECLINATION, 8), and isoclinic lines encircle them (see DIP, *n.*, 19).

magnetic potential. *Elec.* The scalar quantity characteristic of a point in a magnetic field whose negative gradient equals the intensity or strength of the magnetic field. It equals the work required to bring a unit north pole from a point infinitely remote up to the point in question.

magnetic proof plane. An exploring coil.

magnetic pyrites. Pyrrhotite.

magnetic quantum number. *Physics.* A number used to determine the angular momentum of an atom about a line representing the direction of its magnetic field.

magnetic reluctance *or* **resistance.** *Physics.* The resistance offered to the passage of magnetic flux.

magnetic remanence. Residual magnetism.

magnetic resistivity. Specific reluctance.

magnetic retardation. Magnetic lag.

magnetic retentiveness *or* **retentivity.** Power of retaining magnetism after the withdrawal of the magnetizing force.

magnetic rotation. *Physics.* Rotation of the plane of polarized light by transparent substances, due to their situation in a magnetic field. The ***specific magnetic rotation*** is the amount referred to that of water as unity.

mag·net'ics (măg·nĕt'ĭks), *n.* The science of magnetism.

magnetic separator. An apparatus for separating magnetic substances from mixtures by the action of magnets.

magnetic shell. A theoretical sheet or shell composed of magnetic particles, all the north poles of which are on one surface of the sheet and all the south poles on the other.

magnetic shielding. *Elec.* Protection from the action of an external magnetic field.

magnetic speaker. An electromagnetic speaker.

magnetic spectrum. *Physics.* The appearance produced when the cathode rays impinge upon a suitable screen after passing through a magnetic field.

magnetic storm. *Physics.* Any marked disturbance of the earth's magnetic conditions. A connection between sunspots and magnetic disturbances is established.

magnetic surveying. The process of determining local variations in the earth's magnetic field, a means of locating bodies of magnetic ore. — **magnetic survey.**

magnetic susceptibility. = SUSCEPTIBILITY, 3.

magnetic telegraph. A telegraph acting by a magnet.

magnetic telephone. See TELEPHONE, *n.*, 1.

magnetic transition point. The Curie point. See *Curie point*, under CURIE'S LAW.

magnetic tube of force. *Physics.* The space between those magnetic lines of force which pass through adjacent points on the boundary of a specified area located in a magnetic field. Cf. MAGNETIC FLUX.

magnetic twist. A twist produced, as in an iron wire, by changes in magnetization.

magnetic units. See UNIT, *n.*, *List.*

magnetic valve. *Mach.* A valve operated by magnetic attraction.

magnetic vane. Either of a pair of vanes of soft iron, one fixed and the other movable, used in certain electrical measuring instruments operating by magnetic repulsion.

magnetic variation. = DECLINATION, *n.*, 8.

magnetic viscosity. A property of magnetizable substances because of which a certain time is required to produce the maximum effect of a given magnetizing force.

mag·ne·tif'er·ous (măg'nē·tĭf'ĕr·ŭs), *adj.* [L. *magnes, -etis*, magnet + *-ferous.*] Producing or conducting magnetism.

mag·net'i·fy (măg·nĕt'ĭ·fī), *v. t.* [*magnet* + *-fy.*] To magnetize. — **mag·net'i·fi·ca'tion** (-fĭ·kā'shŭn), *n. Both Rare.*

mag·ne·tim'e·ter (măg'nē·tĭm'ē·tĕr), *n.* A magnetometer.

mag'net·ism (măg'nĕ·tĭz'm; -nĭ·tĭz'm), *n.* [NL. *magnetismus;* cf. F. *magnétisme.*] **1.** *Physics.* A property of the molecules of certain substances, as iron in virtue of which they may be magnetized.

2. Power to attract; power to gain the affections.

3. The science which treats of magnetic phenomena.

4. Animal magnetism, or mesmerism.

mag'net·ist (-tĭst), *n.* One versed in magnetism.

mag'net·ite (măg'nĕ·tīt; -nĭ·tĭt), *n.* *Mineral.* An iron oxide (Fe_3O_4), strongly attracted by a magnet and sometimes possessing polarity, being then called *loadstone*. It is an important iron ore. Called also *magnetic iron, magnetic iron ore.* — **mag'net·it'ic** (-tĭt'ĭk), *adj.*

magnetite arc. *Elec.* A flaming arc in which the light-giving vapors, chiefly of titanium and iron, are derived from volatilization of a terminal made of magnetite.

magnetite arc lamp. See ARC LAMP.

mag'net·ite–ba·salt', *n.* *Petrog.* **a** A basalt containing magnetite. **b** A basalt from North Park, Colorado, containing the highest percentage (55) of magnetite yet found in any lava.

mag'net·ite–ol'iv·in·ite, *n.* *Petrog.* A basic differentiation rock at Taberg, Sweden, consisting of titaniferous magnetite and olivine.

mag'net·ite–spi·nel'lite, *n.* *Petrog.* A differentiation rock from Sweden, consisting essentially of titaniferous magnetite and spinel with accessory olivine, pyroxene, pyrrhotite, and apatite.

mag'net·iz'a·ble (măg'nĕ·tĭz'ȧ·b'l; măg'nĭ-), *adj.* Capable of being magnetized. — **mag'net·iz'a·bil'i·ty** (-bĭl'ĭ·tĭ), *n.*

mag'net·i·za'tion (măg'nĕ·tĭ·zā'shŭn; -tĭ·zā'shŭn; măg'-nĭ-), *n.* A magnetizing, or state of being magnetized; also, degree to which a body is magnetized; specif., intensity of magnetic force measured by magnetic moment per unit of volume.

mag'net·ize (măg'nĕ·tīz; -nĭ·tīz), *v.*; -IZED (-ŭzd); -IZ'ING (-tīz'ĭng). *Transitive:* **1.** To communicate magnetic properties to; to convert into a magnet; as, to *magnetize* a needle. According to the theory of J. A. Ewing, now generally accepted, the process of magnetizing a body consists in bringing its molecules (themselves minute magnets) into a uniform arrangement as regards their north and south poles. *Demagnetizing* consists in destroying this arrangement.

2. To attract as a magnet attracts, or like a magnet; to influence uncontrollably, esp. by charming; to captivate.

Fascinated, *magnetized*, as it were, by his character. *Motley.*

3. To bring under the influence of animal magnetism.

—, *Intransitive:* To become magnetized. *Rare.*

mag'net·iz'er (-tīz'ĕr), *n.* One who or that which magnetizes.

mag'net·iz'ing cur'rent (-tīz'ĭng). *Elec.* A current which magnetizes or energizes a magnetic core; exciting current.

magnetizing force. The magnetomotive force.

magnet keeper. See ARMATURE, *n.*, 6.

mag·ne'to- (măg·nē'tō-; măg'nē·tō-). [See MAGNET.] A combining form for *magnetic*, denoting: **a** *Magnetic force*, as in *magnetometer, magnetoscope.* **b** *Pertaining to* or *actuated by magnetism*, as in *magnetoelectric, magnetooptics.* **c** *Magnetoelectric*, as in the following, the meanings of which can be understood from the definitions of their elements:

magnetobell **magnetophonograph** **magnetotelephone**
magnetomachine **magnetotelegraph** **magnetotransmitter**

mag·ne'to (măg·nē'tō), *n.; pl.* -NETOS (-tōz). *Elec.* A magnetoelectric machine; esp., an alternator (*magneto alternator*) with permanent magnets, used to generate the current for the electric ignition in an internal-combustion engine and operated by the engine itself.

Magneto. 1 Permanent Magnet; 2 Pole Pieces; 3 Armature Core; 4 Armature Shaft; 5 Armature Winding, one end of which is in direct connection with the Armature Shaft, the other attached to the Slip Ring (6) which is fastened to and revolves with the Armature Shaft; 7 Collector Brush.

mag·ne'to·chem'is·try (măg·nē'tō·kĕm'ĭs·trĭ; măg·nĕt'ō-), *n.* [*magneto-* + *chemistry.*] That branch of science which deals with the relation of magnetism to chemical phenomena.—**mag·ne'to·chem'i·cal** (-kĕm'ĭ·kăl), *adj.*

mag·ne'to·dy'na·mo (-dī'nə·mō), *n.* A dynamo with permanent field magnets.

mag·ne'to·e·lec'tric (-ē·lĕk'trĭk), *adj.* Also **mag·ne'to·e·lec'tri·cal** (-trĭ·kăl). *Physics.* Pertaining to, or characterized by, electricity developed by magnets; as, *magnetoelectric* induction.

mag·ne'to·e·lec'tric'i·ty (-ē·lĕk'trĭs'ĭ·tĭ), *n.* Electricity developed by means of magnets; also, the science treating of the same.

magnetoelectric machine. A magneto.

mag·ne'to·gen'er·a'tor (-jĕn'ĕr·ā'tĕr), *n.* A magneto alternator.

mag·ne'to·gram (măg·nē'tō·grăm; măg·nĕt'ō-), *n.* [*magneto-* + *-gram.*] *Physics.* An automatic record of magnetic phenomena made by a magnetograph or the like.

mag·ne'to·graph (-grăf), *n.* [*magneto-* + *-graph.*] *Physics.* **a** An automatic instrument for recording, as by photography, states and variations of a terrestrial magnetic element. **b** A magnetogram. — **mag·ne'to·graph'ic** (-grăf'ĭk), *adj.*

mag'net·oid (măg'nĕ·toid; -nĭ·toid), *adj.* [*magnet* + *-oid.*] Resembling a magnet.

mag·ne·tom'e·ter (măg'nĕ·tŏm'ĕ·tĕr), *n.* [*magneto-* + *-meter;* cf. F. *magnétomètre.*] *Physics.* **a** An instrument for measuring the intensity and direction of magnetic forces; also, an instrument for determining any of the terrestrial magnetic elements. Cf. MAGNETOGRAPH. **b** A kind of galvanometer with a heavy magnetic needle.

mag·ne·tom'e·try (-trĭ), *n.* [*magneto-* + *-metry.*] *Physics.* Science of measuring the intensity of magnetic fields and of determining the direction of lines of force; also, use of the magnetometer. — **mag·ne'to·met'ric** (măg·nē'tō·mĕt'rĭk; măg'nĕ·tō-), *adj.* — **·met'ri·cal** (-rĭ·kăl), *adj.* — **mag·ne'to·me'tri·cal·ly,** *adv.*

mag·ne'to·mo'tive (măg·nē'tō·mō'tĭv; măg'nĕ·tō-), *adj.* [*magneto-* + *motive,* adj.] *Elec.* Pertaining to or designating a force (**magnetomotive force**), the cause of a flux of magnetic induction. It is the total of the magnetic potential differences along the entire length of a magnetic line of force; or it is the line integral between two points, or around a circuit, of the intensity of the magnetic field.

mag·ne'to·mo'tor (-mō'tĕr), *n.* [*magneto-* + *motor.*] A voltaic series of large plates, producing low-tension electricity. *Rare.*

mag'ne·ton (măg'nĕ·tŏn), *n.* [NL. See MAGNETIC.] *Physics.* The natural unit of magnetic moment. The *Weiss magneton,* formerly regarded as this natural unit, equals 1123.5 gauss cm. per gram molecule. The *Bohr magneton* equals 5584 gauss cm. per gram molecule; it is the magnetic moment of an electron orbit having an angular momentum equal to that of the spinning electron, or $h/2\pi$ in which h equals Planck's constant. See MAGNETIC MOMENT.

mag·ne'to·op'tics (măg·nē'tō·ŏp'tĭks; măg'nĕ·tō-), *n.* [*magneto-* + *optics.*] A branch of physics dealing with the influence of the magnetic field upon light. Cf. ELECTROOPTICS. — **mag·ne'to·op'tic** (-tĭk), *adj.* — **mag·ne'to·op'ti·cal** (-tĭ·kăl), *adj.*

mag·ne'to·phone (măg·nē'tō·fōn; măg·nĕt'ō-), *n.* [*magneto-* + *-phone.*] *Physics.* An instrument analogous to the siren, in which the undulatory currents generated by the revolution of a perforated disk in the magnetic field are transmitted to a telephone receiver, producing a note the pitch of which is proportional to the velocity of the disk.

mag·ne'to·plum'bite (măg·nē'tō·plŭm'bīt; măg'nĕ·tō-), *n.* [*magneto-* + *plumbum* + *-ite.*] *Mineral.* A double oxide of ferric iron with lead, manganese, and titanium, occurring in acute, black, metallic hexagonal pyramids.

mag·ne'to·print'er (-prĭn'tĕr), *n.* An autographic magnetotelegraph.

mag·ne'to·scope (măg·nē'tō·skōp; măg·nĕt'ō-), *n.* [*magneto-* + *-scope.*] *Physics.* An instrument for detecting magnetic force.

mag·ne'to·stric'tion (măg·nē'tō·strĭk'shŭn; măg'nĕ·tō-), *n.* [*magneto-* + L. *strictio* a drawing together.] *Physics.* A change in the dimensions of a body when magnetized.

mag'ne·tron (măg'nĕ·trŏn), *n.* [*magnet* + *electron.*] A vacuum tube containing an anode and a heated cathode, the flow of electrons from cathode to anode being controlled by an externally applied magnetic field. It is widely used for generating powerful electromagnetic waves of very high frequency.

magni-. A combining form, Latin *magni-,* from *magnus,* meaning *big, great;* — used either in praise or in deprecation, as in *magni*ficent, *magni*loquent; **mag·nip'o·tence, mag·nip'o·tent, mag·nis'o·nant** (see -POTENT, etc.). Specif., *Zool.,* *long,* as in **mag'ni·cau'date, mag'ni·cau·da'tous, mag'ni·ros'trate.** See -CAUDATE, etc.

mag·nif'ic (măg·nĭf'ĭk), *adj* Also **mag·nif'i·cal** (-ĭ·kăl). F. *magnifique,* fr. L. *magnificus.* See MAGNIFICENT.] **1.** Renowned; illustrious. *Obs.*
2. Magnificent; sublime. "Thy *magnific* deeds." *Milton.*
3. Intended to impress; grandiloquent; high-sounding; also, intended to extol; honorific; eulogistic.
4. Royally generous; munificent. *Obs.*
— **mag·nif'i·cal·ly,** *adv.*

Mag·nif'i·cat (-ĭ·kăt), *n.* [L., it magnifies.] **1. a** The Latin version of the song of the Virgin Mary, Luke i. 46–55, "My soul doth magnify the Lord." **b** This canticle or a musical setting of it, esp. as part of the office of Vespers, or Evensong.
2. [*not cap.*] Hence, a song or rhapsody of praise.

mag·nif'i·cate (-kāt), *v. t.* [L. *magnificatus,* past part. of *magnificare.*] To magnify. *Obs.*

mag'ni·fi·ca'tion (măg'nĭ·fĭ·kā'shŭn), *n.* A magnifying, or state of being magnified; specif.: **a** Laudation; exaltation, as by praise. **b** The apparent enlargement of an object by an optical instrument; magnifying power. In *angular magnification* it is equal to the ratio of the angle made with the axis by an emerging ray to the angle made with the axis by the incident ray which produces the former.

mag·nif'i·ca'tive (măg·nĭf'ĭ·kā'tĭv), *adj.* Tending to magnify.

mag·nif'ice (măg'nĭ·fĭs), *n.* Magnificence. *Rare.*

mag·nif'i·cence (măg·nĭf'ĭ·sĕns; -s'ns), *n.* [OF., fr. L. *magnificentia,* fr. *magnificus* magnificent, fr. *magnus* great + *facere* to make. See MAGNITUDE; FACT.] **1.** In medieval ethics, the virtue of unostentatious liberality in expenditure; hence: *Obs.* **a** Munificence. **b** Glory.
2. Splendor of physical surroundings or richness in sensuous qualities; also, grandeur; spectacular beauty.
3. A title applied to rulers and to high officers, as to the rector, prorector, and chancellor of a German university.
4. Something, as a ceremony, marked by splendor. *Obs.*

mag·nif'i·cent (-sĕnt; -s'nt), *adj.* [OF. See MAGNIFICENCE.] **1.** Great in deed, or exalted in place; characterized by admirable or splendid achievements; — now used only as an epithet applied to former famous rulers; as, Sultan Solyman the *Magnificent;* Lorenzo [de' Medici] the *Magnificent.*
2. Liberal or lavish in expenditure; munificent. *Rare.*
3. Characterized by sensuous splendor or sumptuous adornment; imposing; brilliant; also, characterized by grandeur, stateliness, or majestic beauty; as, a *magnificent* palace, panorama, court. **b** As applied to ideas, language, etc.: Impressing the imagination; exalted; noble. **c** *Colloq.* Impressive in display; striking.
Syn. — Sublime; splendid, sumptuous, lavish. See GRAND.
Ant. — Mean, despicable; simple, unostentatious.
— **mag·nif'i·cent·ly,** *adv.* — **mag·nif'i·cent·ness,** *n.*

mag·nif'i·cent, *n.* One who is magnificent.

mag·nif'i·co (măg·nĭf'ĭ·kō), *n.; pl.* -COES (-kōz). [It., magnific.] **1.** An honorary designation or title denoting a grandee or nobleman of Venice.
2. Any person of high position or grand appearance.

mag'ni·fi'er (măg'nĭ·fī'ĕr), *n.* One who or that which magnifies; specif., a lens or combination of lenses.

‖**ma'gni'fique'** (mȧ'nyē'fēk'), *adj.* [F., magnific.] Magnificent.

mag'ni·fy (măg'nĭ·fī), *v.;* -FIED (-fīd); -FY'ING (-fī'ĭng). [OF. and L.; OF. *magnifier,* fr. L. *magnificare.* See MAGNIFICENCE.] *Transitive:* **1.** *Archaic.* **a** To praise highly; to laud; extol. **b** To increase the importance of; to cause to be held in greater esteem or respect.

On that day the Lord *magnified* Joshua. *Joshua* iv. 14.

2. To make greater; to enlarge, either in fact or in appearance; as, the microscope *magnified* the object 100 diameters.
3. To exaggerate; as, to *magnify* a loss or a difficulty.
—, *Intransitive:* **1.** To have the power of causing objects to appear larger than they are; to increase the apparent dimensions of objects.
2. To have effect; to be of importance. *Obs. exc. Dial.*
Syn. — Exalt, glorify, praise; increase; overstate.
Ant. — Lower, debase; lessen; minimize. See DECRY.

magnify oneself against. *Bib.* To oppose with pride.

mag'ni·fy'ing glass (-fī'ĭng). A lens which magnifies the apparent dimensions of objects seen through it.

magnifying power. = MAGNIFICATION **b.**

mag·nil'o·quence (măg·nĭl'ō·kwĕns), *n.* [L. *magniloquentia.*] Quality of being magniloquent; grandiloquence.

mag·nil'o·quent (-kwĕnt), *adj.* [L. *magnus* great + *loquens, -entis,* pres. part. of *loqui* to speak; cf. L. *magniloquus.* See MAGNITUDE; LOQUACIOUS.] Speaking pompously; bombastic; grandiloquent. — **mag·nil'o·quent·ly,** *adv.*
Syn. and **Ant.** — See TURGID.

mag'ni·tude (măg'nĭ·tūd), *n.* [L. *magnitudo,* fr. *magnus* great. See MASTER; cf. MAGNATE, MAXIM.] **1.** Greatness; as: **a** Physical greatness; extent; bigness. **b** *Obs.* Greatness of character, position, fame; nobility; grandeur.

Plain, heroic *magnitude* of mind. *Milton.*

c Greatness, in reference to influence or effect.

The *magnitude* of his designs. *Bp. Horsley.*

2. a Size; extension; spatial quality. **b** Quantity; capability of being greater or less; also, a quantity, extent, or number.
3. *Astron.* A degree of brightness of a celestial body, esp. of a fixed star; also, a number expressing brightness. The brightest stars are represented by the lowest (even zero) numbers; thus, the brightest celestial body, the sun, is of —26.7 stellar magnitude; Sirius, a very bright star, is —1.6. The decimal magnitudes from —1.4 to 1.5 correspond to the former designation *first magnitude;* 1.6 to 2.5 to *second magnitude,* and so on. Only stars of the sixth magnitude and brighter are visible to the naked eye.
4. *Math.* A number assigned to a quantity, according to some stated rule, by means of which the quantity may be compared with other quantities of the same class.
Syn. — See SIZE.

Its theme is the struggle of two families, the *Pandavas* and their cousins, the *Kauravas,* for possession of a kingdom in northern India, the capital of which was near the modern Delhi. The Pandavas are five brothers: *Yudhishthira,* characterized by firmness and integrity; *Bhima,* of huge bodily strength, coarse appetites, and fiery temper; *Arjuna,* brave, generous, and chivalric, the chief hero of the poem; and the twins, *Nakula* and *Sahadeva,* less prominent in the narrative. The Kauravas are the hundred sons of the uncle of the Pandavas, the blind king *Dhritarashtra,* the leader among them being *Duryodhana,* bold, crafty, and vindictive. At a public trial of strength, *Draupadi,* a princess, is won by Arjuna against the Kauravas and all other competitors, and becomes the wife of all five Pandavas. The Kauravas in a gambling match cheat their cousins of the kingdom and drive them into exile. After thirteen years, in a great war, the Pandavas overthrow the Kauravas, but in remorse, abdicate and set out for Indra's heaven, all falling by the way excepting Yudhishthira, who arrives there, to find his brothers and Draupadi awaiting him. A mass of speculative, social, and ethical discourse (cf. BHAGAVADGITA) is introduced. The poem dates from the centuries just preceding the Christian Era, while the event it celebrates is placed by scholars in the 12th century B.C.

6. To amount to; to form the essential being of; to be sufficient to constitute; as, one swallow does not *make* a summer.

7. Hence, to develop into; as, he *makes* a good business man; she will *make* a good wife.

8. To be, or to be capable of being, changed or fashioned into; to furnish the material for; as, wool *makes* warm clothing. "An old cloak *makes* a new jerkin." *Shak.*

II. To form mentally or ideally, or to create as an expression or a result of thought.

9. **a** To frame or formulate in the mind; as, to *make* a judgment or a choice; hence, to compose; as, to *make* a poem or an opera. **b** To produce, as something artificial or false; as, to *make* an errand; to *make* up a story.

10. To view or think; to treat in thought or feeling; hence, to act in harmony with mental or emotional regard; — in various special phrases with *of;* as, to *make* little, or light, of a difficulty; to *make* a virtue of necessity; not to know what to *make* of the news. (This use probably derives part of its meaning from the sense in which *make* signifies to "act," "behave." Cf. def. 20 and *Note.*)

Makes she no more of me than of a slave. *Dryden.*

11. To compute to be; to find as a result of calculation; as, he *made* the weight about fifty pounds; Egyptologists *make* the beginning of the historic era about 4700 B.C.

12. To amount to, in reason or significance; to form or constitute in reason; to signify; as, that the means *makes* no matter if the result be good, is a Machiavellian principle.

The policy of that purpose *made* more in the marriage than the love of the parties. *Shak.*

13. To form as a result of calculation, observation, or design; as, to *make* plans for a house; to *make* a diagram, a map, or a table of statistics.

14. To regard or consider as being.

malarial fever. = MALARIA, 3.

malarial mosquito. Any mosquito of the genus *Anopheles* (which see) or of the subfamily Anophelinae.

malaria parasite. Any of several minute protozoans of the genus *Plasmodium* which in their adult condition live in the tissues of mosquitoes of the genus *Anopheles* (which see) and when transferred to the blood of man, by the bite of the mosquito, produce malaria. The young parasites, or ***sporozoites***, enter the red blood corpuscles and free in the blood plasma an immense number of small spores called ***merozoites***. An indefinite number of such generations may follow, but if meanwhile the host is bitten by a mosquito, the parasites develop into gametes in the stomach of the insect. These conjugate, the zygote thus produced divides, forming spores, and eventually sporozoites, which, penetrating to the salivary glands of the mosquito, may be introduced into a new host. The attacks of the disease coincide with the dissolution of the corpuscles and liberation of the spores and products of growth of the parasites into the blood plasma. Several species of the parasite are distinguished, as *P. vivax*, producing tertian malaria; *P. malariae*, producing quartan malaria; and *P.* (subgenus *Laverania*) *falciparum*, producing estivo-autumnal fever.

Malaria Parasites. 1, 2, 4 Flagellated Forms, 1 of Tertian, 2 of Quartan, and 4 of Estivo-autumnal Fever; 3 Crescents. (After Thayer and Hewetson.)

8. *Pros.* Masculine; — of rhyme.
Syn. — MALE, MASCULINE, MANLY, MANNISH, MANLIKE, MANFUL, VIRILE. MALE (opposed to *female*) applies to animals and plants as well as to human beings, and always suggests sex; MASCULINE (opposed to *feminine*) denotes that (esp. strength, vigor, and the like) which belongs to or is characteristic of men, and frequently suggests gender rather than sex; as, "a *male* tiger" (*Shak.*); "a *male* tree" (*Gilbert White*); "*male* children" (*Josh.* xvii. 2); a *male* choir; "His poetry is *masculine*, plain, concentrated, and energetic" (*Landor*); a *masculine* noun. MANLY (often opposed to *boyish, childish*) commonly suggests a man's finer qualities, esp. courage, frankness, independence; as, "His big *manly* voice turning again toward childish treble" (*Shak.*); "What more *manly* exercise than hunting?" (*Walton*). MANLIKE is more apt to suggest characteristically masculine qualities or (esp.) foibles; as, *manlike* bluntness. MANNISH (compare the implications of *womanish, childish*) is a term of contempt; as compared with the corresponding use of *masculine*, it expresses affected rather than natural qualities; as, "a woman impudent and *mannish* grown" (*Shak.*); a *mannish* costume. MANFUL implies esp. bravery or resolution; as, a *manful* struggle, a *manful* effort to gain self-control. VIRILE (a stronger word than *masculine*) suggests the qualities belonging to fully developed manhood; as, "Ye chiefly, *virile* both to think and feel, deep-chested Chapman and firm-footed Ben" (*Lowell*); a *virile* style.
Ant. — See FEMALE.

Mal·pigh'i·a (măl·pĭg'ĭ·ă), *n.* [NL. See MALPIGHIAN.] *Bot.* A genus of tropical American shrubs and trees, family Malpighiaceae. *M. obovata* is the jiqui.

Mal·pigh'i·a'ce·ae (-ā'sē·ē), *n. pl.* [NL.] *Bot.* A family of tropical herbs, shrubs, or trees (order Geraniales), having opposite leaves and yellow or red flowers. — **mal·pigh'i·a'ceous** (-shŭs), *adj.*

Mal·pigh'i·an (măl·pĭg'ĭ·ăn), *adj.* Of, pert. to, or discovered by, Marcello Malpighi (1628–94), Italian anatomist.

Malpighian body. *Anat.* A Malpighian corpuscle.

Malpighian capsule. = BOWMAN'S CAPSULE. See KIDNEY, 1.

Malpighian corpuscle. *Anat.* **a** A kidney corpuscle. See KIDNEY, 1. **b** Any of the small masses of adenoid tissue formed around the branches of the splenic artery in the spleen.

Malpighian layer. *Anat.* The deeper portion of the epidermis, consisting of cells whose protoplasm has not yet changed into horny material. See SKIN, *Illust.*

Malpighian pyramid. *Anat.* Any of the conical masses (in man 8 to 18 in number) forming the medullary substance of the kidney and projecting as papillae into the renal pelvis. They are composed of bundles of straight uriniferous tubes which open at the apex of the pyramid.

Malpighian tubes *or* **vessels.** *Zool.* Tubular glands opening into the posterior portion of the alimentary canal in nearly all insects and supposed to function as urinary organs. Similar organs are found in certain myriapods, arachnids, etc.

Malpighian tuft. *Anat.* See KIDNEY, 1.

mal·posed' (măl·pōzd'), *adj.* [*mal-* + *pose,* v.] Misplaced.

mal'po·si'tion (măl'pō·zĭsh'ŭn), *n.* Wrong or faulty position, as of the fetus; misplacement.

mal'prac'tice (măl'prăk'tĭs), *n.* The treatment of a case by a surgeon or physician in a manner contrary to accepted rules and with injurious results to the patient; hence, any professional misconduct or any unreasonable lack of skill or fidelity in the performance of professional or fiduciary duties. — **mal'prac·ti'tion·er** (măl'prăk·tĭsh'ŭn·ĕr), *n.*

mal·prax'is (măl·prăk'sĭs), *n.* [NL., fr. *mal-* + *praxis.*] Malpractice.

mal·pres'en·ta'tion (-prĕz'ĕn·tā'shŭn; -prē'zĕn-), *n.* *Obstetrics.* Abnormal presentation of the fetus. See PRESENTATION, 6.

mal'pro·pri'e·ty (măl'prō·prī'ĕ·tĭ), *n.* [*mal-* + *propriety.*] Disorderliness.

malt (môlt; mŏlt), *n.* [AS. *mealt;* akin to D. *mout,* G. *malz,* ON. *malt,* and E. MELT.] **1.** A material consisting of grain, generally barley, that has been softened by steeping in water and allowed to germinate. At this stage it is called *green malt;* this is usually dried in a kiln and sometimes roasted like coffee. Germination develops the enzyme diastase, which is capable of saccharifying the starch of the malt and also that of raw grain mixed with it; hence, malt is essential in brewing and distilling. See DIASTASE **b.** Its large carbohydrate and protein content is responsible for its use as a nutrient, esp. in wasting diseases, as tuberculosis, cholera infantum, etc.
2. Malt liquor; beer. *Colloq.*

malt, *adj.* Relating to, containing, or made with, malt.

malt, *v.;* MALT'ED; MALT'ING. *Transitive:* **1.** To convert into malt, or maltlike material; as, to *malt* barley.

Ma·mil'i·us (mȧ·mĭl'ĭ·ŭs; -yŭs; 159), *n.* In Shakespeare's *Winter's Tale,* the young prince taken from his mother by the jealous Leontes. See HERMIONE, 3.

mam'lat·dar' (măm'lȧt·där'), *n.* Also **mam'lut·dar'.** [Marathi *māmlatdār,* fr. Per. *mu'āmalatdār,* fr. Ar. *mu'āmalah* business + Per. *-dār* holder, holding.] In the Bombay Presidency, a native civil officer in charge of a taluk.

mam'ma (mä'mȧ; mȧ·mä'; *cf.* MAMA), *n.* Also **ma'ma.** [Reduplicated from the infantine word *ma,* influenced in spelling by L. *mamma* breast; cf. F. *maman,* L. *mamma* mother, Gr. *mammē.*] Mother; — now usually a child's word. "Tell tales to papa and *mamma.*" *Swift.*

mam'ma (măm'ȧ), *n.; pl.* -MAE (-ē). [L., breast, prob. identical with L. *mamma* mother; or perh. akin to Gr. *mastos, mazos,* breast, L. *madere* to be moist, drip, flow. See MEAT.] *Anat. & Zool.* A glandular organ for secreting milk, characteristic of all mammals, but normally rudimentary in the male; a mammary gland and its accessory parts.

mam'mal (-ăl), *n.* [See MAMMALIA.] One of the Mammalia.

mam·mal'gi·a (mȧ·măl'jĭ·ȧ), *n.* [NL., fr. L. *mamma* breast + *-algia.*] *Med.* Pain in the breast.

Mam·ma'li·a (mȧ·mā'lĭ·ȧ; 159), *n. pl.* [NL., fr. LL. *mammalis* of the breast, fr. *mamma* breast.] *Zool.* The highest class of vertebrates, including man and all other animals that nourish their young with milk. The Mammalia are warm-blooded, and (except the monotremes) viviparous; their embryos develop an amnion and allantois. Characters peculiar to the class are: the skin more or less covered with hairs of peculiar structure (see HAIR, *n.,* 2), though these are almost wanting in cetaceans; mammary glands; the mandible articulating directly with the squamosal; the ankle joint when present crurotarsal; a chain of small separate ear bones; brain with four optic lobes; a muscular diaphragm separating the heart and lungs from the abdominal cavity; a left aortic arch only; and red blood corpuscles without nuclei (except in the fetus). Although most mammals are terrestrial or arboreal, many are aquatic, as whales, seals, and manatees, and others (the bats) are aerial. The earliest undoubted mammalian remains are Jurassic; in the Tertiary they were especially abundant. They are commonly divided into the subclasses: (1) PROTOTHERIA, containing the Monotremata and extinct Allotheria. (2) EUTHERIA, containing the Marsupialia and all the remaining orders. (By some, the Marsupialia are ranked as a separate subclass, METATHERIA).

mam·ma'li·an (-ăn), *n.* One of the Mammalia.

mam·ma'li·an (-ăn), *adj.* Of or pertaining to, or characteristic of, the Mammalia, or mammals; belonging to the Mammalia.

mam'ma·lif'er·ous (măm'ȧ·lĭf'ĕr·ŭs), *adj.* [*mammal* + *-iferous.*] *Geol.* Containing mammalian remains.

mam·mal'i·ty (mȧ·măl'ĭ·tĭ), *n.* Quality or state of being mammalian.

mam·mal'o·gy (mȧ·măl'ŏ·jĭ), *n.* [*Mammalia* + *-logy,* after F. *mammalogie.*] The branch of zoology which deals with mammals. — **mam'ma·log'i·cal** (măm'ȧ·lŏj'ĭ·kăl), *adj.* — **mam·mal'o·gist** (mȧ·măl'ŏ·jĭst), *n.*

mam'ma·ry (măm'ȧ·rĭ), *adj. Anat.* Of or pertaining to the mammae, or breasts.

mammary artery. *Anat.* See INTERNAL MAMMARY ARTERY.

mammary gland. *Anat. & Zool.* One of the two or more large compound glands, characteristic of the Mammalia, which, in the female, secrete milk for the nourishment of the young. They are regarded as highly specialized sebaceous glands, and are always situated on the ventral aspect of the body, varying in number from two to twenty-two. In monotremes they are without nipples.

mammary pouch. The marsupium of a monotreme as distinguished from that of a marsupial.

mammary vein. See INTERNAL MAMMARY VEIN.

mam'mate (măm'ăt), *adj.* Having mammae.

mam·ma'to-cu'mu·lus (mȧ·mā'tō·kū'mū·lŭs), *n. Meteorol.* A cumulus cloud mammillated below. It indicates rain.

Mam·me'a (mȧ·mē'ȧ), *n.* [NL., fr. Sp. *mamey.* See MAMMEE.] *Bot.* A genus of American and Asiatic trees (family Clusiaceae) having a valvate 2-parted calyx and 2–4-celled ovary becoming a large drupaceous fruit. *M. americana* is the mammee (see MAMMEE **a**), sometimes called *tropical apricot,* cultivated in the West Indies for its large, sweet, yellow fruit.

mam'mee (măm'ē; mȧ·mē'), *n.* Also **ma·mey'** (mȧ·mā'). [Sp. *mamey,* fr. Taíno *mamey.* Cf. 12. A term of familiar address often implying authority, impatience, or contempt; as, Come, *man,* we must go; my good *man,* what are you doing?
13. One possessing in a high degree the distinctive qualities of manhood; one having manly excellence.

Nature might stand up
And say to all the world "This was a *man!*" *Shak.*

14. A person of consequence or position; as, to make one a *man* forever; — often in the phrase *a man or a mouse.*
15. A conical heap of stones set up on a mountain top; the mountain top itself; as, Scafell *Man.* *Local, Eng.*
16. The obverse of a coin; — so called in tossing. *Eng.*

III. Technical senses:
17. *Anthropol.* An individual of the genus *Homo.* Man is the highest type of animal existing or known to have existed, but differs from other animals more in his extraordinary mental development than in anatomical structure. Man belongs in the class Mammalia, and a separate family, the Hominidae, though the older zoologists regarded him as constituting a separate order (Bimana). He doubtless originated in the Eastern Hemisphere. The main structural characters distinguishing man are: his completely erect posture and gait, from which follow the modification of the feet for walking instead of prehension (the hallux or great toe being nonapposable) and the greater development of certain muscles (as the gluteus maximus and those of the calf) which hold the body erect; the shortness of the arms and the size and perfect apposability of the thumb; the

scarcity of hair on most parts of the body; the distinctness of the chin; the comparatively uniform size and even arrangement of the teeth; and, most of all, the enormous development of the brain, esp. of the cerebrum, and the smooth rounded skull and high facial angle. Man alone has the power of articulate speech, and largely by reason of this power the capacity of abstract reasoning. Only one human species, *Homo sapiens,* is generally recognized. Some anthropologists, however, consider the extinct *Neanderthal man* of western Europe as a separate species (*Homo neanderthalensis*) intermediate between the *Java man* (or *Pithecanthropus,* a distinct genus) and existing races. Cf. PILTDOWN MAN, PEKING MAN, PITHECANTHROPUS. According to Linnaeus, *Homo sapiens* comprises four varieties or primary races, the European, Asiatic, African, and American. Blumenbach (1752–1840) distinguished five, Caucasian, Mongolian, Ethiopian, American, and Malay, and this classification is largely followed today, although the number is often reduced to four, corresponding to those of Linnaeus, or, following De Quatrefages, to three (the Malay and American being treated as of mixed origin, chiefly Mongolic). The number of secondary races varies according to the system of classification. The chief physical traits by which different races are distinguished are the color of the skin, the form of the hair, and the shape of the skull, especially with reference to the cranial and gnathic indices. Of these traits the form of the hair is seemingly the most constant, and classifications of the human species on this trait as fundamental have been made by Haeckel, Huxley, Broca, and F. Müller (see HAIR, *n.,* 2). See AGE, *n.,* 7; AMERICAN, *adj.,* 3 (cf. INDIAN, *n.,* 5); CAUCASIAN, *adj.,* 3; ETHIOPIAN, *adj.,* 4; MONGOLIAN, *adj.,* 2; MALAY, *n.,* 1 & 2; 1st LANGUAGE.
18. *Christian Science.* The compound idea of infinite Spirit; the spiritual image and likeness of God; the full representation of Mind. *Mary Baker Eddy.*
19. *Feudalism.* A vassal or liege man. See HOMAGE, 1.

The vassal, or tenant, kneeling, ungirt, uncovered, and holding up his hands between those of his lord, professed that he did become his *man* from that day forth. *Blackstone.*

man'ga·bei'ra (măng'gȧ·bā'rȧ), *n.* [Pg., fr. Tupi *mangaba.*] A Brazilian vine (*Hancornia speciosa*), family Apocynaceae, having a milky juice which yields a rubber, *mangabeira* (or *Pernambuco*) *rubber.*
man'ga·bey (măng'gȧ·bā; -bĭ), **man'ga·by** (-bĭ), *n.* [From *Mangaby*, in Madagascar.] Any monkey of the genus *Cercocebus.*
man'gan·ap'a·tite (măng'găn·ăp'ȧ·tīt), *n.* A dark bluish-green variety of apatite containing manganese.
man'ga·nate (măng'gȧ·nāt), *n. Chem.* A salt of manganic acid, variously obtained as green masses by fusion of manganese dioxide with alkalies, oxides, or carbonates.
man'gan·blende' (măng'găn·blĕnd'), *n.* Alabandite.
man'gan·bruc'ite (-brōōs'īt), *n. Mineral.* A manganiferous variety of brucite.
man'gan·ei'sen (măng'gȧn·ī'zĕn), *n.* [G., fr. *mangan* manganese + *eisen* iron.] *Metal.* Any alloy of manganese and iron. See SPIEGELEISEN.
man'ga·nese (măng'gȧ·nēs; -nēz; 277), *n.* [F. *manganèse*, fr. It. *manganese*, corrupt. fr. ML. *magnesia.* See MAGNESIA.] **1.** A black oxide of the metal described below (def. 2), esp. pyrolusite; — called specif. *black manganese.* Also, *Now Rare*, any of various ores of the metal; as, gray *manganese;* red *manganese.*
2. A grayish-white metal with reddish tinge, soft when pure but ordinarily hard and brittle, resembling iron but not magnetic. Symbol, *Mn;* at. no., 25; at. wt., 54.93; sp. gr., 7.2. Metallic manganese is not found in nature, except alloyed in meteoric iron, but compounds of it are rather widely distributed, as the minerals pyrolusite, braunite, hausmannite, manganite, psilomelane and wad, alabandite, rhodochrosite, rhodonite, etc. The metal is best prepared by igniting one of its oxides with aluminum. Chemically, manganese is of diverse character, varying in valence from two to seven and forming manganous and manganic compounds, manganites, manganates, permanganates, etc. Compounds of manganese are used in the manufacture of glass, pigments, etc., in calico dyeing and printing, in dry cells and as oxidizing agents, but most of the ore is used to make spiegeleisen and ferromanganese.
manganese bronze. *Metal.* Properly, bronze containing manganese, a common proportion being, copper 88, tin 10, manganese 2; also, a brass that has been deoxidized with manganese and that contains 1 or 2 per cent of manganese, but no tin.
manganese brown. **a** A natural or artificial brown oxide or hydroxide of manganese, used as a pigment. **b** *Dyeing.* A brown manganese oxide produced on the fiber; also, its color. **c** The color sherry brown.
manganese dioxide. *Chem.* A dark-brown or iron-black substance, MnO_2, occurring native as pyrolusite, and prepared artificially by heating manganous nitrate and by various precipitation methods. See PYROLUSITE.
manganese epidote. Piedmontite.
manganese heptoxide. *Chem.* A compound, Mn_2O_7, obtained as a dark reddish-brown explosive oil by action of concentrated sulphuric acid on permanganates.
manganese oxide. *Chem.* Any oxide of manganese; specif., manganese dioxide.
manganese sesquioxide. *Chem.* A compound, Mn_2O_3, occurring native as braunite, and obtained as a black powder by gentle heating of manganese oxides and hydroxides in air; — called also *manganic oxide.*
manganese spar. a Rhodonite. **b** Rhodochrosite.
manganese steel. Cast steel containing 12 to 14 per cent of manganese, which causes it to become very hard without becoming brittle.
manganese sulphate. *Chem.* **a** Ordinarily, a pink crystalline salt, $MnSO_4$, made from manganese dioxide and sulphuric acid, and used chiefly in calico printing. **b** A green salt, $Mn_2(SO_4)_3$.

manganic oxide. *Chem.* = MANGANESE SESQUIOXIDE.
manganic sulphate. *Chem.* = MANGANESE SULPHATE **b.**
man'ga-nif'er-ous (măng'gȧ-nĭf'ĕr-ŭs), *adj.* [*manganese* + *-ferous.*] Containing manganese.
man'ga-nite (măng'gȧ-nīt), *n.* [*manganese* + *-ite.*] **1.** *Mineral.* An ore of manganese, the hydrous oxide MnO(OH), in brilliant steel-gray or iron-black orthorhombic crystals, or massive; — called also *gray manganese ore.* **2.** *Chem.* Any of various salts derived from certain hydroxides of manganese related to the dioxide, and regarded as acids (*manganous acids*); as, calcium *manganite,* $CaMnO_3$.
man-ga'ni-um (măng-gā'nĭ-ŭm), *n.* [NL.] Manganese. *R.*
man'ga-nize (măng'gȧ-nīz), *v. t.;* -NIZED (-nīzd); -NIZ'ING (-nīz'ĭng). To alloy with manganese; as, *manganized* steel.
man'ga-no- (măng'gȧ-nō-). a *Mineral.* A combining form for *manganese,* meaning a *variety containing manganese.* **b** *Chem.* A combining form for *manganous.*
man'ga-no-cal'cite (măng'gȧ-nō-kăl'sīt), *n. Mineral.* A variety of rhodochrosite containing calcium carbonate.
man'ga-no-co-lum'bite (-kō-lŭm'bīt), *n. Mineral.* A manganiferous variety of columbite.
man'ga-no-man-gan'ic ox'ide (-măn-găn'ĭk). *Chem.* See MANGANESE TETROXIDE.
man'ga-no-phyl'lite (-fĭl'īt), *n. Mineral.* A manganiferous biotite.
man'ga-no-sid'er-ite (-sĭd'ĕr-īt), *n. Mineral.* A variety of rhodochrosite containing much siderite.
man'ga-no'site (măng'gȧ-nō'sīt; măn-găn'ō-sīt), *n.* [See MANGANOUS.] *Mineral.* Native manganous oxide, MnO, occurring in small emerald-green octahedrons, which turn black on exposure. H., 5–6. Sp. gr., 5.18.
man'ga-no-stib'i-ite (măng'gȧ-nō-stĭb'ĭ-īt), *n. Mineral.* A basic manganese antimonate and arsenate found in black embedded grains.
man'ga-no-tan'ta-lite (măng'gȧ-nō-tăn'tȧ-līt), *n. Mineral.* A manganiferous variety of tantalite.
man'ga-nous (măng'gȧ-nŭs; măn-găn'ŭs), *adj. Chem.* Of, pert. to, or designating, those compounds of manganese in which the element has a lower valence as contrasted with *manganic* compounds; as, *manganous* oxide, MnO.
manganous acid. *Chem.* See MANGANITE, **2.**
manganous hydroxide. A compound, $Mn(OH)_2$, obtained as a white precipitate by adding caustic alkali to a solution of a manganous salt. It rapidly oxidizes in contact with air, forming *manganic hydroxide,* $Mn(OH)_3$.
manganous oxide. A compound, MnO, obtained as a green, easily oxidizable powder by heating other oxides of manganese in a current of hydrogen.
manganous sulphate. *Chem.* = MANGANESE SULPHATE **a.**
manganous sulphide. A compound, MnS, occurring native as alabandite, and obtained artificially as an easily oxidizable, flesh-colored precipitate.
man'gan-pec'to-lite (măng'găn-pĕk'tō-līt), *n.* [*manganese* + *pectolite.*] A manganiferous variety of pectolite.
Man'gar (mŭng'gär), *n.* A Nepalese tribe which furnishes many soldiers to the Gurkha regiments of the British Indian army; also, their language. See INDO-CHINESE LANGUAGES, *Table.*
Mang-bat'tu (măng-bät'ōō), *n.* Also **Mang-bet'tu** (-bĕt'ōō). A Negro of a once powerful tribe dwelling about the headwaters of the Uele.
mange (mānj), *n.* [ME. *manjeve,* fr. OF. *manjue, mangeue,* itching, eating, fr. *manjuer, mangier* (F. *manger*) to eat. See MANGER; cf. MANGY.] Any of various forms of more or less severe, persistent, and contagious skin disease affecting domestic animals and sometimes man, esp. those caused by minute parasitic mites of *Sarcoptes, Psoroptes, Chorioptes,* or allied genera which burrow in, or live on, the skin, and *Demodex,* which lives in the hair follicles or sebaceous glands. Cf. SCAB, TEXAS ITCH.
mange, *adj.* Mangy. *Obs.*
mange, *v. t.* [OF. *mangier.* See MANGE, *n.*] To eat. *Obs.* — *n.* A meal; a kind of fodder. *Obs.*
man'ge-a'o (măn'gȧ-ä'ō), *n.* [Maori.] A New Zealand timber tree (*Litsea calicaris*), having tough hard wood.
man'gel (măng'g'l), *n.* [See MANGEL-WURZEL.] Any variety of beet; specif., the mangel-wurzel. *Eng.*
man'ge-lin (măn'jĕ-lĭn), *n. sing. & pl.* [From Pg. *mangelins,* pl. of *mangelim,* fr. Telugu *mañjāḷi,* fr. Skr. *majjāṭikā.*] See WEIGHT, *Table.*
man'gel-wur'zel (măng'g'l-wûr'z'l), *n.* Also **man'gel.** [G., corrupt. fr. *mangoldwurzel,* fr. *mangold* beet + *wurzel* root.] **a** A large coarse kind of beet (*Beta vulgaris macrorhiza*) extensively grown, esp. in Europe, as food for cattle. **b** The fleshy so-called root of this plant, consisting of enlarged hypocotyl and root. It is less rich in sugar than either the common beet or the sugar beet.
mange mite (mānj). Any of the small parasitic mites that infest the skin of animals, causing mange.
man'ger (mān'jĕr), *n.* [OF. *mangier* to eat, inf. used as n.] A meal; a banquet; also, a prepared food or dish. *Obs.*
man'ger (mān'jĕr; 140), *n.* [OF. *maingeure* (F. *mangeoire*), fr. (assumed) VL. *manducatoria,* fr. L. *manducare* to eat, chew (whence F. *manger* to eat), fr. *mandere.* See MANDIBLE; cf. MANDUCATE, MANGE.] **1.** A trough or open box in which fodder is placed for horses or cattle to eat. Often figurative.

Mange Mite of Cattle. Much enlarged.

mar'riage (măr'ĭj), *n.* [ME. *mariage,* fr. OF. *mariage,* fr. *marier* to marry, fr. L. *maritare.* See MARRY, *v.*] **1.** State of being married, or being united to a person or persons of the opposite sex as husband or wife; also, the mutual relation of husband and wife; wedlock; abstractly, the institution whereby men and women are joined in a special kind of social and legal dependence, for the purpose of founding and maintaining a family. Marriage is of two general types, monogamous and polygamous (polygamy itself being either *polyandrous* or *polygynous,* with many variations. The earliest form of marriage has not been determined, but leading ethnologists regard it variously as a communal or group marriage, a form of temporary monogamy, or a promiscuous union. Monogamous marriage is the form most widely practiced in both primitive and civilized societies, and the only form generally recognized in countries affected by Christian civilization. Among primitive peoples a bride was frequently secured by purchase, but also by capture, theft, elopement, exchange of a sister, or inheritance of a brother's widow. Among the Greeks and Romans marriage was a private contract, usually made and unmade by patriarchal authority, but sometimes by mutual consent. Christian peoples widely regard marriage as a contract requiring ratification in a religious rite, but a civil form of marriage ceremony is now generally provided for. Since the Reformation there has been an increasing difference of opinion as to the essential character of the marriage contract, the extremes being represented by those who hold it a sacramental and indissoluble union, and those who regard it as purely a civil contract, capable of dissolution, esp. for just cause. Under English common law, husband and wife were, for many purposes, considered as one, the rights of the wife to property and over the children being subordinate to those of the husband; but by statute law the wife has acquired practically equal rights with the husband throughout the British Empire and the United States. Cf. FAMILY, MATRIARCHY, PATRIARCHY, PUNALUAN, MONANDRY, MONOGYNY-MANUS, POTESTAS, DOWER, CURTESY, COMMUNITY, GANANCIAL SYSTEM, FORBIDDEN DEGREES, etc.

2. Act of marrying, or rite by which the married status is effected; wedding; often, the wedding ceremony and attendant festivities or formalities. Cf. CONFARREATION; COEMPTION, 2; BEENA MARRIAGE; LEVIRATE.

3. *Obs.* **a** The marriage vow or contract. **b** A dowry.

4. Any intimate or close union.

5. = MARITAGE.

6. In bezique, pinochle, and similar card games, the combination of a king and queen of the same suit. If of the trump suit, it is called a ***royal marriage.***

Syn. — MARRIAGE, MATRIMONY, WEDLOCK, WEDDING. *Marriage* (the common word) and *matrimony* may alike refer to the relation between married persons or to the state into which they enter. MATRIMONY is somewhat formal or conventional, and occasionally has a half-humorous suggestion. *Marriage* (not *matrimony*) is also used of the act or ceremony. WEDLOCK is archaic, poetical, or legal for *marriage* or (esp.) *matrimony;* WEDDING denotes the nuptial ceremony or (esp.) festivities. Cf. MATRIMONIAL.

mar'riage·a·ble (măr'ĭj·ȧ·b'l), *adj.* Fit for, or capable of, marriage; of an age at which marriage is allowable. — **mar'riage·a·bil'i·ty** (-bĭl'ĭ·tĭ), **mar'riage·a·ble·ness,** *n.*

MARTIAL, MARK.] **1.** *Rom. Relig.* The god of war, also regarded as protector of the fields. He may have been originally a god of vegetation, but became a war-god. He was identified with the Greek *Ares,* and hence associated in cult with Venus. The chief festivals of Mars occurred in March (the month named for him) and included the *Agonium Martiale, Equiria,* and *Tubilustrium;* the October festivals, *Armilustrium* and *Equus October,* were also in his honor (cf. *Quirinus*), as was the *lustrum* (which see). In Rome the *Campus Martius* was the seat of the most ancient and famous altar of Mars. Early or dialect forms of the name are *Mamers, Marmar, Marspiter, Maspiter,* and *Mavors.* Cf. AMBARVALIA, BELLONA, DI, SALII.

3. *Astrol.* The lesser infortune, a masculine, nocturnal, hot and dry, choleric, and fiery planet, the mansions of which are Aries and Scorpio, the exaltation, 28° Capricorn, the depression, 28° Cancer, and the orb, 7°.

4. *Astron.* One of the planets of the solar system, conspicuous for the redness of its light. Symbol, ♂. It is the fourth in order from the sun, or the next beyond the earth, having a diameter of about 4,200 miles, a period of 687 days, and a mean distance of 141,000,000 miles from the sun. The least distance of Mars from the earth is 35,000,000 miles, as in 1909 and 1924. It has two small satellites, **Deimos** and **Phobos.** The physical conditions on Mars bear some resemblance to those on the earth, but the atmosphere of Mars must be exceedingly rare. The inclination of the planet's axis to the plane of its orbit indicates seasons similar to those of the earth. As the Martian spring approaches, a network of straight, threadlike markings, popularly called ***canals,*** begins to develop in the planet's surface. No astronomer regards them as filled with water; some think they are volcanic or other surface cracks; others regard them as vegetation, periodically renewed, evidencing extended natural watercourses; and a few have thought they were artificial canals, evidencing the presence of intelligent beings. The average temperature of Mars is thought to be much below that of the earth.

5. *Her.* Gules, in blazoning by planets. *Obs.*

Ma·so'ra, Ma·so'rah (mȧ·sō'rȧ), *n.* [NHeb. *māsōrāh* tradition, fr. Heb. *māsōreth.*] The early Hebrew tradition as to the correct form of the text of the Scriptures; also, in the written editions, the marginal notes, or the text and notes, embodying the results of this tradition. The written *Masora* consists of the notes, or notes and punctuation, to a consonantal text, called the **Masoretic text,** which is the basis of all editions of the Old Testament (see TEXT). The punctuation consists in pointing the vowels and indicating the accents, according to either of two systems, the Palestinian, or Tiberian, and the Babylonian (see PUNCTUATION, *n.,* 2). The marginal notes are chiefly on the number of times that particular words and word forms occur. Simple indications of the number of times of occurrence are placed at the side of the text, forming a **Ma·so'ra par'va** (pär'vȧ), [NL.] or small Masora; such notes extended to a list with citation of passages are placed on the top and bottom margins, forming **a Ma·so'ra mag'na** (măg'nȧ), [NL.] or large Masora; sometimes they are at the end, forming a **Ma·so'ra fi·na'lis** (fī·nā'lĭs), [NL.] or final Masora. Tradition carries the beginning of the oral Masora back as far as Ezra's time; it was reduced to writing somewhere between the 5th and 8th centuries A.D.

12. *Pharm.* The homogeneous pasty mixture compounded for making pills, troches, and plasters; as, blue *mass.*

13. *Physics.* A measure of the quantity of matter in a body as determined by comparing the changes in the velocities that result when the body and a standard body impinge. Experiments prove that, when two bodies interact, as in impact, the ratio of the two accelerations is always the same, regardless of the nature of the interaction. If a number m_1 is arbitrarily assigned to one body, whose acceleration is found to be a_1, and a_2 is found to be the acceleration of the other body, then the quantity $m_1 \frac{a_1}{a_2}$ is a constant, and is equal to the mass m_2, of the second body. For practical purposes of comparison, the number one (kilogram, pound) has been arbitrarily given to the mass of a cylinder of platinum called the *kilogram* (which see) and, in England and the U. S., to the mass of a piece of platinum called the *pound* (which see). These numbers correspond to the mass, m_1 in the preceding expression. The quantity of mass of a body is invariable in amount and independent of its physical state, environment, or motion. However, as the velocity of a body approaches the speed of light, the measure of the mass increases until it becomes, in theory, finally infinite. Some electrically-charged particles, as electrons emitted from radium as beta rays, have attained speeds as high as 99.8 per cent of the speed of light. The foregoing does not imply any change in the body itself. Mass is a measurement only. The results of the measurement depend upon the relative motion of the observer and the object measured, so that the value of the mass of a body is a function of its velocity with reference to the observer. A body moving rapidly with reference to an observer appears to him to possess a mass equal to the mass the body seems to have to an observer moving uniformly with the body divided by $\sqrt{1-\frac{v^2}{c^2}}$, in which V is the velocity of the body with reference to the observer and C is the constant velocity of light, 186,000 miles per second. Mass and energy are definitely linked together by the equation $E = MC^2$, in which C is the velocity of light and M is the mass possessed by the energy E. Cf. ENERGY, *n.,* 5. Mass is commonly measured by weighing, that is, by comparing the pull of gravity on the body whose mass is to be determined with that on a standard of known mass, the ratio of the weights being equal to the ratio of the masses. The result of this process is often called the *weight* of the body, but strictly speaking weight is the pull of gravity on the body. Mass is one of the three fundamental quantities (length, mass, and time) on which all physical measurements are based. The masses of bodies are inversely proportional to the velocities which a given force will impart to them in a given time, and are directly proportional to their kinetic energies if the velocities of the masses are equal. Mass is the quotient obtained by dividing the weight of a body by the acceleration due to gravity. Cf. INERTIA, WEIGHT, SLUG.

14. *Physiol.* The fluid, esp. blood, in the body. *Obs.*

Syn. — See BULK.

mass, *adj.* Of, pert. to, or characteristic of a mass or the masses (see 3d MASS, 6); as, *mass* action, education, psychology; arranged in or involving masses; as, a *mass* effect.

6. An impression of a phonograph record. That obtained by electroplating the original wax record of the sounds is called the *master matrix*; that obtained by electroplating the master matrix is called the *mother matrix.*

7. **a** *Anat. & Biol.* The intercellular substance of a tissue. **b** *Anat.* The part of the cutis beneath a nail.

8. *Bot.* The body on which a fungus or lichen grows.

9. *Dent.* **a** A strip or band placed so as to serve as a retaining outer wall of a tooth in filling a cavity. **b** A metal or porcelain pattern in which an inlay is cast or fused.

10. *Jewelry.* A gem stone cut from some stone, as opal or turquoise, and its surrounding matrix (sense 3 a).

11. *Math.* An ordered set of *mn* elements or constituents, a_{pq}, each occupying its proper place in the symbol, $(a_{11}, a_{12}, \cdots)$ of the matrix, there being *m* rows with *n* elements in each row. If $n = m$ the matrix is called a ***square matrix.*** A square matrix each of whose elements are zero, save those, $a_{11}, a_{22}, \ldots$, in the principal diagonal, and which has each of these elements equal to the same number, *a*, is called a ***scalar matrix.*** The scalar matrix for which $a = 1$ is called the ***identity***, or ***unit, matrix.*** Cf. DETERMINANT; SKEW-SYMMETRIC MATRIX; TRANSPOSED MATRIX; RECIPROCAL MATRIX; SYMMETRIC SQUARE MATRIX.

12. *Type Founding.* **a** A metal plate, usually of copper, suitably formed to mold the face of a type. **b** In a linotype machine, a brass plate having on its front edge an intaglio of the letter it is to produce in relief.

matrix algebra. See ALGEBRA, *n.*, 2.

matrix mechanics. A theory of mechanics based upon the application of postulates connecting frequencies and intensities of spectrum lines by the use of matrix algebra. No consideration is given to electrons, which are deliberately rejected as nonobservable entities.

matrix paper. A bulky absorbent paper, used as the body in the production of a stereomatrix mat.

mat'ro·clin'ic (măt'rō·klĭn'ĭk), *adj. Biol.* Matroclinous.

mat'ro·cli'nous (măt'rō·klī'nŭs; măt'rō·klĭ'nŭs), *adj.* [L. *mater*, or Doric Gr. *matēr*, mother + *klinein* to lean, incline.] *Biol.* Designating or having certain characters inherited from the mother.—**mat'ro·cli'ny** (măt'rō·klī'nĭ), *n.*

ma'tron (mā'trŭn), *n.* [OF. *matrone*, fr. L. *matrona*, fr. *mater* mother. See 3d MOTHER.] **1.** A wife or a widow, esp. one who has borne children; a staid or motherly woman.

mat'ta·more' (măt'ȧ·mōr'; măt'ȧ·mōr'; 181), *n.* [F. *matamore*, fr. Ar. *maṭmūrah* something buried or hidden.] A subterranean storehouse. *Rare.*

Mat'ta·po·ny' (măt'ȧ·pō·nĭ'), *n.* An Indian of an Algonquian tribe of the Powhatan Confederacy. A few survivors still live in Virginia.

mat'ta·ro (măt'ȧ·rō), *n.* [Ar. *maṭar*, fr. L. *metreta.* See METRETA.] See MEASURE, *Table.*

matte (măt), *n.* [F.] **1.** *Metal.* A crude mixture of sulphides formed in smelting sulphide ores of certain metals, esp. copper, lead, and nickel.

2. Mat or dull finish.

matte (măt), *v. t.*; MAT'TED; MAT'TING. To convert into matte.

matte, *n.* Prob., mass;—in phrase *by the matte. Obs. Udall.*

mat'ted (măt'ĕd; -ĭd; 119), *adj.* [See MAT a dull finish.] Having a dull surface; unburnished; as, *matted* gilding.

mat'ted (măt'ĕd; -ĭd; 119), *adj.* [See MAT a covering.] **1.** Covered with a mat or mats; as, a *matted* floor.

2. Tangled closely together; having its parts adhering closely together; as, *matted hair.*

— **mat'ted·ly**, *adv.* — **mat'ted·ness**, *n.*

mat'ter (măt'ĕr), *n.* **a** One who or that which mats; specif., a mattoir. **b** A maker of mats.

mat'ter (măt'ĕr), *n.* [ME. *matere*, fr. OF. *matere* (F. *matière*), fr. L. *materia* matter, wood; akin to Armen. *mair* pine, cedar, *mairi* wood, prob. to Russ. *materój* firm, strong, and perh. to L. *mater* mother. Cf. 3d MOTHER, MADEIRA, MATERIAL.] **1.** That of which any physical object is composed; material; substance; constituents; elements; as, the *matter* of the globe; also, material prepared or selected for any purpose; a particular kind or portion of material; as, coloring *matter*; the gray *matter* of the cortex.

2. Specif., substance excreted from living animal bodies; that which is thrown out or discharged by suppuration, as from a tumor, boil, or abscess; pus; purulent substance.

3. Material or substance regarded as the passive recipient of form; hence, that which is or may be given a new form. Cf. sense 18. "He is the *matter* of virtue." *B. Jonson.*

4. Physical substance as made up of chemical elements and distinguished from incorporeal substance, action, qualities, etc. Cf. sense 18, below.

Matter is inert, senseless, and lifeless. *Johnson.*

5. Amount; quantity; portion; space; — often indefinite.

Away he goes, . . . a *matter* of seven miles. *L'Estrange.*

6. That which is specified as pertaining to a subject or sphere; as, this is not *matter* for dispute; *matter* of fact, of religion. *Archaic.*

7. That which is, or is to be, considered, dealt with, or carried out; concern; hence, indefinitely, a thing or things; as, personal *matters*; a laughing *matter.*

8. **a** Formerly, an affair or business concerning a (specified) person; as, his *matter* shall be sped. **b** *pl.* Circumstances or events having reference to a particular occasion; as, carrying *matters* too far.

9. Material treated or to be treated in a book, speech, legal action, or the like; subject of, or subject matter for, discussion, argument, exposition, etc., whether oral or written; as, events that give *matter* to preachers and writers; to ask the *matter* in dispute. Hence: **a** Substance of that which is expressed, as distinct from the manner of expression; as, strong in *matter*, but weak in style. **b** Substance with meaning; sound sense. "O *matter*, and impertinency mixt." *Shak.* **c** *Obs.* Dispute; argument; quarrel. "If the *matter* should be tried by duel." *Bacon.*

10. That which may or does occasion a (specified) feeling; — with *for* or *of*; as, *matter* for wonder.

11. With *the*, that which momentarily concerns one, esp. as a difficulty; as, what is the *matter?* Also, the cause or source of trouble; as, what is the *matter* with it?

12. Affair worthy of account; thing of consequence; importance; — in the phrases *what matter? no matter*, etc.

13. *Obs.* **a** The first phase of creation; chaos. **b** Field, as of an art or science; subject, as of a study. **c** Topic; theme. **d** Ground; reason; cause. **e** Basic element. **f** Means; provision for something.

14. *Christian Science.* Another name for mortal mind; illusion; the opposite of Spirit; that of which immortal Mind takes no cognizance; that which mortal mind sees, feels, hears, tastes, and smells only in belief.

Mary Baker Eddy.

15. *Law.* That which is to be proved; as: **a** By some record (**matter of record**). **b** By evidence of any kind except a record (**matter in deed**). **c** Solely by the testimony of witnesses unsupported by any record or other written or tangible evidence (**matter in pais** or ***nude matter***).

16. *Literature.* [F. *matière* in *matière de France, de Bretagne, de Rome.*] One of the three principal types of material treated in the medieval metrical romances (cf. METRICAL ROMANCE): **matter of France**, Charlemagne material, material of the Old French epics; **matter of Britain**, Arthurian material; **matter of Rome the great**, material drawn from classical antiquity.

17. *Logic.* **a** = MATTER OF A PROPOSITION. **b** = MATTER OF A SYLLOGISM.

18. *Philos.* The indeterminate subject of reality; the wholly or virtually passive element in the universe; the unorganized basis or stuff of experience which when combined with form, or the ideal element, gives phenomena, or real objects. The metaphysical conception of matter as that which combines or synthesizes the variable elements of existence, though in itself wholly indeterminate, takes its rise in the Platonic and Aristotelian notion of *hyle*, the passive or potential substance or substratum upon which *form* (*eidos, idea*) acts to produce realities. This substratum, or subject of change and development, is conceived to possess no attributes except the capacity of being acted upon by form, and (especially when existing as a combination of matter and form, that is, as reality) a power of resistance or implasticity, by reason of which it yields only in part to the operation of formal causes and so gives rise to the imperfections of reality. The notion of matter as substance or substratum was developed in Scholastic philosophy from the Aristotelian conception. By Descartes this was identified with extended substance, and by later philosophers, as Locke, has often been confounded with the physical conception. According to the Lockian view, matter is the cause of sensation, but is not itself directly perceived. Berkeley denied the existence of any such matter, but, like modern phenomenalists, he did not question the concrete reality of an objective element in experience, that is, of perceptible physical objects possessing the attributes of extension, rigidity, inertia, etc. In Kantian idealism the distinction of *matter* and *form* appears in another guise, *matter* being the sensible stuff or sensuous context of experience (in Kantian language, the "manifold"), while *form* is the pure form of the understanding and the a priori sensible forms, time and space. Cf. FORM, IDEA, NOUMENON, SUBSTANCE.

19. *Physics.* Whatever occupies space; that which is considered to constitute the substance of the physical universe, and, with energy, to form the basis of objective phenomena. The nature of matter is unknown but some of the properties attributed to it are volume or extension, impenetrability (no two bodies or particles can occupy the same space at the same time), mass or inertia, compressibility, elasticity, etc. Various phenomena indicate that all matter is composed of minute particles, *protons* (positively charged) and *electrons* (negatively charged). These are normally combined into atoms, of which there are (not counting isotopes) ninety-two kinds, constituting the elements. See ATOMIC THEORY, CONSERVATION OF MASS, ENERGY.

20. *Post Office.* Mail matter; mail; as, first-class, second-class, or third-class *matter.* See 6th MAIL, *n.*, 3.

21. *Print.* **a** Anything to be set in type; manuscript; copy; also, type set up, — called *live matter* before printing, *dead matter* after printing, *standing matter* while kept in shape for use, usually after a printing. **b** Specif., the text proper as distinguished from headings, etc., or, as in a newspaper, from advertisements.

— *for that matter, or for the matter of that.* So far as that is concerned; as for that. — *in the matter of.* In respect to; with regard to. — *on, or upon, the matter, or the whole matter.* Considering the whole; taking all things into view. *Obs.* — *to, or from, the matter.* To, or from, the point, or matter of debate.

mat'ter (măt'ĕr), *v.*; -TERED (-ĕrd); -TER·ING. *Intransitive:* **1.** To be of importance; to import; signify.

It is not death that *matters*, but the fear of death. *G. B. Shaw.*

2. To form or discharge pus; to maturate.

—, *Transitive:* To regard as important; to concern oneself about; to care for; to mind; also, to value; like. *Obs.*

2. Materials for mats; also, mats collectively; a matlike fabric, as for covering floors, packing articles, etc.
3. An ornamental border. See 5th MAT, 1.
mat'ting, *n.* [See MAT a dull finish.] A dull, lusterless surface in gilding, metalwork, glassmaking, etc.
‖**Matt'ma'le·rei'** (măt'mȧ'lĕ·rī'), *n.* [G.] *Gr. Archaeol.* The decoration of vases with designs in dull, flat color, as distinguished from *Firnismalerei*, painting with lustrous color.
mat'tock (măt'ŭk), *n.* [AS. *mattuc;* akin to L. *mateola* mallet, Pol. *motyka* mattock, Skr. *matya* club, harrow. Cf. 1st MACE, MASHIE, MASSÉ.] An implement for digging and grubbing. See *Illust.*

1 Cutter Mattock; 2 Pick Mattock.

mat'tock, *v. t.* To dig or grub with a mattock.
mat'toid (măt'oid), *n.* [It. *mattoide*, fr. *matto* mad.] A person of congenitally abnormal mind bordering on insanity or degeneracy.
mat·toir' (mȧ·twär'), *n.* [F. *matoir.*] *Engraving.* A kind of coarse punch with a rasplike face, used for making a rough surface on etching ground, or on the naked copper, the effect after biting being very similar to stippled lines.
mat'tress (măt'rĕs; -rĭs), *n.* [OF. *materas* (F. *matelas*), fr. It. *materasso*, fr. Ar. *maṭraḥ* place where something is laid.] **1.** A tufted bed; a bed stuffed with hair, moss, or other suitable material, and tufted or otherwise fastened.

Mattoir

2. A mat. *Obs.*
3. *Hydraul. Engin.* A mass of interwoven brush, poles, etc., to protect a bank from erosion.
4. A bed of sugar cane. *U. S.*
— **mat'tress,** *v. t.*
ma·tur'a·ble (mȧ·tūr'ȧ·b'l), *adj.* Capable of maturation.
Ma'tu·ra di'a·mond (mä'tōō·rȧ). [From *Matura* (*Matara*), Ceylon.] *Gems.* Jargon, especially when artificially decolorized. See ZIRCON.
mat'u·rate (măt'ū·rāt), *v.;* -RAT'ED (-rāt'ĕd; -ĭd; 119); -RAT'ING (-rāt'ĭng). [L. *maturatus*, past part. of *maturare* to make ripe, fr. *maturus* ripe, mature. See MATURE, *v. & adj.*] *Transitive:* **1.** To promote the perfect suppuration of (an abscess).
2. To bring to ripeness or maturity; to ripen.
—, *Intrans.:* To ripen; mature; specif., to generate pus; to suppurate.
mat'u·ra'tion (-rā'shŭn), *n.* [F., fr. L. *maturatio* a hastening.] **1.** The formation of pus or matter.
2. Process of bringing, or of coming, to full development. The genesis and *maturation* of a planet. *Emerson.*
3. *Obs.* **a** *Alchemy.* Conversion of a base metal into gold. **b** Development of one form of matter from another.
4. *Biol.* **a** In animal reproduction the process by which diploid *gonocytes* are transformed into haploid *gametes.* The nuclear behavior is similar in male and female, two meiotic divisions (see MEIOSIS, 2) producing cells with the haploid chromosome number thus preventing doubling of the chromosome number in subsequent *fertilization* (which see). Variations in cytoplasmic behavior produce the large passive *ovum* and the small motile *sperms.* In oögenetic meiosis one cell retains most of the cytoplasm, the remaining nonfunctional three (*polar bodies*) receiving a full complement of chromatin but practically no cytoplasm. Thus, a single ovum, well stored with reserves, results from the maturation of each *oöcyte.* In sperm maturation equational divisions of *spermatocytes* produce four similar *spermatids* which transform into sperm by losing most of their cytoplasm, undergoing nuclear condensation, and developing a motile tail. Maturation is sometimes restricted to postmeiotic differentiation of sperm.
☞ Similar phenomena occur in plants but are differently interpreted by botanists, owing to the more evident alternation of generations resulting from the longer interval between reduction and fertilization.
b Final differentiation in the growth of cells, as in the lignification of xylem of higher plants.
5. *Psychol.* The development of the individual through growth processes, as distinguished from development through exercise and learning.
ma·tur'a·tive (mȧ·tūr'ȧ·tĭv), *adj.* [F. *maturatif.*] Conducing to ripeness or maturity; hence (*pron.* măt'ū·rā'tĭv), conducing to suppuration. — **ma·tur'a·tive,** *n.*
ma·ture' (mȧ·tūr'; 242), *adj.;* MA·TUR'ER (-tūr'ĕr); MA·TUR'EST (-tūr'ĕst; -ĭst; 119). [L. *maturus* ripe, seasonable, early, prop., in good time; akin to L. *Matuta* goddess of the early morning, *matutinus* of the morning, *mane* in the morning, early, *manus* good, OIr. *maith.* Cf. DEMURE, MANES, MATINÉE.] **1.** Brought by natural process to completeness of growth and development; fitted by growth and development for any function, action, or state, appropriate to its kind; full-grown; ripe.
2. Completely worked out; made ready for destined application or use; perfected; as, a *mature* plan.
3. Of or pertaining to a condition of full development; as, a man of *mature* years.
4. Prompt. *Obs.*
5. Having run to the limit of its time; due, as a note.
6. *Phys. Geog.* **a** Designating the topography of a surface well dissected by the erosion of running water so that slopes predominate greatly over flats. **b** Adjusted to rock structure; — said of streams.
Syn. — MATURE, RIPE, MELLOW are here compared esp. in their figurative senses. *Mature* and *ripe* agree in implying fullness of growth; MATURE emphasizes the completion of a development, RIPE suggests rather readiness for use, or full fruition; as, "a true knight, not yet *mature*" (*Shak.*); cf. *mature* deliberation; "*ripe* for exploits and mighty enterprises" (*Shak.*); "autumnal wisdom . . . *ripe* and placid" (*W. Pater*). MELLOW emphasizes the softness, sweetness, or richness attendant upon complete ripeness or maturity; as, "the old man's . . . *mellow*, cheerful vein, like the sweet flavor of a frostbitten apple" (*Hawthorne*). Cf. WHOLE.
Ant. — Immature, unripe. See CRUDE, PREMATURE.
— **ma·ture'ly,** *adv.* — **ma·ture'ness,** *n.*
ma·ture' (mȧ·tūr'; 242), *v.;* -TURED' (-tūrd'); -TUR'ING (-tūr'ĭng). [See MATURATE, MATURE, *adj.*] *Transitive:* **1.** *Obs.* **a** To maturate. **b** To hasten through a due course.
2. To bring or hasten to maturity; to promote full development in; to complete; as, to *mature* one's plans.
—, *Intransitive:* **1.** To advance toward maturity; to become ripe; as, wine and judgment *mature* with age.
2. Hence, to become due, as a note.
ma·tur'er (mȧ·tūr'ĕr), *n.* One who brings to maturity.
mat'u·res'cent (măt'ū·rĕs'ĕnt; -nt), *adj.* [L. *maturescens*, pres. part. of *maturescere* to become ripe, v. incho, from *maturus.* See MATURE, *adj.*] Approaching maturity. — **mat'u·res'cence** (-ĕns; -ns), *n.*
ma·tur'ing (mȧ·tūr'ĭng), *adj.* Approaching maturity; as, *maturing* fruits; *maturing* notes of hand.
ma·tu'ri·ty (mȧ·tū'rĭ·tĭ), *n.* [From L. *maturitas*, perh. through F. *maturité.*] **1.** Deliberateness; due care or consideration. *Obs.*
2. State or quality of being mature; ripeness; full development; as, the *maturity* of corn, of judgment.
3. A becoming due; termination of the period a note, or other obligation, has to run.
4. Prompt action or consideration. *Obs.*

max'well (măks'wĕl; -wĕl), *n.* [After James Clerk *Maxwell*, Scot. physicist.] The C.G.S. electromagnetic unit of magnetic flux. One maxwell equals one gauss-cm²; 10^8 maxwells equal one weber.

maxwell per ampere turn. *Elec.* A unit of permeance; the permeance of a magnetic circuit in which a magnetomotive force of one ampere turn will produce a magnetic flux of one maxwell; — called also *perm.* It equals 10^{-8} webers per ampere turn.

Max'well's de'mon (măks'wĕlz; -wĕlz). *Physics.* A hypothetical being of intelligence and molecular proportions imagined by J. C. Maxwell to illustrate limitations of the second law of thermodynamics.

Maxwell's rule or law. *Elec.* The law that a circuit always tends to move in such a direction as to make the amount of magnetic flux through it a maximum.

Maxwell's vector potential. See VECTOR POTENTIAL.

Maxwell triangle. See COLOR, *n.*, 2.

maxwell turn. *Elec.* A unit of linkage, or flux turns; the product of the flux per turn (in maxwells) and the number of turns of conductor linked with the flux.

may (mā), *n.* [AS. *mæg.*] A maiden. *Archaic & Poetic.*

may. Dial. Eng. var. of MAKE, *v.*

may (mā; 71), *v.; pres., sing., 1st & 3d pers.* MAY, *2d* MAY'EST (mā'ĕst; -ĭst; 119), MAYST (māst), *pl.* MAY; *past tense* MIGHT (mīt). Infinitive and participles lacking in present use. [AS. pres. *mæg* I am able, pret. *meahte, mihte;* akin to D. *mogen*, G. *mögen*, OHG. *mugan, magan*, ON. *mega*, Goth. *magan*, OSlav. *mogo, mošti*, Gr. *mēchos* means, expedient. Cf. DISMAY, MACHINE, MAIN strength, MIGHT, *n.*]

1. *[Intransitive.]* To have power; to be able; sometimes specif., to have power to prevent. *Obs.*

2. As an auxiliary verb, followed by the infinitive without *to*, qualifying the sense of another verb by adding that of: **a** *Archaic.* Ability; competency; — now expressed by *can.*

For what he [the king] *may* do is of two kinds; what he *may* do as just, and what he *may* do as possible. *Bacon.*

b Liberty; opportunity; permission; possibility; as, he *may* go; you *may* be right. It is sometimes used to avoid bluntness in a question or remark. "How old *may* Phillis be, you ask." *Prior.*

☞ Except in indirect discourse, the past indicative *might* is now rarely used in this sense, "he might," etc., being now expressed by some such phrase as, "it was possible for him to," "he was free to," etc. *Might be, might do*, etc., were formerly used for *may have been, done*, etc.; as, the ship *might* be a mile away. The subjunctive *might*, "would be able to," "would perhaps," is used esp. in the principal clauses of conditional sentences and in conditional statements; as, with a little coaxing he *might* come. It is often used colloquially to suggest reproof of an omission or neglect; as, you *might* at least apologize. **c** Desire or wish, as in prayer, imprecation, benediction, and the like, the subjunctive *might* denoting wish without expectation of fulfillment. "*May* you live happily." *Dryden.* **d** Contingency; — used, esp. in clauses of purpose, result, concession, indirect question, in indefinite relative clauses, and the like, to form a periphrastic subjunctive; as, he flatters that he *may* win favor; though the chain *may* break; whatever *might* befall.

☞ *May* is often used with an ellipsis of the infinitive, esp. where it is readily supplied from the context. "Gather ye rosebuds while ye *may.*" *Herrick.*

☞ Where the sense, purpose, or policy of a statute requires it, *may* as used in the statute will be construed as *must* or *shall;* otherwise *may* has its ordinary permissive and discretionary force.

Syn. — MAY, CAN. So far as *can* and *may* come into comparison, CAN expresses ability, whether physical or mental; MAY implies permission or sanction; as, he will do it, if he possibly *can;* I shall call tomorrow, if I *may;* "When Duty whispers low, Thou must, the youth replies, I *can*" (*Emerson*); "I am gone into the fields. . . . Reflection, you *may* come tomorrow" (*Shelley*). The use of *can* for *may* in asking permission is incorrect, but in denying permission *cannot* is common. Cf. OUGHT.

☞ **may be,** *and* **it may be,** are used as equivalent to *possibly, perhaps, by chance.* See 1st MAYBE.

May (mā), *n.* [OF. *mai*, fr. L. *Maius*, fr. (*deus*) *Maius* Jupiter, prop., the great (god); akin to L. *magnus* great. See MASTER.] **1.** The fifth month of the year, having 31 days. "The flowery *May.*" *Milton.*

TABLE OF MEASURES

NOTE. The wine gallon, or U. S. gallon, contains 231 cu. in.; the British, or imperial, gallon is almost exactly ⅙ larger. In the first column of equivalents, where two values are given, one in roman and the other in *italic* type, that in the roman type is the value for the United States; that in the *italic*, for Great Britain. Where only roman type is used, the equivalent has the same value in both countries.

1 Usual value for oil. 2 Usual value for wine. 3 At Paris. 4 Values in the upper line are the earlier. 5 Attic standard. 6 In the usage of the Surveyor General's office, *foot* means *Cape foot* except where the *English foot* is specified. In common usage the reverse is true, at least with the English-speaking population. 7 At Singapore.
* Further information will be found in the vocabulary.

TABLE OF LINEAR MEASURE

12 inches (in.) = 1 foot (ft.)
3 feet = 1 yard (yd.) = 36 inches.
5 1/2 yards = 1 rod (rd.) or pole = 16 1/2 feet.
40 rods = 1 furlong (fur.) = 220 yards = 660 feet.
8 furlongs = 1 statute mile (mi.) = 1,760 yards = 5,280 feet.
3 miles = 1 league = 5,280 yards = 15,840 feet.

TABLE OF SQUARE MEASURE

144 square inches (sq. in.) = 1 square foot (sq. ft.).
9 square feet = 1 square yard (sq. yd.) = 1,296 square inches.
30 1/4 square yards = 1 square rod (sq. rd.) = 272 1/4 square feet.
160 square rods = 1 acre (A.) = 4,840 square yards.
640 acres = 1 square mile (sq. mi.) = 3,097,600 square yards.
36 square miles = 1 township.

TABLE OF CUBIC MEASURE

1,728 cubic inches (cu. in.) = 1 cubic foot (cu. ft.).
27 cubic feet = 1 cubic yard (cu. yd.).
144 cubic inches = 1 board foot.
128 cubic feet = 1 cord.

TABLE OF CHAIN MEASURE

(Gunter's or surveyor's chain.)
7.92 inches (in.) = 1 link (li.).
100 links = 1 chain (ch.) = 66 feet.
80 chains = 1 mile (mi.) = 5,280 feet.

(Engineer's chain.)
12 inches (in.) = 1 link (li.).
100 links = 1 chain (ch.) = 100 feet.
52.8 chains = 1 mile (mi.) = 5,280 feet.

TABLE OF SURVEYOR'S AREA MEASURE

625 square links (sq. li.) = 1 square pole or square rod.
16 square poles = 1 square chain (sq. ch.), surveyor's.
10 square chains = 1 acre (A.).
640 acres = 1 square mile (sq. mi.).
36 square miles = 1 township.

TABLE OF LIQUID MEASURE

4 gills (gi.) = 1 pint (pt.).
2 pints = 1 quart (qt.) = 8 gills.
4 quarts = 1 gallon (gal.) = 8 pints = 32 gills.
31 1/2 gallons = 1 barrel (bbl.) = 126 quarts.
2 barrels = 1 hogshead (hhd.) = 63 gallons = 252 quarts.

TABLE OF APOTHECARIES' FLUID MEASURE

60 minims (min. or ♏) = 1 fluid (or liquid) dram (fl. dr. or ʒ).
8 fluid drams = 1 fluid (or liquid) ounce (fl. oz. or ℥) = 480 minims.
16 fluid ounces = 1 pint (O.) = 128 fluid drams = 7,680 minims.
8 pints = 1 gallon (C.) = 128 fluid ounces = 1,024 fluid drams.

TABLE OF DRY MEASURE

2 pints (pt.) = 1 quart (qt.).
8 quarts = 1 peck (pk.) = 16 pints.
4 pecks = 1 bushel (bu.) = 32 quarts = 64 pints.
105 quarts = 1 barrel (for fruits, vegetables, and other dry commodities) = 7,056 cubic inches.

TABLE OF CIRCULAR MEASURE

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
90 degrees = 1 quadrant.
4 quadrants = 1 circle or circumference.

TABLE OF NAUTICAL MEASURE

6 feet = 1 fathom.
100 fathoms = 1 cable's length (ordinary) = 608 ft. (Br.) = 608.02 ft. (U. S.).
120 fathoms = 1 cable's length (U. S. Navy).
10 cable's lengths = 1 nautical mile = 6,080 ft. (Br.) = 6,080.20 ft. (U. S.).
1 nautical mile = 1.1516 statute miles.
3 nautical miles = 1 league (marine).
60 nautical miles = 1 degree (of a terrestrial great circle).

meas'ure (mĕzh'ẽr), *v.;* MEAS'URED (mĕzh'ẽrd); MEAS'URING (-ẽr-ĭng). [OF. *mesurer*, fr. LL. *mensurare*. See MEASURE, *n.*] *Transitive:* **1.** To limit; regulate. *Obs.*
2. To ascertain the extent, degree, quantity, dimensions, or capacity of, by a standard; hence, to estimate.
3. To allot or distribute by measure. *Archaic.*
With what measure ye mete, it shall be *measured* to you again. *Mat.* vii. 2.
4. To determine or lay off in measuring, as a distance.
5. To pass through or over in journeying; as, a pilgrim *measuring* kingdoms with feeble steps.
6. To mark the bounds or limits of; — with *out.*
7. To serve as the measure of; as, the thermometer *measures* changes of temperature.
8. To adjust to a standard; to bring into comparison or competition (with); as, to *measure* one's skill with a rival.
9. To adjust or estimate by a rule or standard.
Measure your desires by your fortunes. *Jer. Taylor.*
10. To express in measure, meter. *Obs.*
—, *Intransitive:* **1.** To take or make a measurement or measurements; to measure something.
2. a To result, or turn out, on being measured, esp. in respect of length, breadth, thickness, capacity, or the like, according to a standard; as, the cloth *measured* three fourths of a yard; the two pieces *measure* equally. Also, with *up*, to have necessary or fitting qualifications; as, one who *measures* up to his position. **b** To admit of being measured.
3. To give or allot measure.
measure swords. Literally, to compare the length of swords, as for fighting; hence, to fight with swords.
meas'ure-and-a-half' door. *Arch.* A door with molding on one side only.
meas'ured (mĕzh'ẽrd), *adj.* **1.** Regulated or determined by a standard; hence, uniform; graduated; as, with *measured* steps; calculated; deliberated; as, in no *measured* terms.
2. Metrical; rhythmical.
— **meas'ured·ly,** *adv.* — **meas'ured·ness,** *n.*
measured music. Music characterized by a pattern of regularly recurring accents. Cf. PLAIN SONG, RECITATIVE.
Measure for Measure. A play by Shakespeare, probably written 1603–04, printed 1623. See ANGELO; ISABELLA, 2 a.
meas'ure·less, *adj.* Without measure; immeasurable.
Syn. — Boundless, limitless, endless, unbounded, infinite.
Ant. — Finite, definite, limited, determinate.
— **meas'ure·less·ly,** *adv.* — **meas'ure·less·ness,** *n.*
measure line. See PERSPECTIVE.
meas'ure·ly (mĕzh'ẽr·lĭ), *adj. & adv.* Of or in due measure. *Rare.*
meas'ure·ment (mĕzh'ẽr·mĕnt), *n.* **1.** Act or result of measuring something; mensuration.
2. The extent, size, capacity, amount, or quantity ascertained by measuring; as, its *measurement* is five acres.
3. A system of measures.
4. *Math.* The correlation with numbers of entities that are other than members or aggregates.
measurement cargo *or* **goods.** *Naut.* Cargo, or goods, charged for carriage, or limited in amount, by bulk.
measurement ton. See TON, *n.*, 2 c.
measure of curvature. *Math.* a Of a curve, = CURVATURE, 3. **b** Of a surface, the product of the two principal curvatures of the surface at the point. Called also *Gaussian measure of curvature, specific curvature, curvature invariant,* and *scalar curvature.*
meas'ur·er (mĕzh'ẽr·ẽr), *n.* **1.** One who measures; one whose occupation is to measure a (specified) thing.
2. An implement that measures, as a gauge.
3. A measuring worm.
measure signature. *Music.* Time signature; — preferred by some as a more exact designation.
meas'ur·ing (mĕzh'ẽr·ĭng), *pres. part. & verbal n.* of MEASURE.
measuring cup. A cup containing a half pint, and marked so that portions may be accurately determined.
measuring glass. A graduated medicine or dispensing glass.
measuring machine. *Mach.* A machine for measuring, esp. a machine for the accurate mechanical or optical measurement of distances, on standards of length, gauges, and other parts, and commonly made to measure to the order of 0.0001 inch or higher.

One form of Measuring Machine.

measuring wheel. A kind of odometer, or perambulator.
measuring worm. The larva of any moth of the family Geometridae (which see).
meat (mēt), *n.* [ME. *mete,* fr. AS. *mete;* akin to OS. *mat, meti,* OHG. *maz* food, ON. *matr,* Goth. *mats,* D. *met* hashed meat, G. *mettwurst* sausage, L. *madere* to be moist, drip, Gr. *madaros* wet, flaccid, Skr. *madati* he bubbles, rejoices; basic idea: to drip, be fat. Cf. 2d MAMMA, 1st MAST, MASTODON, 4th MATE, 7th MUST.] **1.** Food in general; anything eaten for nourishment, either by man or beast; esp., solid food; hence, the edible part within a husk, rind, shell, etc.; the kernel; as, the *meat* of a lobster, a nut, or an egg.
And God said, Behold, I have given you every herb bearing seed, . . . to you it shall be for *meat.* *Gen.* i. 29.
2. An article of food; a "dish." *Obs.*
3. The flesh of animals used as food; as, a breakfast of bread and fruit without *meat;* specif., flesh (= FLESH, *n.*, 2), as distinguished from *fish* or *fowl.* Commercially, in the United States, *meat* means the dressed flesh of cattle, swine, sheep, or goats, except where used with a qualifying word, as in *reindeer meat, crab meat.*
4. A meal; specif., dinner; the chief meal; — esp. in the phrases *at, before,* or *after meat,* etc.
5. *pl.* The kernels of cottonseed after decortication.
6. *Hunting.* Animals as a source of flesh food; quarry.

-meat (-mēt). A combining form of the noun *meat,* denoting *a* (specified) *kind of food,* as in bake*meat,* sweet*meat.*
meat (mēt), *v. t. & i.* To supply with, or partake of, food; to feed; board. *Now Scot. & Dial.*
meat (mĕt). Var. of METE, to measure. *Obs. exc. Dial.*
me·a'tal (mē-ā'tăl; -t'l), *adj.* Of, like, or pert. to, a meatus.
meat'bird' (mēt'bûrd'), *n. Local, North America.* **a** The Canada jay. **b** Clarke's nutcracker.
meat'cut'ter (-kŭt'ẽr), *n.* One whose work is cutting meat.
meat'ed (mēt'ĕd; -ĭd; 119), *adj.* **1.** Fed; fattened. *Obs.*
2. Having (such) meat; — used chiefly in composition.
meat fly. A flesh fly.
meat'man' (mēt'măn'), *n.; pl.* -MEN (-mĕn'). [A butcher; one who vends meat.
meato-. *Surg.* A combining form for *meatus,* as in **me'a·tom'e·ter, me'a·tor'rha·phy, me·at'o·scope, me'a·tos'co·py, me·at'o·tome, me'a·tot'o·my.**
meat offering. = MEAL OFFERING.
me·a'tus (mē-ā'tŭs), *n.; pl.* -TUSES (-ĕz; -ĭz; 119), -TUS. [L., a going, passage, fr. *meare* to go.] *Anat.* **a** A natural passage or canal. **b** The opening of such a passage.
‖**me·a'tus au'di·to'ri·us** (ô'dĭ·tō'rĭ·ŭs; 181), **me·a'tus a·cu'sti·cus** (ô·kū'stĭ·kŭs). [L. *auditorius* of hearing, NL. *acusticus,* fr. Gr. *akoustikos.*] = AUDITORY MEATUS.
meat'works' (mēt'wûrks'), *n.* A slaughterhouse; also, a meat-packing establishment.
meat'y (mēt'ĭ), *adj.;* MEAT'I·ER (-ĭ·ẽr); MEAT'I·EST. Abounding in, or resembling, meat; hence, full of matter for thought; pithy; also, solid; substantial. "That solid *meaty* citizen." *Edna Ferber.*
Meb·su'ta (mĕb·sōō'tä), *n.* [Ar. *mabsūṭah,* fem., outstretched.] See STAR, *Table.*
Mec'ca (mĕk'ä), *n.* **1.** An Arabian city, birthplace of Mohammed and holy city of the Moslems (cf. KAABA); hence [*often not cap.*], any place sought, esp. by great numbers of persons, as a supremely desirable goal.
2. A Shiraz rug brought to Jidda and Mecca by Persian pilgrims; — called also **Mec'ca-Shi·raz'** (-shē·räz'; -shē'räz).
3. The color Tuscan brown.
Mec'can (-ăn), *adj.* Of or pertaining to Mecca. — *n.* A native or inhabitant of Mecca.
Mec·can'o (mĕ·kăn'ō), *n.* [See MECHANIC.] A trade-mark applied to a steel building set for children. Also [*sometimes not cap.*], the building set bearing this trade-mark.
Mec'ca·wee' (mĕk'ä·wē'), *adj.* Of or pertaining to, or characteristic of, Mecca. — *n.* A native or inhabitant of Mecca.
mech'a·nal (mĕk'ä·năl; -n'l), *adj.* Equipped with mechanical devices. — **mech'a·nal'i·ty** (-ä·năl'ĭ·tĭ), *n.* — **mech'a·nal·ize** (mĕk'ä·năl·īz), *v. t.*
me·chan'ic (mē·kăn'ĭk), *adj.* [L. *mechanicus,* fr. Gr. *mēchanikos,* fr. *mēchanē* machine; cf. F. *mécanique.* See MACHINE.] **1.** Pertaining to manual labor; involving manual skill; as, the *mechanic* arts.
2. Of or pert. to a mechanic or artisan, or the artisan class.
3. Rude; common; vulgar; base. *Obs.*
4. Of the nature of, relating to, or derived from, a machine or machines; mechanical; as, *mechanic* devices.
5. Having an aptitude for mechanics; inventive. *Obs.*
me·chan'ic, *n.* [Cf. F. *mécanique* mechanics. See MECHANIC, *adj.*] **1.** Art or application of handicraft or of the laws of force and motion; also, any mechanical art. *Obs.*
2. [Cf. OF. *mecanique.*] One who practices any mechanic art; an artisan; an artificer.
3. A low, vulgar, or baseborn fellow. *Obs.*
Syn. — See WORKMAN.
me·chan'i·cal (mē·kăn'ĭ·kăl), *adj.* [See MECHANIC, *adj.*]
1. Of, pertaining to, or concerned with, machinery or manual operations; made by a machine or with tools; as, *mechanical* employment.
2. Of, pert. to, or concerned with, manual labor; engaged in manual labor; of the artisan class.
3. Vulgar; common. *Obs.*
4. Done as if by a machine; uninfluenced by will or emotion; proceeding automatically; as, *mechanical* singing.
5. Pertaining to, governed by, or in accordance with, mechanics; as, *mechanical* work, energy; pertaining to the quantitative relations of force and matter, as distinguished from *mental, vital, chemical,* etc.; as, *mechanical* principles, cohesion, deposits. See MECHANICS.
6. Explaining phenomena in terms of mechanics; as, *mechanical* physiologists. See MECHANICS.
7. Automatic (more or less); as, a *mechanical* telegraph.
8. *Obs.* **a** Of the nature of a machine. **b** Practical. **c** Technical.
☞ For many *mechanical* phrases, see the second word.
me·chan'i·cal (mē·kăn'ĭ·kăl), *n.* **1.** A mechanic. *Archaic.*
2. *pl.* Mechanics; also, details of mechanism.
mechanical advantage. *Mech.* The "advantage" gained by the use of a mechanism in transmitting force; hence, the ratio of the force which performs useful work of a machine to the force which is applied to the machine; — called also ***actual mechanical advantage.*** The ***theoretical mechanical advantage*** is the ratio of the distance which the applied force moves to the distance which the resisting force moves.
mechanical construction. *Math.* Construction employing means other than the mere ruler and compasses, or effected by drawing other than mere right lines and circles; — opposed to *geometrical construction.*
mechanical drawing. A style of drawing made with the aid of instruments, such as squares, compasses, etc., as distinguished from freehand drawing; also, a drawing in this style. See ORTHOGRAPHIC PROJECTION.
mechanical engineering. See ENGINEERING, *n.*, 1. — **mechanical engineer.**
mechanical equivalent of heat. The relation between the values of the unit of heat and the unit of mechanical work; the mechanical energy which must be expended to raise the temperature of a unit weight of water one degree. It was first determined by Joule, and hence is called also *Joule's equivalent,* and represented by the symbol J. According to the most accurate determinations the value of J expressed in joules per calorie between 0° and 100° C. (mean) is 4.183, and at 20° C., 4.181.
mechanical gauge. See GAUGE, *n.*, 10.
mechanical hysteresis. *Mech.* A phenomenon, resembling magnetic hysteresis, observed in elastic bodies subjected to stress, resulting in less energy being given out by the body in recovery than is spent on it in deformation, and causing a slight set which may be temporary or permanent.
mechanical inspiration. *Theol.* See INSPIRATION, 2 a.
mechanical interlock. See INTERLOCK, *n.*, 2.
me·chan'i·cal·ism (mē·kăn'ĭ·kăl·īz'm), *n.* **a** = MECHANISM, 4. **b** Mechanical action or procedure.
me·chan'i·cal'i·ty (-kăl'ĭ·tĭ), *n.* Mechanicalness. *Rare.*
mechanical leech. *Med.* = 2d LEECH, 4.
me·chan'i·cal·ly, *adv.* of MECHANICAL. See -LY.
mechanical mixture. *Physics & Chem.* See MIXTURE, 10.
mechanical philosophy. = MECHANISM, 4.
mechanical power. *Mech.* Any of various simple machines, formerly supposed to be the elements from which complex machines are built up. See SIMPLE MACHINE. *Rare.*
mechanical quadrature. *Astron.* Approximative quadrature effected by parallel lines dividing a plane surface into parts small enough to be treated as rectilinear; integration by a similar method.
mechanical refrigeration. See REFRIGERATION, 1.
mechanical stoker. *Mach.* An apparatus for feeding fuel to and stoking furnaces.
mechanical theory. *Philos. & Biol.* = MECHANISM, 4 b.
mechanical tissue. *Bot.* Any tissue serving as a supporting framework in plants. See PARENCHYMA, PROSENCHYMA.
mechanical type. *Chem.* See TYPE THEORY.
mechanical ventilation. See VENTILATION.
mechanical wave. *Physics.* See WAVE, *n.*
mech'a·ni'cian (mĕk'ä·nĭsh'ăn), *n.* One skilled in the theory or construction of machines; a mechanic.
me·chan'i·co- (mē·kăn'ĭ·kō-). A combining form for *mechanic,* denoting: **a** *By mechanical means,* as in **me·chan'i·co·ther'a·py.** See -THERAPY. **b** *Mechanical and,* as in **me·chan'i·co·chem'i·cal, me·chan'i·co·corpus'cu·lar, me·chan'i·co·in'tel·lec'tu·al.**
me·chan'ics (mē·kăn'ĭks), *n.* [From MECHANIC, *adj.* See -ICS.] **1.** That part of physical science which treats of the action of forces on bodies. That part of *mechanics* which considers the action of forces in producing rest or equilibrium is called *statics;* that which relates to such action in producing motion is called *dynamics* (see also KINETICS and KINEMATICS). The term *mechanics* includes the action of forces on all bodies, whether solid, liquid, or gaseous. It is sometimes, however, and formerly was often, used distinctively of *solid* bodies only. The mechanics of *liquid bodies* is called also *hydrostatics* or *hydrodynamics,* according as the laws of rest or of motion are considered. The mechanics of *gaseous bodies* is called also *pneumatics.* The mechanics of fluids in motion with special reference to the methods of obtaining from them useful results constitutes *hydraulics.* ***Theoretical,*** *or* ***analytic, mechanics*** is concerned with the mathematical development of fundamental postulates, as Newton's laws of motion; — called also *pure, abstract,* or *rational mechanics.* ***Applied mechanics*** is concerned with the application of mechanical principles to actual mechanisms. ***Statistical mechanics*** is concerned with the application of the principles of statistics to the mechanics of a system consisting of a large number of parts having motions that differ continuously over a large range. Cf. WAVE MECHANICS, MATRIX MECHANICS, CELESTIAL MECHANICS.
2. The art of shaping and assembling the parts of machines and structures; — called also *practical mechanics, mechanic arts.*
3. The practical application of the principles of physics, esp. the laws of motion, and of the effect of forces upon the properties of bodies, to the construction, action, and work of machines or mechanical tools or devices.
4. The arrangement and relation of the working parts of a machine, device, or process; as, to study the *mechanics* of a watch or of running.
5. Mechanical details; as, the *mechanics* of play writing.
☞ *Mechanics* is usually construed as a singular noun.
mech'a·nism (mĕk'ä·nĭz'm), *n.* [NL. *mechanismus,* fr. Gr. *mēchanē* machine. See MECHANIC, *adj.*] **1.** The parts of a machine, taken collectively; the arrangement or relation of the parts of anything as adapted to produce an effect; as, the *mechanism* of a watch, of a sewing machine.
2. Mechanical operation or action.
He acknowledges nothing besides matter and motion; so that all must be performed either by *mechanism* or accident. *Bentley.*
3. *Kinematics.* A kinematic chain with one link fixed relatively to a standard, as the earth, and constituting the ideal machine, but considered only with regard to relative movements.
4. *Philos., Psychol. & Biol.* **a** A natural process, or nature as a whole, conceived as being machinelike or mechanically necessitated. **b** The doctrine that natural processes, and esp. the processes of life, are mechanically determined and capable of explanation by the laws of physics and chemistry. Cf. TELEOLOGY.
5. *Psychol.* **a** The combination of mental processes by which a result is obtained; as, the *mechanism* of invention. **b** The means unconsciously adopted to gratify a desire; as, a defense *mechanism.*
mech'a·nist (mĕk'ä·nĭst), *n.* **1.** A maker of machines; one skilled in mechanics. *Now Rare.*
2. One who regards the phenomena of nature as the effects of forces merely mechanical.
mech'a·nis'tic (-nĭs'tĭk), *adj.* **1.** Mechanically determined; as, a concept of a *mechanistic* universe.
2. Of or pert. to the theory of philosophic mechanism. See MECHANISM, 4.
3. = MECHANICAL.
— **mech'a·nis'ti·cal·ly** (-tĭ·kăl·ĭ), *adv.*
mech'a·nize (mĕk'ä·nīz), *v. t.;* -NIZED (-nīzd); -NIZ'ING (-nīz'ĭng). To make mechanical or machinelike; to reduce to a fixed mechanical routine; esp., to replace personnel with machinery wherever possible. — *v. i.* To work as a mechanic. — **mech'a·ni·za'tion** (-nĭ·zā'shŭn; -nī·zā'-), *n.* — **mech'a·niz'er** (mĕk'ä·nīz'ẽr), *n.*
mech'a·no- (mĕk'ä·nō-). A combining form, Greek *mēchano-,* from *mēchanē,* meaning *machine,* used to denote: **a** *Mechanics,* as in *mechanology.* **b** *Mechanism,* as in *mechanomorphic.* **c** *Mechanical means,* as in *mechanotherapy.*
mech'a·nol'a·ter (mĕk'ä·nŏl'ä·tẽr), *n.* [*mechano-* + *-later.*] One who exaggerates the value of machinery and machine-made products.
mech'a·nol'o·gy (-nŏl'ŏ·jĭ), *n.* [*mechano-* + *-logy.*] The science of mechanics or of machines.
mech'a·no·mor'phic (mĕk'ä·nō·môr'fĭk), *adj.* [*mechano-* + *-morphic.*] Of the form of a machine or mechanism; as, a *mechanomorphic* God; of or pert. to such a God. *Rare.*
mech'a·no·ther'a·peu'tics (-thĕr'ä·pū'tĭks), *n. Med.* Mechanotherapy. — **mech'a·no·ther'a·peu'tic** (-tĭk), *adj.*

meg'a-ce-phal'ic (-sē-făl'ĭk), *adj.* Also **meg'a-ceph'a-lous** (-sĕf'ȧ-lŭs). [*mega-* + Gr. *kephalē* head.] Large-headed. Specif., *Craniom.,* having a cranial capacity in excess of the mean (which for modern Europeans and Asiatics ranges from 1,500 to 1,600 cubic centimeters). — **meg'a-ce-pha'li-a** (-sē-fā'lĭ-ȧ), **meg'a-ceph'a-ly** (-sĕf'ȧ-lĭ), *n.*

Me-gac'er-os (mē-găs'ēr-ŏs), *n.* [NL., fr. *mega-* + Gr. *keras* horn.] *Paleontol.* A genus of European Pleistocene mammals of the deer family, including the Irish elk. Syn. *Megaloceros.* — **me-gac'er-ine** (-In; -īn), *adj. & n.* — **meg'a-cer'o-tine** (mĕg'ȧ-sĕr'ō-tĭn; -tīn), *adj. & n.*

Meg'a-chi'le (mĕg'ȧ-kī'lē), *n.* [NL., fr. *mega-* + Gr. *cheilos* lip.] *Zool.* A genus of leaf-cutting bees, by some regarded as the type of the family **Meg'a-chil'i-dæ** (-kĭl'ĭ-dē). — **meg'a-chi'lid** (-kī'lĭd), *n. & adj.*

Meg'a-chi-rop'ter-a (-kĭ-rŏp'tēr-ȧ), *n. pl.* [NL., fr. *mega-* + *Chiroptera.*] *Zool.* A suborder of Old World bats consisting of the fruit bats. — **meg'a-chi-rop'ter-an** (-ăn), *adj. & n.* — **meg'a-chi-rop'ter-ous** (-ŭs), *adj.*

meg'a-co'lon (-kō'lŏn), *n.* [*mega-* + *colon.*] *Med.* Abnormal enlargement of the colon.

meg'a-dont (mĕg'ȧ-dŏnt), *adj.* [*meg-* + *-odont.*] Having large teeth. See DENTAL INDEX.

Meg'a-dri'li (-drī'lĭ), *n. pl.* [NL., fr. *mega-* + Gr. *drilos,* explained by L. *verpus* a circumcised man (cf. L. *verpa* membrum virile), but taken in the sense of sperm duct.] *Zool.* A division of oligochaete worms including the larger terrestrial species, as the earthworms; — opposed to *Microdrili.*

meg'a-dy-nam'ics (-dī-năm'ĭks; -dĭ-), *n. Geol.* The mechanics of major earth movements.

meg'a-fog' (mĕg'ȧ-fŏg'; 184), *n.* A signaling apparatus having megaphones pointing in different directions for sounding instructions in code to befogged vessels.

meg'a-ga-mete' (-gȧ-mēt'), *n.* [*mega-* + *gamete.*] *Biol.* A macrogamete.

meg'a-kar'y-o-cyte' (-kăr'ĭ-ō-sīt'), *n.* [*mega-* + *karyo-* + *-cyte.*] *Anat.* A large cell having a lobulated nucleus and found esp. in the bone marrow. It is the source of blood platelets.

Meg'a-lad'a-pis (mĕg'ȧ-lăd'ȧ-pĭs), *n.* [NL., fr. *megal-* + *adapis,* a word mentioned by Gesner as used by Hermolaus Barbarus and taken by Cuvier to mean cony.] *Paleontol.* A genus of Pleistocene lemurs from Madagascar.

Meg'a-lae'ma (-lē'mȧ), *n.* [NL., fr. *mega-* + Gr. *laimos* throat.] *Zool.* A genus of scansorial barbets of southeastern Asia, often made the type of a family, **Meg'a-lae'mi-dæ** (-mĭ-dē), equiv. to Capitonidae (which see). — **meg'a-leme** (mĕg'ȧ-lēm), *n.*

Meg'a-la'ni-a (-lā'nĭ-ȧ), *n.* [NL., fr. *mega-* + Gr. *ēlainein* to wander, roam; in reference to the terrestrial nature of the saurian.] *Paleontol.* A genus of lizards related to the modern monitors, but of gigantic size, whose remains are found in the Pleistocene of Queensland.

Meg'a-la-trac'tus (-lȧ-trăk'tŭs), *n.* [NL., fr. *megal-* + Gr. *atraktos* spindle.] *Zool.* A genus of Australian marine snails, family Turbinellidae. *M. aruanus* is the largest known living gastropod.

meg'a-les'thete, meg'a-laes'thete (-lĕs'thēt), *n.* [*megal-* + *esthete.*] *Zool.* In the megalopores of certain chitons, one of the sense organs, usually pigmented and believed sensitive to light. Cf. MICRESTHETE, SHELL EYE.

meg'a-leth'o-scope (-lĕth'ō-skōp), *n.* [*meg-* + *alethoscope.*] A kind of stereoscope having a large magnifying lens.

Meg'a-lich'thys (-lĭk'thĭs), *n.* [NL., fr. *megal-* + Gr. *ichthys* fish.] *Paleontol.* A genus of large crossopterygian fishes whose remains are found in the Carboniferous. It typifies a family, **Meg'a-lich-thy'i-dae** (-lĭk-thĭ'ĭ-dē), of the order Rhipidistia.

meg'a-lith (mĕg'ȧ-lĭth), *n.* [*mega-* + *-lith.*] *Archaeol.* One of the huge stones or boulders used in various types of prehistoric monuments. See DOLMEN, *Illust.*

meg'a-lith'ic (-lĭth'ĭk), *adj.* Of, pertaining to, or designating, megaliths of the monuments composing them.

meg'a-lo- (mĕg'ȧ-lō-), **megal-.** A combining form, Greek *megalo-, megal-,* from *megas, megalou,* meaning *large, great,* as in *megalo*mania, *megalo*ps; specif., *Med, abnormal enlargement,* as in *megalo*cardia, *megalo*psia. The meanings of the following can be understood from the definitions of their elements.

megalocardia	**megalocornea**	**megalohepatia**
megalocarpous	**megalodactylia**	**megalomelia**
megalocephalia	**megalodactylism**	**megalopenis**
megalocephalic	**megalodactylous**	**megaloplastocyte**
megalocephalous	**megaloenteron**	**megalosplenia**
megalocephaly	**megalogastria**	**megalosyndactyly**
megalochirous	**megaloglossia**	**megaloureter**

meg'a-lo-bat'ra-chus (-băt'rȧ-kŭs), *n.* [NL., fr. *megalo-* + Gr. *batrachos* frog.] *Zool.* A genus consisting of the giant salamander. It is sometimes included in *Cryptobranchus.*

meg'a-lo-blast' (mĕg'ȧ-lō-blăst'), *n.* [*megalo-* + *-blast.*] A giant nucleated blood corpuscle. See ERYTHROBLAST. — **meg'a-lo-blas'tic** (-blăs'tĭk), *adj.*

meg'a-lo-cyte' (mĕg'ȧ-lō-sīt'), *n.* [*megalo-* + *-cyte.*] *Med.* An enlarged red blood corpuscle; macrocyte. — **meg'a-lo-cy-to'sis** (-sī-tō'sĭs), *n.*

Meg'a-lo-don (mĕg'ȧ-lō-dŏn), *n.* [NL., fr. *megal-* + *-odon.*] *Paleontol.* A genus of Devonian and Cretaceous lamellibranchs having ponderous shells. It is the type of a family, **Meg'a-lo-don'ti-dæ** (-dŏn'tĭ-dē).

meg'a-lo-graph' (mĕg'ȧ-lō-grăf'; 83), *n.* [*megalo-* + *-graph.*] A kind of camera lucida for microscopic or kaleidoscopic drawing.

meg'a-log'ra-phy (mĕg'ȧ-lŏg'rȧ-fĭ), *n.* Painting that covers a large surface and depicts a lofty subject. *Obs.*

meg'a-lo-kar'y-o-cyte' (-lō-kăr'ĭ-ō-sīt'), *n.* [*megalo-* + *karyo-* + *-cyte.*] *Anat.* A giant cell found in bone marrow.

meg'a-lo-ma'ni-a (-mā'nĭ-ȧ; 159), *n.* [NL., fr. *megalo-* + *-mania.*] **a** A mania or passion for, or for doing, great or grand things. **b** A disordered mental condition in which the patient has grandiose delusions. — **-ma'ni-ac** (-ăk), *n.* — **-ma-ni'a-cal** (-mȧ-nī'ȧ-kăl), *adj.*

Meg'a-lon'yx (mĕg'ȧ-lŏn'ĭks; mē-găl'ō-nĭks), *n.* [NL., fr. *megal-* + Gr. *onyx* claw.] *Paleontol.* A genus of large extinct slothlike Pliocene and Pleistocene edentate mammals of North America, by some made the type of a family, **Meg'a-lo-nych'i-dæ** (mĕg'ȧ-lō-nĭk'ĭ-dē).

meg'a-lo-phon'ic (-lō-fŏn'ĭk), *adj.* Megalophonous.

meg'a-loph'o-nous (mĕg'ȧ-lŏf'ō-nŭs), *adj.* [*megalo-* + Gr. *phōnē* voice.] **a** High-sounding. *Shelley.* **b** Having a loud or great voice.

meg'a-loph-thal'mus (-lŏf-thăl'mŭs), *n.* [NL., fr. *megal-* + Gr. *ophthalmos* eye.] *Med.* Largeness of the eyes.

meg'a-lop'ic (mĕg'ȧ-lŏp'ĭk), *adj.* Having large eyes; *Zool.,* of or pertaining to the megalops stage of a crustacean.

Meg'a-lop'i-dæ (-lŏp'ĭ-dē), *n. pl.* [NL.] *Zool.* A family of isospondylous fishes, sometimes included in Elopidae as a subfamily **Meg'a-lo-pi'nae** (-lō-pī'nē), of which *Megalops* is the type genus. — **meg'a-lo-pine** (mĕg'ȧ-lō-pīn), *adj. & n.*

meg'a-lop'o-lis (mĕg'ȧ-lŏp'ō-lĭs), *n.* [NL., fr. Gr. *megalopolis,* fr. *megas, megalē,* great + *polis* city.] A very large city. — **meg'a-lo-pol'i-tan** (-lō-pŏl'ĭ-tăn; -t'n), *adj. & n.* — **meg'a-lo-pol'i-tan-ism** (-Iz'm), *n.*

meg'a-lo-pore' (mĕg'ȧ-lō-pōr'; 181), *n. Zool.* One of the larger kind of pores found in the dorsal shell of certain chitons, containing a sense organ (*megalaesthete*).

meg'a-lops (mĕg'ȧ-lŏps), *n.* [NL., fr. *megal-* + Gr. *ōps* eye.] *Zool.* **1.** A larval stage following the zoea in the development of most crabs. In this stage the legs and abdominal appendages have appeared, the abdomen is relatively long, and the eyes are large. Called also **meg'a-lo'pa** (-lō'pȧ). These larvae were originally described as a distinct genus *Megalopa* (syn. *Megalops*).

Megalops of Common Crab (*Cancer irroratus*). (× 5)

2. [*cap.*] A genus of fishes (family Elopidae) of the order Isospondyli, containing several East Indian and South Pacific species closely related to and resembling the tarpon.

meg'a-lop'sy-chy (-lŏp'sĭ-kĭ; -lŏp-sī'-kĭ), *n.* [Gr. *megalopsychia,* fr. *megas, megalē,* great + *psychē* soul, mind.] Greatness of soul. *Obs.*

Meg'a-lop'ter-a (-lŏp'tēr-ȧ), *n. pl.* [NL., fr. *megalo-* + *-ptera.*] *Zool.* A small order of large insects, formerly included in the Neuroptera, with ample wings, the hind pair having a folded anal area. The larvae are aquatic and predatory.

Meg'a-lo-pyg'i-dae (mĕg'ȧ-lō-pĭj'ĭ-dē), *n. pl.* [NL., fr. *megalo-* + Gr. *pygē* buttocks, tail + *-idae.*] *Zool.* A family of American whitish moths known as *flannel moths.* The type genus is **Meg'a-lo-py'ge** (-pī'jē).

Meg'a-lo-sau'rus (mĕg'ȧ-lō-sô'rŭs), *n.* [NL., fr. *megalo-* + *-saurus.*] *Paleontol.* A genus of gigantic carnivorous dinosaurs of the group Theropoda. The genus occurs from the Lias to the Wealden, and is the type of a widely distributed family, **Meg'a-lo-sau'ri-dae** (-sô'rĭ-dē). — **meg'a-lo-saur'** (mĕg'ȧ-lō-sôr'), *n.* — **meg'a-lo-sau'ri-an** (-sô'rĭ-ăn), *adj. & n.* — **meg'a-lo-sau'roid** (-roid), *adj.*

meg'a-lo-scope' (mĕg'ȧ-lō-skōp'), *n.* [*megalo-* + *-scope.*] *Med.* An endoscope with a magnifying apparatus. — **meg'a-los'co-py** (mĕg'ȧ-lŏs'kō-pĭ; mĕg'ȧ-lō-skŏ'pĭ), *n.*

meg'a-lo-sphere' (-sfēr'), *n.* [*megalo-* + *-sphere.*] *Zool.* The large-chambered initial shell of the sexual individuals of certain dimorphic species of Foraminifera. — **meg'a-lo-spher'ic** (-sfĕr'ĭk), *adj.*

-meg'a-ly (-mĕg'ȧ-lĭ). *Med.* A combining form, Modern Latin *-megalia,* from Greek *megalē,* fem. of *megas,* great, denoting *abnormal enlargement of a* (specified) *part,* as in acro*megaly,* gastro*megaly.*

Meg'a-mas-tic'to-ra (mĕg'ȧ-măs-tĭk'tō-rȧ), *n. pl.* [NL., fr. *mega-* + Gr. *mastiktōr* scourger, fr. *mastix* whip.] *Zool.* A division of sponges equiv. to Calcarea. — **meg'a-mas-tic'to-ral** (-răl), *adj.*

meg.am'e-ter (mĕg.ăm'ē-tĕr), *n.* [F. *mégamètre.* See MEGA-; -METER.] **1.** An instrument for determining longitude by observation of the stars.
2. (*pron.* mĕg'ȧ-mē'tĕr). Also **meg'a-me'tre.** See MEGA- **b.**
3. A micrometer. *Rare.*

Meg'a-neu'ra (mĕg'ȧ-nū'rȧ), *n. pl.* [NL., fr. *mega-* + *-neura.*] *Paleontol.* An extinct genus of insects (order Protodonata) known only from the Upper Carboniferous of Commentry, France. It contained the largest known insects.

Me-ga'nos for-ma'tion (mȧ-gä'nōs). [From *Meganos* ranch or land grant, near Martinez, Calif.] *Geol.* The middle division of the marine Eocene of California.

meg'a-phone (mĕg'ȧ-fōn), *n.* [*mega-* + *-phone.*] A device to magnify sound, or direct it in a greater volume, as a very large funnel used as an ear trumpet or as a speaking trumpet. — **meg'a-phon'ic** (-fŏn'ĭk), *adj.*

meg'a-phone, *v. t. & i.* To speak or address through or as if through a megaphone. — *meg'a-phon'ist* (-fŏn'ĭst), *n.*

meg'a-pho-tog'ra-phy (-fō-tŏg'rȧ-fĭ), *n.* Uranophotography. — **meg'a-pho'to-graph'ic** (-fō'tō-grăf'ĭk), *adj.*

Me-gaph'y-ton (mē-găf'ĭ-tŏn), *n.* [NL., fr. *mega-* + Gr. *phyton* plant.] *Paleontol.* A genus of fossil tree ferns represented by trunks with distichous scars.

meg'a-pod (mĕg'ȧ-pŏd), *adj.* Large-footed.

meg'a-pode (-pōd), *n.* Also **meg'a-pod.** [*mega-* + Gr. *pous, podos,* foot.] Any gallinaceous bird of the family **Meg'a-po-di'i-dae** (-pō-dī'ĭ-dē), which includes the maleo, the leipoa, and the brush turkeys. They inhabit Australia and neighboring islands north and east to the Philippines and Ladrones. They are often called ***mound birds,*** from their peculiar habit of heaping up a mass of vegetable debris in which their eggs are laid and hatched. The typical genus is **Meg'a-po'di-us** (-pō'dĭ-ŭs), which includes the Australian species, called *jungle fowls.*

meg'a-pros'o-pous (-prŏs'ō-pŭs), *adj.* [*mega-* + *-prosopous.*] *Anat.* Characterized by a large face.

Me-gap'ter-a (mē-găp'tēr-ȧ), *n.* [NL., fr. *mega-* + *-ptera.*] *Zool.* The genus consisting of the humpback whales. It is the type of a subfamily, **Me-gap'ter-i'nae** (-ĭ'nē). — **me-gap'ter-ine** (mē-găp'tēr-īn; -ĭn; 156), *adj.*

Meg'a-ren'si-an (mĕg'ȧ-rĕn'sĭ-ăn), *adj. & n.* Megarian.

Meg'a-rhi'nus (mĕg'ȧ-rī'nŭs), *n.* [NL., fr. *mega-* + *-rhinus.*] *Zool.* A genus of American tropical mosquitoes having a curved beak and greenish or bluish coloration.

Meg'a-rhys'sa (mĕg'ȧ-rĭs'ȧ), *n.* [NL., fr. *mega-* + *Rhyssa.*] *Zool.* A genus of large ichneumon flies with a long slender ovipositor. The common species of the eastern United States (*M. lunator*) is a parasite of the larva of the pigeon horntail.

Me-gar'i-an (mē-gâr'ĭ-ăn; 79), *adj.* Of or pertaining to Megara, a city of ancient Greece, or the Megarian school. — *n.* A native or inhabitant of Megara; a member or adherent of the Megarian school. — **Me-gar'i-an-ism** (-Iz'm), *n.*

Me-et'a-bel (mē-ĕt'ȧ-bĕl). *D. Bib.*
meet'a-ble, *adj.* See -ABLE.
meeth. + MEAD, a drink; METHE.
meet'ness, *n.* See -NESS.
me-fit'ic. Mephitic. *Ref. Sp.*
me-fit'is. Mephitis. *Ref. Sp.*
meg'a-bar'. See MEGA- **b.**
meg'a-car'y-o-cyte'. VAR. of MEGAKARYOCYTE.
meg'a-cosm (mĕg'ȧ-kŏz'm), *n.* [*mega-* + Gr. *kosmos* world.] = MACROCOSM. [See MEGA- **b.**]
meg'a-cou-lomb' (-kōō-lŏm'), *n.* [MEGA- **b.**]
meg'a-cy'cle, *n. Radio.* See MEGA- **b.**
meg'a-dine. Megadyne. *Ref. Sp.*
meg'a-dyne (mĕg'ȧ-dĭn), *n.* See MEGA- **b.**
Me-gae'ra (mē-jē'rȧ), *n.* [L., fr. Gr. *Megaira.*] See ERINYS.
meg'a-erg' (mĕg'ȧ-ûrg'), *n. Physics.* See MEGA- **b.**
meg'a-far'ad (-fär'ăd), *n.* See MEGA- **b.**
meg'a-joule' (mĕg'ȧ-joul'; -jōōl'; *see* JOULE), *n.* See MEGA- **b.**
megal-. = MEGALO-.
meg'al-erg' (mĕg'ăl-ûrg'), *n.* See *megal-* + *erg.*] = MEGERG.
Meg'a-le'si-a (mĕg'ȧ-lē'sĭ-ȧ; -zhĭ-ȧ), **Mag'a-len'si-a** (-lĕn'sĭ-ȧ), *n. pl.* [L., fr. Gr. *Megalē* the Great, a surname of Cybele, the Great Mother.] See MAGNA MATER. — **Meg'a-le'sian** (-shăn; -zhăn), **-len'si-an** (-lĕn'sĭ-ăn), *adj.*
-me-ga'li-a. [NL.] = -MEGALY.
Meg'a-loc'er-os (mĕg'ȧ-lŏs'ēr-ŏs), *n.* [NL., fr. *megalo-* + Gr. *keras* horn.] Syn. of MEGACEROS.
meg'a-lo-dont' (mĕg'ȧ-lō-dŏnt'), *adj.* = MEGADONT. — **meg'a-lo-dont'i-a** (-dŏn'shĭ-ȧ), *n.*
meg'a-lo'pi-a (-lō'pĭ-ȧ), *n.* Also **meg'a-lop'si-a** (mĕg'ȧ-lŏp'sĭ-ȧ), *n.* [NL., fr. *megal-* + *-opia, -opsia.*] = MACROPIA.
Meg'a-lor'nis (-lôr'nĭs), *n.* [NL.] Syn. of GRUS, 2.
Meg'a-lor-nith'i-dae (-lôr-nĭth'ĭ-dē), *n. pl.* [NL.] Syn. of GRUIDAE.
Meg'a-lu'ri-dae (-lū'rĭ-dē), *n. pl.* [NL.] *Zool.* Syn. of AMIDAE **a.**
meg'a-meria (mĕg'ȧ-mē'rĭ), *n.* = MACROMERIA.
meg'am'pere, *n.* See MEGA- **b.**
meg'a-nu'cle-us (mĕg'ȧ-nū'klē-ŭs), *n.* = MACRONUCLEUS.
meg'a-par'sec, *n.* See MEGA- **b.**
meg'a-phyl'lous, *adj.* See -PHYLLOUS.
Meg'a-pod'i-dae (-pŏd'ĭ-dē), *n. pl.* [NL.] = MEGAPODIIDAE.
meg-gap'o-lis (mĕ-găp'ō-lĭs), *n.* [NL., fr. *mega-* + Gr. *polis* city.] A chief city. *Obs.*

Me·gar'ic (mĕ·găr'ĭk), *adj.* Megarian.

meg'a·ron (mĕg'ȧ·rŏn), *n.; pl.* -RA (-rȧ). [Gr., fr. *megas* great.] *Gr. Archaeol.* **a** The great central hall of the Mycenaean house, normally rectangular, with a circular hearth in the center. **b** A chasm or pit sacred to Demeter.

meg'a·sclere (mĕg'ȧ·sklēr), *n.* Also **meg'a·scle'rum** (-sklē'rŭm). [*mega-* + Gr. *sklēros* hard.] *Zool.* A large spicule; specif., one of the supporting or skeletal spicules of sponges. — **meg'a·scler'ic** (-sklĕr'ĭk), *adj.* — **meg'a·scle'rous** (-sklēr'ŭs), *adj.*

meg'a·scope (-skōp), *n.* [*mega-* + *-scope.*] A kind of magic lantern for throwing a magnified image on a screen.

meg'a·scop'ic (-skŏp'ĭk), *adj.* Also **meg'a·scop'i·cal** (-ĭ·kăl). **1.** Enlarged or magnified; — said of images, etc. **2.** *Petrog.* Visible to the unaided eye; — called also *macroscopic.* — **meg'a·scop'i·cal·ly,** *adv.*

meg'a·seism (mĕg'ȧ·sīz'm; -sīs'm), *n.* [*mega-* + *seism.*] A violent earthquake. — **meg'a·seis'mic** (-sīz'mĭk; -sīs'-), *adj.*

Meg'a·so'ma (mĕg'ȧ·sō'mȧ), *n.* [NL., fr. *mega-* + *-soma.*] *Zool.* A genus of lamellicorn beetles (subfamily Dynastinae) chiefly of tropical America. See ELEPHANT BEETLE.

meg'a·spo·range' (mĕg'ȧ·spō·rănj'), *n.* A megasporangium.

meg'a·spo·ran'gi·um (-spō·răn'jĭ·ŭm), *n.; pl.* -GIA (-ȧ). [NL., fr. *mega-* + *sporangium.*] *Bot.* A sporangium which develops only megaspores. Cf. MICROSPORANGIUM.

meg'a·spore' (mĕg'ȧ·spōr'; 181), *n.* [*mega-* + *spore.*] **a** *Bot.* A kind of asexual spore produced by seed plants and some ferns, which always gives rise to the female prothallium or gametophyte. The embryo sac in seed plants is a megaspore. Cf. MICROSPORE. **b** *Zool.* = MACROSPORE **b.** — **meg'a·spor'ic** (-spŏr'ĭk), *adj.*

meg'a·spo'ro·phyll (-spō'rō·fĭl; 181), *n.* *Bot.* A sporophyll which develops only megasporangia.

meg'a·syn·thet'ic (-sĭn·thĕt'ĭk), *adj.* [*mega-* + *synthetic.*] Forming an extensive or ponderous synthesis; — a term applied to the American Indian languages. See AGGLUTINATIVE LANGUAGES.

Meg'a·the'ri·um (-thē'rĭ·ŭm), *n.* [NL., fr. *mega-* + *-therium.*] *Paleontol.* A genus of ground sloths found in the Pleistocene of America. Some of them, as *M. americanum,* the best-known species, were of gigantic size. They are allied to the sloths and anteaters, the skull and dentition resembling those of the former and the vertebrae the latter. The skin was probably unarmored. The genus is the type of a family, **Meg'a·the·ri'i·dae** (-thē·rĭ'ĭ·dē). — **meg'a·there** (mĕg'ȧ·thēr), *n.* — **meg'a·the'ri·an** (-thē'rĭ·ăn), *adj.* — **meg'a·the'rine** (-ĭn; -īn; 156), *adj.* — **meg'a·the'ri·oid** (-ĭ·oid), **meg'a·the'roid** (-thē'roid), *adj. & n.*

Megatherium (*M. americanum*). (1/75)

meg'a·therm (mĕg'ȧ·thûrm), *n.* [*mega-* + *-therm.*] *Bot.* Any plant which requires great heat combined with very abundant moisture for its successful growth. Cf. MESOTHERM, MICROTHERM. — **meg'a·ther'mic** (-thûr'mĭk), *adj.*

meg'a·type (mĕg'ȧ·tīp), *n.* [*mega-* + *-type.*] *Photog.* An enlarged copy of a picture or negative, produced by a photographic process. — **meg'a·typ'y** (-tĭp'ĭ), *n.*

meg'a·zo'oid (-zō'oid), *n.* [*mega-* + *-zooid.*] *Biol.* One of the larger of the two kinds of zooids of some organisms.

meg'a·zo'o·spore (-zō'ō·spōr; 181), *n.* [*mega-* + *zoospore.*] *Bot.* A large zoospore, or asexual swarm cell.

Me·gil'lah (mĕ·gĭl'ȧ), *n.* [Heb. *mĕgillāh* roll, scroll.] One of the Megilloth.

Me·gil'loth (mĕ·gĭl'ōth), *n. pl.* [Heb. *mĕgillōth* rolls.] *Jewish Lit.* Five books of the Hagiographa (Canticles, Ruth, Ecclesiastes, Esther, and Lamentations), which are respectively read in the synagogue on the feasts of the Passover, Pentecost, Tabernacles, and Purim, and on the anniversary of the destruction of Jerusalem.

me·gilp' (mĕ·gĭlp'), **me·gilph'** (mĕ·gĭlf'), *n.* Also **ma·gilp'** (mȧ·gĭlp'), **me·guilp',** etc. [Origin unknown.] A gelatinous preparation commonly of linseed oil and mastic varnish, used by artists as a vehicle for colors. — *v. t.* To treat with or as with megilp.

meg'ohm' (mĕg'ōm'), *n.* [*meg-* + *ohm.*] A million ohms.

meg'ohm·it (mĕg'ōm·ĭt), *n.* Also **meg'om·it.** [From MEGOHM.] Any of various preparations of thin sheets of mica cemented together. It is used as an insulator in electrical work.

Syn. — Despondency, sorrow, mournfulness, depression, low spirits, hypochondria. — MELANCHOLY, SADNESS, DEJECTION, GLOOM. SADNESS is the general term for depression of spirits, of whatever degree; MELANCHOLY, in modern usage, is (esp.) settled depression; the word often suggests little more than pensive, sometimes pleasing, sadness; as, "a feeling of *sadness* and longing, that is not akin to pain" (*Longfellow*); "Mellow, *melancholy*, yet not mournful, the tone seemed to gush up out of the deep well of her heart" (*Hawthorne*). DEJECTION suggests esp. the mood of one who is downcast, discouraged, or dispirited; GLOOM is profound despondency or heaviness of spirits; as, "As high as we have mounted in delight, in our *dejection* do we sink as low" (*Wordsworth*); "Miss Brown looked . . . depressed almost to *gloom*" (*Mrs. Gaskell*). Cf. DESPONDENCY, SORROW, MISERY, DISTRESS, TEDIUM, PENSIVE.

Ant. — Joy, gaiety, merriment, happiness, gladness.

memorial arch. A monumental structure pierced by an arched passageway, which is often flanked by smaller arches and surmounted by an architrave and attic. The type had its origin among the Romans of antiquity: it supported much adornment by sculptured figures, inscriptions, and columns, and commemorated a notable victory, person, or event. Among Roman arches the best-known are that of *Titus* on the Via Sacra (Rome), with reliefs exhibiting the plunder of Jerusalem; of *Trajan* (at Benevento), dedicated in 114, having a single arch and illustrating in reliefs Trajan's life and Dacian triumphs; of *Septimius Severus*, built by the senate, in 205, in the Forum, to honor the emperor and his two sons, whose statues in a six-horse car originally surmounted it; and of *Constantine*, spanning the Via Triumphalis near the Colosseum, built by that emperor in 311 to celebrate his victory over Maxentius. Modern memorial arches of note are: ***Arc du Carrousel*** ("of the tilting yard"), near the Tuileries, Paris, built by Napoleon I to commemorate his victories of 1805–6; ***arc de triomphe,*** an arch commemorating a victory; specif. [*cap.*] ***Arc de l'Etoile*** ("of the star"), heading the Champs Elysées, the largest existing arch, begun by Napoleon in 1806, but not finished until 1836.

Syn. — MEMORY, REMEMBRANCE, RECOLLECTION, REMINISCENCE. MEMORY, in ordinary usage, is the general term for the faculty by which past impressions are reproduced, or for the revived impressions themselves; as, "Her *memory* . . . went slipping back upon the golden days" (*Tennyson*). In the pl. *memory* suggests esp. somewhat intimate or personal recollections; as, "*memories* of tranquil childhood" (*Shelley*). REMEMBRANCE (now somewhat rare) suggests esp. the state of being remembered or the act of keeping in mind; as, "This do in *remembrance* of me" (*Luke* xxii. 19). RECOLLECTION often implies a conscious effort to recall; as, "Half a word fixed upon or near the spot, is worth a cart-load of *recollection*" (*T. Gray*). REMINISCENCE (chiefly pl.) now suggests esp. the retrospective recalling of happenings, events, or experiences in which one has had part; as, "The *reminiscences* [of my father] kindly contributed by his different friends" (*H. Tennyson*); "I believe that as we lose our powers of *memory* we may increase the power of *reminiscence*, that is, of recalling what we want in small quantities for a short time" (*Jowett*). *Recollection* (in the pl.) is frequently used in a sense parallel with that of *reminiscence*, but less intimate than the corresponding sense of *memory* (in the pl.); as, "You ask me to put down a few *recollections* of your father" (*Lecky*). Cf. REMEMBER.

Men·de'li·an (mĕn·dē'lĭ·ăn; -dēl'yăn; 159), *adj.* [See MENDEL'S LAW.] *Biol.* Of or pert. to Mendel; of, pert. to, or in accordance with Mendel's law. — *n.* An advocate or exponent of Mendel's law. — **Men·de'li·an·ism** (-lz'm). — **Men·de'li·an·ist** (-lĭst), *n.*
Mendelian character. A unit character.
Mendelian factor *or* **unit.** *Biol.* A gene.
Mendelian ratio. The ratio of occurrence of types of offspring in any cross involving Mendelizing characters; typically the 3:1 ratio shown by the offspring in the F_2 generation of parents which differ from each other in respect to some one character.
Men'del·ism (mĕn'dĕl·lz'm), *n.* The principles or the operations of Mendel's law; also, Mendelian inheritance; Mendelianism. — **Men'del·ist** (-lĭst), *n. & adj.* — **Men'del·ize** (-lz), *v. t. & i.*

Men'del's law (mĕn'dĕlz). The law observed in the inheritance of many characters in animals and plants, discovered by Gregor J. Mendel (Austrian Augustinian abbot, 1822–84) in breeding experiments with peas. He showed that the height, color, and other characters depend on the presence of determining factors (***genes***) which behave as units. The following example shows the operation of the law: Tallness being due to a factor *T* and shortness to a factor *t*, a tall plant, arising by the union in fertilization of two germ cells both bearing the factor *T*, is *TT*; a dwarf is *tt*. Crossing these, crossbreds, *Tt*, result (called generation F_1). In their formation a process (**Mendelian segregation**) occurs such that germ cells, whether male or female, are produced of two kinds, *T* and *t*, in equal numbers. *T* and *t*, being thus alternative, are called ***allelomorphs.*** The offspring, generation F_1, which arise from the chance union of these germ cells in pairs, according to the law of probability, are on an average in the following proportions:

1 *TT* : 2 *Tt* : 1 *tt*;

and thus plants (***homozygotes***) pure in tallness (*TT*) and dwarfness (*tt*), as well as crossbreds (***heterozygotes***) (*Tt*), are formed. Frequently, the individual *Tt* is itself indistinguishable from the pure form *TT*. The factor *T* is then called ***dominant***, and *t* called ***recessive***. Generation F_1, containing only the *Tt* form, consists entirely of dominants (tall plants) and generation F_2 consists of three dominants (2 *Tt*, 1 *TT*) to one dwarf (*tt*), which is called *recessive*. Such qualitative and numerical regularity has been proved to exist in regard to very diverse qualities or characters which compose living things, both wild and domesticated, as colors of flowers, of hair or eyes (cf. MULTIPLE FACTORS), patterns, structure, chemical composition, and power of resisting certain diseases. The diversity of forms produced in crossbreeding by horticulturists and fanciers generally results from a process of analytical variation or recombination of the factors composing the parental types. See GENE, LINKAGE, CROSSING OVER; cf. NEO-MENDELISM.
Men'dels·soh'nĭ·an (mĕn'dĕl·sō'nĭ·ăn; 159), *adj.* Also **Men'dels·soh'nic** (-nĭk). Pertaining to or characteristic of Mendelssohn-Bartholdy or his music.

2. Belonging to a retinue or train of servants; serving.
3. Pertaining or appropriate to servants, esp. domestic servants; servile; low; mean. "*Menial* offices." *Swift.*
Syn. — MENIAL, SERVILE, SLAVISH. MENIAL is now used derogatorily of services or offices which, it is implied, are sordid or degrading; as, "Her ladyship was of humble, I have heard even *menial,* station originally" (*Thackeray*). SERVILE now carries as its chief implication that of mean or cringing submission; SLAVISH connotes utter abjectness, or excessively laborious toil; as, "mean, *servile* compliance" (*Burns*); "Fear took hold on me from head to foot — *slavish* superstitious fear" (*Stevenson*); "*slavish* harnessed toil" (*Carlyle*). Both *servile* and *slavish* are used of unduly close dependence upon an original or model; as, "It is the business of art to imitate nature, but not with a *servile* pencil" (*Goldsmith*); "Close [translation], but not so close as to be *servile*" (*Cowper*); "He who *slavishly* adheres to rule displays pedantry" (*P. Barry*). Cf. SERF, SERVITUDE, BASE, OBEDIENT, HUMBLE.

Men'non·ite (mĕn'ŏn·īt), *n.* One of a denomination of evangelical Protestant Christians, formed from the Anabaptist movement of the 16th century, and so called from Menno Simons (1492–1559) of Friesland, one of their leaders. Historically they have stood for Scriptural authority, nonresistance, plainness of dress, rejection of oaths, adult baptism, aloofness from the state, exercise of the ban, or excommunication, restriction of marriage to members of the group, and practice of the rite of foot washing. The following table gives some of the larger branches of Mennonites in the United States.

Name	Date; Founder, etc.	Distinctive Features, etc.
Mennonite Church	Settled Germantown, Pa., 1683.	Largest body; conservatively progressive.
Amish M. C.	European origin, 1698; Jacob Amman or Amman).	Plainness and peculiarity of dress; use of hooks instead of buttons, etc.
Old Order Amish M. C.	Separated from above 1865.	Objections to certain innovations in worship, etc.
Reformed M. C.	Pa.; 1812; Francis and John Herr.	Similar to Amish reform in Europe.
Church of God in Christ	Ohio; 1859; John Holdeman.	
Old Order M. C. (Wisler)	Jacob Wisler; 1870.	Opposes Sunday schools, missions, higher education, use of English in church, etc.
General Conference of the M.C. of No. Amer.	1860 John H. Oberholtzer.	Union movement, interested in education and missions.
Mennonite Brethren in Christ	1853–83	Evangelistic and missionary; baptism by immersion.
Defenseless Mennonites	1866; Henry Egli.	Emphasizes conversion; largely German.
M. Brethren C. of North America	1873–76; migration from Russia.	Immersion backward.
Hutterian Brethren (Mennonites), formerly the Bruederhoef M. C.	1533. Jacob Hutter.	Communistic; use of a peculiar German dialect. See HUTTERIAN BRETHREN, 3 b VOCAB.

Men'non·ite (mĕn'ŏn·īt), *adj.* Of or pertaining to the Mennonites or to their doctrines.

‖**me'no** (mā'nō), *adv.* [It.] *Music.* Less; — used in directions.

me'no- (mĕn'ō-). [See MOON.] A combining form, Greek *mēno-*, from *mēn, mēnos*, meaning *month*, denoting *connection with*, or *relation to, menstruation*, as in *meno*pause. The meanings of the following can be understood from the definitions of their elements.

menometastasis	menorrhea	menosepsis
menophania	menorrheic	menostasis
menoplania	menorrhoea	menostasis
menorrhagia	menorrhoeic	menostatic
menorrhagic	menoschesis	menostaxis
menorrhagy	menoschetic	menoxenia

men'o-. *Zool.* A combining form from Greek *menein*, to remain, as in *Meno*rhyncha.

Me·noe'ceus (mē·nē'sŭs), *n.* [L. *Menoeceus*, fr. Gr. *Menoikeus.*] *Gr. Myth.* A descendant of the warriors who sprang from the teeth of the dragon slain by Cadmus. Tiresias had prophesied that the voluntary death of a man thus descended would appease Ares for the killing of the dragon, and give the Thebans success in the siege by the Seven. Menoeceus accordingly slew himself.

men'sur·a·ble (mĕn'shŏŏr·ȧ·b'l), *adj.* [LL. *mensurabilis*, fr. *mensurare* to measure, fr. *mensura.* See MEASURE; cf. MEASURABLE.] **1.** Capable of being measured; measurable.
2. Of or pertaining to, mensurable music.
3. Fair; just; as, a *mensurable* man. *Obs.*
— **men'sur·a·bil'ī·ty** (-ȧ·bĭl'ĭ·tĭ), *n.* — **men'sur·a·ble·ness,** *n.* — **men'sur·a·bly,** *adv.*

mensurable music. [L. *musica mensurata*]. Music measured according to a system of meter or rhythm, as disting. from *plain song*; specif., a style of music, originating about 1100, distinguished by a complicated notation of time values to make possible the union of simultaneous but independent voice parts. The notation included the notes called *large, long, breve, semibreve, minim*, and others, of which each had thrice the length of the next denomination in *perfect* time — so called out of reverence for the Trinity — and twice that of the next in *imperfect* time. Division of the large into longs was called *major mode*; of the long into breves, *minor mode*; of the breve into semibreves, *time*; of the semibreve into minims, *prolation* (added later, and sometimes confusingly called *major* or *minor*, instead of "perfect" or "imperfect"). These values with their common symbols were thus:

Mode	Major	perfect	1 large = 3 longs	‖=‖ ‖‖ or ‖=‖ ‖‖
		imperfect	1 large = 2 longs	‖=‖ ‖ or ‖=‖ ‖
	Minor	perfect	1 long = 3 breves	‖‖ or ‖*
		imperfect	1 " = 2 "	‖ or ‖
Time		perfect	1 breve = 3 semibreves	)
		imperfect	1 " = 2 "	¢
Prolation		perfect, or major	1 semibreve = 3 minims	• †
		imperfect, or minor	1 " = 2 "	(no dot)

* The *number* of the bars showed the number of longs to the large: their *length*, the number of breves to the long.
† Placed within the sign for *time*.

The normal time could be quickened by a shortening of notes by one third or one half, called *diminution*, and then restored by *augmentation*. It could also be modified by a scheme with fractional symbols, called *proportion*, and by a doubling of certain notes, called *alteration*. The time values of slurred notes (*ligatures*) had a special treatment. Mensurable music led to the development of counterpoint and of the simpler modern notation.

men'su·ral (mĕn'shŏŏ·răl), *adj.* [LL. *mensuralis.*] **a** Of or pert. to measure. **b** *Music.* = MENSURABLE, 2.

men'su·ral·ist (-lĭst), *n.* A composer of mensurable music.

men'su·rate (-rāt), *v. t.* [LL. *mensuratus*, past part. of *mensurare.* See MEASURE, *v.*] To measure. *Rare.*

men'su·ra'tion (mĕn'shŏŏ·rā'shŭn), *n.* [LL. *mensuratio.*] **1.** Act, process, or art, of measuring.
2. The branch of applied geometry concerned with finding the length of lines, areas of surfaces, and volumes of solids, from certain simple data of lines and angles.

men'su·ra'tion·al (-ăl), *adj.* Of or pert. to mensuration.

men'su·ra'tive (mĕn'shŏŏ·rā'tĭv), *adj.* Adapted for measuring.

-ment (-mĕnt). [F., fr. L. *-mentum.*] A suffix forming nouns chiefly from verbs (orig. in words from French) with meanings as follows: **1. a** *Concrete result* or *thing* (arising from causal association with the verb senses, often where the verb itself has not been adopted); as in entangle*ments* (objects that entangle); rent affords a yearly incre*ment* (resulting increase); fragments (pieces broken); an attach*ment* (thing attached). **b** *Concrete means* or *instrument*, as in complement, nutriment, ornament.
2. *Action* (from the active verb senses); act or fact of doing (what the verbal root denotes); as in abridg*ment*, act of abridging; — often implying *process, continuance, manner, art, amount*, or other modification, as of time or place; as in develop*ment*, the fact or process of developing; govern*ment*, the method or art of governing; embezzle*ments*; a cantonment, place where troops are cantoned.
3. *State* or *quality* (from passive and neutral verb sense, and from participial adj. senses); *state, condition, quality* or *degree*, of being (what the root word denotes); as in amaze*ment*, state of being amazed; sometimes also with special implication, as of *manner, time, place*, etc.; as in proud of his adorn*ment*; convenient arrange*ment*.
☞ The reference "See -MENT" is sometimes given as the only definition of a word, if its meaning can be readily gathered from the definitions of the suffix and the root word.

men'tal (mĕn'tăl; -t'l), *adj.* [L. *mentum* the chin.] *Anat. & Zool.* Of or pertaining to the chin, or median part of the lower jaw, or the mentum of an insect; genial. — *n.* A mental plate, scale, or shield (of a fish or reptile).

men'tal (mĕn'tăl; -t'l), *adj.* [F., fr. LL. *mentalis*, fr. *mens, mentis*, the mind. See MIND.] **1.** Of or pertaining to mind; in the broadest sense, referring to the integrated activity of the organism; as, *mental* life, adjustments, hygiene; — often with emphasis (1) on intellectual rather than emotional activity; as, *mental* tests, deficiency; (2) on internal as against overt motor activity; as, *mental* work, arithmetic; or (3) on internal as against sensory processes; as, *mental* image, pain.
2. a Of, pertaining to, or affected with, mental deficiency or disorder; as, *mental* patients. **b** Intended for or devoted to care of the insane; as, a *mental* asylum, hospital.
Syn. — MENTAL, INTELLECTUAL, INTELLIGENT. MENTAL, designating all processes, powers, and attributes of the mind, is contrasted esp. with *bodily*; INTELLECTUAL, with EMOTIONAL, MORAL, and the like; as, "The intelligence, . . . cunning, and other *mental* qualities of spiders are well known" (*Lindsay*); "It was only on her *intellectual* side that Elizabeth touched the England of her day. All its moral aspects were simply dead to her" (*J. R. Green*). *Mental* never applies to persons; *intellectual* may apply to either persons or qualities; as, "men who have the highest *mental* training" (*M. Arnold*); "a miracle of *intellectual* delicacy like Dr. Newman's" (*id.*). As compared with *intelligent*, INTELLECTUAL implies esp. interest in or devotion to pursuits or studies which exercise the intellect; INTELLIGENT, which may be used of animals as well as persons, suggests native sagacity or quickness of perception (cf. SHREWD, SENSIBLE), and facility in the constructive application of principles formulated through mental effort; as, an *intelligent* pupil, spaniel; *intelligent* comprehension; "No abstract, *intellectual* plan of life" (*Browning*). Cf. MIND.
Ant. — Physical; sensory; external. See BODILY.

men'tal, *n.* In *pl.*, mental faculties.

mental age. See AGE, 15.

mental alienation. Insanity.

mental arithmetic. Solution of arithmetical problems by mental processes, unassisted by written figures.

mental blindness. See BLINDNESS, 1.

mental chemistry. *Psychol.* Associationism, admitting in a mental compound properties not in its elements.

mental deafness. See DEAFNESS.

mental deficiency. *Psychol.* Lack of intelligence such as to disqualify an individual from parity with his fellows in school or in later life; feeble-mindedness. In the most extreme degree (*idiocy*) the individual (*idiot*) is incapable of connected speech or of avoiding the common dangers of life; in the next degree in order upwards (*imbecility*) the individual (*imbecile*) commonly is incapable of earning a living; and in the mildest degree (*moronity*) the individual (*moron*) requires supervision in work, recreation, and the general conduct of life.

mental disease. A disease characterized esp. by mental symptoms; mental disorder; insanity.

mental foramen. *Anat.* A foramen for the passage of blood vessels and a nerve, on the outside of the lower jaw on each side near the chin.

men'ise (mĕn'īz), *n.* [OF. *menuise.*] Little fish; minnows. *Obs.*

me'nī·son, *n.* [OF. *menison, menision.*] Dysentery. *Obs.*

Men'kal·ī·nan' (mĕn'kăl·ī·năn'), *n.* [Ar. *mankib dhi-al-inān*, lit., the shoulder of the rein holder.] See STAR, *Table.*

Men'kar (mĕn'kär), *n.* [Ar. *minkhār* nose.] See STAR, *Table.*

Men'kib (mĕn'kĭb), *n.* [Ar. *mankib* shoulder.] See STAR, *Table.*

Men'non·ist, *n. & adj.* = MENNONITE.

mennuet. ✝ MIGNONETTE.

Men'o·bran'chi·dae (mĕn'ō·brăng'kĭ·dē), *n. pl.* [NL.] Syn. of PROTEIDAE.

Men'o·bran'chus (-kŭs), *n.* [NL., fr. 2d *meno-* + Gr. *branchos* a gill.] Syn. of NECTURUS.

men'o·loge, *n.* Menology. *Obs.*

men'o·lo'gi·um (mĕn'ō·lō'jĭ·ŭm), *n.* = MENOLOGY.

Men'o·po'ma (-pō'mȧ), *n.* [NL., fr. 2d *meno-* + Gr. *pōma* lid.] Syn. of CRYPTOBRANCHUS.

mense'ful, *adj.* See -FUL. *Scot. & N. of Eng.*

mense'less, *adj.* See -LESS. *Scot. & N. of Eng.*

mental spine. *Anat.* One of two small elevations on the inner side of the symphysis of the lower jaw, each subdivided into upper and lower *genial tubercles* for the attachment respectively of the genioglossus and geniohyoid muscles.

mental test. *Psychol.* Any standardized procedure applied to an individual in order to ascertain his ability or behavior in comparison with other individuals or with the average of any class of individuals.

men·ta'tion (mĕn·tā'shŭn), *n.* [L. *mens, mentis,* mind + *-ation.*] Mental process or function. Cf. CEREBRATION.

men'ter·y (mĕn'tĕr·ĭ), *n.* [F. *menterie.*] Lying. *Obs.*

Men'tha (mĕn'thȧ), *n.* [L. see MINT the plant.] *Bot.* A large and widely distributed genus of herbs, the true mints, family Lamiaceae. *M. piperita* is the peppermint; *M. spicata* is the garden mint, often called *spearmint.*

men'tha·di'ene (mĕn'thȧ·dī'ēn), *n.* [*menthane* + *di* + *-ene.*] *Chem.* A terpene, $C_{10}H_{16}$, of which menthane is the tetrahydride; dihydrocymene.

men'thane (mĕn'thān), *n.* Also **men'than** (-thăn). [G. *menthan,* fr. *menthol* + *-an* (= E. *-ane*).] *Chem.* Any of three isomeric saturated hydrocarbons, $C_{10}H_{20}$, distinguished as *o-*, *m-*, and *p-*, corresponding to the three cymenes, of which they are hexahydrides. Many members of the terpene series are derived from *p*-menthane, and a few from *m*-menthane. See TERPENE.

‖**menthe** (mănt), *n.* [F.] Mint.

men'thene (mĕn'thēn), *n.* [*menthol* + *-ene.*] *Chem.* **a** A colorless oily hydrocarbon, $C_{10}H_{18}$, of agreeable odor and cooling taste, obtained from menthol by dehydration. It is a tetrahydride of *p*-cymene. **b** By extension, any tetrahydride of cymene. The menthenes are similar in structure to menthane but contain two fewer hydrogen atoms. Cf. MENTHANE.

men'the·nol (mĕn'thē·nōl; -nŏl), *n.* [*menthene* + *-ol.*] *Chem.* Any monohydric alcohol, $C_{10}H_{17}OH$, derived from menthene, as terpineol.

men'the·none (mĕn'thē·nōn), *n.* [*menthene* + *-one.*] *Chem.* Any monoketone, $C_{10}H_{18}O$, derived from menthene, as pulegone. See KETONE.

men'tho- (mĕn'thō-), **menth-.** A combining form for *menthol.*

men'thol (mĕn'thōl; -thŏl), *n.* [*Mentha* + 1st *-ol.*] *Chem.* A white crystalline alcohol, $C_{10}H_{19}OH$, the principal constituent of oil of peppermint; 3-*p*-menthanol; — called also *mint camphor* or *peppermint camphor.* It has the odor and cooling taste of peppermint. It is an anodyne, and is used, esp. locally, in neuralgia and rhinitis.

men'tho·lat'ed (mĕn'thō·lāt'ĕd; -ĭd; 119), *adj.* **a** Treated with menthol. **b** Containing or impregnated with menthol.

men'thone (mĕn'thōn), *n.* [*menthol* + *-one.*] *Chem.* A colorless liquid ketone, $C_{10}H_{18}O$, of mild mintlike odor, occurring in oil of peppermint and also prepared artificially.

men'thyl (mĕn'thĭl), *n.* [*Mentha* + *-yl.*] *Chem.* **a** The univalent radical, $C_{10}H_{19}$, of which menthol is the hydroxide; — disting. as 3-*p*-menthyl. **b** Any of the univalent radicals, $C_{10}H_{19}$, of which menthane is the hydride.

men'ti- (mĕn'tĭ-), A combining form from Latin *mens, mentis,* the mind, as in **men'ti·cul'tur·al, men'ti·cul'ture, men'ti·form, men·tim'e·ter, men'ti·mu·ta'tion.** See -CULTURE, -FORM, etc.

men·tif'er·ous (mĕn·tĭf'ĕr·ŭs), *adj.* [*menti-* + *-ferous.*] Conveying mental impressions; telepathic.

men·tig'er·ous (mĕn·tĭj'ĕr·ŭs), *adj.* [*mento-* + *-gerous.*] Bearing the mentum (of an insect).

men'tion (mĕn'shŭn), *n.* [ME. *mencioun,* fr. OF. *mention,* fr. L. *mentio.* See MIND.] **1.** Formerly, commemoration; now, a speaking or notice, esp. in a brief or cursory manner; a specification, usually by name; casual introduction into speech or writing; naming, esp. incidentally.

merceable. † MERCHABLE.

mer'ba'by (mûr'bā'bĭ), *n.* A baby born to a mermaid.

mer'can·tile (mûr'kăn·tĭl; -tīl; 277), *adj.* [F., fr. It. *mercantile,* fr. L. *mercans, -antis,* pres. part. of *mercari* to traffic. See MERCHANT.] **1.** Of or pertaining to merchants, or the business of merchants; characteristic of, or befitting, a merchant; having to do with, or engaged in, trade.
2. *Econ.* Of or pertaining to the mercantile system (which see); as, the *mercantile* school, doctrine, theory, etc.
Syn. — See COMMERCIAL. — **mer'can·tile·ly,** *adv.*

mer'can·tile, *n.* One engaged in mercantile pursuits.

mercantile agency. *a Law.* Agency of a mercantile agent (in sense **a**). **b** An establishment or institution which collects information as to the character, responsibility, credit, reputation, etc., of merchants or others doing business, and furnishes such information to others for a subscription price; a commercial agency.

mercantile agent. **a** One who is the agent of another for the conduct of mercantile transactions; as defined by the British Factors Act, 1889 (52 & 53 Vict. c. 45), one "who, in the customary course of his business as agent, has authority either to sell goods, or to consign goods for the purpose of sale, or to buy goods, or to raise money on the security of goods." **b** A person or persons engaged in conducting a mercantile agency (in sense **b**).

mercantile law. The laws that deal with, or have grown out of, the usages and customs of merchants or business people or their relations to each other. The term is of indefinite significance, including generally, however, the law of partnership, joint-stock companies, agency, negotiable paper, contracts with carriers, insurance, sale, bottomry and respondentia, debt, guaranty, stoppage in transitu, lien, bankruptcy, and insolvency. Cf. LAW MERCHANT.

mercantile marine. = MERCHANT MARINE.

mercantile paper. Negotiable paper given by merchants for goods bought or received on consignment.

mercantile system. *Econ.* The system of public economy (cf. POLITICAL ECONOMY; ECONOMICS) that developed in the states of Europe upon the centralization of power accompanying the decay of the feudal systems. It was broadly characterized by the fact that its policy in the governmental regulation of industries, trade, and commerce, esp. with foreign countries, was determined rather by national aims than local or individual interests, seeking to build up the national strength and prosperity by securing a favorable balance of trade (see BALANCE OF TRADE), the development of agriculture and manufactures, the creation of a merchant marine, and the establishment of foreign trading monopolies. Characteristic English legislation based on mercantile-system principles was that establishing the regulated companies (see REGULATED COMPANY), the Navigation Laws, the Corn Laws, statutes establishing discriminating or protective tariff duties, etc. It was modified and largely superseded by the economic system of the physiocrats and the system of laissez faire.

mer'can·til·ism (mûr'kăn·tĭl·ĭz'm), *n.* **1.** The spirit, theory, or practice of mercantile pursuits; devotion to commercial enterprise; commercialism.
2. *Econ.* The theory or practice of the mercantile system.

mer'can·til·ist (-ĭst), *adj.* Of or pertaining to the theory or practice of mercantilism.

mer'can·til·ist, *n.* One who favors or practices mercantilism. — **mer'can·til·is'tic** (-ĭs'tĭk), *adj.*

mer'can·til'i·ty (-tĭl'ĭ·tĭ), *n.* Commercialism.

mer·cap'tal (mĕr·kăp'tăl; mûr'kăp·tăl'), *n.* [*mercaptan* + *aldehyde.*] *Chem.* Any of a series of compounds of the general formula $RCH(SR')_2$, formed by the reaction of mercaptans with aldehydes, and analogous to the acetals. They are, in general, oils of unpleasant odor.

mer·cap'tan (mĕr·kăp'tăn; mûr'kăp·tăn'), *n.* [G., fr. ML. *mercurium captans* seizing mercury (*captans,* pres. part. of L. *capere* to seize).] *Chem.* Any of a series of compounds of the general formula RSH, analogous to the alcohols and phenols, but containing sulphur in place of oxygen; — called also *thiol.* Specif., ethyl mercaptan or ethanethiol, C_2H_5SH, the first discovered and most important. Those analogous to the alcohols are also called *thioalcohols, sulphur alcohols,* and *alkyl hydrosulphides;* those analogous to the phenols are also called *thiophenols.* The mercaptans are so called because the hydrogen of the SH group is easily replaced by *mercury* and other metals, forming compounds called **mer·cap'tides** (-tĭdz; -tīdz; 157), or **mer·cap'tids** (-tĭdz).

mer·cap'to- (mĕr·kăp'tō-). *Chem.* A combining form from *mercaptan* denoting *presence of the group* SH. — **mercap'to** (-tō), *adj.*

mer·cap'tole, mer·cap'tol (-tōl; -tŏl), *n.* *Chem.* Any of a series of compounds of the general formula $RR'C(SR'')_2$, formed by the reaction of mercaptans with ketones; specif., the compound $(CH_3)_2C(SC_2H_5)_2$, formed from mercaptan and acetone.

Mer·ca'tor (mûr·kā'tĕr; mĕr·kā'tôr), *n.* [After Gerhard *Mercator,* Flemish geographer.] A Mercator's chart.

mer'ca·to'ri·al (mûr'kȧ·tō'rĭ·ăl; 181), *adj.* [L. *mercatorius.*] Mercantile. *Rare.*

Mer'ca·to'ri·al, *adj.* Of or pert. to the geographer Mercator or his method of projection; as, *Mercatorial* bearings.

Mercator sailing. See SAILING, *n.*

Mer·ca'tor's chart (mĕr·kā'tĕrz; mĕr·kā'tôrz). A chart constructed on the principle of Mercator's projection.

Mercator's projection. A method of map making in which the meridians are drawn parallel to each other, and the parallels of latitude are straight lines whose distance from each other increases with their distance from the equator, so that at all places the degrees of latitude and longitude have to each other the same ratio as on the sphere itself. This produces an apparent enlargement of the polar regions (as in the map under DATE LINE), but is of great importance for navigational purposes, since a rhumb line in such a chart is always a straight line.

mer'ca·ture (mûr'kȧ·tŭr), *n.* [L. *mercatura.*] Commerce; trade. *Obs.*

Mer'ce·dar'i·an (mûr'sē·dâr'ĭ·ăn; 79), *n.* *R.C.Ch.* A member of the religious Order of Our Lady of Mercy, [ML., *de Mercede*] for the Redemption of Captives, founded at Barcelona in 1218 or 1223 by Peter Nolasco, a French knight. At first a military order, it became, in 1318, exclusively religious when its knights joined the newly established Order of Our Lady of Montesa. When the need of ransoming captives ceased, the order turned to missionary labors.

Mer·ce'des (mûr·sē'dēz; *Sp.* mär·thā'thäās; 112), *n.* [Sp. fr. *María de las Mercedes*, attribute of the Virgin Mary, fr. *merced* grace, favor. See MERCY.] Fem. proper name.

merce'ment (mûrs'mĕnt), *n.* Amercement; also, doom. *Obs.*

mer'ce·nar'i·an (mûr'sē·nâr'ĭ·ăn), *n.* A mercenary. *Obs.*

mer'ce·nar'y (mûr'sē·nĕr'ĭ *or, esp. Brit.*, -nēr·ĭ), *adj.* [L. *mercenarius*, fr. *merces* wages, reward. See MERCY.] **1.** Acting merely for reward; serving, working, or done solely for pay; hireling; venal; moved by considerations of pay or profit; sordid.

2. Serving for pay or wages; hired; — now only of soldiers serving in an army not of their own country.

3. Salaried; also, conducted, engaged in, or run for, the purpose of making money. *Obs.*

Syn. — MERCENARY, HIRELING, VENAL. MERCENARY in the sense of *hired* applies (without necessary opprobrium) only to soldiers; as, *mercenary* troops. That is *mercenary*, in ordinary usage, which is actuated by (usually sordid or self-seeking) considerations of profit or reward; as, "She had . . . nothing sordid or *mercenary;* in fact, she never thought of money" (*G. Eliot*). HIRELING applies to that which is (esp.) servilely sold, VENAL, to that which is (esp.) basely purchasable, for a dishonorable consideration; both words are terms of strong opprobrium; as, "prostituted muse and *hireling* bard" (*Byron*); "bartering his *venal* wit for sums of gold" (*Dryden*). Cf. VENDIBLE.

— **mer'ce·nar'i·ly**, *adv.* — **mer'ce·nar'i·ness**, *n.*

mer'ce·nar'y, *n.; pl.* -IES (-Iz). [L. *mercenarius.*] **1.** One who works solely for pay. *Now Rare.*

2. One who is hired or paid for his work; a hireling; — now only a soldier hired into foreign service.

4. Of or pert. to, containing, or consisting of, mercury; as, *mercurial* preparations, barometer. See MERCURY, 5.

5. *Med.* Caused by, or exhibiting the effect of, the use of mercury; as, *mercurial* sore mouth.

— **mer·cu'ri·al·ly,** *adv.* — **mer·cu'ri·al·ness,** *n.*

mer·cu'ri·al, *n.* **1.** A person born under Mercury or having mercurial qualities. See MERCURIAL, *adj.*, 3. *Obs.*

2. The plant mercury, or Good-King-Henry. *Obs.*

3. *Pharm.* A preparation containing mercury.

Mer·cu'ri·a'lis (-ā'lĭs), *n.* [NL. See MERCURY, 12.] **1.** *Bot.* A small genus of herbs of the spurge family (Euphorbiaceae). *M. annua,* the herb mercury, is a naturalized weed in North America. *M. perennis* is the dog's mercury.

2. *Pharm.* The dried herb *M. annua,* used as a purgative, diuretic, and antisyphilitic.

mer·cu'ri·al·ism (mûr·kū'rĭ·ăl·Iz'm), *n.* [*mercurial* + *-ism.*] *Med.* The morbid condition produced by the excessive use of mercury, or by exposure to its fumes, as in mining or smelting; chronic mercury poisoning.

mer·cu'ri·al·ist (-Ĭst), *n.* A mercurial person. *Obs.*

mer·cu'ri·al'i·ty (-ăl'ĭ·tĭ), *n.* **1.** Mercurial quality or state.

2. Mercurial part. *Obs.*

mer·cu'ri·al·ize (mûr·kū'rĭ·ăl·Īz), *v. t.*; MER·CU'RI·AL·IZED (-Īzd); MER·CU'RI·AL·IZ'ING (-Īz'Ĭng). **1.** To make mercurial.

2. *Med.* To treat with mercury to the point of securing its desired effect.

3. *Photog.* To treat with mercury. See DAGUERREOTYPE.

— **mer·cu'ri·al·i·za'tion** (-Ĭ·zā'shŭn; -ĭ·zā'shŭn), *n.*

mercurial ointment. *Pharm.* An ointment containing approximately 30 per cent of finely divided metallic mercury incorporated with lard, suet, and petrolatum.

mercurial telescope. See TELESCOPE, *n.*, 1.

mer'cu·ri·am·mo'ni·um (mûr'kū·rĭ·ă·mō'nĭ·ŭm), *n. Chem.* A radical formerly regarded as derived from ammonium by the substitution of bivalent mercury for hydrogen; specif., the univalent radical NH_2Hg. The **mer'cu·ri·am·mo'ni·um com'pounds** or **mer·cu'ri·a·mines'** (mûr·kū'rĭ·ă·mēnz'; -ăm'Ĭnz) are considered now to be ammonobasic mercuric salts, as $NH_2.Hg.Cl$ (not Hg: NH_2Cl) and mercuric ammines, as $HgCl_2.2NH_3$ (not Hg $(NH_2Cl)_2$).

Mer·cu'ri·an (mûr·kū'rĭ·ăn), *adj.* **a** Of or pert. to the god or the planet Mercury. **b** *Obs.* [*not cap.*] = MERCURIAL, 3.

Mer·cu'ri·an, *n.* **1.** One born under Mercury.

2. An inhabitant of Mercury.

mer·cu'ri·ate (mûr·kū'rĭ·āt), *n.* [See 1st -ATE, 3.] *Chem.* Any of certain complex salts containing mercury.

mer·cu'ri·ate (-āt), *v. t. Chem.* To mercurate.

mer·cu'ric (mûr·kū'rĭk; 242), *adj. Chem.* Of, pertaining to, or containing, mercury; — said specif. of compounds in which this element has a valence of two.

mer'cu·ride (mûr'kū·rĭd; -rĭd), *n.* Also **mer'cu·rid** (-rĭd). [*mercury* + *-ide.*] *Chem.* A binary compound of mercury with another element.

mer·cu'ri·fy (mûr·kū'rĭ·fĭ), *v. t.*; -FIED (-fĭd); -FY'ING (-fĭ'·Ĭng). [*mercury* + *-fy.*] **a** To obtain mercury from (ores). **b** To combine or mingle mercury with; to mercurialize. — **mer·cu'ri·fi·ca'tion** (-fĭ·kā'shŭn), *n.*

Mer·cu'ri·us (mûr·kū'rĭ·ŭs), *n.* [L.] Mercury.

mer'cu·rize (mûr'kū·rĭz), *v. t.*; -RIZED (-rĭzd); -RIZ'ING (-rĭz'Ĭng). *Chem.* To mercurate. — **mer'cu·ri·za'tion** (-rĭ·zā'shŭn; -rĭ·zā'-), *n.*

mer'cu·ro- (mûr'kū·rō-; mûr·kū'rō-), **mercur-.** A combining form for *mercury,* as in **mer·cu'ro·phen.**

Mer·cu'ro·chrome' (mûr·kū'rō·krōm'), *n.* [See MERCURY; -CHROME.] *Pharm.* A trade-mark applied to a red organic mercurated dye (chemically dibromo-hydroxy-mercuri-fluorescein), or its green, crystalline sodium salt, used as a general antiseptic and germicide; hence [*sometimes not cap.*], this dye or a salt or solution of it.

mer·cu'rous (mûr·kū'rŭs; mûr'kū·rŭs), *adj. Chem.* Of, pert. to, or derived from, mercury; containing mercury; — said specif. of compounds in which this element may be regarded as univalent.

Mer'cu·ry (mûr'kū·rĭ), *n.; pl.* -RIES (-rĭz). [L. *Mercurius,* the god and the planet; akin to L. *merx* wares; cf. F. *Mercure.* See MERCHANT.] **1.** *Rom. Relig.* A Latin god of commerce and gain whose cult was derived from that of the Greek Hermes, and to whom, accordingly, the other characteristics of Hermes, as herald or messenger of the gods, conductor of souls to the lower world, and god of eloquence, were ascribed by the Latin poets. His worship was introduced into Rome, from southern Italy, as early as 495 B.C. Cf. DI.

4. A statue or image of Mercury; specif., a herma.

5. [*not cap.*] A heavy silver-white metallic element, the only metal that is liquid at ordinary temperatures; — called also, popularly, *quicksilver* Symbol, *Hg* (*hydrargyrum*); at. no., 80; at. wt., 200.61. Mercury occurs native, and in cinnabar, calomel, and a few other minerals. It is chiefly prepared by roasting cinnabar and condensing the vapors. Mercury freezes at −38.87° C. (−37.96° F.) and boils at 356.9° C. (675° F.). Sp. gr., 13.546 at 20° C. It does not oxidize unless heated nearly to boiling. It is used in barometers and thermometers and for other scientific purposes, for extracting gold and silver from their ores (amalgamation process), and, with steam, in one form of binary heat engine (which see). Its compounds are used in medicine as purgatives, alteratives, antiseptics, and esp. as antisyphilitics. Its alloys are called *amalgams.* See AMALGAM. Chemically, mercury is univalent and bivalent, forming the oxides Hg_2O (mercurous) and HgO (mercuric) Its molecule is monatomic. The element and its compounds are poisonous.

6. [*not cap.*] The mercury in a thermometer or barometer.

7. A pharmaceutical preparation containing the metal mercury or a compound of it.

8. [*not cap.*] Mercurial quality, as sprightliness, spirit, mutability, fickleness, etc. *Obs.*

9. *Alchemy.* The principle of liquidity and volatility. Cf. CHIBRIT.

10. *Astron.* The smallest planet of the solar system, being the nearest known one to the sun, from which its mean distance is about 36,000,000 miles. Its period is 88 days, and its diameter about 3,000 miles. It is visible to the naked eye for about two weeks at a time, three times a year, either at dawn or twilight, as an evening or a morning star, shining with a clear white light. When the morning star, it was called *Apollo* by the Greeks. Symbol, ☿.

11. *Astrol.* A cold and dry, melancholy planet, masculine or feminine, good or evil according to its aspects or conjunctions, the mansions of which are Virgo and Gemini, the exaltation, 15° Virgo, the depression, 15° Pisces, and the orb, 7°.

12. *Bot.* [*not cap.*] [Cf. L. *herba mercurialis*, name of a plant.] Any of certain plants; as: **a** Any plant of the genus *Mercurialis*, esp. dog's mercury (*M. perennis*). **b** Good-King-Henry. **c** Poison ivy. *U. S.*

13. *Her.* Purpure, in blazoning by the planets. *Obs.*

mer'cu·ry, *v. t.* To wash with a preparation of mercury. *Obs.*

mercury arc. *Elec.* An electric discharge through mercury vapor, in a vacuum tube, emitting a blue-green light rich in actinic and ultraviolet rays. It is variously used, as for water sterilization, in photography, and, in **mercury-arc rectifier,** for converting alternating into direct current.

mer'cu·ry-arc' lamp. A mercury-vapor lamp.

mercury boiler. A generator in which mercury is converted into mercury vapor.

mercury chloride. *Chem.* Any chloride of mercury. *Mercuric chloride,* $HgCl_2$ called also *corrosive sublimate* and *bichloride of mercury,* is a heavy, transparent, crystalline salt, easily soluble and of a sharp, metallic taste, and is obtained by subliming a mixture of mercuric sulphate and common salt, and by other methods. It is a virulent poison, a powerful antiseptic and preservative, and an antisyphilitic, and is useful in dyeing, photography, and other industries. For *mercurous chloride,* Hg_2Cl_2, see CALOMEL. There are also basic mercury chlorides.

Mer·ce·do'ni·us (mûr'kē·dō'nĭ·ŭs), **Mer·ced'i·nus** (mĕr·sĕd'ĭ·nŭs), *n.* [L.] See ROMAN CALENDAR.

mer'cer·ship, *n.* See -SHIP.

merch (mĕrk). Scot. var. of MARROW, a substance.

mer'chan·dize, -diz'er, etc. Vars. of MERCHANDISE, etc.

merchant guild. See GUILD, 2.

mer'chant·hood, *n.* See -HOOD.

mer'chant·ish, *adj.* See -ISH.

mer'ci·a·ment. *n.* Short for AMERCIAMENT. *Obs.*

Mer'cier's bar (mĕr'syāz'). [After L. A. *Mercier* (1811–82), French urologist.] = TORUS URETERICUS.

mer'ci·fy, *v. t.* To pity. *Obs.*

Merciless Parliament. = WONDERFUL PARLIAMENT.

mercur-. = MERCURO-.

Mer'cu·re'an (mûr'kū·rē'ăn), *n.* = MERCURIAN, *n.*, 2.

mercuric chloride, cyanide, fulminate, iodide, oxide, sulphide, thiocyanate. See MERCURY CHLORIDE, CYANIDE, etc.

mer·cu'rous chlo'ride. *Chem.* = CALOMEL.

mer·cu'rous ox'ide. See MER-CURY OXIDE.

mercury cyanide. *Chem.* A cyanide of mercury; specif., *mercuric cyanide*, $Hg(CN)_2$.

mercury fulminate. *Chem.* A white crystalline compound, $Hg(ONC)_2.\frac{1}{2}H_2O$, formed by mixing alcohol, nitric acid, and mercury; — called also *mercuric fulminate, fulminating mercury*, etc. It explodes violently on percussion, and is used in percussion caps and detonators.

mercury iodide. *Chem.* Any iodide of mercury; specif., *mercuric iodide*, HgI_2, occurring in two crystalline modifications, yellow rhombic and red octahedral. The red form is the stable one at ordinary temperatures, and is used as a brilliant but impermanent pigment under the name of *brilliant, iodine, pure*, or *royal*, etc., *scarlet*.

mercury lamp. = MERCURY-VAPOR LAMP.

mercury oxide. *Chem.* Any oxide of mercury. *Mercurous oxide*, Hg_2O, is obtained as an unstable brownish-black powder by treating a mercurous salt solution with caustic alkali. *Mercuric oxide*, HgO, is formed as a heavy red crystalline powder by heating mercuric nitrate, by heating mercury in air, etc., and is then called also *red oxide of mercury* or *red precipitate*. A yellow variety (*yellow precipitate*) is obtained by precipitation methods. The red oxide is used in antifouling marine paints, as a pigment, and as an oxiding agent. Both kinds are used in ointments for diseases of the skin and affections of the eyes.

mercury pump. Any vacuum pump in which air or other gas is trapped and exhausted by a stream of mercury. See GEISSLER PUMP, SPRENGEL PUMP.

mercury red. The color vermilion or one like it.

mercury subchloride. *Chem.* = CALOMEL.

mercury sulphide. *Chem.* A sulphide of mercury; specif., *mercuric sulphide*, HgS, occurring native as cinnabar and metacinnabarite, and obtained artificially as a black powder or as a scarlet powder (vermilion).

mercury thiocyanate *or* **sulphocyanate.** *Chem.* A thiocyanate of mercury, specif., *mercuric thiocyanate* or *sulphocyanate*, $Hg(CNS)_2$, a white crystalline salt made by precipitation. Sold in egg-shaped pellets, it is called *Pharaoh's serpent, serpents*, or *serpents' eggs*, because on burning it expels a voluminous yellowish ash in serpentine form.

Mer'cu·ry Tris'me·gis'tus. = HERMES TRISMEGISTUS.

mer'cu·ry-va'por lamp. *Elec.* A gas-discharge lamp in which the gas used is mercury vapor.

mercury–vapor turbine. See TURBINE.

mercury weed. The three-seeded mercury.

Mer·cu'ti·o (mûr·kū'shĭ·ō), *n.* In Shakespeare's *Romeo and Juliet*, a witty, madcap gentleman, friend to Romeo.

mer'cy (mûr'sĭ), *n.; pl.* MERCIES (-sĭz). [ME. *merci*, fr. OF. *merci*, fr. L. *merces, mercedis*, hire, pay, reward, LL., equiv. to *misericordia* pity, mercy. See MARKET; cf. A-MERCE, MERCENARY.] **1.** Forbearance from inflicting harm, esp. in the way of punishment, under provocation, when one has the power to inflict it; compassionate treatment of an offender or adversary; clemency. "Examples of justice must be made for terror to some; examples of *mercy* for comfort to others." *Bacon.*
2. Disposition to exercise compassion or forgiveness; mercifulness; pity; compassion; willingness to spare or to help.
3. [*cap.*] Used: **a** As a personification. **b** As a fem. proper name.
4. The power to be merciful or clement; clemency; as, to throw oneself on the *mercy* of a conquerer.
We trusted ourselves to the *mercy* of the waves. *Swift.*
5. A merciful act, as of God; a blessing regarded as a manifestation of compassion or favor.
The Father of *mercies* and the God of all comfort. 2 *Cor.* i. 3.
6. Compassionate treatment of the unfortunate and helpless; as, works of *mercy;* sometimes, favor; beneficence.
7. *Obs.* **a** Amercement. **b** Thanks.
Syn. — Indulgence, forbearance, tolerance. — MERCY, GRACE, CLEMENCY, LENITY, LENIENCY, CHARITY. MERCY is esp. kindness or compassion toward the suffering or condemned; GRACE (now somewhat archaic in this sense) is spontaneous favor to the guilty or undeserving; CLEMENCY is mildness esp. in the exercise of power; as, "Earthly power doth then show likest God's when *mercy* seasons justice" (*Shak.*); "If there be such failing in me, I might amend it by the *grace* of Heaven" (*Tennyson*); a prince famous for his *clemency*, an appeal to a judge for *clemency*. LENITY is esp. mild or gentle, LENIENCY (opposed esp. to *rigor, severity*), easy or indulgent, treatment of faults or failings; as, "What makes robbery bold but too much *lenity?*" (*Shak.*); to look with *leniency* upon human folly. CHARITY, as here compared (cf. PHILANTHROPY), is broad and kindly tolerance; as, "with malice toward none, with *charity* for all" (*Lincoln*); "To know the literature of another language . . . enlarges aesthetic *charity*" (*Lowell*). Cf. PITY, HUMANE, FAVOR, GENTLE, EXCUSE.
Ant. — Cruelty, harshness, inhumanity, implacability.
— *at the mercy of.* Wholly in the power of; liable to any treatment whatever at the hands of. — *in mercy.* Amerced; fined; liable to a fine. *Obs.*

mer'cy, *v. t.* [OF. *mercier.*] To thank. *Obs.*

mercy seat. **1.** *Jewish Antiq.* The golden plate resting on the Ark on which the blood of sacrificial animals was sprinkled, as prescribed by the law for temple worship; — a translation of the Heb. *kappōreth*, Gr. *hilastērion*, in English Bible versions, on the belief that it was the resting place of God. The word means propitiatory thing, means of propitiation, and is applied to various things. Hence a better name for this object is the *propitiatory*.
2. Figuratively: **a** The throne of God or Christ. **b** Propitiation — said of Christ after 1 John ii. 2.

mercy stock *or* **stool.** = MERCY SEAT, 2 **b.** *Obs.*

mercy stroke. A coup de grâce.

merd (mûrd), *n.* Also **mer'da** (mûr'dȧ). [F. *merde*, fr. L. *merda.*] Dung. *Obs.*

mer·div'o·rous (mĕr·dĭv'ō·rŭs), *adj.* [L. *merda* excrement + *-vorous.*] Eating excrement.

mer·du'ri·nous (mĕr·dū'rĭ·nŭs), *adj.* [L. *merda* dung + *urina* urine.] Of dung and urine. *Obs.*

mere (mēr), *adj.* [AS. *mǣre.* See MORE.] Famous, glorious; beautiful. *Obs.*

mere, mear (mēr), *n.* [AS. *mǣre, gemǣre;* akin to ON. *mæri*, MD. *mēre*, and to L. *murus* wall. See MUNITION; cf. 2d MOOR.] A boundary; a boundary mark or line, as a strip of grass; a landmark.

mere (mēr), *v. t.* To divide, limit, bound. *Obs. exc. Dial.*
— *v. i.* To border (on); be bounded (by). *Obs.*

mere (mēr), *n.* [ME. *mere*, fr. AS. *mere* mere, sea; akin to D. *meer* lake, OS. *meri* sea, OHG. *meri, mari*, G. *meer*, ON. *marr*, Goth. *marei*, Lith. *marès*, Olr. *muir*, L. *mare.* Cf. MARINE, MARSH, MERMAID, MOOR waste land.] *Archaic & Dial.* **1.** The sea; also, an arm of the sea.
2. A sheet of standing water; a lake or pool.
3. A marsh or fen.

mere (mēr), *adj.; superl.* MER'EST (mē'rĕst; -ĭst; 119): the comparative is rarely or never used. [OF. and L.; OF. *mier*, fr. L. *merus;* akin to AS. *ǣmerian* to purify. See MORNING.] **1.** Unmixed; undiluted; pure. *Obs.*
2. Done, made, or exercised independently of others; sole; as, *mere* motion (cf. EX MERO MOTU); *mere* will. *Chiefly Law.*
3. Being only or fully what it or one appears to be; nothing less than; entire; absolute; sheer; unqualified. *Obs.*
Then entered they the *mere*, main sea. *Chapman.*
4. Only this, and nothing else; nothing more than; such, and no more; simple; as, a *mere* child; a *mere* form.
Planless indeterminate lives, plebeian lives, *mere* lives. *H. G. Wells.*
Syn. — MERE, BARE are often employed with little or no distinction. But MERE is commonly used to emphasize the limitations of a thing, as if it were declared to be "simply what it is and nothing more"; BARE is stronger, and frequently suggests that the object to which it is applied just escapes falling short of what it actually is; as, *mere* civility (that is, civility and nothing more); *bare* civility (that is, civility that just escapes being incivility); a *mere* boy; to make a *bare* living; a *mere* majority signifies little; elected by a *bare* majority. Cf. PURE, HARDLY.

mere, *adv.* Merely. *Obs.*

me're (mā'rā; *colloq.* mûr'ĭ), *n.* [Maori.] **a** The short flat club of stone, wood, or bone which was formerly the chief weapon of the Maoris. See MAORI, *Illust.* **b** A miniature imitation of this club used as an ornament.

‖**mère** (mâr), *n.* [F.] Mother.

-mere (-mēr). A combining form from Greek *meros* [see MERIT], meaning *part, portion*, used chiefly in botany, embryology, and zoology, as in *cytomere*, *arthromere*. Derivative adjectives are formed in *-meric*.

Mère' Cou'pa'ble, La (lȧ mâr' kōō'pȧ'blʼ). [F.] See FIGARO, 1.

Mer'e·dith'i·an (mĕr'ē·dĭth'ĭ·ăn), *adj.* Of, pert. to, or characteristic of George Meredith or his works. — *n.* An admirer of Meredith or his writings or style.

mer'el (mĕr'ĕl), *n.* [ME. *merel* counter or piece in a game, fr. OF. *merel, merele* (F. *mêreau, marelle*). Cf. MORRIS the game.] *Obs. exc. Hist.* **a** *pl.* The old game of morris. **b** *sing.* A man used in the game. **c** *pl.* Fox and geese.

mere'ly (mēr'lĭ), *adv.* **1.** Purely; unmixedly; absolutely; entirely; quite; also, solely; in fact; actually. *Obs.*
2. Not otherwise than; simply; barely; only; as, he came *merely* to see and talk with his friends.
Syn. — Just, entirely, utterly; scarcely.

me·ren'chy·ma (mĕ·rĕng'kĭ·mȧ), *n.* [NL., fr. 1st *mero-* + *-enchyma.*] *Bot.* Parenchyma composed of spherical cells. — **mer'en·chym'a·tous** (mĕr'ĕng·kĭm'ȧ·tŭs), *adj.*

meres'man (mēr'z'mȧn), *n.; pl.* -MEN (-mĕn). A parish officer who ascertains meres or boundaries. *Eng.*

mere'stone', **mear'stone'** (mēr'stōn'), *n.* A stone designating a boundary; a landmark. *Archaic & Dial.*

mere'swine' (-swīn'), *n.* [AS. *mereswīn*, prop., sea swine.] A dolphin; a porpoise. *Obs.*

mer'e·tri'cious (mĕr'ē·trĭsh'ŭs), *adj.* [L. *meretricius*, fr. *meretrix, -icis*, a prostitute, lit., one who earns money, i. e., by prostitution, fr. *merere* to earn, gain. See MERIT.] **1.** Of, pert. to, characteristic of, or being, a prostitute; having to do with harlots; as, *meretricious* traffic.
2. Alluring by false show; gaudily and deceitfully ornamental; tawdry; as, *meretricious* dress, style, composition.
Syn. — See GAUDY.
— **mer'e·tri'cious·ly,** *adv.* — **mer'e·tri'cious·ness,** *n.*

mer'e·trix (mĕr'ē·trĭks), *n.; pl.* -TRICES (-trĭ'sēz). [L.] A harlot or prostitute.

mer'folk' (mûr'fōk'), *n.* Merpeople.

mer·gan'ser (mĕr·găn'sĕr), *n.* [NL., fr. L. *mergus* diver (bird, fr. *mergere* to dip, plunge) + *anser* goose. See MERGE; GOOSE.] **1.** Any of several fish-eating ducks constituting the subfamily Merginae, having a slender bill, hooked at the end, and the head usually crested. They are expert divers. Their flesh is poor. *Mergus merganser* of Europe and the very similar *M. m. americanus* of America are common large species. An allied form, the *red-breasted merganser* (*M. serrator*), is common to both continents. See HOODED MERGANSER, *Illust.*; SMEW.
2. [*cap.*] *Zool.* Syn. of MERGUS (genus of mergansers).

merge (mûrj), *v.; MERGED* (mûrjd); MERG'ING (mûr'jĭng). [L. *mergere, mersum;* akin to Skr. *majjati* he dives, sinks, bathes, Lith. *mazgoti* to wash. Cf. EMERGE, IMMERSE.] *Trans.:* **1.** To cause to be swallowed up; to immerse; sink.
To *merge* all natural . . . sentiment in inordinate vanity. *Burke.*
2. *Law.* To cause to be absorbed, sunk, or extinguished by merger (which see).
3. To cause to combine, unite, or coalesce.
—, *Intransitive:* **1.** To be sunk, swallowed up, or lost; to lose identity by absorption or immersion in something else.
2. *Law.* To be absorbed or extinguished by merger.
Syn. — See MINGLE. **Ant.** — See DIVIDE.

merge, *n.* Act of merging.

mer'gence (mûr'jĕns), *n.* A merging; state of being merged.

merg'er (mûr'jĕr), *n.* One who or that which merges.

merg'er, *n.* [Formed on the analogy of AF. or OF. infin. forms used as nouns. See MERGE, *v.*] **1.** *Law.* An absorption of one estate, or of one contract or interest, in another, or of a minor offense in a greater. At common law a merger takes place when a lesser estate and a greater one, or a higher security, obligation, or interest, and a lower one, become vested in one person in the same right without any intermediate estate, etc.; but in equity the two interests may be treated as separate so far as equitable interests demand. With reference to corporations *merger* is used to denote the vesting of the control of different corporations in a single one by the issue of stock of the controlling corporation in place of a majority of the stock of the others, and is distinguished from a *consolidation*, which in strictness implies that the consolidating companies dissolve, their property and business being transferred to a single company (cf. AMALGAMATION, 3).
2. = MERGENCE.

Mer·gi'nae (mĕr·jĭ'nē), *n. pl.* [NL., fr. L. *mergus* diver.] *Zool.* The subfamily of ducks consisting of the mergansers.

Mer'gus (mûr'gŭs) is the typical genus.

mer'i- (mĕr'ĭ-). **a** A combining form from Greek *meris*, meaning *a part, a share*, used chiefly in *Bot.*, as in *meri*carp, *meri*stele. **b** *Chem. Parti-, partly*, as in *meri*quinone.

mer'i·ah (mĕr'ĭ·ȧ), *n.* [Oriya *meriyā.*] One of the human victims whom the Khonds formerly sacrificed to the earth-goddess. See TARI.

-mer'ic (-mĕr'ĭk) See -MERE.

-mer'ic (-mĕr'ĭk). *Chem.* A combining form from *isomeric*, meaning *characterized by a* (specified) *association of substances in compounds*, as in polymeric, tautomeric. Corresponding nouns denoting *condition* are formed in **-merism.** Cf. -MERE.

mer'i·carp (mĕr'ĭ·kärp), *n.* [F. *méricarpe*, fr. Gr. *meros* a part + *karpos* fruit.] *Bot.* One of the two carpels forming a cremocarp (which see).

me'ri·ce (mĕr'ĭ·tsĕ; *Czech* myĕr'zhĭ·tsĕ), *n.* [Czech *měřice* measure.] See MEASURE, *Table.*

Mer'i·da (mĕr'ĭ·dȧ), *n.* The color suntan.

me·rid'i·an (mĕ·rĭd'ĭ·ăn; mē-), *adj.* [ME., fr. OF. *meridien*, fr. L. *meridianus*, fr. *meridies* noon, for older *medidies*, fr. *medius* middle + *dies* day. See MID; DEITY.] **1.** Being at, or pert. to, midday; belonging to, or passing through, the highest point attained by a heavenly body in its diurnal course.
2. Of or pertaining to a meridian.
3. Southern; meridional. *Rare.*
4. Pertaining to, or characteristic of, the highest point or culmination; as, *meridian* splendor.
5. Of the highest degree; consummate. *Obs.*

me·rid'i·an, *n.* [See MERIDIAN, *adj.*] **1.** Midday; noon. *Obs.* Hence: **a** *Rare.* A siesta. **b** *Scot.* A midday drink.
2. Of a star or the sun, its highest apparent point.
3. South. *Obs.*
4. Special or distinctive locality, circumstances, capacities, or the like; grade; plane.
5. The highest point, as of success, prosperity, or the like; culmination, as the prime of a man's life.
6. Any line or circle resembling a meridian of longitude (see 9, below), as on the globular shell of certain sea urchins.
7. *Math.* In full, **meridian curve.** Of a surface of revolution, the curve formed by the intersection of the surface and a plane passing through the axis of revolution.
8. *Astron.* **a** A great circle of the celestial sphere passing through its poles and the zenith of a given place. It is crossed by the center of the sun at local apparent noon. **b** Short for MERIDIAN INSTRUMENT.
9. *Geog.* **a** A great circle on the surface of the earth, passing through the poles and any given place; also, and now usually, the half of such a circle included between the poles. Its plane coincides with that of the astronomical meridian of the place. See PRIME MERIDIAN. **b** The representation of such a circle or half circle on a map or globe; any of a series of lines drawn at certain intervals due north and south, or in the direction of the poles. They are numbered according to the degrees of longitude; as, the 90th *meridian* east of Greenwich. **c** A graduated circle, as of brass, in which a globe is suspended and revolves.
10. *Print.* Formerly, a size of type equal to four-line *small pica*, or about 44 points.

me·rid'i·an, *v. i.* To come to its or a meridian.

meridian altitude. *Astron.* The arc of the meridian intercepted between a celestial body at culmination and the nearest point of the horizon.

meridian circle. See CIRCLE, *n.*, 12.

Meridian Day. The day on which a vessel in the Pacific crosses the 180th meridian. Going east a calendar day is dropped; going west an extra day is added. Cf. DATE LINE, 2.

meridian instrument. *Astron.* Any astronomical instrument having a telescope mounted on an east-west-horizontal axis so as to rotate in a meridian plane.

meridian line. **a** = MERIDIAN, 9 **a** & **b.** **b** A surveyor's line marked by stones (**meridian stones**) to define the true north and south line.

meridian mark. A fixed mark due north or south of a meridian instrument, to aid in adjusting or finding its azimuth.

meridian passage. *Astron.* The passage of a celestial body across an observer's meridian.

meridian photometer. A photometer consisting essentially of a telescope with two object glasses, and polarizing prisms for changing the apparent brightness of an observed celestial body, used for finding the magnitude of a star by comparison with the pole star.

meridian ring. A ring marked as a sundial.

meridian sailing. *Navig.* Sailing north or south, as opposed to parallel sailing east or west.

Me·rid'i·on (mĕ·rĭd'ĭ·ŏn), *n.* [NL., fr. Gr. *meridion*, a small part.] *Bot.* A genus of fresh-water diatoms (Pennatae), containing but a single species (*M. circulare*) having cuneate cells, arranged in flat, fan-shaped, or spiral colonies and often causing odors in public water supplies. It typifies a family, **Me·rid'i·o·na'ce·ae** (-ō·nā'sē·ē).

me·rid'i·o·nal (mĕ·rĭd'ĭ·ō·năl; mē-; -n'l), *adj.* [F. *méridional*, fr. LL. *meridionalis*, fr. *meridies* midday, south. See MERIDIAN.] **1.** Of, pertaining to, or situated in, the south; having a southern aspect; southern; southerly.
2. Of, pertaining to, or characteristic of, people living in the south, as of Europe, esp. France.
3. Of or pert. to the position of the sun at midday; hence, pert. to, or characteristic of, midday or noon. *Obs.*
4. Of, pertaining to, like, or suggestive of, a meridian.
— **me·rid'i·o·nal·ly,** *adv.*

Me·rid'i·o·nal, *n.* One who lives in the south, as of Europe, esp. France.

meridional difference of latitude. *Navig.* The difference of the meridional parts for any two latitudes; — called also erroneously **meridional distance.**

me·rid'i·o·nal'i·ty (-năl'ĭ·tĭ), *n.* Quality or state of being meridional or on the meridian; position in the south.

meridional part. *Navig.* The length of any small portion of a terrestrial meridian (expressed in minutes of the equator), increased from its natural length more and more as the pole is approached, in accord with Mercator's projection.

meridional projection. *Math.* A projection of a sphere on a plane parallel to a meridian plane through the point of projection.

Mé'ri'mée's' yel'low (mȧ'rē'māz'). A permanent yellow pigment prepared by fusing lead monoxide with a little bismuth antimonate.

me·ringue' (mē·răng'; *F.* -răng'), *n.* [F., of obscure origin.] *Cookery.* A delicate mixture, chiefly of the beaten whites of eggs and powdered sugar, used as an icing on puddings, pies, etc., or made into small cakes or shells and quickly browned or baked; also, a cake or shell made of this. — **me·ringued'** (mē·răngd'), *adj.*

‖**me·ringue' gla'cée'** (mē·răng' glȧ'sā'). [F.] A dessert of ice cream, meringue shells, and, usually, whipped cream.

mer'il. Var. of MEREL.

Me·ri′no (mĕ-rē′nō; mē-), *n; pl.* -NOS (-nōz). [Sp.; cf. Sp. *merino* moving from pasture to pasture, *merino* a royal judge and superintendent or inspector of sheep walks, ML. *merinus*, fr. *majorinus*, i. e., major villae, fr. L. *major* greater. See MAYOR.] **1. a** A hardy gregarious breed of fine-wooled white sheep, originating in Spain, widely popular, esp. on the ranges in America and Australia. The rams have heavy spirally twisted horns; the ewes are hornless. The wool covers the head, often obscuring the eyes. In the better varieties the skin hangs in heavy folds, esp. about the breast, shoulders, and thighs. The breed excels all others in the weight and quality of its fleece, but does not rank high as a mutton producer. **b** [*not cap.*] An animal of this breed.
2. A fine soft fabric resembling cashmere, made originally of merino wool.
3. A fine wool yarn used in hosiery, knit underwear, etc. — **Me·ri′no,** *adj.*

Me·ri′o·nes (mē-rī′ō-nēz), *n.* [NL., fr. Gr. *mēria* thigh bones; — from the formation of the hind legs.] *Zool.* A genus of gerbils. See GERBIL.

mer′i·qui·none′ (mĕr′ĭ-kwĭ-nōn′; -kwĭn′ōn), *n. Chem.* A meriquinonoid compound. — **mer′i·qui·non′ic** (-kwĭ-nŏn′ĭk), *adj.*

mer′i·quin′o·noid (-kwĭn′ō-noid; -kwĭ-nō′noid), *adj.* [*meri-* + *quinonoid.*] *Chem.* Pertaining to or designating a class of compounds which are partly quinonoid and partly benzenoid in character, as quinhydrone; — opposed to *holoquinonoid.*

-meris. *Bot. & Zool.* A combining form from Greek *meris*, a part, used in generic names, as in Piptomeris.

mer′ism (mĕr′ĭz′m), *n.* [NL. *merismus*, fr. Gr. *merismos* division, partition.] *Rhet.* A form of synecdoche in which a totality is expressed by two contrasting parts (*old and young; thick and thin; near and far*).

mer′ism (mĕr′ĭz′m), *n.* [Gr. *meros* part + *-ism.*] *Biol.* A repetition of homologous parts.

-merism. See 2d -MERIC.

mer′is·mat′ic (mĕr′ĭz-măt′ĭk; mĕr′ĭs-), *adj.* [NL. *merisma* part, fr. Gr. *merisma*; akin to Gr. *meros* part.] **a** *Bot.* Pertaining to, or consisting of, meristem; capable of growth, as meristem. **b** *Zool.* Dividing by the formation of internal partitions.

me·ris′moid (mē-rĭz′moid; mē-), *adj.* [NL. *merisma* part + *-oid.* See MERISMATIC.] *Bot.* In fungi, having a branched pileus.

mer′ist (mĕr′ĭst), *n.* [Gr. *meristēs*, fr. *merizein* to divide.] A divider. *Rare.*

mer′i·ste′le (mĕr′ĭ-stē′lē), *n.* [Gr. *meris*, or *meros*, part + *stele.*] *Bot.* A leaf bundle in a protostelic stem, as that of the higher ferns; — so called because it contains elements of all the tissues of the stele, of which it is a portion. — **mer′i·ste′lic** (-stē′lĭk), *adj.*

mer′i·stem (mĕr′ĭ-stĕm), *n.* [Gr. *meristos* divided, divisible, fr. *merizein* to divide, fr. *meros* part, share. See MERIT.] *Bot.* Embryonic or undifferentiated tissue the cells of which are capable of active division. The earliest meristem, as that of growing points, is distinguished as *promeristem*, characterized by cell division with little increase in cell size, and the tissue developing from it is distinguished as *primary meristem*, from which the fundamental structure of the plant is formed. The cells of permanent tissue may again become capable of division, giving rise to meristematic tissue, as cambium, phellogen, etc.; this is then known as *secondary meristem. Apical meristem* is located at the tips of the axes, etc.; *intercalary meristem* lies at nodal regions separating portions of permanent tissue; *lateral meristem* has a layered distribution.

mer′i·ste·mat′ic (mĕr′ĭ-stē-măt′ĭk), *adj. Bot.* Pert. to, or consisting of, meristem. — **-mat′i·cal·ly** (-ĭ-kăl-ĭ), *adv.*

me·ris′tic (mē-rĭs′tĭk; mē-), *adj.* [Gr. *meristos* divided.] *Biol.* Pertaining to, or divided into segments (esp. metameres). — **me·ris′ti·cal·ly** (-tĭ-kăl-ĭ), *adv.*

mer′i·stog′e·nous (mĕr′ĭ-stŏj′ē-nŭs), *adj.* [Gr. *meristos* divided + *-genous.*] *Bot.* Arising from a single hyphal cell or a group of adjacent hyphal cells by repeated cross and longitudinal divisions, as in the development of certain pycnidia. Cf. SYMPHOGENOUS.

mer′it (mĕr′ĭt), *n.* [OF. *merite*, fr. L. *meritum*, fr. *merere, mereri*, to deserve, earn, orig., to get a share; akin to Gr. *meros* part, *moros* fate, doom, *moira* lot, *meiresthai* to receive as one's portion. Cf. MARKET, MERETRICIOUS.] **1.** Due reward or punishment; usually, reward deserved; a mark or token of excellence or approbation; as, his teacher gave him ten *merits.*

In some classifications it constitutes the suborder **Me·si'tae** (-sī'tē); in others it is part of the suborder Mesoenatides.

mes'i·tite (mĕs'ĭ·tīt), **mes'i·tine** (-tĭn), *n.* Also **mesitine spar.** [Gr. *mesitēs* mediator.] A magnesium iron carbonate, $2MgCO_3.FeCO_3$, intermediate between magnesite and siderite.

mes'i·tyl (-tĭl; -tēl), *n.* [Gr. *mesitēs* mediator, fr. *mesos* middle + *-yl.*] *Chem.* **a** A hypothetical radical, C_9H_{11}, of which mesityl oxide was once regarded as the oxide and acetone as the hydroxide. **b** The univalent radical (C_9H_{11}) of which mesitylene is the hydride, either $C_6H_3(CH_3)_3$ (2-*mesityl*), or $C_6H_3(CH_3)_2CH_3$ (*α-mesityl*).

me·sit'y·lene (mē·sĭt'ĭ·lēn; mĕs'ĭ·tĭ·lēn'), *n.* [*mesityl* + *-ene.*] *Chem.* A colorless oily hydrocarbon, $C_6H_3(CH_3)_3$, occurring in coal tar and petroleum, and also prepared artificially, as by distilling acetone with sulphuric acid.

me·sit'y·le'nic acid (mē·sĭt'ĭ·lē'nĭk; -lĕn'ĭk). *Chem.* A crystalline acid, $C_6H_3(CH_3)_3CO_2H$, formed by the oxidation of mesitylene. See XYLIC.

mesityl oxide. *Chem.* A volatile liquid ketone, $(CH_3)_2C{:}CHCOCH_3$, of a peppermint odor, obtained by the action of certain dehydrating agents on acetone.

mes·me'ri·an (mĕz·mē'rĭ·ȧn; mĕs-), *adj.* Mesmeric. — *n.* A mesmerite.

mes·mer'ic (mĕz·mĕr'ĭk; mĕs-), *adj.* Also **mes·mer'i·cal** (-ĭ·kȧl). Of, pert. to, or induced by, mesmerism; hence, fascinating; irresistible. — **mes·mer'i·cal·ly** (-ĭ·kȧl·ĭ), *adv.*

mes'mer·ism (mĕz'mĕr·Iz'm; mĕs'-), *n.* [After F. A. *Mesmer,* who first brought it into notice at Vienna, about 1775; cf. F. *mesmérisme.*] Hypnotism (which see). — **mes'mer·ist** (-ĭst), *n.*

mes'mer·ite (-ĭt), *n.* A believer in mesmerism.

mes'mer·ize (-Iz), *v. t. & i.;* -IZED (-Izd); -IZ'ING (-Iz'Ĭng). To hypnotize. — **mes'mer·i·za'tion** (-ĭ·zȧ'shŭn; -ĭ·zȧ'-shŭn), *n.* — **mes'mer·iz'er** (mĕz'mĕr·Iz'ĕr; mĕs'-), *n.*

mes'mer·iz·ee' (-ĭ·zē'), *n.* A mesmerized person.

mes'mer·o·ma'ni·a (mĕz'mĕr·ō·mā'nĭ·ȧ; mĕs'-), *n.* [NL. See MESMERISM; -MANIA.] Insane reliance upon mesmerism. — **mes'mer·o·ma'ni·ac** (-ăk), *n.*

mesn·al'i·ty (mĕn·ȧl'ĭ·tĭ), *n.* Mesnalty. *Rare.*

mesn'al·ty (mĕn'ȧl·tĭ), *n.* [Law F. *mesnalte.* See MESNE.] *Law.* Estate or condition of a mesne lord.

mesne (mēn), *adj.* [Law F. form of AF. *meen.* See MEAN intermediate.] *Law.* Middle; intervening; specif.: **a** In **mesne lord,** designating a lord who holds land of a superior, being *tenant* to the superior, but *lord* to his own tenant. **b** Intermediate in time of occurrence or performance; as, **a mesne encumbrance,** or one between two others.

mesne, *n.* **a** *Now Rare.* A mean, as distinguished from an extreme; also, a means. **b** Short for MESNE LORD.

mesne process. See 1st PROCESS, 8.

mes'o- (mĕs'ō-; mē'sō-), **mes-.** [See MID.] A combining form, Greek *meso-, mes-,* from *mesos,* meaning: **1.** *In the middle, the space* or *part between, middling,* used to denote *intermediate in position, size, time,* or *degree,* as in *mesoderm, mesodont, Mesozoic, mesotherm.* Cf. MID-. **2.** *Intermediate in type,* as in *mesolite, Mesozoa.* **3.** *Anat.* **a** *An intermediate connective part,* as in *mesocaecum, mesorchium.* **b** *A mesentery,* as in *mesocolon.* **c** = MESATI-, as in *mesocephalic, mesoprosopic.* **4.** *Biochem.* Designating certain reduction products of hemin and bilirubin. **5.** (*pron.* mĕs'ō-; mĕz'ō-) *Inorg. Chem.* Denoting any of certain acids regarded as derived from the ortho acids by loss of water, as in **mes'o·di'si·lic'ic ac'id** (-dĭ'sĭ·lĭs'ĭk), $H_2Si_2O_5$. **6.** *Med.* Partial; secondary; — of diseases. **7.** (*pron.* mĕs'ō-; mĕz'ō-) *Org. Chem.* **a** Denoting an optical isomer whose inactivity is assumed to be due to internal compensation, as in *meso*tartaric acid. **b** Pertaining to or designating certain middle groups or positions in various cyclic compounds, as: (1) The CH groups in positions 9 and 10 in anthracene (which see) or corresponding groups in fluorene, etc. Abbr., *ms.* (2) A position between two hetero atoms in a ring, as position 2 in imidazole. Abbr., *μ* or *ms.* ☞ For many chemical terms beginning with *meso-,* see the word with which *meso-* is combined. **8.** *Petrog.* **a** A prefix used before the name of an igneous rock to indicate that it is of late Paleozoic or Mesozoic age. **b** A prefix used before the name of a metamorphic rock to indicate that it belongs to the middle zone of metamorphism.

mes'o (mĕs'ō; mĕz'ō), *adj. Chem.* = MESO, 4, 5, 7.

mes'o·ap·pen'dix (mĕs'ō-ȧ-pĕn'dĭks; mē'sō-), *n.* [NL. See MESO-; APPENDIX.] The mesentery of the vermiform appendix. — **mes'o·ap·pen'di·ci'tis** (-ȧ·pĕn'dĭ·sī'tĭs), *n.*

mes'o·a'ri·um (mĕs'ō-ȧ'rĭ·ŭm; mē'sō-; 79), *n.* [NL., fr. *mes-* + Gr. *ōiarion,* dim. of *ōion* an egg.] *Zool.* The fold of peritoneum suspending the ovary from the dorsal wall of the body cavity in some animals, as fishes. — **mes'o·ar'i·al** (-ȧr'ĭ·ȧl), *adj.*

mes'o·bar (mĕs'ō·bär; mē'sō-), *n.* [*meso-* + Gr. *baros* weight.] *Meteorol.* **a** A region of normal, or approximately normal, barometric pressure. **b** An isobar of normal pressure.

mes'o·ben'thos (mĕs'ō·bĕn'thŏs; mē'sō-), *n.* [NL., fr. *meso-* + *benthos.*] *Biol.* The fauna and flora of the sea bottom between 100 and 500 fathoms.

mes'o·blast (mĕs'ō·blăst; mē'sō-), *n.* [*meso-* + *-blast.*] *Embryol. & Zool.* The middle germ layer of the embryo.

mes'o·blas·te'ma (mĕs'ō·blȧs·tē'mȧ; mē'sō-), *n.* [NL., fr. *meso-* + *blastema.*] The mesoblast. — **mes'o·blas·tem'ic** (-tĕm'ĭk), *adj.*

mes'o·blas'tic (-blăs'tĭk), *adj. Embryol.* Relating to, or derived from, the mesoblast.

mesoblastic somite. *Embryol.* A primitive segment.

mes'o·bran'chi·al (-brăng'kĭ·ȧl), *adj.* [*meso-* + *branchial.*] *Zool.* Of or pertaining to the middle branchial region of a crab's carapace.

mes'o·breg'mate (-brĕg'mȧt), *adj.* [*meso-* + Gr. *bregma* front part of the head.] *Craniol.* Having the top of the skull moderately rounded.

mes'o·cae'cum (-sē'kŭm), *n.* [NL., fr. *meso-* + *caecum.*] *Anat.* The fold of peritoneum attached to the caecum. — **mes'o·cae'cal** (-kȧl), *adj.*

mes'o·car'di·a (-kär'dĭ·ȧ), *n.* [NL., fr. *meso-* + *-cardia.*] *Anat.* An unusual position of the heart, in the central part of the thorax.

mes'o·car'di·um (-kär'dĭ·ŭm), *n.* [NL.] **1.** *Embryol.* The membrane connecting the embryonic heart with the body wall and intestine. **2.** *Anat.* The part of the pleura fused with the pericardium.

mes'o·carp (mĕs'ō·kärp; mē'sō-), *n.* [*meso-* + *-carp.*] *Bot.* The middle layer of a pericarp. Cf. ENDOCARP.

mes'o·cen'trous (mĕs'ō·sĕn'trŭs; mē'sō-), *adj.* [*meso-* + Gr. *kentron* center.] *Zool.* Having a median center of ossification.

mes'o·ceph'al (mĕs'ō·sĕf'ȧl; mē'sō-), *n.* A mesaticephalic person.

mes'o·ce·phal'ic (-sē·făl'ĭk), *adj.* [*meso-* + *cephalic.*] *Anat.* **a** Pertaining to the middle region of the head. **b** Having the cranial cavity of medium capacity. **c** Mesaticephalic. **d** Mesencephalic. — **mes'o·ceph'a·ly** (-sĕf'ȧ·lĭ), **mes'o·ceph'a·lism** (-lĭz'm), *n.*

mes·o·ceph'a·lon (-sĕf'ȧ·lŏn), *n.* [NL.] The mesencephalon. *Rare.*

mes'o·ceph'a·lous (-sĕf'ȧ·lŭs), *adj.* Mesocephalic.

mes'o·chil'i·um (mĕs'ō·kĭl'ĭ·ŭm; mē'sō-), *n.* [NL., fr. *meso-* + Gr. *cheilos* lip.] *Bot.* The center of the labellum in certain orchids.

mes'o·chon'dri·um (-kŏn'drĭ·ŭm), *n.* [NL., fr. *meso-* + Gr. *chondros* cartilage.] *Zool.* The matrix of cartilage.

mes'o·chro'ic (-krō'ĭk), *adj.* [Gr. *mesochroos* of mixed complexion, fr. *mesos* middle + *chrōs, chroos,* complexion.] *Ethnol.* Having a complexion intermediate between light and dark, as the Mongolian race.

mes'o·coele (mĕs'ō·sēl; mē'sō-), *n.* Also **mes'o·coe'li·a** (-sē'lĭ·ȧ). [NL. See MESO-; -COELE.] *Anat.* The ventricle of the mesencephalon. — **mes'o·coe'li·an** (-sē'lĭ·ȧn; 159), *adj.* — **mes'o·coe'lic** (-sē'lĭk), *adj.*

mes'o·co'lon (-kō'lŏn), *n.* [NL., fr. Gr. *mesokōlon,* fr. *mesos* middle + *kōlon* colon.] *Anat.* A fold of peritoneum, or mesentery, joining the colon (usually the transverse colon) to the dorsal abdominal wall. — **mes'o·col'ic** (-kŏl'ĭk), *adj.*

mes'o·cor'a·coid (-kŏr'ȧ·koid), *adj.* [*meso-* + *coracoid.*] *Zool.* Designating, or pertaining to, a median element of the coracoid arch in certain teleost fishes, as the Nematognathi, Plectospondyli, and Isospondyli; — called also *precoracoid.* — *n.* A mesocoracoid bone.

mes'o·cra'ni·al (-krā'nĭ·ȧl; 159), *adj.* [*meso-* + *-cranial.*] *adj.* Mesocephalic.

mes'o·crat'ic (mĕs'ō·krăt'ĭk; mē'sō-), *adj.* [*meso-* + Gr. *kratein* to rule.] *Geol.* Having nearly equal dark and light mineral constituents; as, a *mesocratic* diorite. Cf. LEUCOCRATIC, MELANOCRATIC.

mes'ode (mĕs'ōd), *n.* [Gr. *mesōidos.* See MESO-; ODE.] *Gr. Drama.* A portion of a choral ode between a strophe and its antistrophe. — **mes·od'ic** (mĕs·ŏd'ĭk), *adj.*

mes'o·derm (mĕs'ō·dûrm; mē'sō-), *n.* [*meso-* + *-derm.*] *Embryol. & Zool.* The middle germ layer; the mesoblast; also, the tissues which are subsequently developed from it. See GERM LAYER, cf. MESOGLOEA. — **mes'o·der'mal** (-dûr'mȧl), *adj.* — **mes'o·der'mic** (-mĭk), *adj.*

Mes'o·des'ma (-dĕz'mȧ), *n.* [NL., fr. *meso-* + Gr. *desmos* bond, ligament.] *Zool.* A genus of marine bivalves (Tellinacea), living mostly in the sand in shallow water. It is the type of a family, **Mes'o·des·mat'i·dae** (-dĕz·măt'ĭ·dē), syn. **Mes'o·des'mi·dae** (-dĕz'mĭ·dē).

Mes'o·de·vo'ni·an (-dē·vō'nĭ·ăn), **Mes'o·de·von'ic** (-vŏn'ĭk), *adj. Geol.* Middle Devonian. See GEOLOGY, *Chart.*

mes'o·dont (mĕs'ō·dŏnt; mē'sō-), *adj.* [*mes-* + *-odont.*] Having medium-sized teeth. See DENTAL INDEX.

Mes'oe·nat'i·des (mĕs'ē·năt'ĭ·dēz; mē'sē-), *n. pl.* [NL., fr. *Mesoenas,* type genus, fr. *mes-* + Gr. *oinas* wild pigeon.] *Zool.* A suborder of small, raillike birds (order *Gruiformes*) consisting of two Madagascan genera *Mesites* and *Monias.*

mes'o·fur'ca (mĕs'ō·fûr'kȧ; mē'sō-), *n.; pl.* -CAE (-sē). [NL., fr. *meso-* + L. *furca* fork.] *Zool.* The middle apodeme of the thorax of an insect, projecting upward from the sternum into the body cavity. — **mes'o·fur'cal** (-kȧl), *adj.*

mes'o·gas'ter (-găs'tĕr), *n.* [NL.] *Embryol.* The mesogastrium. — **mes'o·gas'tral** (-trȧl), *adj.*

meson-dewe, mesondieu. † MEASONDUE.

mes'o·gas'tric (mĕs'ō·găs'trĭk; mē'sō-), *adj.* **a** *Anat. & Embryol.* Of or pert. to the mesogastrium. **b** *Zool.* Of or pert. to the middle gastric lobe of a crab's carapace.

mes'o·gas'tri·um (-găs'trĭ·ŭm), *n.* [NL., fr. *meso-* + Gr. *gastēr* belly.] *Anat.* **a** In the embryo, either of the two mesenteries of the stomach. **b** The umbilical region.

mes'o·gloe'a (mĕs'ō·glē'ȧ; mē'sō-), *n.* [NL., fr. *meso-* + Gr. *gloios* a glutinous substance.] *Zool.* In sponges and coelenterates, a gelatinous substance between the endoderm and ectoderm; — often called *mesoderm.* — **mes'o·gloe'al** (-ȧl), *adj.*

mes'og·nath'ic (mĕs'ŏg·năth'ĭk; mē'sŏg-), *adj.* Mesognathous.

mes'og·nath'i·on (mĕs'ŏg·năth'ĭ·ŏn; mē'sŏg-), *n.* [NL., fr. *meso-* + *gnathion.*] *Anat. & Zool.* The lateral part of the premaxilla bearing the lateral incisor tooth, on each side.

me·sog'na·thous (mē·sŏg'nȧ·thŭs; mē-), *adj.* [*meso-* + *-gnathous.*] **a** *Anthropom.* Having the jaws of medium size and slightly projecting; also, having a facial profile angle of 80° to 85°. **b** *Anat. & Zool.* Of, pertaining to, or designating the mesognathion. — **me·sog'na·thism** (-thĭz'm), **me·sog'na·thy** (-thĭ), *n.*

mes'o·gy'rate (mĕs'ō·jī'rȧt; mē'sō-), *adj.* [*meso-* + *gyrate.*] *Zool.* Curving toward the center, as the umbones of some bivalves. Cf. PROSOGYRATE.

mes'o·he'par (-hē'pär), *n.* [NL.] *Zool.* A mesentery of the liver.

Mes'o·hip'pus (mĕs'ō·hĭp'ŭs; mē'sō-), *n.* [NL., fr. *meso-* + Gr. *hippos* horse.] *Paleontol.* A genus of horses about as large as sheep, from the Oligocene of North America. See EQUIDAE, *Illust.*

mes'o·labe (mĕs'ō·lāb), *n.* [L. *mesolabium,* fr. Gr. *mesolabos,* fr. *mesos* middle + *lambanein* to take.] An instrument of the ancients for finding two mean proportionals between two given lines, required in solving the problem of the duplication of the cube. It was also used for extracting roots geometrically.

mes'ole (mĕs'ōl), *n.* [See MESOLITE.] = THOMSONITE.

mes'o·lec'i·thal (mĕs'ō·lĕs'ĭ·thȧl; mē'sō-), *adj.* [*meso-* + Gr. *lekithos* egg yolk.] Centrolecithal.

mes'o·lim'ni·on (-lĭm'nĭ·ŏn), *n.* [NL., fr. *meso-* + Gr. *limnion,* dim. of *limnē* marsh, pool.] The middle stratum of water in a lake or sea.

mes'o·lite (mĕs'ō·lĭt; mē'sō-lĭt), *n.* [*meso-* + *-lite.*] *Mineral.* A zeolitic mineral, intermediate between natrolite and scolecite.

mes'o·lith'ic (-lĭth'ĭk), *adj.* [*meso-* + *-lith* + *-ic.*] *Archaeol.* Designating a stage of culture intermediate between the paleolithic and the neolithic.

me·sol'o·gy (mē·sŏl'ō·jĭ; mē-), *n.* [*meso-* + *-logy.*] Ecology. — **mes'o·log'ic** (mĕs'ō·lŏj'ĭk; mē'sō-), **mes'o·log'i·cal** (-ĭ·kȧl), *adj.*

mes'o·mere (mĕs'ō·mēr; mē'sō-), *n.* [*meso-* + *-mere.*] *Embryol.* **a** A primitive segment, or mesoblastic somite. **b** A blastomere of medium size.

mes'o·me'tri·um (-mē'trĭ·ŭm), *n.* [NL., fr. *meso-* + Gr. *mētra* womb. See MATRIX.] *Zool.* A fold of the peritoneum supporting the oviduct or uterus. — **me·som'e·tral** (mē·sŏm'ē·trȧl; mē-), **mes'o·met'ric** (mĕs'ō·mĕt'rĭk; mē'sō-), *adj.*

mes'o·morph (mĕs'ō·môrf; mē'sō-), *n.* [*meso-* + *-morph.*] A type of human body of medium limb length and head dimension.

mes'o·mor'phic (-môr'fĭk), *adj. Physical Chem.* Designating, pertaining to, or existing in, an intermediate state, esp. a semicrystalline condition characteristic of liquid crystals (which see). In the *nematic* mesomorphic state, the orientation of the molecules or atoms is in parallel lines; in the *smectic,* the orientation is in parallel planes or layers.

Mes'o·my·o'di (mĕs'ō·mī·ō'dī; mē'sō-), *n. pl.* [NL., fr. *meso-* + Gr. *mys, myos,* muscle + *ōidē* song.] *Zool.* A group of passerine birds having the syringeal muscles attached to the middle of the bronchial semirings; — nearly equiv. to *Clamatores.* Disting. from *Acromyodi.* — **mes'o·my·o'di·an** (-dĭ·ăn), *adj. & n.* — **mes'o·my'o·dous** (-mĭ'ō·dŭs), *adj.*

mes'on (mĕs'ŏn; mē'sŏn), *n.* [NL., fr. Gr. *meson* middle, neut. of *mesos,* adj., middle.] *Zool.* The mesial plane.

mess of pottage. Something valueless or trivial or of inferior value; — in allusion to Genesis XXV. 29–34.

mes'sor (mĕs'ôr), *n.* [L., a reaper.] *Feudal Law.* An officer on some manors, below the reeve, and in charge of the harvest.

mess pork. Barreled salt pork made from shoulders and sides of lightweight hogs, cut in pieces of about 4 lbs. each.

mess'room' (mĕs'rōōm'; 200), *n.* A room used for a mess; a dining room.

mes'srs. (mĕs''rz). Usual written form of MESSIEURS.

mess'tin' (mĕs'tĭn'), *n. Mil.* An oval-shaped metal vessel, a part of a soldier's mess equipment.

mes'suage (mĕs'wĭj), *n.* [AF. *messuage*, prob. for *mesnage.* See MÉNAGE.] *Law.* A dwelling house, with the adjacent buildings and curtilage, and the adjoining lands.

mess'-up', *n.* Muddle; melee. *Colloq.*

mess'y (mĕs-ĭ), *adj.;* MESS'I-ER (-ĭ-ĕr); MESS'I-EST. Like a mess; disordered, untidy. — **mess'i-ness** (-ĭ-nĕs; 119), *n.*

mes-tee' (mĕs-tē'), *n.* [From MESTIZO.] A mustee.

mes'tive (mĕs'tĭv), *adj.* [L. *maestus* sad.] Mournful. *Obs.*

mes-ti'zo (mĕs-tē'zō), *n.; pl.* -ZOS, -ZOES (-zōz). [Sp., like OF. *mestis* (F. *métis*), fr. LL. *misticius, mixticius*, fr. L. *mixtus* mixed, past part. of *miscere* to mix. See MIX; cf. MESTEE, MÉTIF, MÉTIS, MUSTEE.] Esp. in Spanish America and the Philippines, a person of mixed blood; esp., the offspring of a European or person of European stock and an (East) Indian, Negro, Malay, or other person of dark, non-European stock; often specif., *Phil. I.*, a person of Chinese and native blood; hence, loosely, any half-breed.

‖**mes'to** (mĕs'tō), *adj.* [It.] *Music.* Sad, pensive.

mes'tome (mĕs'tōm), *n.* [Gr. *mestōma* fullness, fr. *mestos* full.] *Bot.* The conducting tissue in plants, including the hadrome and leptome. Cf. STEREOME.

Mes'u-a (mĕs'ū-ȧ), *n.* [NL., after Ar. *ibn-Māsawayh* (d. 857), Persian Christian physician in the service of the Caliph.] *Bot.* A small genus of tropical Asiatic trees of the balsam-tree family (Clusiaceae). *M. ferrea*, the ironwood or rose chestnut, yields nagkassar oil.

Mes-vin'i-an (mĕs-vĭn'ĭ-ăn; 159), *adj. Archaeol.* Pre-Chellean; — from the culture site of Mesvin, Belgium.

me-sym'ni-on (mĕ-sĭm'nĭ-ŏn), *n.* [Gr.] *Anc. Pros.* A short colon or rhythmic series interpolated in a stanza.

met (mĕt), *n.* [AS. *gemet* a measure.] **1.** Measure; measurement. *Obs.*

2. Unit or instrument of measuring, usually a bushel; also, the quantity measured. *Now Dial*

met (mĕt). Var. of MEAT. *Now Dial.*

met, *past tense & past part.* of MEET.

met-. = META-.

me'ta (mē'tȧ), *n.; pl.* METAE (-tē). [L.] *Rom. Antiq.* One of the posts to mark the turning place or goal in a race.

met'a- (mĕt'ȧ-), **met-.** [Gr. *meta* between, with, after; akin to AS. *mid* with, G. *mit*, Goth. *mith*, E. *mid*, in *midwife*.] A prefix meaning in general *along with, after*, denoting: **1.** a *Posteriority; succession; after-*, as in *metachronism.* b *Change; transposition; transfer; trans-*, as in *metamorphosis.* c [From *metaphysics.*] *Beyond; transcending; higher*, as in *metapsychosis*; — chiefly in names of sciences, as in *metachemistry, metageometry.*

2. *Anat. & Zool. Situated behind; dorso-*, as in *metapore.*

3. *Biol. Succession; one after another*, as in *metabiosis.*

4. *Bot. & Zool. A later or a more highly organized* or *specialized form of a* (specified) *type*, as in *Metazoa.*

5. *Chem.* a A substance *isomeric with*, or *otherwise closely related to, the one to whose name the prefix is attached*, as in *metaldehyde.* b Denoting certain inorganic acids and hydroxides *derived from the ortho*, or ordinary, *form by loss of water (usually of one molecule of water from each molecule of acid* or hydroxide), as in *metaphosphoric* acid, HPO_3, aluminum *metahydroxide*, $AlO(OH)$. Cf. PYRO-. c Any of certain benzene derivatives or compounds analogous to them in structure, as in *metaxylene*, (*m*-xylene). Abbr. *m-*. See BENZENE RING. d See NAPHTHALENE.

6. *Geol. & Mineral. A process* or *product of metamorphism*, as in *metadiorite. Now Rare.*

7. *Med. Occurring subsequently; post-*, as in *metainfective.*

met'a (mĕt'ȧ), *adj. Chem.* = META-, 5; as, *meta* position.

Me'ta (mē'tȧ), *n.* Dim. of MARGARET.

me-tab'a-sis (mĕ-tăb'ȧ-sĭs), *n.; pl.* -ASES (-sēz). [NL., fr. Gr. *metabasis*, fr. *metabainein* to pass over, fr. *meta* over + *bainein* to go.] A transition; as: a *Med.* A change, as of disease, symptoms, or treatment. b *Rhet.* A transition from one subject or point to another.

me-tab'a-site (-sīt), *n.* [*meta*morphosed *basic* rocks + *-ite.*] Any of various metamorphosed basic igneous rocks, including basalts and diabases.

met'a-bat'ic (mĕt'ȧ-băt'ĭk), *adj.* [Gr. *metabatikos* easily moving. See METABASIS.] *Physics.* Of or pertaining to the transfer of heat or of any form of energy.

met'a-bi-ol'o-gy (mĕt'ȧ-bī-ŏl'ō-jĭ), *n.* A system of knowledge or science constructed on or around biological principles. — **-bi'o-log'i-cal** (-bī'ō-lŏj'ĭ-kăl), *adj.*

met'a-bi-o'sis (-bī-ō'sĭs), *n.* [NL., fr. *meta-* + Gr. *biōsis* way of life; cf. Gr. *metabioun* to live after.] *Biol.* a A mode of life in which one organism so depends on another that it cannot flourish unless the latter precedes and influences the environment favorably. b A change of condition in an organism caused by an outside stimulus, as mutations in bacteria resulting from exposure to ultraviolet rays. — **met'a-bi-ot'ic** (-ŏt'ĭk), *adj.* — **-bi-ot'i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

met'a-bi-sul'phite (-bī-sŭl'fīt), *n.* [*meta-* + *bisulphite.*] *Chem.* A salt of the hypothetical acid $H_2S_2O_5$; — called also *pyrosulphite.* Potassium metabisulphite, $K_2S_2O_5$, is used in wine making, photography, etc.

met'a-blet'ic (mĕt'ȧ-blĕt'ĭk; -blē'tĭk), *adj.* [Gr. *metablētikos.*] Of the nature of barter. *Rare.*

Me-tab'o-la (mĕ-tăb'ō-lȧ; mē-), *n. pl.* [NL., fr. Gr. *metabolē* change, fr. *meta* beyond + *ballein* to throw. See DEVIL.] *Zool.* A division of the insects which undergo a metamorphosis. — **met'a-bo'li-an** (mĕt'ȧ-bō'lĭ-ăn; 159), *n.* — **me-tab'o-lous** (mĕ-tăb'ō-lŭs; mē-), *adj.*

met'a-bol'ic (mĕt'ȧ-bŏl'ĭk), *adj.* Also **met'a-bol'i-cal** (-ĭ-kăl). [Gr. *metabolikos.* See METABOLA.] **1.** *Biol. & Physiol.* Of, pertaining to, or characterized by, metabolism.

2. *Zool.* Pert. to, or undergoing, a metamorphosis; changeable in form; specif., of or pert. to the Metabola.

me-tab'o-lism (mĕ-tăb'ō-lĭz'm), *n.* **1.** *Biol. & Physiol.* The sum of the processes concerned in the building up of protoplasm and its destruction incidental to life; the chemical changes in living cells, by which the energy is provided for the vital processes and activities, and new material is assimilated to repair the waste. Metabolism may be regarded as including two aspects: constructive (termed *anabolism* or *assimilation*) or destructive (*catabolism* or *dissimilation*). Both forms consist of a series of steps. In anabolism these are in the main synthetic, resulting in building up of the nutritive substances into the more complex living protoplasm. In catabolism they are mainly destructive, decomposing and oxidizing the constituents of protoplasm into simpler bodies with a liberation of energy. Anabolism and catabolism go on together, but one may predominate and obscure the other. The anabolic activity of animal cells is less conspicuous, and the catabolism (in consequence of their greater activity) usually greater than in plants; they require complex organic substances (proteins, carbohydrates, fats, etc.) as nutriment, and they excrete simple substances, as water, carbon dioxide, urea, etc., as catabolic products. The cells composing the green tissue of plants are conspicuously anabolic, building up carbohydrates from the carbon dioxide of the air by photosynthesis, and utilizing these substances, with the nitrates and other mineral salts absorbed from the soil, in the formation of complex compounds. See NUTRITION, SECRETION, ASSIMILATION, CATABOLISM.

2. *Zool.* Metamorphosis; — usually in combination, as in *ametabolism, holometabolism*, etc.

me-tab'o-lite (-lĭt), *n. Physiol.* Any product of metabolism.

me-tab'o-lize (-līz), *v. t.;* -LIZED (-lĭzd); -LIZ'ING (-lĭz'ĭng). *Physiol.* To subject to metabolism. — *v. i. Physiol.* To perform metabolism.

me-tab'o-lon (-lŏn), *n.* [NL., fr. Gr. *metabolos* changeable. See METABOLA.] *Physics & Chem.* Any of the changing, short-lived atoms formed in disintegration of a radioactive element.

me-tab'o-ly (-lĭ), *n.* [Gr. *metabolē, metabolia*, a changing.] = METABOLISM. *Rare.*

met'a-bo'rate (mĕt'ȧ-bō'rāt; 181), *n. Chem.* A salt or ester of metaboric acid.

met'a-bo'ric (-rĭk), *adj.* [*meta-* + *boric.*] *Chem.* Pertaining to or designating an acid, HBO_3 or $H_3B_3O_6$, obtained as a glassy amorphous solid by heating ordinary boric (orthoboric) acid to 100° C. (212° F.).

met'a-bran'chi-al (-brăng'kĭ-ăl), *adj. Zool.* Of or pertaining to a posterior lobe of the carapace of crabs.

met'a-brush'ite (-brŭsh'īt), *n. Mineral.* A mineral closely similar to, and occurring with, brushite.

me-tab'u-lar (mĕ-tăb'ū-lĕr), *adj.* Of or pert. to metabolism.

met'a-car'pal (mĕt'ȧ-kär'păl), *adj. Anat.* Of or pertaining to the metacarpus. — *n.* A metacarpal bone.

met'a-car-pa'le (-kär-pā'lē), *n.; pl.* -PALIA (-lĭ-ȧ). [NL.] *Anat.* A metacarpal bone.

met'a-car'po-pha-lan'ge-al (-kär'pō-fȧ-lăn'jē-ăl), *adj.* Pertaining to the metacarpus and the phalanges.

met'a-car'pus (-kär'pŭs), *n.* [NL., fr. Gr. *metakarpion*, fr. *meta* beyond, between + *karpos* the wrist.] *Anat. & Zool.* The part of the hand or forefoot (esp. of its skeleton) between the carpus and the phalanges, containing, when all the digits are present, five more or less elongated bones. In many animals some are rudimentary or wanting, and adjacent ones may fuse, as in the cannon bones of the forelimbs of various ungulates (see CANNON BONE).

met'a-cen'ter, **met'a-cen'tre** (mĕt'ȧ-sĕn'tĕr; mĕt'ȧ-sĕn'-tĕr), *n.* [F. *métacentre.* See META-; CENTER.] *Hydros. & Shipbuilding.* The point of intersection (*M* in *Illust.*) of the vertical through the center of buoyancy (*B*) of a floating body with the vertical through the new center of buoyancy (*B'*) when the body is displaced however little. When *M* is above the center of gravity (*G*) of the floating body the position of the body is stable; when below it, unstable; when coincident with it, neutral.

Metacenter.

met'a-cen'tral (mĕt'ȧ-sĕn'trăl), *adj.* Metacentric.

met'a-cen'tric (-sĕn'trĭk), *adj.* Of or pertaining to the metacenter. — **met'a-cen-tric'i-ty** (-sĕn-trĭs'ĭ-tĭ), *n.*

metacentric height. The distance between the metacenter and the center of gravity of a floating body.

met'a-chem'ic (-kĕm'ĭk), *adj.* Also **met'a-chem'i-cal** (-ĭ-kăl). **1.** Of or pertaining to metachemistry.

2. *Geol.* Metasomatic.

met'a-chem'is-try (-kĕm'ĭs-trĭ), *n.* a Chemistry beyond the bounds of chemistry proper, as in a nonmaterial sphere; highly speculative chemistry.

An affair of race or of *metachemistry.* *Emerson.*

b The chemistry of subatomic phenomena. c Colloid chemistry; — a proposed term.

Met'a-chla-myd'e-ae (-klȧ-mĭd'ē-ē), *n. pl.* [NL. See META-; CHLAMYDEOUS.] *Bot.* A division of dicotyledonous plants in which the parts of the corolla are more or less united, the corolla being called *gamopetalous.* Plants of this group are assumed to be of later phylogenetic development than those of the co-ordinate group Archichlamydeae. Called also *Gamopetalae* and *Sympetalae.* — **met'a-chla-myd'e-ous** (-ē-ŭs), *adj.*

met'a-chro'ma-sis (-krō'mȧ-sĭs), **met'a-chro'ma-sy** (-sĭ), *n.* [NL., fr. *meta-* + Gr. *chrōma* color.] *Physiol.* The property of staining in a different color, as when treatment with a blue aniline dye makes a cellular element red. — **met'a-chro-mat'ic** (-krō-măt'ĭk), *adj.*

met'a-chro'ma-tin (-krō'mȧ-tĭn), *n.* [*metachromatic* + *-in.*] *Biol.* A heavily staining material in the cell division of certain blue-green algae. — **met'a-chro'ma-tin'ic** (-tĭn'ĭk), *adj.*

met'a-chro'ma-tism (-krō'mȧ-tĭz'm), *n.* [*meta-* + Gr. *chrōma, chrōmatos*, color.] Change of color; specif., *Physical Chem.*, a change of color due to a change in physical conditions, esp. in the temperature of a body.

met'a-chrome (mĕt'ȧ-krōm), *adj.* [*meta-* + *-chrome.*] Designating any of a series of mordant azo dyes; as, *metachrome* brown B.

met'a-chrome (mĕt'ȧ-krōm), *n.* A metachromatic granule.

me-tach'ro-nism (mĕ-tăk'rō-nĭz'm), *n.* [Gr. *metachronos, metachronios*, after the time, happening afterward, fr. *meta* beyond + *chronos* time; cf. F. *métachronisme*, ML. *metachronismus.*] An error in chronology committed by placing an event after its real date. Cf. PARACHRONISM.

met'a-chro'sis (mĕt'ȧ-krō'sĭs), *n.* [NL., fr. *meta-* + Gr. *chrōsis* a coloring.] *Zool.* The power of changing color at will by the expansion of special pigment cells, under nerve influence, as seen in many reptiles, fishes, etc. *Cope.*

met'a-cin'na-bar-ite (mĕt'ȧ-sĭn'ȧ-bär-īt), *n. Mineral.* Native mercuric sulphide, HgS. See MERCURY SULPHIDE.

met'a-cism (mĕt'ȧ-sĭz'm), *n.* [LL. *metacismus*, fr. Gr. *mytakismos* fondness for the letter μ.] **a** The placing of a word with final *m* before a word beginning with a vowel, — regarded as a fault in Latin prose composition. **b** *Lat. Gram.* Pronunciation of a final *m* before a vowel where it should be elided. c Mytacism.

met'a-clase (mĕt'ȧ-klās), *n.* [*meta-* + *-clase.*] *Geol.* A rock in which cleavage has developed, as in slate or schist.

met'ac-neme (mĕt'ăk-nēm), *n.* [*meta-* + Gr. *knēmē* shin.] *Zool.* A mesentery of any of the various secondary sets developed in most Zoantharia.

met'a-coele (mĕt'ȧ-sēl), *n.* [*meta-* + *-coele.*] The lower part of the fourth ventricle of the brain.

met'a-cone (-kōn), *n. Zool.* The posterior of the three cusps of a primitive upper molar; in higher forms, the posteroexternal cusp. The corresponding cusp of a lower molar, called **met'a-co'nid** (-kō'nĭd), is the posterointernal. See TRITUBERCULY. — **met'a-co'nal** (-năl), *adj.*

met'a-co'nule (-kō'nūl), *n. Zool.* The posterior intermediate cusp of a mammalian upper molar between the hypocone and the metacone. See TRITUBERCULY.

met'a-cor'a-coid (-kŏr'ȧ-koid), *n. Zool.* One of the two elements forming the coracoid process. *Howes.*

met'a-cra'sis (-krā'sĭs), *n.* [NL., fr. *meta-* + Gr. *krasis* a mixing.] *Geol.* Metamorphism by recrystallization, as in the conversion of limestone to marble.

met'a-cro'mi-on (mĕt'ȧ-krō'mĭ-ŏn), *n.* [NL.] *Zool.* A process projecting backward and downward from the acromion of the scapula of some mammals. — **met'a-cro'mi-al** (-ăl), *adj.*

met'a-cryst (mĕt'ȧ-krĭst), *n.* [*meta-* + *-cryst.*] *Petrog.* A pseudophenocryst of a secondary mineral in metamorphic rock; — called also *porphyroblast.*

met'a-cy'clic (-sī'klĭk; -sĭk'lĭk), *adj.* [*meta-* + *-cyclic.*] *Math.* Denoting, or pertaining to, any permutation of elements in any given cycle of numbers.

me-tad' (mē-tăd'), *n.* [Telugu dial. *mettăd.*] A small field rat (*Millardia meltada*).

met'a-dis-coi'dal (mĕt'ȧ-dĭs-koi'dăl), *adj. Anat. & Zool.* Designating a form of placenta. See PLACENTA, 1.

me-tad'ro-mous (mē-tăd'rō-mŭs), *adj.* [*meta-* + *-dromous.*] *Bot.* Having the primary veins in each segment given off from the upper side of the midrib, as in some ferns.

met'a-flu'id-al (mĕt'ȧ-flōō'ĭ-dăl; -d'l), *adj. Petrog.* Relating to a texture seen in some rhyolites and related rocks, in which the constituents lie more or less parallel.

met'a-ga-lac'tic (mĕt'ȧ-gȧ-lăk'tĭk), *adj.* [*meta-* + *galactic.*] *Astron.* In the vicinity of a galaxy, but not a component part of it.

met'a-gas'ter (-găs'tĕr), *n.* [NL., fr. *meta-* + *-gaster.*] *Embryol.* The definitive intestine of the embryo.

met'a-gas'tric (-găs'trĭk), *adj. Zool.* Of or pertaining to the two posterior gastric lobes of the carapace of crabs.

met'a-gas'tru-la (-găs'trōō-lȧ), *n.* [NL.] *Embryol.* Any form of gastrula which is modified or not typical.

met'age (mĕt'ĭj), *n.* [From METE, *v.*] Official measurement of contents or weight; also, the charge for it.

Met'a-geit'ni-on (mĕt'ȧ-gīt'nĭ-ŏn), *n.* [Gr. *metageitniōn.*] See GREEK CALENDAR.

met'a-gel'a-tin (-jĕl'ȧ-tĭn), **-tine** (-tĭn; -tēn), *n. Biochem.* A modification of gelatin that remains fluid, formerly used in photography.

met'a-gen'e-sis (mĕt'ȧ-jĕn'ē-sĭs), *n.* [NL., fr. *meta-* + *-genesis.*] *Biol.* Alternation of generations; specif., alternation of a gemmiparous, or asexual, and a sexual generation. — **met'a-ge-net'ic** (-jē-nĕt'ĭk), *adj.* — **i-cal-ly** (-ĭ-kăl-ĭ), *adv.*

met'a-gen'ic (-jĕn'ĭk), *adj.* Metagenetic.

met'a·hew'ett·ite (mĕt'ə̇·hū'ĕt·īt; -ĭt·īt), *n.* [*meta-* + *hewettite.*] *Mineral.* A mineral resembling hewettite, but differing slightly from it in its behavior during hydration. See HEWETTITE.

met'a·ig'ne·ous (mĕt'ə̇·ĭg'nē·ŭs), *adj.* Designating certain metamorphosed igneous rocks. See METAMORPHISM.

‖**mé'tai'rie'** (mā'tĕ'rē'; *E.* mē·tā'rē), *n.* [F.] A piece of land cultivated by a métayer.

met'a·ki·ne'sis (mĕt'ə̇·kĭ·nē'sĭs; -kī-), *n.* [NL., fr. *meta-* + Gr. *kinēsis* motion.] **a** See KINESIS. **b** *Biol.* = METAPHASE. — **met'a·ki·net'ic** (mĕt'ĭk), *adj.*

met'al (mĕt'l), *n.* [ME., fr. OF. *metal, metail,* fr. L. *metallum* metal, mine, fr. Gr. *metallon* metal, orig., mine; prob. akin to Gr. *metallan* to search after. Cf. METTLE, MEDAL.] **1.** Any of a class of substances which typically show a peculiar luster (see METALLIC LUSTER), are good conductors of electricity and heat, are opaque, and may be fused, as gold, bronze, steel, etc.; also, any such substance without reference to special character; as, a piece of *metal.* Most metals are malleable, and comparatively heavy. All except mercury are solid at ordinary temperatures, and when solid they are crystalline in structure. The peculiar properties of metals are accounted for by the theory of a particular type of chemical combination in which all the atoms tend easily to lose electrons. The positive ions thus formed cohere, held together by the electron gas produced from discarded electrons no longer bound to particular atoms. Cf. ELEMENT, *n.*, 9.

2. Material; substance; stuff; hence, spirit; mettle.

Till God make men of some other *metal* than earth. *Shak.*

3. A metal alloy or object (of the kind specified); as, gun *metal.* Specif.: **a** Gold. **b** Cast iron.

4. A mine; — a Latinism. *Jer. Taylor.*

5. The speculum of a reflecting telescope. *Obs.*

6. Hardened clay; shale.

7. The color pearl blue.

8. *Chem.* An elementary metal (sense 1), as distinguished from a mixed metal, or *alloy.* The metals constitute over three fourths of the recognized elements. See AMMONIUM, ARSENIC, NONMETAL.

☞ In naming new metals, it is customary to use the suffix *-um* or *-ium*; as, aluminum, beryll*ium.*

9. *Glass Mfg.* Glass in a state of fusion.

10. *Gunnery.* **a** The metal (sense 1) forming the barrel. **b** = LINE OF METAL; — in phrases, *over metal, under metal, with her metal,* that is, respectively, with muzzle higher than breech, with breech higher, with muzzle and breech level.

11. *Her.* Or (gold) or argent (silver) used as a tincture.

12. *Mining.* **a** Ore from which a metal is derived. **b** In coal mining, country rock as distinguished from coal.

13. *Naval.* The effective power of guns on a war vessel expressed in general terms of the weight of projectiles fired in a broadside; as, a ship with more *metal* in its main battery.

14. *Print.* Type metal; hence, state of being in type.

15. *Roads, Railroads, etc.* **a** = ROAD METAL. **b** *pl. Eng.* The rails of a railroad.

16. *Smelting.* In copper smelting, short for *blue metal,* the regulus containing about 60 per cent of copper.

☞ COMBINATIONS (all adjectives) are:

metal-bearing	metal-cutting	metal-melting
metal-bending	metal-decorated	metal-perforating
metal-boring	metal-drilling	metal-piercing
metal-bound	metal-drying	metal-shaping
metal-broaching	metal-edged	metal-sheathed
metal-bushed	metal-embossed	metal-slitting
metal-clad	metal-forged	metal-slotting
metal-clasped	metal-framed	metal-studded
metal-cleaning	metal-grinding	metal-testing
metal-coated	metal-jacketed	metal-tipped
metal-covered	metal-lined	metal-trimming

met'al, *adj.* Of or pertaining to metal.

met'al (mĕt'l), *v. t.;* MET'ALED (-ld) or MET'ALLED; MET'AL·ING or MET'AL·LING. **1.** To cover or furnish with metal; as, to *metal* a ship's bottom.

2. **a** To macadamize (a highway); to provide (a road) with metal. **b** To ballast (a railway).

metal age. The period including the Bronze Age and the Iron Age. Cf. AGE, *n.*, 7.

met'al·am·mo'ni·um (-ə̇·mō'nĭ·ŭm), *n.* [NL., fr. *metal* + *ammonium.*] *Chem.* Any radical regarded as derived from ammonium by replacing one or more of its hydrogen atoms by a metal. See MERCURIAMMONIUM. *Obs.*

metal carbonyl. = CARBONYL **b.**

metal cloth. = LAMÉ.

metal coloring. Bronzing. See BRONZE, *v. t.*, 3.

met'al·craft' (mĕt'l·krăft'; 83), *n.* Art of executing in metal artistic designs, as repoussé work, chasing, inlaying.

met·al'de·hyde (mĕt·ăl'dē·hīd), *n.* [*met-* + *aldehyde.*] *Chem.* A white crystalline substance, $(C_2H_4O)_3$ or $(C_2H_4O)_4$, a polymer of ordinary aldehyde formed from it below 0°C. (32° F.) in the presence of catalysts.

met'a·lep'sis (mĕt'ə̇·lĕp'sĭs), *n.; pl.* METALEPSES (-sēz). [L., fr. Gr. *metalēpsis* participation, alteration, fr. *metalambanein* to partake, to take in exchange, fr. *meta* beyond + *lambanein* to take.] *Rhet.* Substitution by metonymy of one figurative sense for another.

met'a·lep'tic (-lĕp'tĭk), *adj.* Also **met'a·lep'ti·cal** (-tĭ·kăl). [Gr. *metalēptikos.*] **1.** Of or pert. to a metalepsis. **2.** Designating a muscle having associated, or synergetic, action with other muscles.

— **met'a·lep'ti·cal·ly,** *adv.*

met'al·er, met'al·ler (mĕt'l·ĕr), *n.* One who places metal sheets on sized work.

metal fouling. See FOULING, *n.*, 2.

met'al·ine (mĕt'l·ĭn; -ēn), *n.* **1.** A substance of variable composition, as metallic oxides, wax, fats, etc., used as a substitute for ordinary lubricants.

2. An alloy of 35 parts cobalt, 30 copper, 25 aluminum, and 10 iron.

— **met'al·ine,** *adj.* — **met'al·ined** (-ĭnd; -ēnd), *adj.*

met'al·ing (mĕt'l·ĭng), *or* **met'al·ling,** *pres. part. & verbal n.* of METAL. Specif.: **n.** Metal for a road or railroad.

met'al·ist, met'al·list (-ĭst), *n.* A worker in metals.

met'al·ize, met'al·lize, (mĕt'l·īz), *v. t.* To treat with, esp. to coat with, a metal; to impregnate with a metal or metallic compound; also, *Rare,* to vulcanize; to mineralize, as a fossil. — **met'al·i·za'tion, met'al·li·za'tion** (-ĭ·zā'shŭn; -ĭ·zā'-), *n.*

met'al·lar'y (mĕt'ăl·ĕr'ĭ; -ĕr·ĭ), *n.* [LL. *metallarius* miner, fr. *metallum* metal.] A worker or expert in metals. *Obs.*

metal leaf. Dutch foil.

met'al·le'i·ty (mĕt'ə̇·lē'ĭ·tĭ), *n.* [F. *métalléité.*] Metallicity.

metalli-. A combining form, Latin *metalli-,* from *metallum,* meaning *metal,* as in **met·tal'li·fac'ture, met·tal'li·fi·ca'tion, met·tal'li·fy.**

met·tal'lic (mĕ·tăl'ĭk), *adj.* [F. or L.; F. *métallique,* fr. L. *metallicus,* fr. Gr. *metallikos,* fr. *metallon.* See METAL.] **1.** Of, pertaining to, or made of, a metal; as, a *metallic* salt; *metallic* ceiling; of the nature of metal; as, a *metallic* substance; exhibiting the characteristic properties of a metal in the free state (that is, not combined as in oxides or salts); as *metallic* lead.

2. Resembling metal, as in appearance, in sound under percussion, or in hard, inflexible quality; as, *metallic* color; a *metallic* style; a *metallic* voice.

3. Yielding metal; metalliferous.

☞ For some *metallic* phrases, see the second word.

met·tal'li·cal (mĕ·tăl'ĭ·kăl), *adj.* Metallic.

met·tal'li·cal·ly, *adv.* of METALLIC, METALLICAL.

metallic brown. **1.** A brown pigment containing usually about 50 to 70 per cent of ferric oxide, Fe_2O_3.

2. The color mineral brown.

metallic gray. The color granite.

met'al·lic'i·ty (mĕt'ə̇·lĭs'ĭ·tĭ), *n.* Quality of being metallic.

metallic luster, *or* **lustre.** A luster characteristic of metals in a compact state, and shown also by some other substances, as certain minerals and dyes.

met·tal'lic·ly (mĕ·tăl'ĭk·lĭ), *adv.* of METALLIC. *Rare.*

metallic oxide. *Chem.* An oxide of a metal.

metallic paint. **a** A paint, in which the pigment is chiefly iron oxide, used for painting metal surfaces. **b** A paint whose pigment is a metal, as bronze powder.

metallic paper. **a** Paper covered with a thin suspension of lime, whiting, and size. When it is written upon with a pewter or brass pencil, the lines can hardly be effaced. **b** A paper with a thin layer of a metal, as aluminum or tin.

metallic phosphorus. See PHOSPHORUS, 3.

met·tal'lics (mĕ·tăl'ĭks), *n. pl.* **1.** Metallic substances.

2. Flakes of metal to be used in paint.

met'al·lide (mĕt'l·īd), *n.* [See -IDE.] *Chem.* A binary compound of a metal, usually with another metal.

met'al·lif'er·ous (-lĭf'ĕr·ŭs), *adj.* [L. *metallifer,* fr. *metallum* metal + *ferre* to bear.] Producing or containing metal; yielding metals.

met·tal'li·form (mĕ·tăl'ĭ·fôrm), *adj.* [*metalli-* + *-form.*] Having the form or properties of a metal.

met·tal'lik (mĕ·tăl'ĭk), *n.* [Turk. See METAL; cf. BESHLIK.] Any of a series of debased coins formerly current in Turkey. The one nominally worth 20 paras, usually called *yirmilik,* varied in actual value from 10 to 18 paras (1 to 2 cents).

met'al·line (mĕt'l·ĭn; -īn), *adj.* [F. *métallin.*] **1.** Pertaining to, or resembling, a metal; metallic.

2. Impregnated with metallic salts; as, *metalline* water.

met'al·lish (-ĭsh), *adj.* Metallic. *Obs.*

met·tal'lo- (mĕ·tăl'ō-), **metall-.** A combining form, Greek *metallo-, metall-,* from *metallon,* metal, used to mean *metal,* as in *metallo*graphy, *metall*urgy.

met·tal'lo·chrome (mĕ·tăl'ō·krōm), *n.* [*metallo-* + *-chrome.*] A coloring or ring produced on metal by electrolytic deposition. See NOBILI'S RINGS.

met·tal'lo·chro'my (-krō'mĭ), *n.* [*metallo-* + *-chromy.*] The art or process of coloring metals, esp. by electrolytic deposition. See NOBILI'S RINGS.

met·tal'lo·ge·net'ic (-jē·nĕt'ĭk), *adj.* Also **met·tal'lo·gen'ic** (-jĕn'ĭk). *Geol.* Designating or pert. to the origin of ores.

met'al·log'e·ny (mĕt'l·ŏj'ē·nĭ), *n.* [*metallo-* + *-geny.*] *Geol.* The branch of geology which deals with the origin of ore deposits.

met·tal'lo·graph (mĕ·tăl'ō·grăf; 83), *n.* [*metallo-* + *-graph.*] **1.** A print made by metallography.

2. A photograph of a section of metal.

met·tal'lo·graph'ic (mĕ·tăl'ō·grăf'ĭk), *adj.* **1.** Pertaining to the description of coins. *Obs.*

2. Pertaining to, or produced by means of, metallography.

met'al·log'ra·phy (mĕt'l·ŏg'rə̇·fĭ), *n.* [*metallo-* + *-graphy.*] **1.** Study or science of metal structure and alloys; esp., study of such structure visually, as with the microscope.

2. A method of transferring impressions of the grain of wood to metallic surfaces by chemical action. *Rare.*

3. A substitute for lithography, in which metallic plates are used instead of stone.

— **met'al·log'ra·phist** (-fĭst), *n.*

met'al·loid (mĕt'l·oid), *n.* [*metall-* + *-oid.*] *Chem.* **a** *Obs.* An alkali metal, as sodium, or an alkaline-earth metal, as calcium. **b** A nonmetal. See NONMETAL. *Berzelius.* **c** An element, as arsenic, antimony, or tellurium, resembling the typical metals in certain properties only.

met'al·loid, *adj.* **1.** Having the appearance of a metal.

2. *Chem.* Of, pert. to, or of the nature of, a metalloid.

met'al·loi'dal (-oi'dăl; -d'l), *adj.* Metalloid.

met'al·lom'e·ter (-ŏm'ē·tĕr), *n.* [*metallo-* + *meter.*] A machine for testing small thin metal strips by flexion.

met·tal'lo·phone (mĕ·tăl'ō·fōn), *n.* [*metallo-* + *-phone.*] *Music.* **a** An instrument like a pianoforte, but having metal bars instead of strings. **b** An instrument like the xylophone, but having metallic instead of wooden bars.

met·tal'lo·plas'tic (mĕ·tăl'ō·plăs'tĭk), *adj.* [*metallo-* + *-plastic.*] Of or pertaining to the deposition of metal from solution in producing casts.

met·tal'lo·ther'a·peu'tic (mĕ·tăl'ō·thĕr'ə̇·pū'tĭk), *adj. Med.* Pert. to metallotherapy.

met·tal'lo·ther'a·py (-thĕr'ə̇·pĭ), *n.* [*metallo-* + *-therapy.*] *Med.* **1.** Treatment of disease, esp. of nervous affections, by applying metallic plates to the body.

2. Treatment of disease by administration of metals, or esp. their salts, as mercury salicylate in syphilis, etc.

met'al·lur'gy (mĕt'l·ûr'jĭ; mĕ·tăl'ûr·jĭ; 277), *n.* [NL. *metallurgia,* fr. Gr. *metallourgos* worker in metal, fr. *metallon* metal + *-ergos* worker, working. See METAL; WORK.] The science and art of extracting metals from their ores, refining them, and preparing them for use. It includes various processes, as smelting, amalgamation, electrolytic refining, rolling, heat-treating, etc. — **met'al·lur'gic** (mĕt'l·ûr'jĭk), **met'al·lur'gi·cal** (-jĭ·kăl), *adj.* — **met'al·lur'gi·cal·ly,** *adv.* — **met'al·lur'gist** (mĕt'l·ûr'jĭst; mĕ·tăl'ĕr·jĭst), *n.*

met'a·log'ic (mĕt'ə̇·lŏj'ĭk), *n.* A material logic, esp. one confined to metaphysical abstractions and of doubtful validity; also, a spurious logic.

met'a·log'i·cal (mĕt'ə̇·lŏj'ĭ·kăl), *adj.* [*meta-* + *logical.*] **1.** Beyond the scope or province of logic.

2. Of or pertaining to what is built on logical distinctions or principles, or what is analogous to logic.

met'al·or·gan'ic (mĕt'l·ôr·găn'ĭk), *adj.* Organometallic.

me·tal'o·scope (mē·tăl'ō·skōp), *n.* An instrument for examining metal. — **met'al·os'co·py** (mĕt'l·ŏs'kə·pĭ), *n.*

met'a·lu'mi·nate (mĕt'ə̇·lū'mĭ·nāt), *n.* [*met-* + *aluminate.*] *Chem.* A salt of **met'a·lu·min'ic ac'id** (-lū·mĭn'ĭk), $HAlO_2$; as, calcium *metaluminate* $Ca(AlO_2)_2$.

met'al·ware' (mĕt'l·wâr'), *n.* Work or ware of metal; esp., artistic work in metal.

met'al·work'ing (-wûr'kĭng), *n.* The process or occupation of shaping things out of metal. — **met'al·work'** (-wûrk'), *n. & v.* — **met'al·work'er** (-wûr'kĕr), *n.* — **·work'ing,** *adj.*

met'al·works' (-wûrks'), *n.* A workshop, factory, or the like, where metal is treated, shaped, forged, etc.

met'a·math'e·mat'ics (mĕt'ə̇·măth'ē·măt'ĭks), *n.* See -ICS. The philosophy of the higher mathematics. — **met'a·math'e·mat'i·cal** (-ĭ·kăl), *adj.*

met'a·mer (mĕt'ə̇·mĕr), *n.* [See METAMERE.] *Chem.* A compound which is metameric with one or more others.

me·tam'er·al (mē·tăm'ĕr·ăl), *adj.* Zool. Metameric.

met'a·mere (mĕt'ə̇·mēr), *n.* [*meta-* + *-mere.*] *Zool.* One of the more or less similar segments or parts arranged in a longitudinal series composing the body of many animals.

met'a·mer'ic (-mĕr'ĭk), *adj.* [*meta-* + *-meric.*] **1.** *Zool.* Of or pertaining to a metamere or metamerism.

2. *Chem.* Having the same elements united in the same proportion by weight, and with the same molecular weight, but of different structure and different properties; isomeric; — now relatively little used. See ISOMERIC.

met'a·mer'i·cal·ly (-ĭ·kăl·ĭ), *adv.* In a metameric manner.

me·tam'er·ide (mē·tăm'ĕr·Īd; -Id; 157), *n.* A metamer.

me·tam'er·ism (mē·tăm'ĕr·Īz'm), *n.* **1.** *Zool.* The state of being made up of metameres; serial segmentation.

2. *Chem.* State or quality of being metameric; also, the relation or condition of metameric compounds.

met'a·mer·i·za'tion (mĕt'ə̇·mĕr·ĭ·zā'shŭn; mē·tăm'ĕr-), *n. Zool.* The formation or differentiation of metameres.

me·tam'er·ized (mē·tăm'ĕr·Īzd), *adj. Zool.* Divided into metameres.

me·tam'er·ous (-ŭs), *adj.* Zool. Metameric.

me·tam'er·y (mē·tăm'ĕr·ĭ; mĕt'ə̇·mĕr·ĭ), *n.* Metamerism.

met'a·mor'phic (mĕt'ə̇·môr'fĭk), *adj.* [See METAMORPHOSIS.] **1.** Involving physical transformation; changing in form; as, a *metamorphic* potion.

2. Pert. to metamorphosis; as, a *metamorphic* stage.

3. *Geol.* Of, pertaining to, produced by, or exhibiting, metamorphism; as, *metamorphic* rocks. See METAMORPHISM.

met'a·mor'phism (-fĭz'm), *n.* **1.** Metamorphosis.

2. *Geol.* Broadly, any change in the constitution of any kind of rock; more commonly, a pronounced change, generally effected by action of pressure, heat, and water, resulting in a more compact and more highly crystalline condition of the rock. This phase of metamorphism is ***anamorphism,*** and is opposed to ***katamorphism,*** which is the breaking down of rock by chemical or mechanical processes. For convenience, distinction is made between ***local,*** or ***contact, metamorphism,*** produced by the intrusion of igneous masses or heated waters, and ***regional,*** or ***general, metamorphism,*** affecting wide areas. In the latter case pressure is the most important factor. Water, which is present in most rocks, acts by solution and redeposition; heat and pressure increase its potency. Pressure may have an effect apart from any movement of the rock masses (***static metamorphism***), or it may produce motion and deformation (***dynamic metamorphism***). ***Thermal metamorphism*** places emphasis on heat as a factor in the process; ***hydrothermal metamorphism*** on heat and moisture. Marble is metamorphosed limestone; most gneiss is metamorphosed granitic rock; while schists, which represent extreme metamorphism, may be derived from almost any sort of rock. Rocks produced by the metamorphism of sediments are sometimes called ***metasedimentary rocks,*** and those from igneous rocks, ***metaigneous rocks.*** See also DYNAMOMETAMORPHISM, HYDROMETAMORPHISM, METASOMATOSIS. Cf. EPIGENESIS, 2.

met'a·mor'phize (-fīz), *v. t.* To metamorphose.

met'a·mor·phop'si·a (-môr·fŏp'sĭ·ə), *n.; pl.* -SIAE (-ē). [NL. See METAMORPHOSIS; -OPSIA.] A defect of vision, consisting in a distortion of form and localization of objects.

met'a·mor'phose (mĕt'ə̇·môr'fōz; -fōs), *v.;* -PHOSED (-fōzd; -fōst); -PHOS·ING. [F. *métamorphoser.*] *Transitive:* **1.** To change into a different form; to transform; transmute.

And earth was *metamorphosed* into man. *Dryden.*

2. To cause to undergo metamorphosis.

—, *Intransitive: Zool.* To undergo a change of form.

Syn. — See TRANSFORM.

— **met'a·mor'phos·er** (-fōz·ĕr; -fōs), *n.*

met'a·mor'phose (-fōs), *n.* [Cf. F. *métamorphose.*] Metamorphosis. *Rare.*

met'a·mor·pho'sian (-môr·fō'shăn), *adj.* Metamorphosic.

met'a·mor·pho·sic (-môr'fō·sĭk), *adj.* Also, *Rare,* **met'a·mor·pho'si·cal** (-môr·fō'sĭ·kăl). Of or pert. to metamorphosis.

met'a·mor'pho·sis (mĕt'ə̇·môr'fō·sĭs; -môr·fō'sĭs; 277), *n.; pl.* -PHOSES (-sēz). [L., fr. Gr. *metamorphōsis,* fr. *metamorphoun* to transform, fr. *meta* beyond, over + *morphē* form.] **1.** Change of form, structure, or sub-

4. *Anat.* A change of one tissue into another, as cartilage into bone. Cf. OSSIFICATION, 1.
5. *Bot.* The sum of the various modifications through which a primitive plant structure may pass in the course of its development, whether phylogenetic or primarily ontogenetic.
6. *Chem.* **a** Any chemical change, as oxidation, reduction, hydrolysis, substitution, etc. **b** The changing of a compound into an isomeric form. See ISOMERIC, *adj.*
7. *Med.* A form of degeneration marked by conversion of certain tissues or structures into other material.
8. *Music.* Repetition of a musical figure or idea with modifications giving it a new character.
9. *Zool.* A marked and more or less abrupt change in the form or structure (and usually also in the habits, food, etc.) of an animal during postembryonic development, as when the larva of an insect becomes a pupa, or a tadpole changes to a frog. In entomology a metamorphosis is said to be *complete* when the larva, pupa, and imago differ from each other greatly in structure. An *incomplete* or *direct* metamorphosis implies that the young hatches from the egg with the general form of the adult or at no time passes into a quiescent stage corresponding to a pupa. Cf. HOLOMETABOLISM, HETEROMETABOLISM.

met'a·phor (mĕt'ȧ·fĕr; -fôr), *n.* [F. *métaphore*, fr. L. *metaphora*, fr. Gr. *metaphora*, fr. *metapherein* to carry over, transfer, fr. *meta* beyond, over + *pherein* to bring, bear. See META-; BEAR to carry.] *Rhet.* Use of a word or phrase literally denoting one kind of object or idea in place of another by way of suggesting a likeness or analogy between them (the ship *plows* the sea; a *volley* of oaths). See TROPE. A metaphor may be regarded as a compressed simile, the comparison implied in the former (a marble brow) being explicit in the latter (a brow white like marble).
Syn. — See COMPARISON.
met'a·phor'i·cal (-fôr'ĭ·kăl), *adj.* Also **met'a·phor'ic** (-ĭk). [Gr. *metaphorikos*; cf. F. *métaphorique.*] Of, pert. to, or comprising, a metaphor; as, a *metaphorical* expression. — **met'a·phor'i·cal·ly**, *adv.* — **met'a·phor'i·cal·ness**, *n.*
met'a·phor·ist (mĕt'ȧ·fĕr·ĭst), *n.* One who makes metaphors.
met'a·phos'phate (-fŏs'fāt), *n.* *Chem.* A salt of metaphosphoric acid. See PHOSPHORIC ACID, 1.
met'a·phragm (mĕt'ȧ·frăm), **met'a·phrag'ma** (-frăg'mȧ), *n.* [NL. *metaphragma*, fr. *meta-* + Gr. *phragma* a fence.] *Zool.* A phragma of the metathorax of insects. — **met'a·phrag'mal** (-frăg'măl), *adj.*

met'a·phrase (mĕt'ȧ·frāz), *n.* [Gr. *metaphrasis*, fr. *metaphrazein* to paraphrase, fr. *meta* beyond, over + *phrazein* to speak.] Orig., a translation or paraphrase; now, as opposed to a *paraphrase*, a translation from one language into another.
met'a·phrase, *v. t.*; **-PHRASED** (-frāzd); **-PHRAS'ING** (-frăz'ĭng). **a** To make a metaphrase of. Formerly, specif., to render into verse. **b** To alter the wording of.
met'a·phrast (-frăst), *n.* [Gr. *metaphrastēs.*] Orig., a translator; now, one who renders verse into a different meter, or prose into verse. — **met'a·phras'tic** (-frăs'tĭk), **met'a·phras'ti·cal** (-tĭ·kăl), *adj.* — **-ti·cal·ly**, *adv.*
met'a·phys'e·al (-fĭz'ē·ăl), *adj.* Of or pert. to a metaphysis.
met'a·phys'ic (-fĭz'ĭk), *adj.* Metaphysical. *Milman.*
met'a·phys'ic, *n.* [ML. *metaphysica*, fem. sing., fr. *metaphysica*, neut. pl. See METAPHYSICS.] **1.** = METAPHYSICS.

Words are the beginning of *metaphysic.* *Stevenson.*

2. Metaphysical character or constitution.
met'a·phys'i·cal (-ĭ·kăl), *adj.* [Cf. ML. *metaphysicus.*] **1.** Of or pertaining to metaphysics; according to rules or principles of metaphysics; hence, abstract or abstruse; as, *metaphysical* reasoning.
2. Pertaining to, or having, real being or the essential nature of reality; as, *metaphysical* truth; *metaphysical* being.
3. Preternatural or supernatural. *Obs.*

Fate and *metaphysical* aid. *Shak.*

4. Designating, or pertaining to, a so-called "school" of 17th-century poets, whose works abound in elaborate subtleties of thought and expression; — so called by Dr. Johnson. Donne, Cowley, Herbert, and Crashaw are of this group.
met'a·phys'i·cal·ly (mĕt'ȧ·fĭz'ĭ·kăl·ĭ), *adv.* **1.** In the manner of metaphysical science, or of a metaphysician.
2. In the mode of a metaphysical reality or existence.
3. Supernaturally. *Obs.*
met'a·phy·si'cian (-fĭ·zĭsh'ăn), **met'a·phys'i·cist** (-fĭz'ĭ·sĭst), *n.* [F. *métaphysicien.*] One versed in metaphysics.
met'a·phys'i·cous (-fĭz'ĭ·kŭs), *adj.* Versed in metaphysics. *Rare.*
met'a·phys'ics (-fĭz'ĭks), *n.* See -ICS. [From *metaphysic*, n., after ML. *metaphysica*, neut. pl., fr. Gr. *meta ta physika* after those things which relate to external nature, after physics, fr. *meta* beyond, after + *physikos* relating to external nature, natural, physical, fr. *physis* nature. See PHYSICS; cf. METAPHYSIC, *n.* The term was first used, it is believed, by Andronicus of Rhodes, the editor of Aristotle's works, as a name for that part of his writings which came *after* the *Physics.*] That division of philosophy which includes ontology, or the science of being, and cosmology, or the science of the fundamental causes and processes in things; in a looser sense, all of the more abstruse philosophical disciplines; in a narrower sense, ontology alone. The primary meaning of *metaphysics* is derived from those discussions by Aristotle which he himself called the First Philosophy or Theology, and which deal with the nature of being, with cause or genesis, and with the existence of God. Later, metaphysics was understood as the science of the supersensible. By Albertus Magnus it was called the ***transphysical science***; and Aquinas considered it to be concerned with the cognition of God. Scholastic philosophy in general understood it as the science of being in itself, that is, as *ontology*, a meaning which, with some difference of interpretation, is still retained. The Renaissance resulted in two developments. In Germany, Christian Wolff divided metaphysics into ontology, cosmology, psychology, and natural or rational theology. In England, Bacon defined it as the quest or study of formal and final causes, contrasting with it natural philosophy as treating efficient and material causes. As philosophy received from Descartes its peculiarly epistemological character, the conception of metaphysics altered from the science of being to the science of the conditions of knowledge. In England, owing to the prevalence of psychological problems, it became practically identified with the analytical psychology of the time; while in Germany, Kant's *Critique* asserted its transcendental province as the science of pure, or a priori, reason. The notion that metaphysics is concerned with that which transcends experience led to the positivistic denial of the possibility of metaphysical knowledge, while the critical spirit and logical point of view of Kant caused metaphysics to be identified with logic by Hegel, Schopenhauer and later writers have insisted that metaphysics is concerned with analysis of experience, in the broad sense, and this empirical view is largely held by modern writers.
me·taph'y·sis (mĕ·tăf'ĭ·sĭs), *n.* [NL., fr. Gr. *metaphyesthai* to become by change; cf. Gr. *physis* nature.] Change of form; transformation.
met'a·phyte (mĕt'ȧ·fīt), *n.* [*meta-* + *-phyte.*] *Bot.* A multicellular plant; — opposed to *protophyte.* — **met'a·phyt'ic** (-fĭt'ĭk), *adj.*
met'a·pla'si·a (-plā'zhĭ·ȧ), *n.* [NL. See META-; -PLASIA.] *Physiol.* Direct transformation of one form of tissue into another form, as of cartilage into bone.
me·tap'la·sis (mĕ·tăp'lȧ·sĭs), *n.* [NL. See META-; -PLASIS.] *Biol.* The condition of fulfilled growth and development in the ontogeny of an individual.
met'a·plasm (mĕt'ȧ·plăz'm), *n.* [L. *metaplasmus*, fr. Gr. *metaplasmos*, fr. *meta* beyond, over + *plassein* to mold.] **1.** *Biol.* **a** That part of the contents of a cell consisting of lifeless matter or inclusions, as certain carbohydrates. **b** Alloplasm.
2. *Gram.* **a** A change in the letters or syllables of a word. **b** The use for oblique cases of forms not from the nominative stem.
— **met'a·plas'mic** (-plăz'mĭk), *adj.*
met'a·plast (mĕt'ȧ·plăst), *n.* [See METAPLASM.] *Gram.* A form made by metaplasm.
met'a·plas'tic (-plăs'tĭk), *adj.* **a** *Physiol.* Pert. to, or produced by, metaplasia. **b** Of or pert. to metaplasm.
met'a·pleu'ral (-plōōr'ăl; 242), *adj.* *Zool.* **a** Of or pert. to a metapleure. **b** Of or pert. to the metapleuron.
met'a·pleure, met'a·pleur (mĕt'ȧ·plōōr), *n.* [*meta-* + Gr. *pleura* side.] *Zool.* One of the folds of integument along the abdomen in *Amphioxus* and related genera.
met'a·pleu'ron (-plōōr'ŏn; 242), *n.*; *pl.* **-RA** (-ȧ). [NL. See META-; PLEURON.] *Zool.* **a** One of the pleura of the metathorax of an insect. **b** = METAPLEURE.
met'a·pneu·mon'ic (-nū·mŏn'ĭk), *adj.* Succeeding pneumonia.
met'ap·neus'tic (mĕt'ăp·nūs'tĭk), *adj.* [*meta-* + Gr. *pneustikos* pertaining to breathing.] *Zool.* Breathing through a single pair of posterior or anal spiracles, as certain insect larvae.
met'a·po'di·al (mĕt'ȧ·pō'dĭ·ăl), *adj.* *Zool.* **a** Of or pert. to either the metacarpus or metatarsus. **b** Of or pert. to the metapodium. — *n.* A metacarpal or metatarsal bone.
met'a·po'di·a'le (-ā'lē), *n.*; *pl.* **-ALIA** (-lĭ·ȧ). [NL.] *Zool.* A metapodial bone.
met'a·po'di·um (-pō'dĭ·ŭm), *n.*; *pl.* **-DIA** (-dĭ·ȧ). [NL., fr. *meta-* + *-podium.*] *Zool.* The posterior division of the foot in mollusks.
met'a·pol'i·tics (-pŏl'ĭ·tĭks), *n.* Rarely, **met'a·pol'i·tic** (-tĭk). Theoretical political science. — **met'a·po·lit'i·cal** (-pō·lĭt'ĭ·kăl), *adj.* — **met'a·pol'i·ti'cian** (-pŏl'ĭ·tĭsh'ăn), *n.*
met'a·poph'y·sis (-pŏf'ĭ·sĭs), *n.*; *pl.* **-SES** (-sēz). [NL. See META-; APOPHYSIS.] *Anat.* A tubercle projecting from the anterior articular process of a vertebra, esp. in the lumbar region. In man the metapophyses are rudimentary and known as ***mammillary processes*** or ***tubercles***. — **met·ap'o·phys'e·al** (mĕt·ăp'ō·fĭz'ē·ăl), **-phys'i·al** (-ĭ·ăl), *adj.*
met'a·pore (mĕt'ȧ·pōr; 181), *n.* [*meta-* + *pore.*] The foramen of Magendie.
met'a·post'scu·tel'lum (-pōst'skū·tĕl'ŭm), *n.* *Zool.* The postscutellum of the metathorax of an insect. — **-scu·tel'lar** (-ĕr), *adj.*
met'a·pre·scu'tum (-prē·skū'tŭm), *n.* *Zool.* The prescutum of the metathorax of an insect. — **-scu'tal** (-tăl; -t'l), *adj.*
met'a·pro'te·in (-prō'tē·ĭn), *n.* [*meta-* + *protein.*] *Biochem.* Any of a class of products derived from proteins through the action of acids (***acid metaprotein***) or alkalies (***alkali metaprotein***), by which the solubility and sometimes the composition is changed. Cf. ALBUMINATE.
met'a·psy'chic (mĕt'ȧ·sĭ'kĭk), *adj.* Metapsychical.
met'a·psy'chi·cal (-kĭ·kăl), *adj.* Beyond ordinary psychology, or physiological psychology; — applied to studies of mediumistic and allied phenomena. — **met'a·psy'chics** (-kĭks), *n.* — **met'a·psy'chism** (-kĭz'm), *n.* — **met'a·psy'chist** (-kĭst), *n.*
met'a·psy·chol'o·gy (-sĭ·kŏl'ō·jĭ), *n.* [*meta-* + *psychology.*] Any theory that aims to supplement the facts and empirical laws of psychology by speculations on the connection of mental and physical processes or on the place of mind in the universe. Thus, Freud's metapsychology aims to supplement his treatment of the conscious and unconscious and of the motivation of behavior by a theory of memories as charges of physical energy and of emotion as a process of discharge. — **-psy'cho·log'i·cal** (-sĭ'kō·lŏj'ĭ·kăl), *adj.*
me·tap'sy·cho'sis (mĕ·tăp'sĭ·kō'sĭs), *n.* [NL., fr. Gr. *metapsychōsis.* See META-; PSYCHOSIS.] The action of mind on mind without known physical agency.
me·tap'ter·yg'i·um (mĕ·tăp'tĕr·ĭj'ĭ·ŭm), *n.* [NL., fr. *meta-* + Gr. *pterygion* fin.] *Zool.* The posterior of the three principal basal cartilages in the paired fins of certain fishes, esp. sharks and rays. — **me·tap'ter·yg'i·al** (-ăl), *adj.*
met'ap·ter'y·goid (mĕt'ăp·tĕr'ĭ·goid), *adj.* *Zool.* Situated behind the pterygoid. — *n.* A metapterygoid bone.
met·ar'a·bic ac'id (mĕt·ăr'ȧ·bĭk) [*met-* + *arabic.*] *Chem.* A white powder obtained from cherry and beech gums and sugar beet pulp, and formed artificially by heating arabic acid.
met'a·ross'ite (mĕt'ȧ·rŏs'īt), *n.* [*meta-* + *rossite.*] *Mineral.* A hydrous calcium vanadate. See ROSSITE.
met'a·sac'charin'ic acid (-săk'ȧ·rĭn'ĭk). See SACCHARINIC **b.**
met'a·scu·tel'lum (-skū·tĕl'ŭm), *n.* [NL.] The scutellum of the metathorax of an insect. — **scu·tel'lar** (-ĕr), *adj.*
met'a·scu'tum (-skū'tŭm), *n.* [NL.] *Zool.* The scutum of the metathorax of an insect. — **-scu'tal** (-tăl), *adj.*
met'a·so'ma (-sō'mȧ), *n.*; *pl.* **-SOMATA** (-tȧ). [NL., fr. *meta-* + *-soma.*] *Zool.* The hinder part of the body of a mollusk. — **met'a·so'mal** (-măl), *adj.*
met'a·so'ma·sis (-sō'mȧ·sĭs), *n.* [NL.] Metasomatosis.
met'a·so·mat'ic (-sō·măt'ĭk), *adj.* **a** *Geol.* Of or pertaining to metasomatism. **b** *Zool.* Of or pertaining to a metasoma.
met'a·so'ma·tism (mĕt'ȧ·sō'mȧ·tĭz'm), *n.* Metasomatosis.
met'a·so'ma·to'sis (mĕt'ȧ·sō'mȧ·tō'sĭs), *n.* [NL., fr. *meta-* + Gr. *sōma, sōmatos*, body.] *Geol.* Metamorphism developed by chemical transformation of the constituent minerals and the replacement of some of them with consequent change in the chemical composition of the rock.
met'a·sperm (mĕt'ȧ·spûrm), *n.* [*meta-* + *-sperm.*] *Bot.* An angiosperm. — **met'a·sper'mic** (-spûr'mĭk), *adj.* — **met'a·sper'mous** (-mŭs), *adj.*
met'a·sta'ble (-stā'b'l), *adj.* *Physics & Chem.* Designating or pertaining to a condition of comparative stability. — **met'a·sta·bil'i·ty** (-stȧ·bĭl'ĭ·tĭ), *n.*
metastable state. *Physics.* A state of an atomic system such that its energy of excitation cannot be radiated as light.
met'a·stan'nate (-stăn'āt), *n.* A salt of metastannic acid.
met'a·stan'nic ac'id (-ĭk). *Chem.* **a** Commonly, β-stannic acid. See STANNIC ACID. **b** Properly, α-stannic acid.
me·tas'ta·sis (mĕ·tăs'tȧ·sĭs), *n.*; *pl.* **-SES** (-sēz). [LL., transition, fr. Gr. *metastasis*, fr. *methistanai* to place in another way, fr. *meta* after + *histanai* to place.] **1.** Change of state, substance, or form.

The lamp and oil man, just then beginning, by a not unnatural *metastasis*, to bloom into a lighthouse engineer. *Stevenson.*

2. *Biol.* Metabolism.
3. *Med.* **a** The transfer of a disease-producing agency, as cells or bacteria, from a region of disease to another part of the body with development of a similar lesion in the new location. **b** The secondary growth of a malignant tumor so produced.
4. *Petrog.* A change of a paramorphic character, as the recrystallization of a limestone or the devitrification of a glassy rock.
5. *Rhet.* Change of subject, esp. sudden transition.
me·tas'ta·size (-sīz), *v. i.* [See -IZE.] *Med.* To spread to other parts by metastasis, as a tumor.
met'a·stat'ic (mĕt'ȧ·stăt'ĭk), *adj.* Also **met'a·stat'i·cal** (-ĭ·kăl). Of, pertaining to, or caused by, metastasis; as, a *metastatic* abscess. — **met'a·stat'i·cal·ly**, *adv.*
met'a·ster'num (-stûr'nŭm), *n.* [NL., fr. *meta-* + *-sternum.*] **a** *Anat.* The xiphisternum, or the xiphoid process. **b** *Zool.* The ventral plate of the metathorax. — **met'a·ster'nal** (-stûr'năl; -n'l), *adj.*
met'a·sthen'ic (-sthĕn'ĭk), *adj.* *Zool.* Strong in the hinder part of the body.
met'a·stib'nite (-stĭb'nīt), *n.* [*meta-* + *stibnite.*] *Mineral.* An amorphous, brick-red antimony trisulphide, Sb_2S_3, having the same composition as stibnite.

met·an'ti·mo'nic ac'id (mĕt·ăn'tĭ·mō'nĭk; -mŏn'ĭk). See ANTIMONIC ACID.
met·an'ti·mo'ni·ous (-mō'nĭ·ŭs), *or* **met·an'ti·mo·nous** (-ăn'tĭ·mō·nŭs), **ac'id.** See ANTIMONIOUS ACID.
met'a·pec'tic ac'id (mĕt'ȧ·pĕk'tĭk). = METARABIC ACID.
met'a·pec'tus (-pĕk'tŭs), *n.* [NL. See PECTUS.] = METASTERNUM.
met'a·pep'sis (-pĕp'sĭs), *n.* [NL.] *Petrog.* = REGIONAL METAMORPHISM. See METAMORPHISM.
met'a·per'i·od'ic ac'id (mĕt'ȧ·pûr'ĭ·ŏd'ĭk). See 2d PERIODIC.
met'a·phe'nyl·ene, *n.* See PHENYLENE.
met'a·phe'nyl·ene·di·am'ine, *n.* Also **-in.** See PHENYLENEDIAMINE.
met'a·phor·ize, *v. t. & i.* See -IZE.
met'a·phos·phor'ic ac'id. See PHOSPHORIC ACID, 1.
met'a·phos'pho·rous ac'id. See PHOSPHOROUS ACID.
met·taph'ra·sis (mĕ·tăf'rȧ·sĭs), *n.* [NL. See METAPHRASE.] = METAPHRASE. [NEW THOUGHT.]
Metaphysical Healing. See **metaphysical idealism.** See IDEALISM. [NECESSITY, 6 a.]
metaphysical necessity. See
metaphysical whole. See WHOLE.
met'a·phy·si'cian·ism (mĕt'ȧ·fĭ·zĭsh'ăn·ĭz'm), *n.* See -ISM.
metaphysical truth. See TRUTH, *n.*, 4 b.
met'a·phys'i·cize, *v. i. & t.* See [-IZE.]
me·taph'y·ton (mĕ·tăf'ĭ·tŏn), *n.* [NL.] *Bot.* = METAPHYTE.
met'a·plum'bate (mĕt'ȧ·plŭm'bāt), *n.*; **met'a·plum'bic** (-bĭk) **ac'id.** See PLUMBIC ACID; 1st -ATE.
met'a·rhy'o·lite, *n.* See META-.
met'ar·sen'ic ac'id (mĕt'är·sĕn'ĭk; -sĕ'nĭk). See ARSENIC ACID.
met'ar·se'ni·ous ac'id. See ARSENIOUS ACID.
met·ar'se·nite, *n.* See ARSENITE.
met'a·sed'i·men'ta·ry, *adj.* See METAMORPHISM, 2.
met'a·sil'i·cate, *n.* See SILICATE.
met'a·si·lic'ic, *adj.* See SILICIC ACID. [METASOMA.]
met'a·some (mĕt'ȧ·sōm), *n.* =
Met'a·sper'mae (-spûr'mē), *n. pl.* [NL. See -SPERM.] Syn. of ANGIOSPERMAE.

me·tas'to·ma (mē·tăs'tō·mȧ), *n.; pl.* -MATA (mĕt'ȧ·stō'mȧ·tȧ; -stōm'ȧ·tȧ). [NL., fr. *meta-* + Gr. *stoma* mouth.] *Zool.* A median platelike process behind the mouth in crustaceans and related arthropods.

me·tas'tro·phe (mē·tăs'trō·fē), *n.* [Gr. *metastrophē.*] Interchange. — **met'a·stroph'ic** (mĕt'ȧ·strŏf'ĭk), *adj.*

met'a·tar'sal (mĕt'ȧ·tär'sȧl; -s'l), *adj. Anat.* Of or pertaining to the metatarsus. — *n.* A metatarsal bone.

met'a·tar·sa'le (-tär·sā'lē), *n.* [NL.] A metatarsal bone.

met'a·tarse (mĕt'ȧ·tärs), *n.* The metatarsus. *Rare.*

met'a·tar'so·pha·lan'ge·al (-tär'sō·fȧ·lăn'jē·ȧl), *adj.* Pertaining to the metatarsus and the phalanges.

met'a·tar'sus (-tär'sŭs), *n.; pl.* -SI (-sī). [NL. See META-; TARSUS.] **1.** *Anat. & Zool.* The part of the foot (in quadrupeds, of the hind foot), or of its skeleton, between the tarsus and phalanges, containing, when all the digits are present, five more or less elongated bones. These are reduced in number or fused in many animals in a similar way to those of the metacarpus. In man it forms the instep; in horses and cattle, the part of the hind leg from the hock to the fetlock joint. In birds the metatarsus, ordinarily called *shank* or *tarsus*, contains a large bone representing three fused metatarsals and certain distal tarsal elements (united with its proximal end), and usually a rudiment of a fourth metatarsal.
2. *Zool.* **a** The tarsus of the posterior pair of legs of an insect. **b** The proximal segment of the tarsus of an insect. **c** The proximal segment of the foot of a spider.

met'a·tat'ic (-tăt'ĭk), *adj.* Also **met'a·tat'i·cal** (-ĭ·kȧl). [*meta-* + Gr. *tatos* that can be stretched.] *Physics.* Coincident in direction with the directions of stress or strain; — said of certain axes or planes used in discussing the elastic properties of bodies. — **met'a·tat'i·cal·ly,** *adv.*

met'a·tax'ic (-tăk'sĭk), *adj.* [See META-; -TAXIS.] *Geol.* Designating or pert. to rock cleavage due to fracture. *Rare.*

me·ta'te (mȧ·tä'tē), *n.* [Sp., fr. Nahuatl *metlatl.*] A stone with a concave upper surface, used in Spanish North America and by the Indians in the southwestern United States for grinding cereal seeds.

met'a·thal'a·mus (mĕt'ȧ·thăl'ȧ·mŭs), *n.* [NL., fr. *meta-* + *thalamus.*] *Anat.* A division of the diencephalon comprising the geniculate bodies.

Met'a·the'ri·a (-thē'rĭ·ȧ), *n. pl.* [NL. See META-; -THERIUM.] *Zool.* In some classifications, a subclass of mammals coextensive with Marsupialia. — **met'a·the'ri·an** (-thē'rĭ·ăn), *adj. & n.*

me·tath'e·sis (mē·tăth'ē·sĭs), *n.; pl.* -SES (-sēz). [LL., fr. Gr. *metathesis,* fr. *metatithenai* to place differently, to transpose, fr. *meta* beyond, over + *tithenai* to place, set. See META-; THESIS.] **1.** Change of place, condition, etc.; reversal; specif., transposition, as of the letters, sounds, or syllables of a word (A.-S. *ascian, axian* (cs = x); OHG. *erila, elira;* the deaf-mutism *knife* for *knife,* and similar miswritings or mispronunciations; *Falstaff* for *Fastolph*).
2. *Chem.* = DOUBLE DECOMPOSITION.
— **met'a·thet'ic** (mĕt'ȧ·thĕt'ĭk), **-thet'i·cal** (-ĭ·kȧl), *adj.* — **met'a·thet'i·cal·ly,** *adv.*

met'a·tho'rax (mĕt'ȧ·thō'răks; 181), *n.* [NL. See META-; THORAX.] The posterior segment of the thorax in insects. See INSECT, *Illust.* — **met'a·tho·rac'ic** (-thō·răs'ĭk), *adj.*

met'a·ti'tan·ate (-tī'tăn·āt), *n.* [See 1st -ATE, 3.] *Chem.* A salt of metatitanic acid, H_2TiO_3.

Me·ta'tron (mē·tä'trŏn), *n.* [Heb. *Mēṭāṭrōn,* an intermediary, fr. L. Gr. *metātōr,* fr. L. *metator* a fixer of boundaries.] *Jewish Theol.* An angelic envoy of God mentioned in the Midrashim.

met'a·troph'ic (mĕt'ȧ·trŏf'ĭk), *adj.* [*meta-* + *-trophic.*] *Biol.* Saprophytic.

met'a·tung'stic ac'id (mĕt'ȧ·tŭng'stĭk). [*meta-* + *tungstic.*] *Chem.* Any of various complex tungstic acids, esp. one obtained as a yellow crystalline solid soluble in water, having the formula $H_2W_4O_{13}$ ascribed to it.

met'a·type (mĕt'ȧ·tīp), *n.* [*meta-* + *-type.*] *Zool.* A topotype determined by the original describer of its species. — **met'a·typ'ic** (-tĭp'ĭk), *adj.*

met'a·van'a·date (mĕt'ȧ·văn'ȧ·dāt), *n.* A salt of metavanadic acid. See VANADIC ACID.

met'a·vaux'ite (-vōk'sĭt), *n.* [*meta-* + *vauxite.*] *Mineral.* A hydrous iron aluminum phosphate derived by alteration from vauxite. See VAUXITE.

met'a·vol'tine (-vŏl'tĭn; -tēn), *n.* [*meta-* + *voltaite.*] *Mineral.* A complex basic hydrous sulphate, chiefly of iron.

me·tax'ite (mē·tăk'sĭt), *n.* [G. *metaxit,* fr. Gr. *metaxa* silk.] *Mineral.* A fibrous serpentine.

met'a·xy'lem (mĕt'ȧ·zī'lĕm), *n. Bot.* That part of the primary xylem formed after the protoxylem and consisting of mature xylem elements. See XYLEM.

‖**mé'ta'yage'** (mȧ'tē'yȧzh'; *E.* mĕ·tā'yĭj), *n.* [F. See MÉTAYER.] The métayer system of farming land.

mé'ta'yer' (*F.* mȧ'tē'yā'; *E.* mĕ·tā'yēr), *n.* [F., fr. L. *medietas* half; cf. ML. *medietarius.* See MOIETY.] One who cultivates land for a share (usually one half) of its yield, receiving stock, tools, and seed from the landlord. Such a system (called the *métayer system* or *system of share rent*) was once common in England and continental Europe.

Met'a·zo'a (mĕt'ȧ·zō·ȧ), *n. pl.* [NL., fr. *meta-* + Gr. *zōion* animal.] *Zool.* A group comprising all animals except the Protozoa. They have the body when adult composed of numerous cells differentiated into tissues and organs, and, except in a few degraded parasitic forms, a digestive cavity lined with specialized cells. Reproduction is chiefly (in a majority of forms always) sexual, and each individual thus produced begins its existence as a single cell (see EGG), which by mitotic division and differentiation of the resulting new cells grows into an adult organism, generally passing through an embryonic stage known as a *gastrula* (which see), or some recognizable modification of it. — **met'a·zo'al** (-zō'ȧl), *adj.* — **met'a·zo'an** (-ăn), *adj. & n.*

met'a·zo·ē'a (-zō·ē'ȧ), *n.* [NL., fr. *meta-* + Gr. *zōion* animal.] *Zool.* A larval stage in certain higher Crustacea intermediate between the zoëa and megalops stages.

met'a·zo'ic (-zō'ĭk), *adj. Zool.* Metazoan.

met'a·zo'on (-zō'ŏn), *n.* [NL.] *Zool.* One of the Metazoa.

Met'calfe bean (mĕt'kăf). A valuable, prostrate forage plant (*Phaseolus metcalfei*) of the southwestern U. S. and adjacent Mexico; also, the pods or seeds of this plant.

mete (mēt), *v.; :* MET'ED (mēt'ĕd; -ĭd; 119); MET'ING (mēt'ĭng). [AS. *metan;* akin to D. *meten,* G. *messen,* OHG. *mezzan,* ON. *meta,* Goth. *mitan,* L. *modus* measure, moderation, *modius* a corn measure, *meditari* to meditate, *modestus* moderate, modest, *moderari* to moderate, Gr. *medesthai* to be mindful of, *medimnos* a corn measure, OIr. *midiur* I judge; basic idea: to measure. See MEDICINE, MUST, *v.;* cf. MEET, *adj.,* MODERATE, MODERN, MODESTY.] *Transitive:* **1.** To find the quantity, dimensions, or capacity of, by any rule or standard; to measure.
2. To assign by measure; to apportion; allot; — chiefly with *out;* as, to *mete* out punishment or reward.
3. To determine the limits or value of by measure. *Obs.*
—, *Intransitive:* To measure. *Archaic. Mark* iv. 24.
Syn. — Give, award, distribute.

mete (mēt), *n.* [OF., fr. L. *meta.*] **a** *Obs.* Goal. **b** Boundary; — chiefly *pl.,* in *metes and bounds.*

mete, *v. i. & t.; past* METTE; *past part.* MET. [AS. *mētan.*] To dream; also impersonally, as in *memette,* I dreamed. *Obs.*

mete. Var. of MEAT, MEET. *Now Dial.*

me'tel (mē'tĕl), *n.* [NL. *nux methel, nux metella,* fr. Ar. *jawz māthil.*] A thorn apple; esp., the fruit of *Datura metel.*

met'em·pir'ic (mĕt'ĕm·pĭr'ĭk), **met'em·pir'i·cal** (-ĭ·kȧl), *adj.* [*met-* + *empiric, -ical.*] *Philos.* Related, or belonging, to the objects of knowledge within the province of metempirics. — **met'em·pir'i·cal·ly,** *adv.*

met'em·pir'ic (mĕt'ĕm·pĭr'ĭk), *n.* A metempiricist.

met'em·pir'i·cism (-ĭ·sĭz'm), *n.* The tendency to be concerned with metempirics; also, any doctrine which emphasizes what is beyond the empirical. — **-pir'i·cist** (-sĭst), *n.*

met'em·pir'ics (-ĭks), *n.* The science or study of concepts and relations which are conceived as beyond, and yet as related to, the knowledge gained empirically. See -ICS.

met'emp·sy'chic (mĕt'ĕmp·sī'kĭk), **me·temp'sy·cho'sic·al** (mē·tĕmp'sĭ·kō'zĭ·kȧl), **me·temp'sy·cho'sal** (-zȧl; -z'l), *adj.* Of or pertaining to metempsychosis. *Rare.*

me·temp'sy·chose (mē·tĕmp'sĭ·kōs; mē-), *v. t.;* -CHOSED (-kōst); -CHOS'ING (-kōs'ĭng). [See METEMPSYCHOSIS.] To translate or transfer, as the soul, from one body to another.

me·temp'sy·cho'sis (-kō'sĭs), *n.; pl.* -CHOSES (-sēz). [LL., fr. Gr. *metempsychōsis,* fr. *meta* beyond, over + *empsychoun* to animate, fr. *en* in + *psychē* soul. See PSYCHOLOGY.] The passing of the soul at death into another body, whether of a brute or a person; transmigration of souls. The doctrine of metempsychosis was held by the ancient Egyptians, and is a tenet of East Indian philosophy.

met'emp·to'sis (mĕt'ĕmp·tō'sĭs), *n.* [NL., fr. Gr. *meta* beyond, after + *emptōsis* a falling upon, fr. *empiptein* to fall in or upon, fr. *en* in + *piptein* to fall.] *Chron.* The suppression of a day in the calendar to prevent the date of the new moon being set a day too late, or the suppression of the bissextile day once in 134 years. Cf. PROEMPTOSIS.

met'en·ceph'a·lon (mĕt'ĕn·sĕf'ȧ·lŏn), *n.; pl.* -LA (-lȧ). [NL., fr. *met-* + *encephalon.*] *Anat., Embryol., & Zool.* **a** *Now Rare.* The myelencephalon. **b** The subdivision of the rhombencephalon between the isthmus and the myelencephalon, comprising the cerebellum and pons. See BRAIN, **1 a.** **c** Sometimes, the cerebellum alone. — **met'en·ce·phal'ic** (mĕt'ĕn·sē·făl'ĭk), *adj.*

met'en·sar·co'sis (mĕt'ĕn·sär·kō'sĭs), *n.* [NL., fr. *met-* + Gr. *ensarkōsis* incarnation (fr. *en* in + *sarx, sarkos,* flesh.] Transfer of flesh from one body to another. *Rare.*

met'en·so'ma·to'sis (mĕt'ĕn·sō'mȧ·tō'sĭs), *n.* [LL., fr. Gr. *metensōmatōsis.*] A change of body or re-embodiment (by the soul).

met·en'ter·on (mĕt·ĕn'tĕr·ŏn), *n.; pl.* -TERA (-ȧ). [NL., fr. *met-* + *enteron.*] *Zool.* **a** The enteron modified in any manner from the primitive archenteron. **b** One of the radial digestive chambers of an actinozoan as distinguished from the mesenteron. — **met·en'ter·on'ic** (-ŏn'ĭk), *adj.*

me'te·or (mē'tē·ēr; 159), *n.* [OF. or ML.; OF. *meteore,* fr. ML. *meteorum,* fr. Gr. *meteōron,* pl. *meteōra* things in the air, fr. *meteōros* high in air, raised off the ground, fr. *meta* beyond + *eōra, aiōra,* a suspension or hovering in the air; akin to Gr. *aeirein* to lift, raise up.] **1.** Any phenomenon or appearance in the atmosphere, as whirlwinds, clouds, rainbows, etc. Meteors are often classed as: ***aerial meteors,*** winds, tornadoes, etc.; ***aqueous meteors*** or ***hydrometeors,*** rain, hail, snow, dew, etc.; and ***luminous meteors,*** including, besides rainbows, halos, etc., the ***igneous meteors,*** lightning, shooting stars, and the like.

All day the hoary *meteor* fell. *Whittier.*

2. *Astron.* A transient, luminous, celestial body that enters the earth's atmosphere with great velocity from without, its light being due to incandescence caused by the heat generated by the resistance of the air. Because of this heat most of the meteors are dissipated into gas before reaching the ground. The brighter meteors are called ***fireballs,*** or, if they explode, ***bolides;*** the fainter ones, ***shooting stars*** or ***falling stars.*** Those that reach the ground are called ***meteorites.*** A large number of meteors appearing on the same night or on successive nights constitute a ***meteoric shower.*** Meteoric showers are due to swarms of meteoric bodies moving around the sun in definite orbits. Some of these swarms are definitely connected with certain comets, and some of them may be regarded as the remnants of disintegrated comets, notably the Andromedes, associated with Biela's comet. Some showers occur annually with great regularity, as the August Perseids, some at long intervals, as the displays of November Leonids in 1833, 1866–67, and 1901. Meteoric showers are named from the constellations in which their radiants are located (as Aquilids, Arietids, Aurigids, Draconids), or sometimes from individual stars near the radiant point (as η Aquarids, α Orionids, β Ursæ Minorids), or from the comets with which they are associated (as Bielids). See LEONID, LYRAID, ANDROMEDE.

meteor dust. Cosmic dust.

me'te·or·graph' (mē'tē·ēr·grȧf'; 83), *n.* [*meteor* + *-graph.*] A device to facilitate recording the path of a meteor.

me'te·or'ic (-ōr'ĭk), *adj.* Also **me'te·or'i·cal** (-ĭ·kȧl). [ML. *meteoricus.*] **1.** Of or pertaining to a meteor or meteors; meteorological; as, *meteoric* phenomena; *meteoric* stones.
2. Like a meteor in appearance, flight, etc.; flashing; transiently brilliant; as, swift *meteoric* fame.
— **me'te·or'i·cal·ly,** *adv.*

meteoric astronomy. Astronomy treating of the appearance, motions, composition, and origin of meteors.

meteoric iron. Iron of meteoric origin. See METEORITE.

meteoric paper. A paperlike substance of confervoid origin found floating in the air. It was formerly supposed to fall from meteors.

meteoric shower. See METEOR, 2.

meteoric stone. *Astron.* A meteorite.

me'te·or·ism (mē'tē·ēr·ĭz'm), *n.* [NL. *meteorismus,* fr. Gr. *meteōrismos* a lifting up.] *Med.* Flatulent distention of the abdomen. See TYMPANITES. — **me'te·or·is'tic** (-ĭs'tĭk), *adj.*

me'te·or·ist (-ĭst), *n.* A specialist on the subject of meteors.

me'te·or·it'al (mē'tē·ēr·ĭt'ȧl; -'l), *adj.* Meteoritic.

me'te·or·ite (mē'tē·ēr·īt; 159), *n.* [Cf. F. *météorite.*] **A** stony or metallic body that has fallen to the earth from outer space; an aerolite; loosely, a meteor (which see). Meteorites usually show a pitted surface with a fused crust, caused by the heat developed in their rapid passage through the earth's atmosphere. A meteorite may consist: (1) Of metallic iron, which is usually chiefly composed of kamacite and taenite, and is invariably alloyed with a small percentage of nickel, often with small amounts of cobalt and traces of other metals (***meteoric iron,*** or ***siderite,*** formerly ***holosiderite***). When etched this usually exhibits peculiar crystalline figures, called ***Widmanstaetten figures.*** (2) Of a cellular mass of iron with embedded silicates (***siderolite,*** formerly ***mesosiderite***). (3) Of a stony mass of silicates with little iron (***meteoric stone,*** or ***aerolite,*** formerly ***sporadosiderite***). (4) Of a mass without iron (***asiderite***).

Section of a piece of a Meteorite, or Meteoric Iron, showing Widmanstaetten Figures.

me'te·or·it'ic (-ĭt'ĭks), *adj.* Of or pert. to meteorites.

meteoritic hypothesis. *Cosmog.* The hypothesis that the earth was formed by the aggregation of scattered meteorites. Cf. PLANETESIMAL HYPOTHESIS, NEBULAR HYPOTHESIS.

me'te·or·it'ics (-ĭt'ĭks), *n. Astron.* The science which treats of meteorites. See -ICS.

me'te·or·ize (mē'tē·ēr·īz), *v. t.* [Gr. *meteōrizein* to raise to a height.] **a** To vaporize. *Evelyn.* **b** *Med.* To cause meteorism of or in. — *v. i.* **a** To vaporize. **b** To take the form or appearance of a meteor; to shine out in a brief brilliance. — **me'te·or·i·za'tion** (-ĭ·zȧ'shŭn; -ĭ·zȧ'shŭn), *n.*

me'te·or·o- (mē'tē·ōr·ō-; mē'tē·ŏr'ō-), **meteor-.** A combining form for *meteor,* as in *meteor*olite, *meteor*ite.

me'te·or·o·gram' (mē'tē·ōr·ō·grăm'; mē'tē·ŏr'-), *n.* [*meteoro-* + *-gram.*] *Meteorol.* Record of a meteorograph.

me'te·or·o·graph' (mē'tē·ōr·ō·grȧf'; mē'tē·ŏr'-; 83), *n.* [F. *météorographe.*] **1.** *Meteorol.* An autographic apparatus for recording simultaneously several meteorologic elements, as temperature, moisture, etc.
2. A camera for photographing meteor trails.
— **me'te·or·og'ra·phy** (mē'tē·ēr·ŏg'rȧ·fĭ), *n.* — **me'te·or·o·graph'ic** (-ōr·ō·grăf'ĭk; mē'tē·ŏr'-), *adj.*

me'te·or·like' (mē'tē·ēr·līk'), *adj.* See -LIKE.

me'te·or·oid' (mē'tē·ēr·oid'), *n.* [*meteor* + *-oid.*] *Astron.* One of the countless small solid bodies in the solar system, which become meteors on entering the earth's atmosphere. — **me'te·or·oi'dal** (-oi'dȧl; -d'l), *adj.*

me'te·or·o·lite' (mē'tē·ōr·ō·līt'; mē'tē·ŏr'-), *n.* [F. *météorolithe.* See METEOR; -LITE.] **A** meteorite. — **me'te·or·o·lit'ic** (-lĭt'ĭk), *adj.*

me'te·or·o·log'ic (mē'tē·ōr·ō·lŏj'ĭk; mē'tē·ŏr'-), **me'te·or·o·log'i·cal** (-ō·lŏj'ĭ·kȧl), *adj.* [Gr. *meteorologikos;* cf. F. *météorologique.*] Of or pertaining to the atmosphere and its phenomena, or meteorology. — **me'te·or·o·log'i·cal·ly,** *adv.*

meteorological elements. The subjects of meteorological observation, as temperature, barometer pressure, etc.

me'te·or·ol'o·gist (mē'tē·ēr·ŏl'ō·jĭst), *n.* Specialist in meteorology.

me'te·or·ol'o·gy (-jĭ), *n.* [Gr. *meteōrologia,* fr. *meteōros* high in the air + *logos* discourse; cf. F. *météorologie.* See METEOR.] **1.** The science, or branch of physics, treating of the atmosphere and its phenomena, esp. of its variations of heat and moisture, of its winds, etc. Cf. CLIMATOLOGY.
2. The meteorological character of a region.

me'te·or·om'e·ter (-ŏm'ē·tēr), *n.* [*meteoro-* + *-meter.*] **a** An apparatus which transmits automatically to a central station atmospheric changes as marked by the anemometer, barometer, thermometer, etc. **b** A mechanical device for determining the real path of a meteor.

me'te·or·o·scope' (mē'tē·ōr·ō·skōp'; mē'tē·ŏr'ō·skōp), *n.* [Gr. *meteōroskopion,* fr. *meteōroskopos* observing the heavenly bodies. See METEOR; -SCOPE.] *Astron.* **a** *Obs.* An astrolabe; a planisphere. **b** An instrument for measuring the position, length, and direction of the apparent path of a meteor.

me'te·or·os'co·py (mē'tē·ēr·ŏs'kō·pĭ), *n.* Observation of meteors.

me'te·or·ous (mē'tē·ēr·ŭs *or, esp. in poetry,* mē·tē'ō·rŭs), *adj.* [See METEOR.] Meteoric.

met·ep'i·me'ron (mĕt·ĕp'ĭ·mē'rŏn), *n.* [NL.] The epimeron of the metathorax of an insect. — **-me'ral** (-rȧl), *adj.*

met·ep'i·ster'num (-stŭr'nŭm), *n.* [NL.] *Zool.* The episternum of the metathorax of an insect. — **met·ep'i·ster'nal** (-nȧl; -n'l), *adj.*

me'ter, me'tre (mē'tĕr), *n.* [ME. *metre* (in senses I & 3), fr. OF. *metre* (F. *mètre*), fr. L. *metrum,* fr. Gr. *metron;* cf. AS. *meter,* fr. L. See MEASURE.] **1.** Systematically arranged and measured rhythm in verse; specif.: **a** The property of a verse that is divided into a determined number of metrical feet (sometimes, quantitative feet) or syllabic groups; metrical structure.

The only strict antithesis to prose is *meter.* *Wordsworth.*

b The metrical pattern of a verse as indicated esp. by the prevailing type of foot and the number of feet; as, ballad *meter;* Horace's *meters.* **c** The metrical pattern of a stanza or strophe, esp. in hymns; as, common *meter;* long *meter.* **d** *Rare.* A measure, as a foot or a dipody.
2. *Music.* **a** Primarily, that part of rhythmical structure concerned with the division of a composition into measures by means of regularly recurring accents, each measure consisting of a uniform number of beats or time units, of which the first has the strongest accent; — less specifically called *time* or *rhythm.* **b** The distribution of long and short tones within measures; — commonly called *rhythm.* **c** The formation from measures of larger divisions, such as phrases, sections, or strophes; — commonly called *rhythm.*
3. A metrical composition or version; a poem or verse. *Obs.*
4. [F. *mètre,* fr. Gr. *metron.*] A measure of length, the basis of the *metric system.* The meter as now defined is the distance between two lines on a certain platinum-iridium bar kept at the International Bureau of Weights and Measures in Paris, when this bar is at 0° C. or 32° F. Copies of this bar are kept elsewhere. In Great Britain the legalized relation for many years has been one meter equal to 39.370113 imperial inches, but recent determinations show the present actual relation to be one meter equal to 39.370147 imperial inches. In the United States the accepted value is 39.37 inches. Copies of the International Prototype Meter are in the possession of the principal

countries of the world. The value of the meter in wave lengths of light is known with very great accuracy; for example, the generally accepted value for the wave length of red cadmium radiation under specified standard conditions is 0.00064384696 mm. The meter was intended to be, and is very nearly, one ten-millionth part of the distance measured on a meridian of the earth from the equator to the pole. **Syn.** — See RHYTHM.

-meter. [L. *metrum* measure, fr. Gr. *metron.*] *Prosody.* A combining form, denoting *a measure of* (so many) *feet in a verse*, as in hepta*meter*, tetra*meter*.

me'ter, me'tre (mē'tĕr), *v. t. & i.*; ME'TERED, ME'TRED (mē'tĕrd); ME'TER·ING (-tĕr·ĭng), ME'TRING (mē'trĭng). To compose in, or put into, meter.

me'ter (mē'tĕr), *n.* [From METE to measure.] **1.** One that measures; esp., an official measurer of commodities.

2. An instrument for measuring, and usually for indicating and recording automatically the quantity measured. ***Gas meters*** are of two kinds: ***wet meters***, containing a liquid and a partly submerged, partitioned drum rotated by the gas; ***dry meters***, usually indicating by piston displacement. Both are automatic, with the necessary recording clockwork and dials. ***Water meters*** usually act by piston displacement or by a rotating vane or a gyrating disk. ***Electricity*** or ***electric meters***, for measuring current or energy, are termed ***electrolytic***, ***clock***, or ***motor, meters***, according to whether operated by electrolysis (deposited metal being subsequently weighed), a time clock of changing rate, or a motor and the necessary recording apparatus. Motor meters are now almost exclusively used. See WATT-METER.

Interior of ordinary Dry Gas Meter, consisting essentially of two bellows (only the front bellows is shown) which are filled with gas and emptied alternately, the motion of the bellows being transmitted, by means of a flag and gearing, to the pointers of the index dials which register the amount of gas passing through the meter. 1 Metal Disk at front of Bellows; 2 Partition between Front and Rear Bellows; 3 Inlet Pipe; 4 Outlet Pipe; 5 Slide Valves, controlling flow of gas to Chambers below; 6 Index Dials; 7 Flag Arm; 8 Leather Diaphragm of Bellows, secured to walls of Chamber; 9 Tangent Arms; 10 Disk Guide Wires.

3. Hence, an instrument for measuring, and usually for indicating and recording automatically, distance, or height, speed, intensity, or the like.

Rotary Disk Water Meter. Water entering the meter, in the direction of the arrow, flows through a Screen (3) to a Measuring Chamber (1) divided by a hard rubber Disk (2) into two equal compartments, one of which is filling while the other is emptying. There is thus an unbalanced water pressure continually moving the disk and giving to the Pin (4) a circular motion. The Pin drives an Arm (5) attached to a Gear Train (6) by which the movement is transmitted to the pointers of the Recording Dial (7) which thus registers the amount of water passing through the meter. The inset shows a Diaphragm (8) separating the inlet side from the outlet side of the Measuring Chamber.

me'ter, *adj.* Of or pertaining to a meter.

-meter. [NL. *-metrum* or F. *-mètre*, both fr. Gr. *metron* measure. See 1st METER.] A combining form, denoting an *instrument or means for measuring some* (specified) *thing*, as in baro*meter*, chrono*meter*, volt*meter*. Cf. -METRY.

me'ter (mē'tĕr), *v. t.*; ME'TERED (-tĕrd); ME'TER·ING. To measure by means of a meter or meters.

me'ter, *n.* A line above or below a hanging net, to which the net is attached to strengthen it.

me'ter·age (-ĭj), *n.* [See METER instrument.] Act, result, or cost of measuring.

me'ter–am'peres, me'tre–am'peres, *n. pl. Radio.* The product of the transmitting antenna current in amperes by height in meters, — a measure of the radiating strength of a transmitting station.

meter angle. *Physiol. Optics.* The angle between the visual axes and the median plane when the eyes are looking at a point one meter from their centers in that plane.

me'tered mail (mē'tĕrd). *Post Office.* Prepaid mail matter requiring no postage stamps but marked (see INDICIA, 2) by an electrical machine, set and controlled by the post office.

me'ter·er (mē'tĕr·ĕr), *n.* A metrist; a versifier. *Obs.*

meter fixer. See FIXER, 2.

me'ter·gram', me'tre·gram' (mē'tĕr·grăm'), *n.* **a** *Mech.* A measure of energy equal to the work done in lifting a weight of one gram through a vertical distance of one meter. **b** *Elec.* A unit used for specifying the resistance of electrical conductors; specif., a wire of uniform cross section, of a length of one meter and a mass of one gram.

me'ter–kil'o·gram, me'tre–kil'o·gram, *n. Physics.* **a** A unit of work equal to the work done in raising a weight of one kilogram against the force of gravity to a height of one meter. **b** = KILOGRAM-METER **a**.

me'ter·man (mē'tĕr·măn), *n.*; *pl.* -MEN (-mĕn). A man trained to read and adjust meters, as gas meters.

me'ter–mil'li·me'ter, me'tre–mil'li·me'tre, *n. Elec.* A unit used in expressing the resistance of electrical conductors; specif., a wire one millimeter in diameter and one meter in length.

meter rate. See 3d RATE, 7.

mete'stick' (mēt'stĭk'), *n.* [*mete*, v. + *stick.*] *Naut.* A device to level cargo or measure a hold, consisting of a standard with a sliding board or stick projecting at right angles.

mete'wand' (mēt'wŏnd'), *n.* [*mete* to measure + *wand.*] A measuring rod. *Archaic & Dial.*

mete'yard' (mēt'yärd'), *n.* [Cf. AS. *metgeard.* See 1st METE; YARD stick.] A yard or rod used as a measure. *Dial.*

meth-. Variant of *meta-*; — used before an aspirate, as in *methyl*.

methi-. *Chem.* = METHO-.

meth'a·cryl'ic (mĕth'ă·krĭl'ĭk), *adj.* [2d *meth-* + *acrylic.*] *Chem.* Pert. to or designating a colorless crystalline acid, $CH_2:C(CH_3)CO_2H$, occurring in Roman oil of camomile and also prepared artificially.

meth'an·al (mĕth'ăn·ăl), *n.* [F. *méthanal*, fr. *méthane* methane + *al*dehyde.] *Chem.* Formaldehyde.

meth'a·nate (mĕth'ă·nāt), *v. t.*; -NAT'ED (-nāt'ĕd; -ĭd; 119); -NAT'ING (-nāt'ĭng). To convert into methane.

meth'ane (mĕth'ān), *n.* [*methyl* + *-ane.*] *Chem.* A gaseous hydrocarbon, CH_4, light, odorless, and inflammable, occurring naturally as a product of decomposition of organic matter in marshes and mines, and produced artificially by dry distillation of many organic substances or by synthetic methods; — called also *marsh gas.* Water gas, a mixture of carbon monoxide and hydrogen, is *methanated* by passing it over a nickel catalyst with moderate heating. See METHANE SERIES, FIRE DAMP.

methane series. *Chem.* A homologous series of saturated open-chain hydrocarbons of the general formula C_nH_{2n+2}, of which methane is the first member and the type; — called also the ***paraffin series*** (little-affinity series). At ordinary temperatures the lowest members, containing one to four carbon atoms, are gases; intermediate members (n = 5–15) are liquids, of which gasoline, kerosene, etc., are mainly mixtures; while the highest members, from $C_{16}H_{34}$ on, are white waxy or greasy crystalline solids, ordinary paraffin being a mixture of these.

meth'a·no'ic (mĕth'ă·nō'ĭk), *adj.* [See METHANAL.] *Chem.* Formic, as in *methanoic* acid.

meth'a·nol (mĕth'ă·nōl; -nŏl), *n., or* **meth'yl** (mĕth'ĭl) **al'co·hol.** [*methane* + 1st *-ol.*] *Chem.* A light, volatile, inflammable liquid, CH_3OH, boiling at 64.5° C. (148.1° F.), obtained by the distillation of wood, and also increasingly by synthesis from carbon monoxide and hydrogen under high pressure in the presence of catalysts; — called also *wood alcohol, wood spirit, pyroligneous spirit, carbinol,* etc. It is like ordinary or ethyl alcohol in many of its properties, and hence is used as a solvent, as a fuel, and as a denaturant for ordinary alcohol. Its chief use, however, is in the manufacture of formaldehyde and other organic chemicals. Methanol is a dangerous poison, causing not only intoxication, but blindness, coma, and often death.

meth'a·nom'e·ter (mĕth'ă·nŏm'ĕ·tĕr), *n.* [*methane* + *-meter.*] An instrument, resembling a eudiometer, to detect the presence and amount of methane, as in coal mines.

methe (mĕth), *n.* [AS. *mæth.* See MEASURE.] Measure; hence, moderation; considerateness. *Obs.*

me·theg'lin (mĕ·thĕg'lĭn), *n.* [W. *meddyglyn*, fr. *meddyg* physician (fr. L. *medicus*) + *llyn* liquor, juice.] A beverage, orig. Welsh, usually made of fermented honey and water; mead.

met·he'mo·glo'bin (mĕt·hē'mō·glō'bĭn; mĕt·hĕm'ō-; mĕth·ē'mō-), *n.* Also **met·hae'mo·glo'bin.** [*met-* + *hemoglobin.*] *Biochem.* A soluble, brownish-red, crystalline compound, a transformation product of oxyhemoglobin, from which the oxygen cannot be removed in a vacuum. It is formed by the spontaneous decomposition of blood and also by the action on blood of various oxidizing reagents, as ozone, etc.

met·he'mo·glo'bi·ne'mi·a, met·hae'mo·glo'bi·nae'mi·a (-glō'bĭ·nē'mĭ·ȧ), *n.* [NL., fr. *methemoglobin* + *-emia.*] *Med.* The occurrence of methemoglobin in the blood.

met·he'mo·glo'bi·nu'ri·a, *or* **-hae'mo-** (-glō'bĭ·nū'rĭ·ȧ), *n.* [NL., fr. *methemoglobin* + *-uria.*] *Med.* The occurrence of methemoglobin in the urine.

me·the'na·mine (mĕ·thē'nȧ·mēn; -mĭn), *n.* Also **-in.** [*methene* + *-amine.*] *Pharm.* Hexamethylenetetramine, used as a diuretic and as a solvent for uric acid.

meth'ene (mĕth'ēn), *n.* [*methyl* + *-ene.*] *Chem.* **a** Methylene. **b** An unsaturated derivative of methane of the general formula R–CH=R'.

meth'e·nyl (mĕth'ē·nĭl), *n.* [*methene* + *-yl.*] *Chem.* The trivalent radical CH, known only in combination.

meth'er (mĕth'ĕr), *n.* [Ir. *meadar.*] A square wooden drinking cup. *Ir.*

meth'ide (mĕth'īd; -ĭd; 157), *n.* Also **-id.** [See METHYL.] *Chem.* A binary compound of methyl, usually with some element; as, mercury *methide* (mercury dimethyl), $Hg(CH_3)_2$.

meth'ine (mĕth'ēn; -ĭn), *n. Chem.* **a** Methenyl. **b** Any of certain methyl derivatives of organic bases, in which this radical is attached to nitrogen.

me·thinks' (mĕ·thĭngks'), *v. impers.*; *past tense* -THOUGHT' (-thôt'). [AS. *thyncan* to seem, *mē thync(e)th, mē thūhte,* ME. *me think(e)th, me thoughte;* akin to G. *dünken* to seem, *denken* to think, E. *think.* See ME; THINK.] It seems to me. See ME, 1 **d**. *Now Rare*, except in poetry.

meth·ĭ'o·dide (mĕth·ĭ'ō·dīd; -dĭd; 157), *n. Chem.* A compound with methyl iodide.

meth'i·on'ic (mĕth'ĭ·ŏn'ĭk), *adj.* [*methyl* + *thionic.*] *Chem.* Pertaining to or designating a deliquescent crystalline acid, $CH_3(SO_3H)_3$, formed by fuming sulphuric acid acting on acetylene, acetamide, etc.

me·thi'o·nine (mĕ·thī'ō·nēn; -nĭn; 157), *n.* [*methyl* + *thio-* + *-ine.*] *Biochem.* A sulphur-containing amino acid, $C_5H_{11}NO_2S$, found in certain proteins, as casein, egg albumin, and yeast.

meth'o- (mĕth'ō-), **meth-.** A combining form for *methyl.*

meth'o·bro'mide (-brō'mīd; -mĭd; 157), *n.* Also **-mid.** [*metho-* + *bromide.*] *Chem.* A compound with methyl bromide, CH_3Br.

meth'od (mĕth'ŭd), *n.* [F. *méthode*, fr. L. *methodus*, fr. Gr. *methodos* method, investigation following after, fr. *meta* after + *hodos* way. See META-; CEDE.] **1.** An orderly procedure or process, as, orig., of treating disease; regular way or manner of doing anything; hence, a set form of procedure adopted in investigation or instruction; as, a *method* of improving the mind.

2. Connected arrangement in literary composition; also, the art of such arrangement or the discipline teaching it.

3. Orderly arrangement, elucidation, development, or classification; lucid exhibition, as of ideas; systematic arrangement peculiar to a person or a given matter; plan or design, as of an author; more generally, orderliness and regularity or habitual practice of them in action.

Though this be madness, yet there's *method* in it. *Shak.*

4. *Obs.* **a** A methodical exposition. **b** Table of contents. **c** An arrangement which follows a plan or design.

5. *Educ.* A systematic plan adopted in presenting instructional material; as, the lecture *method*; a course in *methods.*

6. *Med.* The system of the methodics. *Hist.*

Syn. — Order, system, procedure, process, rule; fashion, course. — METHOD, MODE. METHOD is commonly a special or definite system of procedure; MODE, as here compared (cf. FASHION), though often suggesting more definiteness or formality of procedure than "way" or "manner," is ordinarily less specific than *method*; as, one's *method* (cf. one's *mode*) of teaching; one's *mode* of speaking. But the two words are often interchangeable. Cf. MANNER.

me·thod'ic (mĕ·thŏd'ĭk), *adj.* [L. *methodicus*, fr. Gr. *methodikos*; cf. F. *méthodique.*] **1.** Designating, or pert. to, the ancient school of physicians called methodists. *Obs.*

2. Done or acting with method; of or pertaining to method; methodical; systematic.

me·thod'ic (mĕ·thŏd'ĭk), *n.* = METHODIST, 5.

me·thod'i·cal (-ĭ·kăl), *adj.* **1.** = METHODIC, 1.

2. Arranged with regard to method; characterized by method or orderliness; disposed, performed, or the like, with method or order; as, *methodical* arrangement.

3. Habitually proceeding according to method; observant of order; systematic; as, he is a very *methodical* person. — **me·thod'i·cal·ly,** *adv.* — **me·thod'i·cal·ness,** *n.*

methodical signs. See SIGN, *n.*, 4 **b**.

me·thod'ics (mĕ·thŏd'ĭks), *n.* The art and principles of method; methodology. See -ICS.

meth'od·ism (mĕth'ŭd·ĭz'm), *n.* **1.** [*cap.*] *Eccl.* The doctrines, polity, and worship peculiar to Methodists.

2. Methodical procedure; overdevotion to methods.

meth'od·ist (-ĭst), *n.* [See METHOD.] **1.** One versed in or observant of, or who lays great stress on, method.

2. [*cap.*] A member or adherent of a denomination of Protestant Christians, the outgrowth of a small religious association or club formed at Oxford University, in 1729, by John and Charles Wesley and others. The name was originally one of several applied derisively by the Oxford students to the members of the club, this one alluding to their methodical habits of study and religious observance. The movement, at first one of revival within the Established Church, expanded into a great evangelistic work, and eventually separated from the Church of England. In doctrine, the Methodists are Arminians, as were the Wesleys. Whitefield, for a time associated with the Wesleys, was a rigid Calvinist, and soon separated from them. The ***Welsh Calvinistic Methodists***, the chief religious body of Wales (called also ***Welsh Presbyterians***), are in reality Presbyterians. See PRESBYTERIAN, *adj.* In government, the various Methodist bodies differ. The British Methodist churches are governed through conferences, but are presbyterian in their ministry and congregational in some features of their administration. In America, the prevailing form of polity is a modified episcopacy, with bishops and presiding elders (the latter now called *district superintendents* in the Methodist Episcopal Church) as assistants to them. The chief distinctive features of Methodism in general are: (1) the system of probationers (see PROBATION, 3 **d**); (2) the class meeting; (3) exhorters; (4) local preachers; (5) the itineracy; (6) presiding elders; (7) bishops. Various bodies of Methodists have rejected some of these. The names, dates of organization, distinctive features, etc., of Methodist bodies in Great Britain, Ireland, and America are as follows:

Great Britain & Ireland. (No bishops: governed directly through the Conference.)

Wesleyan Methodists: 1739; British parent body.

Irish Wesleyan Methodist Church : 1747.

Independent Methodist Churches: 1797; each church independent; no paid ministry.

Primitive Methodist Connexion: 1810; large use of laity in church government; women licensed to preach.

Wesleyan Reform Union: 1859.

United Methodist Church: 1907; formed by union of Methodist New Connexion (1797–98), Bible Christians, or Bryanites (1815), and United Methodist Free Churches (1857).

United States. (Orig. and still chiefly episcopal in organization: governed by bishops elected by the General Conference.)

Methodist Episcopal Church: 1784; largest body; home territory, northern U. S.

Methodist Episcopal Church, South; separated from preceding in 1845 on slavery; second in size; home terr., southern U. S.

Union American M. E. Church: 1813; colored.

Reformed Methodist Church: 1814; congregational; emphasizes entire sanctification and faith healing.

African M. E. Church 1815; colored.

African Union Methodist Protestant Church: 1866; from African Union Church (1813) and 1st colored M. Protestant Church; nonepiscopal; cf. M. Prot. Ch.

African M. E. Zion Church: 1820; colored; women equally eligible with men to all positions.

Methodist Protestant Church: 1830; nonepiscopal; lay representation in Conference equal to ministerial.

Colored Methodist Protestant Church: 1840.

Wesleyan Methodist Connection or Church of America: 1843; nonepiscopal; opposed to secret societies; emphasizes entire sanctification.

Primitive Methodist Church; from England into U. S. about 1843; nonepiscopal; maintains itinerant and local ministers; emphasizes the camp meeting.

Congregational Methodists: 1852; nonepiscopal; not strictly congregational in polity.

Free Methodist Church: 1860; since 1907, a bishop presides; enjoins strict simplicity; emphasizes entire sanctification.

Reformed Zion Union Apostolic Church: 1869; colored; reorganized as "Reformed" in 1882.

Colored M. E. Church: 1870; organized from colored members of M. E. Church, South.

New Congregational Methodists: 1881; nonepiscopal.

Reformed Methodist Union Episcopal Church: 1896; succeeding the Independent Methodist Church (1884); colored.

Independent African Methodist Episcopal Church 1897; colored.

Holiness Methodist Church: 1900.

Canada.

In 1874 the Wesleyan Methodist Church in Canada and the Methodist New Connexion, Eastern British American Conferences, united to form the Methodist Church of Canada. In 1883 it was joined by the Methodist Episcopal Church in Canada, the Primitive Methodist Church in Canada, and the Bible Christian Church of Canada. It is now merged with Congregationalists and the majority of Presbyterians in the United Church of Canada.

3. A person of strict piety; — used in contempt or ridicule. **4.** *Eccl. Hist.* **a** An advocate of a particular theological system; esp., an Amyraldist. **b** [*cap.*] In the 17th century, one of a class of Roman Catholic apologists who gave systematic representations of the method of polemics. **5.** *Med.* One of an ancient school of physicians who rejected observation and founded their practice on reasoning and theory. They are said to have held views intermediate between those of the dogmatic and empiric schools and to have held that diseased conditions consisted in "looseness," "tightness," or a mixture of the two, for each of which three states there was a suitable remedy.
6. *Nat. Hist.* A systematist. *Rare.*

Meth'od·ist (mĕth'ŭd·ĭst), *adj.* Of or pertaining to the Methodists or Methodism.

Meth'od·is'tic (mĕth'ŭd·ĭs'tĭk), *adj.* [*often not cap.*] Of, pertaining to, or characteristic of Methodists or Methodism; resembling a Methodist. — **Meth'od·is'ti·cal·ly** (-tĭ-kăl-ĭ), *adv.*

Meth'od·ist·y (mĕth'ŭd·ĭs·tĭ), *adj.* Methodistic.

meth'od·i·za'tion (mĕth'ŭd·ĭ·zā'shŭn; -ĭ·zā'shŭn), *n.* Act or process of methodizing, or state of being methodized.

meth'od·ize (mĕth'ŭd·īz), *v. t.;* -IZED (-īzd); -IZ'ING (-īz'-ĭng). To reduce to method; to dispose in due order; to arrange in an orderly manner; as, to *methodize* one's work; also, to render methodical. — **meth'od·iz'er** (-īz'ĕr), *n.*

Meth'od·ize, *v. i. & t.* To talk or act as a Methodist; to incline to Methodism; to turn or make Methodist.

meth'od·less (mĕth'ŭd·lĕs; -lĭs; 119), *adj.* Without method; unmethodical.

method of agreement. *Logic.* A method of scientific induction according to which "if two or more instances of the phenomenon under investigation have only one circumstance in common, the circumstance in which alone all the instances agree, is the cause (or effect) of the given phenomenon" (*J. S. Mill*).

method of concomitant variations. *Logic.* A method of scientific induction according to which "whatever phenomenon varies in any manner whenever another phenomenon varies in some particular manner, is either a cause or an effect of that phenomenon, or is connected with it through some fact of causation" (*J. S. Mill*).

method of difference. *Logic.* A method of scientific induction according to which "if an instance in which the phenomenon under investigation occurs, and an instance in which it does not occur, have every circumstance save one in common, that one occurring only in the former; the circumstance in which alone the two instances differ, is the effect, or (the) cause, or a necessary part of the cause of the phenomenon" (*J. S. Mill*). Cf. INDIRECT METHOD OF DIFFERENCE.

method of exclusion. *Logic.* In scientific induction, the progressive exclusion of the nonessential antecedents, by comparison of cases, to find the essential residue or real cause; also, the determination of the true principle by successive elimination, as false, of all the possible, or plausible, hypotheses save that one.

method of extinctions. *Astron.* The method of ascertaining a star's magnitude by observing its total extinction in a wedge of neutral tinted optical glass.

method of Gauss (gous). = DOUBLE WEIGHING.

method of increments. *Math.* The calculus of finite differences.

method of residues. *Logic.* A method of scientific induction according to which if one subtract "from any phenomenon such part as is known by previous inductions to be the effect of certain antecedents, the residue of the phenomenon is the effect of the remaining antecedents" (*J. S. Mill*).

method of sections. *Engin.* A method of finding analytically the stresses in the parts of a beam, frame, or truss, by taking a section, usually vertically, and writing down the conditions of equilibrium of the cut beam, etc., the stresses being calculated from the resulting equations.

method of substitution. A method of standardizing or calibrating in which one of the group of units to be compared is exactly balanced against an unknown but adjustable quantity, the others being then successively substituted for it and compared with the unknown.

meth'od·ol'o·gy (mĕth'ŭd·ŏl'ō·jĭ), *n.* [Gr. *methodos* method + *-logy.*] The science of method or arrangement; hence: **a** A branch of logic dealing with principles of procedure whether of theoretic or practical science. **b** *Educ.* The science which describes and evaluates arrangements of materials of instruction. — **meth'od·o·log'i·cal** (mĕth'-ŭd·ō·lŏj'ĭ·kăl), *adj.* — **meth'od·o·log'i·cal·ly,** *adv.* — **meth'od·ol'o·gist** (-ŏl'ō·jĭst), *n.*

Meth'od·y (mĕth'ŭd·ĭ), *n. & adj.* Methodist. *Chiefly Dial.*

meth·ox'y- (mĕth·ŏk'sĭ-). A combining form, *meth-* + *oxy-*, denoting the presence of *methoxyl*, usually replacing hydrogen. — **meth·ox'y** (-sĭ), *adj.*

meth·ox'yl (mĕth·ŏk'sĭl), *n.* [*methyl* + *-oxyl* as in hydroxyl.] *Chem.* A univalent radical, CH_3O (methyl combined with oxygen), analogous to hydroxyl.

meth·ron'ic (mĕth·rŏn'ĭk), *adj.* [G. *methronsäure* methronic acid, fr. *methylletrylondicarbon*säure.] *Chem.* Pertaining to or designating a white crystalline dibasic acid, $C_8H_8O_6$, produced by certain condensations of acetoacetic ester.

Me·thu'se·lah (mē·thū'zĕ·lȧ; -sĕ·lȧ), *n.* [Heb. *Mĕthushā'ĕl.*] One of the patriarchs, who is said (*Gen.* v. 27) to have lived 969 years; hence, an aged man.

meth'yl (mĕth'ĭl), *n.* [From METHYLENE.] *Chem.* The univalent hydrocarbon radical CH_3, of which methane is the hydride. It is a constituent of many compounds; as, *methyl* alcohol; *methyl* ether, etc.

meth'yl·ac'et·an'i·lide (-ăs'ĕt·ăn'ĭ·līd; -lĭd; 157), *n.* [*methyl* + *acetanilide.*] *Pharm.* A crystalline methyl derivative of acetanilide used as an antipyretic and antineuralgic.

methyl acetate. *Chem.* A colorless, fragrant liquid, $CH_3CO_2CH_3$, occurring in crude wood vinegar and wood spirit, and also made from methanol and acetic acid.

meth'yl·al' (mĕth'ĭl·ăl'; mĕth'ĭl·ăl), *n.* [*methylene* + *al*dehyde.] *Chem.* A light, volatile liquid, $H_2C(OCH_3)_2$, of a pleasant ethereal odor, obtained by partial oxidation of methanol. It is used in medicine as a hypnotic and in organic chemistry as a synthetic agent and solvent. By extension, any compound of the general formula $H_2C(OR)_2$.

methyl alcohol. *Chem.* Methanol.

methyl aldehyde. *Chem.* = FORMALDEHYDE.

meth'yl·a·mine' (mĕth'ĭl·ȧ·mēn'; -ăm'ĭn; 157), *n., or* **methyl amine.** Also **-min.** *Chem.* **a** A colorless, inflammable gas, CH_3NH_2, of strong ammoniacal odor, obtained from herring brine, from certain euphorbiaceous plants, by dry distillation of bones, wood, etc., by treating acetamide with bromine and caustic soda, and by other methods. **b** Any amine in which methyl replaces ammoniacal hydrogen. See DIMETHYLAMINE, TRIMETHYLAMINE.

meth'yl·an'i·line (-ăn'ĭ·lĭn; -lĭn; -lēn; 157), *n., or* **methyl aniline.** Also **-lin.** *Chem.* Any methyl derivative of aniline; specif., a colorless oil, $C_6H_5NHCH_3$, made esp. by heating aniline hydrochloride with methanol.

meth'yl·an'thra·cene (-ăn'thrȧ·sēn), *n., or* **methyl anthracene.** *Chem.* A hydrocarbon, $C_{15}H_{12}$, derived from anthracene by replacement of a hydrogen atom by methyl.

meth'yl·ate (mĕth'ĭ·lāt), *n.* [*methyl* + alcohol*ate.*] *Chem.* A compound derived from methanol (methyl alcohol) by the replacement of the hydroxyl hydrogen by a metal; a methyl alcoholate; as, sodium *methylate*, CH_3ONa; — less commonly, but perhaps preferably, called *methoxide.*

meth'yl·ate (-lāt), *v. t.;* -AT'ED (-lāt'ĕd; -ĭd; 119); -AT'ING (-lāt'ĭng). **a** To impregnate or mix with methanol (methyl alcohol). **b** *Chem.* To introduce the radical methyl (CH_3) into. — **meth'yl·a'tion** (-lā'shŭn), *n.* — **meth'yl·a'tor** (mĕth'ĭ·lā'tĕr), *n.*

meth'yl·at'ed spir'it *or* **spir'its** (-lāt'ĕd; -ĭd; 119). Ordinary, or ethyl, alcohol denatured with methanol (methyl alcohol). See DENATURE, *v. t.*

methyl blue. See DYE, *Table.*

methyl chloride. *Chem.* A colorless, sweet-smelling gas, CH_3Cl, obtained by action of hydrochloric acid on methanol (methyl alcohol), and used as a refrigerant, etc.

methyl cyanide. See NITRILE.

meth'yl·ene (mĕth'ĭ·lēn), *n.* [F. *méthylène*, fr. Gr. *methy* wine + *hylē* wood; — a word coined to correspond to the name *wood spirit.*] **a** *Chem.* A bivalent hydrocarbon radical, CH_2, not known in the free state, but conveniently regarded as a component of various compounds; as, *methylene* bromide, CH_2Br_2. **b** *Com.* Methanol.

methylene blue. An important blue dye of the thiazine class. **Methylene azure,** a similar dye, is obtained from it by oxidation.

meth'yl·ene·di·ox'y- (mĕth'ĭ·lēn·dī·ŏk'sĭ-). [*methylene* + *dioxy-.*] *Chem.* A combining form denoting the *presence of the group* $-OCH_2O-$. See DIOXY-.

methylene iodide. *Chem.* A yellowish liquid, CH_2I_2, remarkable for its high specific gravity (3.325 at 20° C. or 68° F.); di-iodo-methane. Its heaviness makes it useful for separating minerals and determining specific gravities.

meth'yl·en'i·mine (mĕth'ĭ·lēn'ĭ·mēn; -mĭn), *n.* [*methylene* + *imine.*] Also **-in.** *Chem.* A hypothetical compound, $CH_2{:}NH$, known in the form of derivatives. See AZOMETHINE.

meth'yl·en'i·tan (mĕth'ĭl·ĕn'ĭ·tăn), *n.* [G., fr. dioxy*methylen* + mann*itan;* from its resemblance to mannitan.] *Chem.* A yellow, sirupy substance first obtained in 1861 by heating trioxymethylene with lime water.

methyl ester. See ESTER.

methyl ether. *Chem.* **a** A colorless, easily condensable gas, $(CH_3)_2O$, of agreeable odor, obtained by heating methanol (methyl alcohol) with sulphuric acid; — called also ***dimethyl ether, methyl oxide.*** **b** Any ether derived from an alcohol or phenol by replacement of hydroxyl hydrogen by methyl; as, the *methyl ether* of benzyl alcohol. **c** A methyl ester.

methyl ethyl ketone. *Chem.* = BUTANONE.

methyl green. See DYE, *Table.*

me·thyl'ic (mē·thĭl'ĭk), *adj. Chem.* Of, pertaining to, or derived from, methyl; as, *methylic* alcohol; *methylic* amine.

methyl iodide. *Chem.* A colorless heavy liquid, CH_3I, prepared by treating methanol (methyl alcohol) with iodine and phosphorus and used as a reagent in organic chemistry.

methyl ketol. *Chem.* = ACETOL **a.**

meth'yl·naph'tha·lene (mĕth'ĭl·năf'thȧ·lēn), *n., or* **methyl naphthalene.** *Chem.* Either of two isomeric hydrocarbons, $C_{10}H_7.CH_3$, occurring in coal tar.

methyl orange. An azo dye derived from dimethylaniline. It dyes silk and wool a fiery orange, but is used only as an indicator in alkalimetry, its dilute solution being yellow when neutral and pink when acid.

meth'y·lo'sis (mĕth'ĭ·lō'sĭs), *n.* [NL., fr. *met-* + Gr. *hylē* matter + *-osis.*] *Geol.* = METASOMATOSIS. — **meth'y·lot'ic** (-lŏt'ĭk), *adj.*

methyl red. See DYE, *Table.*

methyl rubber. A synthetic rubber made in Germany during the World War by polymerization of dimethyl-butadiene.

methyl salicylate. *Chem.* The methyl ester, $C_6H_4(OH)-CO_2CH_3$, of salicylic acid.

methyl sulphate. *Chem.* A methyl ester of sulphuric acid; specif., ***dimethyl sulphate*** $(CH_3)_2SO_4$, a colorless poisonous liquid used as a methylating agent.

methyl violet. Any of a series of synthetic dyes chiefly mixtures of methylated rosanilines; — often with added symbols, as 2 B, 5 B. See DYE, *Table.*

met'ic (mĕt'ĭk), *n.* [Gr. *metoikos*, prop., changing one's abode, fr. *meta,* indicating change + *oikos* house, abode.] *Gr. Antiq.* A settler; immigrant; at Athens, an alien resident in Attica, who had some civil privileges. Cf. ISOTELY.

me·tic'u·lous (mē·tĭk'ū·lŭs), *adj.* [F. *méticuleux,* fr. L. *meticulosus,* fr. *metus* fear.] **1.** Timid; fearful. *Obs.*
2. Unduly or excessively careful of small details or about comparatively unimportant matters; finically scrupulous.
The excessive and *meticulous* civility of Addison. *E. Gosse.*

Syn. — See CAREFUL. **Ant.** — See SLOVENLY, CARELESS. — **me·tic'u·los'i·ty** (-lŏs'ĭ·tĭ), *n.* — **me·tic'u·lous·ly,** *adv.* — **me·tic'u·lous·ness,** *n.*

mé·tier' (mā·tyā'; mā'tyā), *n.* Also **me·tier'.** [F. *métier.* See MISTER a trade.] Calling; profession; business; occupation to which one is peculiarly adapted; line.

mé'tis' (mā'tēs'), *n. masc.,* **mé'tisse'** (mā'tēs'), *fem.* [F. See MESTIZO.] A person of mixed blood; locally, *U. S.,* an octoroon; *Canada,* a half-breed.

Me'tis (mē'tĭs), *n.* [Gr. *Mētis,* fr. *mētis* wisdom, skill.]
1. *Gr. Myth.* The first wife of Zeus.
2. *Astron.* See ASTEROID, *Table.*

Met'o·ac (mĕt'ō·ăk), *n.* An Indian of the group of closely associated Algonquian tribes of Long Island, including the Canarsee, Montauk, Rockaway, and Shinnecock.

met'o·chy (mĕt'ō·kĭ), *n.* [Gr. *metochē* a sharing, fr. *metochein* to share in.] *Zool.* The relation between a harmless guest insect and its host. — **met'o·chous** (-kŭs), *adj.*

met·oes'trum (mĕt·ēs'trŭm; -ĕs'-), *n.* [NL., fr. *met-* + *oestrum.*] *Physiol.* The regressive period following that of greatest oestrous activity, or rut. See OESTROUS CYCLE. — **met·oes'trous** (-trŭs), *adj.*

Me·ton'ic cy'cle (mē·tŏn'ĭk). [After *Meton,* the Athenian astronomer of the 5th century B.C.] A period of 19 years, after the lapse of which the new and full moon returns to the same day of the year. It was the basis of the Greek calendar and survives in the golden numbers used in determining Easter. Cf. CALLIPPIC CYCLE; See GOLDEN NUMBER.

met'o·nym (mĕt'ō·nĭm), *n.* A word used in metonymy.

met'o·nym'i·cal (-nĭm'ĭ·kăl), *adj.* Also **met'o·nym'ic** (-ĭk). [See METONYMY.] Pertaining to, or involving, metonymy; used in metonymy. — **met'o·nym'i·cal·ly,** *adv.*

me·ton'y·mous (mē·tŏn'ĭ·mŭs), *adj.* Metonymical. — **me·ton'y·mous·ly,** *adv.*

me·ton'y·my (mē·tŏn'ĭ·mĭ), *n.* [L. *metonymia,* fr. Gr. *metōnymia,* fr. *meta,* indicating change + *onyma, onoma,* name. See NAME.] *Rhet.* Use of one word for another that it suggests, as the effect for the cause, the cause for the effect, the sign for the thing signified, the container for the thing contained, etc. (darkness was the *saving* of us, for the *cause of saving;* a man keeps a good *table,* instead of good *food;* we read *Vergil,* that is, his poems; a man has a warm *heart,* that is, warm *affections*). See TROPE.

Syn. — METONYMY, SYNECDOCHE alike involve the substitution for one idea of another closely allied to it. The technical distinction between the two, which may be seen in the defs., is now little noted, and the tendency now is to allow *metonymy* to do duty for both. Cf. COMPARISON.

met'o·pe (mĕt'ō·pē; mĕt'ŏp), *n.* [L. *metopa,* fr. Gr. *metopē,* fr. *meta* with, between + *opē* opening, hole, the hole in the frieze between the beam ends.] *Arch.* The space between two triglyphs of the Doric frieze, often adorned with carved work. See ORDER, *Illust.*

met'o·pe, *n.* [See METOPIC.] *Zool.* The middle anterior portion of a crab.

Me·to'pi·as (mē·tō'pĭ·ăs), *n.* [NL., fr. Gr. *metōpias* having a broad forehead, fr. *metōpon* forehead.] *Paleontol.* A genus of large labyrinthodonts from the Keuper formation (Triassic) of Germany.

me·top'ic (mē·tŏp'ĭk), *adj.* [Gr. *metōpon* the forehead.] *Anat.* Of or pert. to the forehead; frontal; as, **metopic suture,** a suture uniting the frontal bones in the foetus.

me·to'pi·on (mē·tō'pĭ·ŏn), *n.* [NL., fr. Gr. *metōpion* forehead.] *Craniom.* A point situated midway between the frontal prominences. See CRANIOMETRY, *Illust.*

met'o·pism (mĕt'ō·pĭz'ĭm), *n. Anat.* Condition of having a persistent frontal suture. See FRONTAL BONE.

Met'o·poc'er·os (mĕt'ō·pŏs'ĕr·ŏs), *n.* [NL., fr. Gr. *metōpon* forehead + *keras* horn.] *Zool.* The genus of Iguanidae containing the rhinoceros iguana.

met'o·po·man'cy (mĕt'ō·pō·măn'sĭ), *n.* [Gr. *metōpon* forehead + *-mancy.*] Divination by means of the forehead or face.

me·to'pon (mē·tō'pŏn; mĕt'ō·pŏn), *n.* [Gr. *metōpon* forehead.] *Anat.* The most frontal part of the frontal lobe of the brain.

met'o·po·scop'ic (mĕt'ō·pō·skŏp'ĭk), **met'o·po·scop'i·cal** (-ĭ·kăl), *adj.* Of or pertaining to metoposcopy.

met'o·pos'co·py (-pŏs'kō·pĭ), *n.* [Gr. *metōposkopos* observing the forehead, fr. *metōpon* the forehead + *skopos* a watcher.] The art of discovering character from the markings of the forehead. — **met'o·pos'co·pist** (-pĭst), *n.*

me·tos'te·on (mē·tŏs'tē·ŏn), *n.* [NL., fr. *met-* + *-osteon.*] *Zool.* The posterolateral ossification in the sternum of birds. — **me·tos'te·al** (-ăl), *adj.*

metr-. = 1st METRO-, as in:

metralgia	**metrectasia**	**metrectopia**
metranemia	**metrectatic**	**metrectopic**
metratonia	**metrectomy**	**metrectopy**

metr-. = 2d METRO-.

me'tra (mē'trȧ), *n.* [NL., fr. Gr. *mētra.* See MATRIX.] = UTERUS, 1.

-metra. [NL.] *Med.* A combining form from Greek *mētra,* the womb, denoting *a pathological condition of the womb,* as in hydro*metra,* pyo*metra.*

me·tre'tes (mē·trē'tēz), *n. sing. & pl.* [Gr. *metrētēs.*] See MEASURE, *Table.*

me·tre'za (mē·trā'zȧ), *n.* [See MISTRESS.] A mistress. *Obs.*

me'tri·a (mē'trĭ·ȧ), *n.* [NL., fr. Gr. *mētra* womb.] *Med.* Puerperal inflammation.

met'ric (mĕt'rĭk), *adj.* [L. *metricus,* fr. Gr. *metrikos.* See 1st METER.] **1.** Relating to measurement; involving, or proceeding by, measurement.
2. [F. *métrique.* See 1st METER, 4.] Of or pertaining to the meter as a standard of measurement, or pertaining to the decimal system of measurement of which the meter is the basis.
3. = METRICAL, 1.
4. = METRICAL, 3.
☞ For some *metric* phrases, see the second word.

met'ric, *n.* **1.** = METRICS, 1.
2. A standard of measurement; a criterion. Cf. METRICS, 2.

metric aggregate. *Math.* An aggregate having associated with every pair (x, y) of its elements a real number xy such that $xx = 0$; $xy = [yx > 0$ for $x \neq y$; and $xy + yz \geqq xz$.

met'ri·cal (mĕt'rĭ·kăl), *adj.* **1.** Of or pertaining to meter; arranged in meter; as, *metrical* compositions.
2. = METRIC, 1 & 2.
3. *Math.* Postulating a method of determining magnitudes, as lengths, areas, volumes, or angles.

metrical accent. The accent as determined by the meter of a verse, the measure of music, etc.

met'ri·cal·ly, *adv.* of METRIC, METRICAL.

metrical romance. *Literature.* A romance narrated in metrical form; — applied specif. to the narrative poetry of medieval times in western Europe. See 2d MATTER, 16; cf. 1st GEST, 2.

metric carat. See CARAT, 1.

metric centner. See CENTNER, 1.

metric geometry. *Math.* Geometry that postulates a method of determining the distance between any two of its points and thence determines the size of geometrical magnitudes, as lengths, areas, volumes, angles. See DISTANCE, *n.,* 3, *Note.*

me·thought' (mē·thôt'), *past tense of* METHINKS. [METHOUGHT.] **me·thoughts'.** Obs. equiv. of **meth·ox'ide** (mĕth·ŏk'sīd; -ĭd; 157), *n.* Also **-id.** *Chem.* See METHYLATE.

meth'ri·date. ✝ MITHRIDATE.

Me·thu'sa·el (mē·th ŭ's ā·ĕl), **Me·thu'sha·el** (-shā'-ĕl). *Bib.*

Me·thu'sa·lem (-sȧ·lĕm; -sȧ·lĕm), *n.* Corrupt. of METHUSELAH (after Jerusalem). *Obs. exc. Illit.*

meth'yl ben'zene. *Chem.* = TOLUENE.

meth'yl·eth·yl·a·ce'tic (mĕth'-ĭl·ĕth'ĭl·ȧ·sē'tĭk; -sē'tĭk), *adj.* [*methyl* + *ethyl* + *acetic.*] *Chem.* See VALERIC.

meth'yl·gly'cine, meth'yl·gly'-co·coll, *n. Chem.* = SARCOSINE.

meth'yl·gly'ox·al' (mĕth'ĭl·glĭ'-ŏk·săl'; -glĭ·ŏk'săl), *n. Chem.* = PYRUVALDEHYDE.

meth'yl·ma·lon'ic, *adj.* [*methyl* + *malonic.*] = SUCCINIC **b.**

meth'yl·pen'tose (mĕth'ĭl·pĕn'-tōs), *n., or* **methyl pentose.** *Chem.* See PENTOSE.

meth'yl·pro'pane (-prō'pān), *n.* See GENEVA SYSTEM.

meth'yl·sul'fa·nol (-sŭl'ĭd·nōl; -nŏl), *n.* [Irreg. fr. *meta-* + Gr. *xenos* guest.] = HETEROZEOUS. — **met·ox'e·ny** (-nĭ), *n.*

me'tre (mē'tĕr). Var. of 1st & 2d METER.

met·ox'a·zine (mĕt·ŏk'sȧ·zēn; -zĭn; 157), *n.* Also **-zin.** *Chem.* See OXAZINE.

met·ox'e·nous (mĕt·ŏk'sē·nŭs), *adj.* [Irreg. fr. *meta-* + Gr. *xenos* guest.] = HETEROZEOUS. — **met·ox'e·ny** (-nĭ), *n.*

o·gram, me'tre·less, me'tre-mil'li·me'tre, me'tre·ship. Vars. of METER-AMPERES, etc.

me'tred (mē'tĕrd), **me'tring** (-trĭng). Vars. of METERED, METERING.

me·tre'ta (mē·trē'tȧ), *n.;* *pl.* **-TAE** (-tē). Also **me·tre'te** (mē·trē'tē), *n.* [L., *mētēta.*] Cf. METRETES.] See MEASURE, *Table.*

metric horsepower. See HORSEPOWER, *n.*, 2 a.

metric hundredweight. See HUNDREDWEIGHT.

me·trĭ'cian (mĕ·trĭsh'ăn), *n.* [Cf. F. *métricien.* See 1st METER.] A composer in, or student of, meter.

met'rĭ·cism (mĕt'rĭ·sĭz'm), *n.* Metrical composition; versification.

met'rĭ·cist (-sĭst), *n.* A metrist.

met'rĭ·cize (-sīz), *v. i.* To analyze metrically; to scan.

met'rĭ·cize, *v. t.* To change into or express in the metric system.

metric pfund. See PFUND.

met'rics (mĕt'rĭks), *n.* See -ICS. **1.** The part of prosody dealing with metrical composition.
2. Standard of measurement; criteria.

metric space. *Math.* = POINT SET.

metric system. A decimal system of measures and weights, with the meter and the gram as bases. The units of the metric system at the outset were all derived from the unit of length, the meter, which was intended to be, and is very nearly, one ten-millionth part of the distance measured on a meridian of the earth from the equator to the pole, being equal to 39.37 U. S. inches or about 3 ⅜ inches. For more recent calculations, see 1st METER, 4. Upon the meter were originally based the other primary units of measure: the *square meter*, the *cubic meter*, or *stere*, the *are* (100 square meters), the *liter* (which see), and the *gram* (see 2d GRAM). It was found, however, that masses could be compared with a higher degree of accuracy than that with which volumes could be determined, and it was therefore preferable to have a material standard of mass specifically defined rather than one derived from the unit of length through the unit of volume. A definite mass, the International Prototype Kilogram (see KILOGRAM), was, therefore, adopted as the standard of mass, and the unit of volume, the liter, was then redefined in terms of the standard of mass; the liter being defined as the volume of a kilogram of pure water at the temperature of its maximum density, and equal to 1.000027 cubic decimeters. The Greek prefix *deca-*, or *deka-*, before a unit means ten; *hecto-*, one hundred; *kilo-*, one thousand; *myria-*, ten thousand; *mega-*, one million; thus a *hectometer* is 100 meters. Similarly, the Latin prefix *deci-* before a unit means one tenth; *centi-*, one hundredth; *milli-*, one thousandth; and *micro-*, one millionth; thus, a *centigram* is one hundredth of a gram. See *Tables*, below. The system originated in France about 1790. Its use is required by law in a majority of nations, and is permitted in others, as England and the United States.

me'tro- (mē'trō-; mĕt'rō-), **metr-.** Comb. form, Greek *mētro-*, from *mētēr*, meaning *mother*, as in *metro*polis.

met'ro- (mĕt'rō-). A combining form, Greek *metro-*, from *metron*, meaning *measure*, as in *metro*logy, *metro*mania.

me·trol'o·gy (mē·trŏl'ō·jĭ), *n.* [3d *metro-* + *-logy.*] The science of, or a system of, weights and measures; also, a treatise on the subject. — **met'ro·log'i·cal** (mĕt'rō·lŏj'ĭ·kăl), *adj.* — **me·trol'o·gist** (mē·trŏl'ō·jĭst), *n.* — **met'ro·logue** (mĕt'rō·lŏg; 185), *n.*

met'ro·ma'ni·a (mĕt'rō·mā'nĭ·ȧ), *n.* [NL., fr. 3d *metro-* + *-mania;* cf. F. *métromanie.*] A mania for writing verses. — **met'ro·ma'ni·ac** (-ăk), *n. & adj.* — **met'ro·ma·ni'a·cal** (-mȧ·nī'ȧ·kăl), *adj.*

met'ro·nome (mĕt'rō·nōm), *n.* [3d *metro-* + Gr. *nomos* law.] An instrument for marking exact time, esp. in music. The usual form, called **Maelzel's metronome** from J. N. Maelzel, who claimed its invention in 1816, is essentially a clock-moved pendulum swinging on a pivot near its center, and having a leaden ball at its lower end and a sliding weight on the upper end, by which the number of strokes per minute is regulated.

Maelzel's Metronome.

met'ro·nom'ic (-nŏm'ĭk), **met'ro·nom'i·cal** (-ĭ·kăl), *adj.* **a** Of or pertaining to a metronome or the marking of time with it. **b** Hence, of a musical performance, overprecise; mechanically regular. — **met'ro·nom'i·cal·ly,** *adv.*

metronomic, *or* **metronome, mark.** A mark at the beginning of a piece of music to show its tempo according to the metronome. Thus M.M. ♩ = 110 means that the sliding weight of Maelzel's metronome is to be set at 110, and the music played at the rate of 110 time units (in this case quarter notes) to the minute.

me'tro·nym'ic (mē'trō·nĭm'ĭk; mĕt'rō-), *adj.* [Gr. *mētrōnymikos*, fr. *mētēr* mother + *onyma, onoma*, name.] **a** Derived from the name of the mother or other female ancestor; as, a *metronymic* name or appellation; also, denoting such derivation; as, a *metronymic* suffix. **b** Tracing descent matrilineally; based upon matrilineal descent; as, a *metronymic* clan; *metronymic* kinship; — disting., in both senses, from *patronymic.*

me'tro·nym'ic, *n.* Also **me'tro·nym** (mē'trō·nĭm; mĕt'rō-). A metronymic name or appellation.

me·tron'y·my (mē·trŏn'ĭ·mĭ), *n.* The custom of using the maternal clan or totemic name, or of tracing descent matrilineally. Cf. PATRONYMY.

met'ro·pho·tog'ra·phy (mĕt'rō·fō·tŏg'rȧ·fĭ), *n.* [3d *metro-* + *photography.*] Photogrammetry.

-me·tro'pi·a (-mē·trō'pĭ·ȧ). [NL.] A combining form, *metr-* + *-opia*, denoting *range of vision*, as in hypermetropia.

met'ro·pole (mĕt'rō·pōl), *n.* [OF., fr. LL. *metropolis.* See METROPOLIS.] **1.** A chief town; a metropolis. *Archaic.*
2. *Eccl.* A metropolitan see; a metropolis.

met'ro·pol'ic (mĕt'rō·pŏl'ĭk), *adj.* Metropolitan. *Obs.*

me·trop'o·lis (mē·trŏp'ō·lĭs), *n.; pl.* -LISES (-ēz; -lz; 119), -LEIS (-lĭs), or, *incorrectly*, -LES (-lēz). [LL., fr. Gr. *mētropolis*, prop., the mother city (in relation to colonies), fr. *mētēr* mother + *polis* city. See MOTHER; POLICE.] **1.** The mother or parent city or state of a colony; — orig. used of Greek cities or states.
2. The chief or capital city of a country, state, region, etc.
3. A principal seat or center; as, a *metropolis* of religion.
4. *Eccl.* The seat, or see, or a metropolitan (def. 1). "The great *metropolis* and see of Rome." *Shak.*
5. *Zool. & Bot.* The region where a particular species of plant or animal, or a group of species, is most abundant.

met'ro·pol'i·tan (mĕt'rō·pŏl'ĭ·tăn), *adj.* [LL. *metropolitanus* of a metropolis.] **1.** *Eccl.* Of, pertaining to, or designating, or characteristic of or befitting, a metropolis or metropolitan; as, *metropolitan* authority, bishops.
2. Of, pertaining to, or being, a metropolis, or principal city; as, *metropolitan* trade; *metropolitan* luxury.
3. Of, pert. to, or being, the mother country. *Now Rare.*
4. Chief; leading; principal. *Obs.*

met'ro·pol'i·tan, *n.* **1.** *Eccl.* Orig., the bishop of the chief city or metropolis of a province; now, the head of an ecclesiastical province (see ARCHBISHOP). For administrative purposes in the early church the civil province was made a unit of ecclesiastical jurisdiction, and the bishop of its principal city was granted definite but limited rights over the other (suffragan) bishops of the province. The system became universal in the church. Nowadays, however, the position of metropolitan is one of honor and dignity rather than of jurisdiction.
2. A chief town or city; metropolis. *Now Rare.*
3. = METROPOLIS, 3. *Obs.*
4. One who lives in, or has the manners, customs, or ideas of, a (or the) metropolis (sense 2).
5. *Gr. Hist.* A citizen of a metropolis (sense 1).

Metropolitan Army. See ARMY ORGANIZATION, *Table.*

met'ro·pol'i·tan·ate (mĕt'rō·pŏl'ĭ·tăn·ăt), *n.* The see or office of a metropolitan bishop.

met'ro·pol'i·tan·cy (-sĭ), *n.* State or position of being a metropolis. *Rare.*

me·trop'o·lite (mē·trŏp'ō·līt), *n.* [LL., *metropolita*, fr. Gr. *mētropolitēs.*] **a** *Eccl.* A metropolitan. **b** *Obs.* A metropolis.

met'ro·ra'di·o·scope' (mĕt'rō·rā'dĭ·ō·skōp'), *n.* [3d *metro-* + *radio-* + *-scope.*] Apparatus for measuring cathode rays.

me'tror·rha'gi·a (mē'trō·rā'jĭ·ȧ; mĕt'rō-), *n.* [NL., fr. 1st *metro-* + *-rhagia.*] Profuse bleeding from the uterus, esp. such as is not menstrual.—**me'tror·rhag'ic** (-răj'ĭk), *adj.*

me'tror·tho'sis (mē'trōr·thō'sĭs; mĕt'rōr-), *n.* [NL., fr. 1st *metro-* + Gr. *orthōsis* a making straight.] *Med.* Rectification of a misplaced uterus.

Me'tro·sĭ·de'ros (mē'trō·sĭ·dē'rŏs; mĕt'rō-), *n.* [NL., fr. Gr. *mētra* heart of a tree + *sidēros* iron.] *Bot.* A genus of chiefly Pacific-island trees or shrubs of the myrtle family.

met'ro·style (mĕt'rō·stīl), *n.* [3d *metro-* + *-style.*] A speed-regulating device for player pianos. — **met'ro·style,** *v. i. & i.*

Me·trox'y·lon (mē·trŏk'sĭ·lŏn), *n.* [NL., fr. Gr. *mētra* heart or pith of a tree + *-xylon.*] *Bot.* A small genus of Indo-Malayan pinnate-leaved palms (family Arecaceae), which flower and fruit and then die. Two species, *M. laeve* and *M. rumphii*, are the well-known sago palms.

-metry. [See METER.] A combining form, Greek *-metria*, from *metron*, denoting *an art, process, or science of measuring* (something specified), as in acidi*metry*, geo*metry*, psycho*metry*, trigono*metry*. Cf. 2d -METER.

met'tar (mĕt'ĕr), *n.* [Ar. *maṭarah* a skin bag for oil.] See MEASURE, *Table.*

met'tle (mĕt'l), *n.* [E. *metal*, used in a tropical sense in allusion to the temper of the metal of a sword blade. See METAL.] Quality of temperament or disposition; spirit, esp. as regards honor, fortitude, ardor, etc.; courage.
—*on, upon, or to, one's mettle.* Incited or roused to the use of one's best efforts; in the highest state of efficiency.

met'tle, *adj.* Spirited; mettlesome. *Archaic & Scot.*

met'tle. Var. of METAL. *Now Dial.*

met'tled (-'ld), *adj.* Having, or full of, mettle; mettlesome.

met'tle·some (mĕt'l·sŭm), *adj.* Full of mettle, or spirit; having natural ardor; fiery; as, a *mettlesome* horse.

Me'xi·tli (mā'hē·tlē), **Me'xi·tl** (-t'l, -tlē), *n.* [Nahuatl *Mexitli*, *Mexicli*.] = HUITZILOPOCHTLI.

Mey'er valve (mī'ĕr). See CUT-OFF VALVE.

meyne. † MAYNE, MANY, MEAN.

Mez'a·ab (mĕz'ĭ·ăb). *D. Bib.*

Mez'a·hab (-hăb). *Bib.*

mez'ail. Var. of MESAIL.

mez'an·kor'rie moth (mĕz'ăn·kŏr'ĭ). = MUGA MOTH. See MUGA.

mez·cal'ine. Also **-in.** Vars. of MESCALINE.

mez·quit' (mĕs·kēt'; 267), **mes·quit'e** (mĕs·kē'tē; 267). Vars. of MESQUITE.

mes·quit'a (-kē'tä). Var. of MESQUITA, MESQUITE.

mez'ur·a·bl, mez'ure, mez'ured. Measurable, etc. *Rep. Sp.*

‖**mez'za** (mĕd'zä), *adj.* See MEZZO. [It.] = MÉTAYAGE.

‖**mez'ze·ri'a** (mĕd'zä·rē'ä), *n.* [henna].

mez'zin. † MUEZZIN.

‖**mez'zi ter'mi·ni,** *pl.* of MEZZO TERMINE.

mezzograph screen. See SCREEN, *n.*, 15.

mhen'dee. Var. of MENDEE.

mhorr (môr). Var. of MOHR.

mho'wa (mō'wd). Var. of MAHUA.

m-hum'. Var. of UM-HUM. *Colloq.*

mi'am. Var. of MIAMIA.

Mi'a·min (mĭ'ä·mĭn). *Bib.*

Miao'tse. **Miao'tze** (myou'dsē), *n. pl.* = MANTZU.

Mi'a·plac'i·dus (mĭ'ä·plăs'ĭ·dŭs), *n.* [NL., prob. fr. Ar. *miyāh* waters + L. *placidus* placid.] See STAR, *Table*.

mi·as'ma·tize (mĭ·äz'mä·tīz), *v.i.* See -IZE.

mi·au'er. Var. of MIAOWER.

mi·auw'. Var. of MIAOW.

Mi'chel·an'ge·lesque' (mī'kĕl·ăn'jē·lĕsk'), *adj.* Characteristic of, or resembling, the Florentine artist Michelangelo Buonarotti (1475–1564) or his work, which is pre-eminent for grandeur of conception, dramatic, almost violent action, and technical mastery of execution.

Mi·che'li·a (mĭ·kē'lĭ·ȧ), *n.* [NL., after Piero Antonio *Micheli,* It. botanist.] *Bot.* A genus of Asiatic shrubs and trees of the magnolia family (Magnoliaceae). *M. fuscata* is the banana shrub, *M. champaca* the champac.

Mi'chel·son–Mor'ley ex·per'i·ment (mī'kĕl·sŭn·môr'lĭ). [After A. A. *Michelson,* Am. physicist, and E. W. *Morley* (1838–1923), Am. chemist.] *Physics.* An experiment that shows that the two parts of a divided ray of light travel at the same speed over paths perpendicular to each other, as over east-west and north-south paths. The deductions from the experiment are that: (1) the motion of the earth through space has no effect upon the velocity of light; (2) the absolute motion of the earth is not measurable. The experiment confirms Einstein's theory.

mich'er (mĭch'ĕr), *n.* [ME. *michare, muchare.* See MICHE.] **a** *Obs.* A sneak, thief, or pander. **b** *Now Dial.* A truant.

mich'er·y (-ĭ), *n.* Theft; cheating. *Obs.*

Mich'i·gam'e·a (mĭch'ĭ·găm'ē·ȧ), *n.* [Of Algonquian origin, lit., great lake, prob. with ref. to Big Lake, Ark., where they once lived; cf. Cree *mishigamaw* great lake.] An Indian of an Algonquian tribe of the Illinois confederacy. See ILLINOIS, 1.

Mich'i·gan (mĭsh'ĭ·găn), *n.* A State of the United States. See *Gaz.*

Mich'i·gan'der (mĭsh'ĭ·găn'dĕr), *n.* A Michiganite; — a nickname. *U. S.*

Michigan grayling. See GRAYLING, 1.

Mich'i·gan·ite (mĭsh'ĭ·găn·īt), *n.* A native or inhabitant of Michigan.

Michigan rose. The prairie rose.

mich'ing (mĭch'ĭng), *adj. & verbal n.* Hiding; skulking; pilfering; truant-playing. *Now Dial.*

mich'ing mal'i·cho (**mal'le·cho**) (*pron.* măl'ĭ·kō). A phrase in Shakespeare's *Hamlet* (III. ii. 147) of uncertain origin and meaning, usually understood to mean *hiding,* or *skulking, mischief.*

Mich'ler's ke'tone (mĭk'lĕrz). [After Wilhelm T. *Michler* (1846–89), Ger. chemist.] *Chem.* A colorless crystalline ketone, $[(CH_3)_2NC_6H_4]_2CO$, made by treating dimethylaniline with phosgene, and used in the manufacture of certain dyes.

mick (mĭk), *n.* [From MICHAEL.] An Irishman. *Slang.*

mick'le (mĭk''l), *adj.* [ME. *mikel, muchel,* fr. AS. *mycel, mycel;* akin to OS. *mikil,* OHG. *mihil, mihhil,* ON. *mikill, mykill,* Goth. *mikils,* L. *magnus,* Gr. *megas,* gen. *megalou,* Skr. *mahat, mahi,* Tocharian B *makī-*; cf. Hittite *mekkis.* Cf. MUCH, MASTER.] Great; much. "A man of *mickle* might." *Spenser.* — **mick'le,** *adv.* — **mick'le·ness,** *n. All Archaic & Dial.*

mick'le (mĭk''l), *n.* **a** *Obs.* Largeness; size. **b** *Dial.* A great amount or sum.

Mick'le·mote' (mĭk''l·mōt'), **Mick'le·ge·mote'** (-gĕ·mōt'), *n.* [AS. *mycel gemōt, mycel gemōt.*] *A.-S. Hist.* The great, or national, gemot.

mick'le—mouthed' (mĭk''l·mouth'd'; -mouth'; 66), *adj.* Having a big mouth. *Scot.*

Mick'y (mĭk'ĭ), *n.* **a** Dim. of Michael. **b** Hence [*usually not cap.*], *Slang, U. S.,* an Irishman; a mick.

Mic'mac (mĭk'măk), *n.; pl.* -MACS (-măks). One of a tribe of Algonquian Indians of Newfoundland and the Maritime Provinces. They now number about 3,500, and work as fishers, guides, and curio makers.

mi'co (mē'kō), *n.* [Pg., fr. Tupi *mico,* of Cariban origin; cf. Galibi *mĕku* monkey.] A marmoset; esp., the black-tailed marmoset (*Callithrix melanurus*) of parts of tropical South America.

mi·con'cave (mī·kŏn'kāv; mī'kŏn·kāv'; 66), *adj.* [*mi-* + *concave.*] Slightly curved; — applied specif. to a type of crystal commonly used in open-faced watches.

Mi·co'ni·a (mī·kō'nĭ·ȧ), *n.* [NL., after D. *Miçón,* Sp. physician.] *Bot.* A large genus of tropical American shrubs or trees (family Melastomaceae), with small flowers in showy inflorescenses. Syn. *Tamonea* (sense **a**).

mi con'tra fa (mē kŏn'trȧ fä). *Medieval Music.* Literally, *mi* (of the "hard" hexachord) against *fa* (of the "natural"). See GAMUT. The interval B–F, the tritone or augmented fourth once stigmatized as the *diabolus in musica.*

micr-. = MICRO- (which see), as in *micr*esthete, *micr*ohm.

mi'cra·cous'tic (mī'krȧ·kōōs'tĭk; -kous'tĭk), *adj.* [F. *micracoustique.*] Pertaining or suited to audition of small sounds. — *n.* A micracoustic instrument. *Obs.*

mic'ra·mock (mĭk'rȧ·mŏk), *n.* [Origin unknown.] A cowrie (*Cypraea*). *Florida.*

mi·cran'der (mī·krăn'dĕr), *n.* [*micr-* + Gr. *anēr, andros,* man.] *Bot.* A dwarf male. Cf. MACRANDER. See OEDOGONIACEAE. — **mi·cran'drous** (-drŭs), *adj.*

mi'cra·ner (mī'krȧ·nĕr), *n.* [NL., fr. *micr-* + Gr. *anēr* man, male animal.] *Zool.* A male ant of unusually small stature.

mi'cran·thro'pos (mī'krăn·thrō'pŏs; mī·krăn'thrō·pŏs), *n.* [NL., fr. *micr-* + Gr. *anthrōpos* man.] A miniature or epitome of man. *Coleridge.*

Mi·cras'ter (mī·krăs'tĕr), *n.* [NL., fr. *micr-* + Gr. *astēr* star.] *Paleontol.* A genus of spatangoid sea urchins; — from the starlike disposal of the ambulacral furrows.

mi·cres'thete, mi·craes'thete (mī·krĕs'thēt), *n.* [See MICRO-; ESTHETE.] *Zool.* One of the small sense organs in the micropores of certain chitons. Cf. MEGALESTHETE.

mi'cri·fy (mī'krĭ·fī), *v. t.;* -FIED (-fīd); -FY'ING (-fī'ĭng). [*micr-* + *-fy.*] To make small or insignificant.

mi'cro- (mī'krō-; *occas.* mĭk'rō-), **micr-.** [See MICA.] A combining form (opposed to *macro-* and *mega-*), Greek *mikro-, mikr-,* from *mikros,* meaning: **1.** *Small, petty,* as in *microcosm, micropia, micrology;* used also to denote specif.: **a** *Enlarging as does the microscope;* — in names of instruments, as in *microbarograph, microphone.* **b** In the metric system and in various terms in electricity, mechanics, etc., *one millionth part of a* (specified) *unit.* Cf. MICROMICRO-. The following can be understood from the definitions of their elements.

microampere
microangstrom
microbar
microcoulomb
microcurie
microerg
microfarad
microgilbert
microgramme

3. *Bot. & Zool.* **a** *Very small in a* (specified) *feature;* — in adjectives, as in *microceratous, microphyllous.* **b** *A variety of a* (specified) *type relatively small in size or extent;* — in nouns, as in *microgamete, microspore.*

4. *Chem. Of or pertaining to, or for, very small* or *minute amounts of material; microchemical* or *microanalytical;* as in *microdesiccator, micro-iodometric.*

5. *Med. Abnormally small;* — chiefly in nouns denoting a condition of a (specified) part, as in *microcephalia.* The meanings of the following can be understood from the definitions of their elements.

microblepharis
microblepharism
microblephary
microbrachia
microbrachius
microcardia
microcardius
microcheilia
microcheiria
microchiria
microcnemia

6. *Petrog.* **a** *Of very fine grain,* as in *microdiorite, microgabbro, microgranite.* **b** *Visible only under the microscope.*

mi'cro (mī'krō), *adj. Chem.* = MICRO-, 4.

mi'cro (mī'krō), *n. Zool.* Any very small moth.

mi'cro—a'er·o·phil'ic, *adj.* Also **mi'cro—a'er·oph'i·lous.** *Biol.* Requiring very little free oxygen. — **mi'cro—a'er·o·phile',** **-phil',** *adj. & n.*

mi'cro·am'me'ter (mī'krō·ăm'mē'tĕr), *n.* [*micro-* + *ammeter.*] *Elec.* An instrument for measuring microamperes.

mi'cro·a·nal'y·sis (-ȧ·năl'ĭ·sĭs), *n.* [NL., fr. *micro-* + *analysis*]. *Anal. Chem.* Analysis of minute amounts of material, usually requiring special, very sensitive, or small-scale apparatus (**mi'cro·ap'pa·ra'tus** [-ăp'ȧ·rā'tŭs; -răt'ŭs]); — opposed to *macroanalysis.* — **mi'cro·an'a·lyst** (-ăn'ȧ·lĭst), *n.* — **mi'cro·an'a·lyt'i·cal** (-ăn'ȧ·lĭt'ĭ·kăl), *adj.*

mi'cro—au'di·phone, *n.* An instrument for making very slight sounds perceptible.

mi·cro'bal (mĭ·krō'băl; mī'krō·băl), *adj.* Microbial.

mi'cro·bal'ance (mī'krō·băl'ȧns), *n.* [*micro-* + *balance.*] *Physics.* A balance designed to measure weights less than a milligram.

mi'cro·bar'o·graph (-băr'ō·grȧf; 83), *n.* A barograph for recording small and rapid changes.

mi'cro·bat'ter·y (-băt'ĕr·ĭ), *n.* A minute galvanic battery.

mi'crobe (mī'krōb), *n.* [F., fr. Gr. *mikros* small + *bios* life.] A very minute organism; a microorganism; a germ; — popularly applied to bacteria, esp. to the pathogenic forms. — **mi·cro'bi·al** (mĭ·krō'bĭ·ăl), *adj.* — **mi·cro'bi·an** (-ăn), *adj.* — **mi·cro'bic** (-krō'bĭk; -krŏb'ĭk), *adj.*

mi'crobe·proof' (66), *adj.* See -PROOF.

mi·cro'bi·cide (mĭ·krō'bĭ·sīd), *n.* [*microbe* + *-cide.*] Any agent which kills or destroys microbes. — **mi·cro'bi·cid'al** (-sīd'ăl), *adj.*

mi'cro·bi·o'sis (mī'krō·bī·ō'sĭs), *n.* [NL., fr. *microbion* + *-osis.*] *Med.* Infection by microbes.

mi'cro·bi·o'ta (-bī·ō'tȧ), *n.* [NL., fr. *micro-* + *biota.*] *Biol.* The microscopical flora and fauna of a region. — **mi'cro·bi·ot'ic** (-bī·ŏt'ĭk), *adj.*

mi·cro'bi·ous (mĭ·krō'bĭ·ŭs), *adj.* Microbial.

mi'cro·bism (mī'krō·bĭz'm), *n.* [See -ISM.] State of being infested with microbes; — called *latent microbism* when they are not growing.

mi'cro·burn'er (mī'krō·bûr'nĕr), *n. Chem.* A burner giving a very small flame, for use esp. in microanalysis.

mi'cro·car'pous (-kär'pŭs), *adj.* [*micro-* + *-carpous.*] Small-fruited.

Mi'cro·ce'bus (mī'krō·sē'bŭs), *n.* [NL., fr. *micro-* + Gr. *kēbos* a long-tailed monkey.] *Zool.* A genus of Madagascar lemurs of the subfamily Lemurinae consisting of the dwarf lemurs.

mi'cro·cen'tro·some (mī'krō·sĕn'trō·sōm), *n.* A centriole.

mi'cro·cen'trum (-sĕn'trŭm), *n.; pl.* -TRUMS (-trŭmz), -TRA (-trȧ). [NL., fr. *micro-* + L. *centrum* center.] **1.** *Anat.* **a** Centrosome. **b** Micronucleus.

2. *Biol.* A group of centrioles forming the center of the aster of dividing cells; the central apparatus.

mi'cro·ceph'al (mī'krō·sĕf'ăl), *n.; pl.* -CEPHALI (-sĕf'ȧ·lī). A microcephalic person.

mi'cro·ce·phal'ic (mī'krō·sē·făl'ĭk), *adj.* Also **mi'cro·ceph'a·lous** (-sĕf'ȧ·lŭs). [NL. *microcephalus,* fr. Gr. *mikrokephalos.* See MICRO-; CEPHALIC.] Having a small head; specif., having a cranial capacity less than 1350 cc., as the Veddahs, Bushmen, and aboriginal Tasmanians.

— **mi'cro·ce·pha'li·a** (mī'krō·sē·fā'lĭ·ȧ), *n.* — **mi'cro·ceph'a·lism** (-sĕf'ȧ·lĭz'm), *n.* — **mi'cro·ceph'a·ly** (-sĕf'ȧ·lĭ), *n.*

mi'cro·cepl'a·lus (mī'krō·sĕf'ȧ·lŭs), *n.* [NL., fr. *micro-* + *cephalus.*] *Med.* A person or monster with an abnormally small head.

mi'cro·cer'a·tous (-sĕr'ȧ·tŭs), *adj.* [*micro-* + Gr. *keras, keratos,* horn.] *Zool.* Having short antennae.

mi'cro·chae'ta (-kē'tȧ), *n.; pl.* -TAE (-tē). [NL., fr. *micro-* + *-chaeta.*] *Zool.* **a** Any of certain small bristles occurring on the body of insects, esp. Diptera. **b** [*cap.*] A genus of earthworms. *M. rappi* of South Africa reaches a length of five feet.

Mi'cro·chi·rop'ter·a (-kī·rŏp'tĕr·ȧ), *n. pl.* [NL., fr. *micro-* + *Chiroptera.*] *Zool.* A suborder of bats including all except the fruit bats (*Megachiroptera*). — **mi'cro·chi·rop'ter·an** (-ăn), *adj. & n.* — **mi'cro·chi·rop'ter·ous** (-ŭs), *adj.*

mi'cro·chro'mo·some (-krō'mō·sōm), *n. Biol.* **a** Either of a pair of very small chromosomes in certain Hemiptera having a delayed synapsis. **b** Any very small chromosome.

mi'cro·chro·nom'e·ter (-krō·nŏm'ē·tĕr), *n.* [An instrument for measuring minute intervals of time; a chronoscope.

mi'cro·cin'e·mat'o·graph (mī'krō·sĭn'ē·măt'ō·grȧf; 83), *n.* [*micro-* + *cinematograph.*] A motion photomicrography. — **mi'cro·cin'e·ma·tog'ra·phy** (-mȧ·tŏg'rȧ·fĭ), *n.* — **mi'cro·cin'e·mat'o·graph'ic** (-măt'ō·grăf'ĭk), *adj.*

Mi'cro·cit'rus (-sĭt'rŭs), *n.* [NL., fr. *micro-* + *Citrus.*] *Bot.* A small genus of Australian shrubs or trees of the rue family (Rutaceae). See FINGER LIME.

mi'cro·clas'tic (-klăs'tĭk), *adj.* Minutely clastic.

mi'cro·cline (mī'krō·klīn), *n.* [*micro-* + *-cline.*] *Mineral.* A mineral of the feldspar group, like orthoclase or common feldspar in composition, but triclinic in form, though approaching orthoclase in crystal habit and angles. It is white to pale yellow, red, or green.

microcline green. A color, green in hue, of low saturation and very high brilliance. Cf. COLOR.

mi'cro·coat (mī'krō·kōt), *n.* A small coat; — with a play on *microcosm.*

Mi'cro·coc'cus (-kŏk'ŭs), *n.* [NL., fr. *micro-* + *-coccus.*] *Bacteriol.* **a** A genus of mostly more or less psychrophilic bacteria of the family Coccaceae, consisting of saprophytes or facultative parasites occurring in plates or irregular groups, not in packets or chains. Many form yellow or orange pigment. The genus formerly included various allied forms now placed in the genera *Staphylococcus* (including *S. aureus,* syn. *M. pyogenes*), *Diplococcus, Neisseria, Gaffkya, Streptococcus,* and *Rhodococcus.* The genus typifies a tribe, **Mi'cro·coc'ce·ae** (-kŏk'sē·ē), of mostly Gram-positive species. **b** [*not cap.; pl.* -COCCI (-sī).] Any bacterium of this genus; also, broadly, any small coccus. — **mi'cro·coc'cal** (mī'krō·kŏk'ăl), *adj.*

mi'cro·co'le·op'ter·a (mī'krō·kō'lē·ŏp'tĕr·ȧ; -kŏl'ē-), *n. pl.* [NL.] *Zool.* The smaller beetles, collectively.

mi'cro·col'or·im'e·ter (-kŭl'ĕr·ĭm'ē·tĕr; -kŏl'ō·rĭm'-), *n.* A colorimeter designed for use when only small amounts of material are available.

mi'cro·col'or·im'e·try (-kŭl'ĕr·ĭm'ē·trĭ; -kŏl'ō·rĭm'-), *n.* Colorimetry involving very small amounts of materials. Cf. MICROANALYSIS. — **mi'cro·col'or·im'e·ter** (-tĕr), *n.* — **mi'cro·col'or·i·met'ric** (-kŭl'ĕr·ĭ·mĕt'rĭk; -kŏl'ō·rĭ-), *adj.* — **mi'cro·col'or·i·met'ri·cal·ly** (-rĭ·kăl·ĭ), *adv.*

mi'cro·co·nid'i·um (-kō·nĭd'ĭ·ŭm), *n.; pl.* -CONIDIA (-ȧ). *Bot.* A small conidium as contrasted with a larger conidium, a *macroconidium,* both being produced by the same species. — **mi'cro·co·nid'i·al** (-ăl), *adj.*

mi'cro·con'ju·gant (-kŏn'jōō·gănt), *n.* [*micro-* + *conjugant.*] *Biol.* In anisogamous syngamy, the smaller conjugant or gamete.

Mi'cro·con'o·don (-kŏn'ō·dŏn), *n.* [NL. See MICRO-; -ODON.] *Paleontol.* A genus of small American Triassic reptiles long supposed to be one of the most ancient mammals.

mi'cro·cosm·stit'u·ent (-kŏn·stĭt'ū·ĕnt), *n.* A microscopic constituent.

mi'cro·cosm (mī'krō·kŏz'm; 277), *n.* [F. *microcosme,* fr. LL. *microcosmus,* fr. Gr. *mikros kosmos,* lit., little world. The Gr. phrase = man.] **1.** A little world; a miniature universe. Hence: **a** Man, or human nature as a supposed epitome of the exterior universe or great world; — opposed to *macrocosm.* **b** *Humorous.* The body. **c** A community, institution, town, district, country, etc., regarded as an epitome of the world or as being a little world. **d** In the 18th century, a traveling mechanical show. **e** A representation in miniature or on a small scale.

2. *Alchemy.* The philosophers' stone. *Obs.*

— **mi'cro·cos'mal** (-kŏz'măl), *adj.* — **mi'cro·cos'mi·an** (-mĭ'-ăn), *adj.* — **-cos'mic** (-mĭk), *adj.* — **-cos'mi·cal** (-mĭ·kăl), *adj.*

microcosmic salt. *Chem.* A white crystalline salt, $NaNH_4HPO_4.4H_2O$, best obtained by mixing solutions of sodium phosphate and ammonium phosphate or chloride; hydrogen sodium ammonium phosphate. It is changed to glassy sodium metaphosphate on heating, and hence is used in place of borax as a blowpipe reagent in testing for metallic oxides. It was originally obtained from human urine, and called *sal microcosmicum.*

mi'cro·cos·mog'ra·phy (mī'krō·kŏz·mŏg'rȧ·fĭ), *n.* [*microcosm* + *-graphy.*] Description of man as a microcosm.

mi'cro·cos·mol'o·gy (-kŏz·mŏl'ō·jĭ), *n.* A treatise on the microcosm, or human body. *Rare.*

mi'cro·cra'nous (-krā'nŭs), *adj.* [See CRANIUM.] Having a skull of small volume or capacity.

mi'cro·crith (mī'krō·krĭth), *n. Chem.* Weight of the half hydrogen molecule, or of the hydrogen atom. Cf. CRITH.

mi'cro·cryp'to·crys'tal·line (-krĭp'tō·krĭs'tăl·ĭn; -īn), *adj. Petrog.* Dubiocrystalline.

mi'cro·crys'tal·line (-krĭs'tăl·ĭn; -īn), *adj. Petrog.* Having its constituent crystalline grains visible by microscope.

mi'cro·cyst (mī'krō·sĭst), *n.* **1.** *Bot.* In slime molds, a resting cell formed from a swarm spore.

2. *Med.* A very small cyst, esp. one arising from another cyst.

mi'cro·cyte (mī'krō·sīt), *n.* [*micro-* + *-cyte.*] *Anat.* One of the small disks resembling in color the red corpuscles, but of one third or one half the size, which occur in blood (in especially large numbers in certain forms of anaemia). — **mi'cro·cy·to'sis** (-sī·tō'sĭs), *n.*

Mi'chah (mī'kȧ). *Bib.* Var. of MICAH.

Mi·cha'ia (mĭ·kā'yȧ; mĭ·kī'ȧ). [*Bib.*]

miche. † MUCH.

Mi·che'a (mĭ·kē'ȧ). *D. Bib.*

Mi·che'as (-ăs). *Bib.*

Mi'chel' (mē'shĕl'), *n.* See MICHAEL.

Mi'chel·an'ge·lism (mī'kĕl·ăn'jē·lĭz'm), *n.* See -ISM.

mich'i·gan (mĭ'sh'ĭ·găn), *n.* [*Cards.* = NEWMARKET, 2.

Mich'mas (mĭk'măs), *or* **Mich'mash** (-măsh). *Bib.* [*Bib.*]

Mich'me·thah (mĭk'mē·thȧ). [*Bib.*]

Mi·cho'a·can' (mē·chō'ȧ·kăn'), *adj.* = TARASCAN **a.**

Mi·cho'a·ca'no (-kȧ'nō), *n.* = TARASCO.

Mich'ri (mĭk'rĭ). *Bib.* [*Scot.*]

micht (mĭkt). Var. of MIGHT.

Mich'tam (mĭk'tăm). *Bib.* [Heb. *mikhtām,* corrupt. fr. a word meaning supplication.] A term, of uncertain meaning, in the heading of several psalms.

mick'le·dom, *n.* Mickleness. *Obs.*

Mi·clan'te·cu'tli. Var. of MICTLANTECUTLI.

mi'craes·thete. Var. of MICRESTHETE.

Mi·cram'pe·lis (mĭ·krăm'pĕ·lĭs), *n.* [NL., fr. *micr-* + Gr. *ampelis,* dim. of *ampelos* vine.] Syn. of ECHINOCYSTIS.

mi'cra·nat'o·my (mī'krȧ·năt'ō·mĭ), *n.* See MICRO-, 2 **a.**

mi'cren·ce·pha'li·a (mī'krĕn·sē·fā'lĭ·ȧ), *n.* Also **mi'cren·ceph'a·ly** (-sĕf'ȧ·lĭ), *n.* [NL.] *Med.* See MICRO-, 5. — **mi'cren·ce·phal'ic** (-sē·făl'ĭk), *adj.* — **mi'cren·ceph'a·lous** (-sĕf'ȧ·lŭs), *adj.* — **mi'cren·ceph'a·lus** (-lŭs), *n.*

mi·cret'gate (mī·krŭt'gāt), *n. Zool.* See MICRO-, 3 **b.**

mi'crobe·less, *adj.* See -LESS.

mi·cro'bi·on (mī·krō'bĭ·ŏn), *n.; pl.* -BIA (-ȧ). = MICROBE.

mi·cro'bi·um (mī·krō'bĭ·ŭm), *n.* = MICROBE.

mi'cro·blast (mī'krō·blăst), *n.* See ERYTHROBLAST.

mi'cro·bu·rette', *or* **-bu·ret'** (-bū·rĕt'), *n. Anal. Chem.* See MICRO-, 4.

mi'cro·cal'trop (-kăl'trŏp), *n. Zool.* See MICRO-, 3 **b.** [CRO-, 1.]

mi'cro·cel'lu·lar, *adj.* See MI-

mi'cro·char'ac·ter, *n. Biol.* See MICRO-, 2 **b.**

mi'cro·cin'e·ma, *n.* = MICROCINEMATOGRAPH.

mi'cro·co·lum'nar, *adj.* [See MICRO-, 1.

mi'cro·com·bus'tion, *n. Chem.* [See MICRO-, 4.]

mi'cro·cos'mos (mī'krō·kŏz'mōs), -mus (-mŭs), *n.* [See MICROCOSM.] = MICROCOSM.

mi'cro·cous'tic. Erron. var. of MICRACOUSTIC.

Mi'cro·cy·pri'ni (-sĭ·prĭ'nĭ), *n. pl.* [NL.] Syn. of CYPRINODONTES.

mi′cro·de·tec′tion (mī′krō·dē·tĕk′shŭn), *n.* *Chem.* The detection of minute amounts of a substance.

mi′cro·de·tec′tor (-tĕr), *n.* An instrument or device for detecting small amounts or minute changes, as in electric current.

mi′cro·de·ter′mi·na′tion (-dē·tûr′mĭ·nā′shŭn), *n.* *Chem.* Determination by microanalysis or by the microscope.

mi′cro·dis·sec′tion (-dĭ·sĕk′shŭn), *n.* Dissection under the microscope; specif., *Biol.*, such dissection of cells or tissues as done by means of fine needles operated manually through a precise system of levers.

mi′cro·dont (mī′krō·dŏnt), *adj.* [*micr-* + *-odont.*] Having small teeth. See DENTAL INDEX. — **mi′cro·dont·ism** (-Iz′m), *n.* — **mi′cro·don′tous** (-dŏn′tŭs), *adj.*

mi′cro·draw′ing (-drô′ĭng), *n.* A drawing made to exhibit microscopic structures or other very small details.

Mi′cro·dri′li (-drĭ′lī), *n. pl.* [NL., fr. *micro-* + Gr. *drilos* (see MEGADRILI).] *Zool.* A division of oligochaete worms including the smaller, usually aquatic, species.

mi′cro·drive′ (mī′krō·drīv′), *n.* *Mach.* A microleveling drive.

mi′cro·e·lec′trode (-ē·lĕk′trōd), *n.* *Physical Chem.* An electrode used in microelectrolysis.

mi′cro·e·lec′trol′y·sis (-ē·lĕk′trŏl′ĭ·sĭs; -ēl′ĕk-), *n.* *Physical Chem.* Electrolysis on a very small scale, using small quantities of material.

mi′cro·e·lec′tro·scope (-ē·lĕk′trō·skōp), *n.* An electroscope for detecting small quantities of electricity.

mi′cro·ex·am′i·na′tion (-ĕg·zăm′ĭ·nā′shŭn; -ĭg-), *n.* Examination by means of the microscope.

mi′cro·fel′site (-fĕl′sīt), *n.* *Petrog.* An anisotropic mass of fibrous or granular texture, the groundmass of certain igneous rocks. — **mi′cro·fel·sit′ic** (-fĕl·sĭt′ĭk), *adj.*

mi′cro·fi·la′ri·a (-fĭ·lā′rĭ·ä; 79), *n.* [NL., fr. *micro-* + *filaria.*] The larval form of filaria worms in the blood.

mi′cro·flu′id·al (-flōō′ĭ·dăl; -dĭ′l), *adj.* *Petrog.* Showing a flow structure under the microscope.

mi′cro–form′ (mī′krō·fôrm′), *n.* **a** *Biol.* A microorganism. **b** *Bot.* Any rust having a telial stage and sometimes a pycnial stage.

Mi′cro·ga′dus (-gā′dŭs), *n.* [NL., fr. *micro-* + *Gadus.*] *Zool.* A genus of gadoid fishes consisting of the tomcods.

mi′cro·gal′va·nom′e·ter (-găl′vä·nŏm′ē·tĕr), *n.* A form of reflecting galvanometer to measure very weak currents.

mi′cro·ga·mete′ (-gä·mēt′), *n.* [*micro-* + *gamete.*] *Biol.* The smaller (commonly the male) gamete of a heterogamous organism. Cf. *macrogamete, megagamete.*

mi′cro·ga·me′to·cyte (-gä·mē′tō·sīt), *n.* *Biol.* A gametocyte producing microgametes.

mi·crog′a·my (mī·krŏg′ä·mĭ), *n.* [*micro-* + *-gamy.*] *Biol.* Syngamy between gametes much smaller than the vegetative cells. It occurs in the Protozoa and certain algae.

Mi′cro·gas′ter (mī′krō·găs′tĕr), *n.* [NL., fr. *micro-* + *-gaster.*] *Zool.* A genus of small ichneumon flies (family Braconidae) whose larvae are parasitic on various caterpillars. It is the type genus of a subfamily, **Mi′cro·gas·tri′nae** (-găs·trĭ′nē). — **mi′cro·gas′trine** (-găs′trĭn; -trīn), *adj.*

mi·crog′li·a (mī·krŏg′lĭ·ä), *n.* [NL., fr. *micro-* + *-glia.*] *Anat.* Material consisting of small adventitious cells scattered within the central nervous system, esp. the brain.

mi′cro·gram (mī′krō·grăm), *n.* [*micro-* + *gram.*] *Physics.* One millionth of a gram. Abbr. *μ g.* See WEIGHT, *Table.*

mi′cro·gran′ite (-grăn′ĭt), *n.* *Petrog.* An igneous rock composed, like granite, of crystals of quartz and alkalic feldspar, but on a very minute scale, as the groundmass of certain porphyries. — **mi′cro·gra·nit′ic** (-grä·nĭt′ĭk), *adj.* — **mi′cro·gran′it·oid** (-grăn′ĭ·toid), *adj.*

mi′cro·gran′u·lar (-grăn′ū·lĕr), *adj.* Minutely granular.

mi′cro·gran′u·lit′ic (-grăn′ū·lĭt′ĭk), *adj.* Minutely granulitic.

mi′cro·graph (mī′krō·grăf; 83), *n.* [See MICROGRAPHY.] **1.** Instrument for executing minute writing or engraving. **2.** A graphic reproduction of an object as seen through the microscope. When a photograph, it is a photomicrograph. **3.** *Physics.* An instrument for measuring minute movements by the magnified record of movements of a diaphragm.

mi·crog′ra·pher (mī·krŏg′rä·fĕr), *n.* Also **mi·crog′ra·phist** (-fĭst). A specialist in micrography.

mi′cro·graph′ic (mī′krō·grăf′ĭk), *adj.* **1. Of or pertaining** to micrography; minutely written. **2.** Related to, or disclosed by, microscopic examination, and exhibited, or exhibitable, in drawings or photographs. **3.** *Petrog.* Graphic on a scale so small as to be visible only under the microscope; micropegmatitic. See GRAPHIC, 6. — **mi′cro·graph′i·cal** (-ĭ·kăl), *adj.* — **-i·cal·ly,** *adv.*

mi·crog′ra·phy (mī·krŏg′rä·fĭ), *n.* [*micro-* + *-graphy.*] **1.** Description of microscopic objects. **2.** Art or practice of very minute handwriting. **3.** Examination or study with the microscope.

mi′cro·grav′er (mī′krō·grāv′ĕr), *n.* *Archaeol.* A microlith.

mi·crohm′me′ter (mī·krōm′mē′tĕr), *n.* [*microhm* + *-meter.*] *Elec.* A sensitive kind of ohmmeter for measuring very small resistances.

Mi′cro·hy′me·nop′ter·a (mī′krō·hī′mĕn·ŏp′tĕr·ä), *n. pl.* [NL.] *Zool.* Small or minute Hymenoptera, collectively. — **mi′cro·hy′me·nop′ter·on** (-ŏn), *n.*

mi′cro·in·jec′tion (-ĭn·jĕk′shŭn), *n.* Injection under the microscope; specif., *Biol.*, such injection into cells, or tissues as done by means of a fine, mechanically controlled, capillary tube.

mi′cro·lep′i·dop′ter·a (-lĕp′ĭ·dŏp′tĕr·ä), *n. pl.* [NL. See MICRO-; LEPIDOPTERA.] *Zool.* The smaller moths, collectively, including members of several families, as the Tineidae, Tortricidae, Pyralididae, and Pterophoridae. — **mi′cro·lep′i·dop′ter** (-dŏp′tĕr), *n.* — **mi′cro·lep′i·dop′ter·an** (-ăn), *adj. & n.* — **mi′cro·lep′i·dop′ter·on** (-ŏn), *n.* — **mi′cro·lep′i·dop′ter·ous** (-ŭs), *adj.*

mi′cro·lep′i·dop′ter·ist (-Ĭst), *n.* A student of the microlepidoptera.

mi′cro·leu′ko·blast (-lū′kō·blăst), *n.* [*micro-* + *leuko-* + *-blast.*] A myeloblast.

mi′cro·lev′el (mī′krō·lĕv′ĕl), *v. t.* [*micro-* + *level.*] To bring (an elevator, etc.) close to an exact level by automatic means.

mi′cro·lite (mī′krō·līt), *n.* [*micro-* + *-lite.*] **1.** *Petrog.* A minute crystal, visible only under the microscope, usually affecting polarized light; a microcrystal. **2.** *Mineral.* A mineral occurring usually in very small isometric crystals of yellow or brown color and resinous luster. It is essentially calcium pyrotantalate, $Ca_2Ta_2O_7$. — **mi′cro·lit′ic** (-lĭt′ĭk), *adj.*

mi′cro·lith (mī′krō·lĭth), *n.* [*micro-* + *-lith.*] **1.** A microlite. **2.** *Archaeol.* A tiny stone implement found in paleolithic culture levels, through the Aurignacian to the Tardenoisian. — **mi′cro·lith′ic** (-lĭth′ĭk), *adj.*

mi·crol′o·gy (mī·krŏl′ō·jĭ), *n.* [Gr. *mikrologia.* See MICRO-; -LOGY.] Attention to petty items or differences.

mi·crol′o·gy (mī·krŏl′ō·jĭ), *n.* [*micro-* + *-logy.*] The science which deals with the technique of handling microscopic objects, esp. in biology. — **mi′cro·log′ic** (mī′krō·lŏj′ĭk), *adj.* — **mi′cro·log′i·cal** (-kăl), *adj.* — **mi′cro·log′i·cal·ly,** *adv.* — **mi·crol′o·gist** (mī·krŏl′ō·jĭst), *n.* — **mi′cro·logue** (mī′krō·lŏg; 185), *n.*

mi′cro·ma′ni·a (mī′krō·mā′nĭ·ä; 159), *n.* [NL.] *Psychiatry.* **a** The delusion that one's body has become small, or that parts of it are gone. **b** Insanity characterized by self-depreciation. — **mi′cro·ma′ni·ac** (-ăk), *n.*

mi′cro·ma·nip′u·la′tion (-mä·nĭp′ū·lā′shŭn), *n.* [*micro-* + *manipulation.*] *Biol.* Microdissection and microinjection, collectively, as an art or technique; micrurgy. — **mi′cro·ma·nip′u·la′tor** (-mä·nĭp′ū·lā′tĕr), *n.*

mi′cro·ma·nom′e·ter (-mä·nŏm′ē·tĕr), *n.* A manometer specially designed to measure minute differences of pressure.

Mi′cro·mas·tic′to·ra (mī′krō·măs·tĭk′tō·rä), *n. pl.* [NL., fr. *micro-* + Gr. *mastiktōr* scourger, fr. *mastix* whip, scourge.] *Zool.* A division of sponges consisting of forms having comparatively small choanocytes; — practically equiv. to *Noncalcarea.*

mi′cro·me′li·a (-mē′lĭ·ä; 159), *n.* [NL., fr. *micro-* + *-melia.*] *Terat.* A condition characterized by abnormally small and imperfectly developed extremities. — **mi′cro·mel′ic** (-mĕl′ĭk), *adj.* — **mi·crom′e·lus** (mī·krŏm′ē·lŭs), *n.*

mi′cro·mem′brane (-mĕm′brān), *n.* *Physical Chem.* A very thin semipermeable membrane.

mi′cro·mere (mī′krō·mēr), *n.* [*micro-* + *-mere.*] *Embryol.* One of the smaller cells or blastomeres due to the unequal segmentation of an egg. See BLASTULA, *Illust* — **mi′cro·me′ral** (-mēr′ăl), *adj.* — **-mer′ic** (-mĕr′ĭk), *adj*

Mi′cro·me′ri·a (-mē′rĭ·ä), *n.* [NL. See MICRO-; -MERE.] *Bot.* A large genus of fragrant chiefly Old World herbs of the mint family (Lamiaceae). *M. chamissonis* is the yerba buena.

mi·crom′er·ism (mī·krŏm′ĕr·Iz′m), *n.* [*micro-* + *-merism.*] *Biol.* The hypothesis that protoplasm consists of extremely small units each possessing the peculiar attributes of living substance.

mi′cro·me·rit′ic (-mē·rĭt′ĭk), *adj.* [*micro-* + *macromeritic.*] Granitic, with grains so small as to be invisible without the microscope; — opposed to *macromeritic.*

mi′cro·mes′en·ter′y (mī′krō·mĕs′ĕn·tĕr′ĭ *or, esp. Brit.*, -tĕr·ĭ), *n.* *Zool.* In the Anthozoa, an incomplete secondary mesentery; a metacneme.

mi·crom′e·ter (mī·krŏm′ē·tĕr), *n.* [F. *micromètre.* See MICRO-; -METER.] **a** An instrument, used with a telescope or microscope, for measuring minute distances, or the apparent diameters of objects which subtend minute angles. The measurement given directly is that of the image of the object formed at the focus of the object glass. A ***ring, circular,*** or ***annular, micrometer*** is a thin, flat ring in the focal plane of the telescope, used esp. to determine differences of right ascension and declination. A ***crossbar micrometer*** consists of two flat bars in the focal plane of the telescope, crossing at 90° and inclined 45° to the east-west line. **b** Short for MICROMETER CALIPER, etc. Cf EYEPIECE MICROMETER.

mi′cro·me′ter (mī′krō·mē′tĕr), *n.* = MICRON, **1.** See MICRO-, **1 b.**

mi·crom′e·ter cal′i·per. *Mach.* A caliper with micrometer screw attached, used for very exact measurement. It is often made to measure to 0.0001 inch.

Micrometer Caliper. *a a a* Frame; *b* Anvil; *c* Movable Spindle; *d* Sleeve; *e* Thimble. A complete rotation of *e* moves *c* .025 inch. The beveled edge of *e* is divided into 25 parts, so that to turn *e* by the length of one of these parts moves *c* .001 inch. By means of a vernier scale (not shown) on *d* .0001 inch can be measured.

micrometer screw. A screw with a graduated head (**micrometer head**) and fine threads used in micrometers, etc.

mi′cro·meth′od (mī′krō·mĕth′ŭd), *n.* *Chem.* A method involving very small amounts of material or the use of the microscope.

mi′cro·met′ri·cal (-mĕt′rĭ·kăl), *adj.* Also **mi′cro·met′ric** (-rĭk). [Cf. F. *micrométrique.*] Pertaining to, or made by, the micrometer. — **mi′cro·met′ri·cal·ly,** *adv.*

mi·crom′e·try (mī·krŏm′ē·trĭ), *n.* Art of measuring with a micrometer.

mi′cro·mi′cro- (mī′krō·mī′krō-). [*micro-* + *micro-.*] A prefix denoting one millionth of a millionth part of; as in **mi′cro·mi′cro·far′ad,** a 10^{-12} farad.

mi′cro·mi′cron (-mī′krŏn), *n.* [*micro-* + *micron.*] One millionth of a micron, or 10^{-12} meter (0.000000000039 in., or 0.000000001 mm.). Its symbol is *μμ.*

mi′cro·mil′li·me′ter, -me′tre (mī′krō·mĭl′ĭ·mē′tĕr), *n.* [*micro-* + *millimeter.*] The millionth part of a millimeter, or a millimicron; also, as in *Biol.*, a micron. Called also **mi′cro·mil** (mī′krō·mĭl). Symbol, *mμ.*

mi′cro·mo′tion (mī′krō·mō′shŭn; 66), *adj.* Designating, or pertaining to, the study of small or microscopic motions, esp. by the use of motion-picture photography.

mi′cro·mo′tion (mī′krō·mō′shŭn), *n.* One of a number of extremely short motions or cycles of motions that follow each other in such quick succession that they are confusing to the eye of an observer.

mi′cro·mo′to·scope (-mō′tō·skōp), *n.* A camera for photographing successive phases in the motions of microscopic objects.

mi′cro–mov′ie (mī′krō·mōōv′ĭ), *n.* A motion picture of microscopic objects and beings.

mi′cron (mī′krŏn), *n.; pl.* MICRONS (-krŏnz), MICRA (-krä). [NL., fr. Gr. *mikros* small.] **1.** A unit of length, the thousandth part of one millimeter, or the millionth of a meter (0.000039 in.). Symbol, *μ.* **2.** *Physical Chem.* A particle of diameter between 0.01 and 0.0001 millimeter.

-mi′cron. A combining form of *micron,* used in names of units of measurement, as in micro*micron,* milli*micron.*

mi′cro–nee′dle, *n.* *Biol.* A needle for micromanipulation.

Mi′cro·ne′sian (mī′krō·nē′shăn; -zhăn), *adj.* [From NL. *Micronesia,* fr. Gr. *mikros* small + *nēsos* an island.] Of or pertaining to Micronesia or the Micronesians; also, designating, or belonging to, the division of Melanesian languages spoken in Micronesia. See AUSTRONESIAN LANGUAGES, *Table.*

Mi′cro·ne′sian, *n.* A native of Micronesia, which is inhabited by a variety of peoples mostly of mixed Melanesian, Polynesian, and Malaysian stocks. Usually the Micronesians are shorter, darker, and more hairy than the Polynesians.

mi′cro·nom′e·ter (-nŏm′ē·tĕr), *n.* [*micro-* + *chronometer.*] An instrument by means of which minute portions of time can be measured.

mi′cro·nu′cle·us (-nū′klē·ŭs), *n.; pl.* -CLEI (-ī). [NL.] *Zool* In many ciliate infusorians, a small nucleus situated near to, but distinct from, the chief nucleus (*macronucleus*) — **mi′cro·nu′cle·ar** (-ĕr), *adj.*

mi′cro·or′gan·ism (mī′krō·ôr′găn·Iz′m), *n.* *Biol.* Any organism of microscopic (also, in a broad sense, ultramicroscopic) size; — applied esp. to bacteria and protozoa. — **mi′cro·or·gan′ic** (-ôr·găn′ĭk), *adj.* — **mi′cro·or′gan·is′mal** (-ôr′găn·Iz′măl), *adj.*

mi′cro·pan′to·graph (-păn′tō·grăf; 83), *n.* A pantograph which produces microscopic copies.

mi′cro·par′a·site (-păr′ä·sīt), *n.* A parasitic microorganism. — **mi′cro·par′a·sit′ic** (-sĭt′ĭk), *adj.*

mi′cro·peg′ma·tite (-pĕg′mä·tīt), *n.* [*micro-* + *pegmatite.*] *Petrog.* Microcrystalline graphic granite. — **mi′cro·peg′ma·tit′ic** (-tĭt′ĭk), *adj.*

mi′cro·perth′ite (-pûrth′īt), *n.* See PERTHITE. — **mi′cro·per·thit′ic** (-pĕr·thĭt′ĭk), *adj.*

mi′cro·pet′al·ous (-pĕt′ăl·ŭs), *adj.* Having very small petals. *Rare.*

mi′cro·phag′o·cyte (-făg′ō·sīt), *n.* Also **mi′cro·phage** (mī′krō·fāj). *Anat.* A small phagocyte.

mi·croph′a·gous (mī·krŏf′ä·gŭs), *adj.* [*micro-* + *-phagous.*] *Biol.* Feeding on small objects. — **mi·croph′a·gy** (-jĭ), *n.*

mi′cro·phone (mī′krō·fōn), *n.* [*micro-* + *-phone.*] *Physics.* An instrument for intensifying feeble sounds or for transmitting sounds, based on the principle that the transition resistance between loosely joined electric conductors decreases in proportion as they are pressed together. The conductors form part of a circuit through which a current is passing, and the variations in pressure due to sound waves in the vicinity of the conductors produce variations of resistance, and hence fluctuations of the current, by which the sounds are reproduced, as in a telephone receiver. The transmitter of the modern telephone is essentially a microphone, the pressure of the sound waves being communicated to the conductors by means of a diaphragm. The transmitter of Alexander Graham Bell (1876) was the first instrument serving as a microphone, but that of D. E. Hughes (1878) was the first to be given the name. In the Hughes microphone the action consists of a relayed amplification depending upon two loose bodies in contact. Modern telephone transmitters are largely developments of this type. The more sensitive forms, as radiomicrophones, are devices for converting sound into electrical impulses or varying current.

Three types of Microphone. *A* Carbon type 1 Diaphragm; 2 Granular Carbon; 3 Damping Plate Groove; 4 Initial, and 5 Final, Diaphragm Stretching Rings. *B* Condenser type: 1 Diaphragm; 2 Compensating Diaphragm; 3 Tube leading to chamber which is exhausted of air and then filled with nitrogen gas to reduce air resistance to a minimum; 4 Damping Plate Groove; 5 Acoustic Valve. *C* Moving Coil, or Dynamic, type: 1 Diaphragm and Voice Coil Assembly; 2 Magnet; 3 Connection Jack; 4 Air Tube (to equalize air pressure between the chamber in front and that to the rear of the diaphragm); 5,5 Pole Pieces; 6,6 Air Chambers; 7 Voice Coil; 8 Connections of Voice Coil to Jack.

mi′cro·phone, *v. t.* To transmit by microphone.

mi′cro·phon′ic (-fŏn′ĭk), *adj.* Of or pertaining to a microphone; serving to intensify weak sounds; micracoustic.

mi′cro·phon′ics (-ĭks), *n.* [See MICROPHONE.] The science which treats of the microphone or of the means of increasing the intensity of low or weak sounds. See -ICS.

mi′cro·pho′no·graph (-fō′nō·grăf), *n.* A special phonograph for the recording and reproduction of faint sounds.

mi′cro·pho′to·graph (-fō′tō·grăf; 83), *n.* [*micro-* + *photograph.*] **a** A microscopically small photograph. **b** Loosely, a photomicrograph. — **mi′cro·pho′to·graph′ic** (-grăf′ĭk), *adj.* — **mi′cro·pho·tog′ra·phy** (-fō·tŏg′rä·fĭ), *n.*

mi′cro·pho′to·graph, *v. t.* To take a picture by microphotography.

mi′cro·pho′to·scope (-fō′tō·skōp), *n.* [*microphotograph* + *-scope.*] A portable optical instrument for examining microphotographs, esp. minute maps.

mi′cro·phyl′lous (mī′krō·fĭl′ŭs), *adj.* *Bot.* Small-leaved.

mi′cro·phyte (mī′krō·fīt), *n.* [*micro-* + *-phyte.*] *Bot.* A minute plant, esp. one of the bacteria. — **mi′cro·phy′tal** (-fī′tăl; -t′l), **mi′cro·phyt′ic** (-fĭt′ĭk), *adj.* — **mi′cro·phy·tol′o·gy** (-fī·tŏl′ō·jĭ), *n.*

mi′cro·di·ao′tine, *n.* See MICRO-, 3. [See MICRO-, 4.]

mi′cro·dis′til·la′tion, *n.* *Chem.* See MICRO-, 4.

mi′cro·es′ti·ma′tion, *n.* *Chem.* See MICRO-, 4.

mi′cro·eu′tax·it′ic, *adj.* *Petrog.* See MICRO-, 6.

mi′cro·fau′na, *n.* See MICRO-, 3.

mi′cro·flo′ra, *n.* *Bacteriol. & Bot.* See MICRO-, 3.

mi′cro·fo′li·a′tion, *n.* *Petrog.* See MICRO-, 6 b. [*Ref. Sp.*]

mi′cro·fone. Microphone.

mi′cro·foe′sil, *n.* See MICRO-, 2 b.

mi′cro·fun′gus, *n.* *Bot.* See MICRO-, 3 b.

mi′cro·fur′nace, *n.* *Chem.* See MICRO-, 4.

mi′cro·go·nid′i·um, *n.* [NL.] *Bot.* See MICRO-, 3 b. — **mi′cro·go·nid′i·al,** *adj.*

mi′cro·grav′i·met′ric, *adj.* See MICRO-, 4.

mi′cro·gyne (mī′krō·jīn), *n.* *Zool.* See MICRO-, 3. [See MICRO-, 1 b.]

mi′crohm (mī′krōm; mĭ·krōm′). **mi′cro·kin′e·ma·tog′ra·phy.** Var. of MICROCINEMATOGRAPHY.

mi′cro·meas′ure·ment, *n.* See MICRO-, 4.

mi′cro·morph (mī′krō·môrf), *n.* *Zool.* See MICRO-, 3 b.

mi′cro·my′e·lo·blast′, *n.* = MYELOBLAST. [See MICRO-, 1 a.]

mi′cro·pho·tom′e·ter, *n.* *Ophth.* [NL.] *Med.* = MICROPSIA.

mi′croph·thal′mi·a (mī′krŏf·thăl′mĭ·ä), *n.* [NL.] *Med.* See MICRO-, 5. — **mi′croph·thal′mic** (-mĭk), *adj.* — **mi′croph·thal′mos** (-mŏs), **-mus** (-mŭs), *n.*

mi·cro′pi·a (mī·krō′pĭ·ä), *n.* [NL.] *Med.* = MICROPSIA.

mī′cro-pin′ (mī′krō-pĭn′), *n.* [*micro-* + *pin.*] A minute pin for mounting very small insects.

mī′cro-pi-pette′, *or* **-pi-pet′** (-pī-pĕt′), *n.* **1.** A pipette for the measurement of very small volumes.
2. *Biol.* A small and extremely fine-pointed pipette used in making micro injections.

mī′cro-plak′ite (mī′krō-plăk′īt), *n.* [*micro-* + Gr. *plax, plakos,* a tablet, flat plate + *-ite.*] *Petrog.* The brownish tabular inclusions sometimes found in basic feldspar, pyroxene, etc.

mī′cro-plank′ton (-plăngk′tŏn), *n.* *Biol.* Microscopic plankton. Cf. MACROPLANKTON.

mī′cro-plas·tom′e·ter (-plăs·tŏm′ē-tĕr), *n.* A plastometer in which observations are made with a microscope.

mī·crop′o·dal (mī-krŏp′ō-dăl; -dĭ), *adj.* Also **mī·crop′o·dous** (-dŭs). *Anat. & Zool.* Having feet abnormally small.

Mī′cro-pod′i·for′mes (mī′krō-pŏd′ĭ-fôr′mēz), *n. pl.* [NL., fr. *micro-* + Gr. *pous, podos,* foot + *-form.*] *Zool.* An order of birds having long narrow wings and weak feet. It comprises the swifts (suborder **Mi·crop′o·di** [mī-krŏp′-ō-dī]) and the hummingbirds.

mī′cro-po·lar′i·scope (mī′krō-pō-lăr′ĭ-skōp), *n.* *Optics.* A polarizing microscope; that is, a microscope with polarizer and analyzer attached, as for use in crystallography.

mī′cro-pore (mī′krō-pōr; 181), *n.* *Zool.* One of the small pores in the shell of some chitons, containing a minute sense organ (*micresthete*). Cf. MEGALOPORE.

mī′cro-por′phy-rit′ic (-pôr′fĭ-rĭt′ĭk), *adj.* *Petrog.* Porphyritic on a minute scale, visible only under the microscope.

mī′cro-pro·jec′tor (-prō-jĕk′tĕr), *n.* An optical device consisting usually of an illuminator and a microscope lens system, used to project on a screen an enlarged image of a microscopic subject.

mī·crop′si·a (mī-krŏp′sĭ-ȧ), *n.* Also **mī′crop·sy** (mī′krŏp-sĭ). [NL. See MICRO-; -OPSIA.] *Med.* Abnormity of vision, in which objects appear smaller than they really are; — opposed to *macropsia.*

mī·crop′ter·ous (mī-krŏp′tĕr-ŭs), *adj.* [Gr. *mikropteros,* fr. *mikros* small + *pteron* wing.] *Zool.* Having small or rudimentary, hence useless, wings or fins. — **mī·crop′ter·ism** (-ĭz′m), *n.*

Mī·crop′ter·us (-ŭs), *n.* [NL.] *Zool.* A genus of fishes (family Centrarchidae) to which the smallmouthed black bass and the Kentucky black bass belong.

Mī·crop′ter·yg′i·dae (mī-krŏp′tĕr-ĭj′ĭ-dē), *n. pl.* [NL., fr. *Micropteryx,* type genus (fr. *micro-* + *-pteryx*) + *-idae.*] *Zool.* A family of very primitive moths (division Jugatae) having functional mandibles. The type genus is **Mi·crop′ter·yx** (mī-krŏp′tĕr-ĭks). It is the type of a superfamily, **Mi′crop·ter′y·goi′de·a** (mī′krŏp-tĕr′ĭ-goi′dē-ȧ). — **mī′crop·ter′y·gid** (mī′krŏp-tĕr′ĭ-jĭd), *n. & adj.*

mī·crop′ter·yg′i·ous (mī-krŏp′tĕr-ĭj′ĭ-ŭs), *adj.* [*micro-* + Gr. *pterygion* fin.] Having, or provided with, small fins.

mī′cro-py′lar (mī′krō-pī′lĕr), *adj.* Pert. to a micropyle.

mī′cro-pyle (mī′krō-pīl), *n.* [F., fr. Gr. *mikros* small + *pylē* gate, orifice.] **1.** *Zool.* A minute opening; as: **a** That in the investing membranes of an egg, by which spermatozoa may enter. **b** That through which the protoplasmic contents of a gemmule of a sponge escape.
2. *Bot.* The minute orifice in the integuments of an ovule through which the pollen tube penetrates to the embryo sac in porogamic plants. It persists in the seed as a closed orifice.

mī′cro-py·rom′e·ter (-pī-rŏm′ē-tĕr), *n.* [*micro-* + *pyrometer.*] *Physics.* An instrument for the optical determination of the temperature or emissivity of microscopic glowing bodies. It has a minute glowlamp mounted in the eyepiece of a microscope so that the image of the filament is superimposed upon that of the observed glowing surface.

mī′cro-rhab′dus (mī′krō-răb′dŭs), *n.* [NL., fr. *micro-* + Gr. *rhabdos* rod.] *Zool.* A rod-shaped sponge spicule.

mī′cro-rheo·om′e·ter (-rē-ŏm′ē-tĕr), *n.* A rheometer for measuring the flow of liquids in capillary tubes. — **mī′cro-rhe′o·met′ric** (-rē′ō-mĕt′rĭk), *adj.*, **-ri·cal** (-rĭ-kăl), *adv.*

Mī′cro-rho′pi·as (-rō′pĭ-ăs), *n.* [NL., fr. *micro-* + Gr. *rhōpēia* bushes.] *Zool.* A genus of typical ant urens. See ANT UREN.

Mī′cro-sau′ri·a (mī′krō-sô′rĭ-ȧ), *n. pl.* [NL., fr. *micro-* + *-sauria.*] *Paleontol.* A group of extinct stegocephalians containing salamanderlike forms. In a broader sense, equiv. to *Lepospondyli.* — **mī′cro-sau′ri·an** (-ăn), *adj. & n.*

mī′cro-sclere (mī′krō-sklēr), *n.* Also **mī′cro-scle′rum** (-sklē′rŭm). [*micro-* + Gr. *sklēros* hard.] *Zool.* A minute sponge spicule, usually supporting a single cell. — **mī′cro-scle′rous** (-sklēr′ŭs), *adj.*

mī′cro-scope (mī′krō-skōp), *n.* [NL. *microscopium.* See MICRO-; -SCOPE.] **1.** An optical instrument, consisting of a lens, or combination of lenses, for making enlarged or magnified images of minute objects. The *simple,* or *single, microscope,* consists merely of a single lens or magnifying glass set in a frame. In this form of instrument the rays of light which enter the eye proceed directly from the object itself. The *compound microscope* requires an *objective* and an *eyepiece,* commonly mounted in a *drawtube,* — accurate focus, in the case of high-power lenses, being attained by a special screw appliance known as the *fine adjustment.* The *projecting microscope* is constructed to throw the magnified image upon a screen in a dark room or box. It has a large lens for converging a beam of sunlight or artificial light upon the object, and a small lens or magnifier. See also ULTRAMICROSCOPE. The development of the microscope dates from the Middle Ages. The first compound instrument was, probably, that of a Dutchman, Zacharias Janssen (c. 1590). Anton Leeuwenhoek (1632–1723) made simple but efficient microscopes through which he was able to observe microorganisms.

Compound Microscope. 1 Eyepiece; 2 Tube; 3 Nosepiece, carrying three Objectives (4, 4); 5 Rack and Pinion for making coarse adjustment; 6 Screw for making fine adjustment; 7 Stage; 8 Illuminating Mirror; 9 Condenser.

Projecting Microscope fixed in an outer Wall or Shutter. *a* Knob for turning the Mirror; *b* Screw for inclining the Mirror; *m* Mirror for reflecting the Sun's Light through the Lenses; *l* Principal Condensing Lens at outer End of the smaller Tube; *e* Second Condensing Lens, moved by Thumbscrew *c*; *n* Two Metal Plates holding the Object at the Focus of the Lenses; *f* Tube containing the Objective Lens, movable by Thumbscrew *d*; *e* Screen through which the Rays pass to form Magnified Image on the Screen.

2. [*cap.*] *Astron.* Microscopium.

mī′cro-scope (mī′krō-skōp), *v. t.* To look at with or as with a microscope; also, to magnify.

mī′cro-scop′ic (mī′krō-skŏp′ĭk), *adj.* Also **mī′cro-scop′i·cal** (-ĭ-kăl). **1.** Of, pert. to, or conducted with, the microscope or microscopy.
2. Like a microscope; able to see very minute objects.
3. So small or fine as to be invisible or not clearly distinguished without the use of a microscope; as, *microscopic* plants, crystallization; — often limited so as to exclude *submicroscopic* and *ultramicroscopic.* Hence, loosely, very small.
4. Seen in the small, or taken in the small; in terms of small or relatively small units or elements; as, the phenomena of the molecule or the electron are *microscopic.*
— **mī′cro-scop′i·cal·ly,** *adv.*

mī′cro-scop′ics (-skŏp′ĭks), *n.* Microscopy. See -ICS.

Mī′cro-sco′pid (mī′krō-skō′pĭd; mī-krŏs′kō-pĭd), *n.* [See 1st -ID.] *Astron.* One of the meteors whose radiants are in the constellation Microscopium.

Mī′cro-sco′pi·um (mī′krō-skō′pĭ-ŭm), *n.*; *gen.* MICROSCOPII (-pĭ-ī). [NL. See MICROSCOPE, 2.] *Astron.* A constellation south of Capricornus; the Microscope.

mī·cros′co·pize (mī-krŏs′kō-pīz), *v. i.* To use the microscope.

mī·cros′co·py (mī-krŏs′kō-pĭ; mī′krō-skō′pĭ; 277), *n.* Use of the microscope; investigation with the microscope. — **mī·cros′co·pist** (mī-krŏs′kō-pĭst; mī′krō-skō′pĭst), *n.*

mī′cro-seism (mī′krō-sīz′m; -sīs′m), *n.* [*micro-* + *-seism.*] A feeble earth tremor not directly perceptible, but detected only by means of specially constructed apparatus. — **mī′cro-seis′mic** (-sīz′mĭk; -sīs′-), **-seis′mi·cal** (-mĭ-kăl), *adj.*

mī′cro-seis′mo·graph (-sīz′mō-grăf; -sīs′mō-grăf; 83), *n.* [*microseism* + *-graph.*] A microseismometer.

mī′cro-seis·mol′o·gy (-sīz·mŏl′ō-jĭ; -sīs-mŏl′ō-jĭ), *n.* [*microseism* + *-logy.*] Science or study of microseisms.

mī′cro-seis·mom′e·ter (-mŏm′ē-tĕr), *n.* [*microseism* + *-meter.*] A seismometer for measuring microseisms. — **mī′cro-seis·mom′e·try** (-trĭ), *n.*

mī′cro-seis′mo·met′ro·graph (-sīz′mō-mĕt′rō-grăf; -sīs′-mō-), *n.* A seismometrograph of great sensitiveness.

mī′cro-sep′tum (-sĕp′tŭm), *n.* [NL.] *Zool.* In anthozoans, a narrow or imperfect mesentery.

mī′cros·mat′ic (mī′krŏz·măt′ĭk), *adj.* [*micr-* + Gr. *osmē* a smell, odor.] *Zool.* Having the organs of smell feebly developed. — **mī·cros′ma·tism** (mī-krŏz′mȧ-tĭz′m), *n.*

mī·cro·so′ma·tous (mī′krō-sō′mȧ-tŭs; -sŏm′ȧ-tŭs), *adj.* *Anat.* Characterized by a small body; dwarfish.

mī′cro·some (mī′krō-sōm), *n.* [*micro-* + 3d *-some.*] *Biol.* One of the minute granules embedded in protoplasm.

mī′cro·som′ite (-sŏm′īt), *n.* *Mineral.* A mineral close to cancrinite, in minute colorless hexagonal crystals.

Mī′cro·so′rex (-sō′rĕks; 181), *n.* [NL., fr. *micro-* + L. *sorex* shrewmouse.] *Zool.* A subgenus or genus of very small American shrews typified by *Sorex hoyi.*

mī′cro·spe′cies (mī′krō-spē′shēz; -shĭ-ēz), *n.* *Biol.* **a** A species based upon minute, but fixed, characters; a genetic species. **b** A species of limited or restricted distribution.

mī′cro·spec′tro·scope (mī′krō-spĕk′trō-skōp), *n.* [*micro-* + *spectroscope.*] *Physics.* A spectroscope arranged for attachment to a microscope, for observation of the spectrum of light from minute portions of any substance. — **mī′cro·spec′tro·scop′ic** (-spĕk′trō-skŏp′ĭk), *adj.* — **mī′cro·spec·tros′co·py** (-spĕk·trŏs′kō-pĭ; -spĕk′trō-skō′pĭ), *n.*

Mī′cro·sphae′ra (-sfē′rȧ), *n.* [NL., fr. *micro-* + *-sphaera.*] *Bot.* A genus of powdery mildews (family Erysiphaceae). *M. alni* is common on the lilac.

mī′cro·sphere (mī′krō-sfēr), *n.* **1.** *Biol.* The central region of the aster surrounding the centrosome.
2. *Zool.* The very small primordial shell of the asexual individuals of certain dimorphic Foraminifera. — **mī′cro-spher′ic** (-sfĕr′ĭk), **mī′cro·sphaer′ic** (-sfĕr′ĭk; -sfēr′ĭk), *adj.*

mī′cro·spher′u·lit′ic (-sfĕr′ū-lĭt′ĭk), *adj.* *Petrog.* Consisting of, or characterized by, spherulites of microscopic size.

mī′cro·spo·ran′gi·um (-spō-răn′jĭ-ŭm), *n.*; *pl.* -GIA (-ȧ). [NL. See MICRO-; SPORANGIUM.] *Bot.* A sporangium with microspores, as, in seed plants, the pollen sac of the anther.

mī′cro·spore (mī′krō-spōr; 181), *n.* [*micro-* + *-spore.*]
1. *Bot.* One of the smaller of the two kinds of asexual spores produced by heterosporous plants, giving rise to the male prothallium, as the pollen grain of seed plants.
2. *Zool.* The smaller of two forms of spores produced by certain protozoans, as Radiolaria.
— **mī′cro·spor′ic** (-spōr′ĭk), *adj.* — **mī·cros′po·rous** (mī-krŏs′pō-rŭs; mī′krō-spō′rŭs; 181), *adj.*

Mī′cro·spo·rid′i·a (mī′krō-spō-rĭd′ĭ-ȧ), *n. pl.* Also **Mī′cro-spo′ri·di′i·da** (-spō′rĭ-dī′ĭ-dȧ; 181). [NL., fr. *micro-* + *sporidium.*] *Zool.* An order of Protozoa, of the class Sporozoa, whose members are parasitic in both vertebrates and invertebrates, notably in fishes, insects, and crustaceans. — **mī′cro·spo·rid′i·an** (-spō-rĭd′ĭ-ăn), *adj. & n.*

mī′cro·spo′ro·phyll (mī′krō-spō′rō-fĭl; 181), *n.* *Bot.* A sporophyll bearing microsporangia.

mī′cro·spo·ro′sis (-spō-rō′sĭs), *n.* [NL., fr. *microspore* + *-osis.*] *Veter.* A form of ringworm affecting foals, characterized by the loss of hair in small round patches, esp. on the neck and head, and caused by a vegetable parasite.

Mī′cro·spo′rum (mī′krō-spō′rŭm; 181), *n.* [NL. See MICRO-; -SPORE.] *Bot.* A genus of fungi (family Moniliaceae) causing certain types of ringworm.

mī′cro·stat (mī′krō-stăt), *n.* [*micro-* + *-stat.*] A microscope attachment consisting of a stage and finder.

mī′cro·sthene (-sthēn), *n.* [*micro-* + Gr. *sthenos* strength.] *Zool.* One of an abandoned group of mammals (**Mi·cros′the·nes** [mī-krŏs′thē-nēz]), including Insectivora, Chiroptera, Rodentia, and Edentata. — **mī′cro·sthen′ic** (mī′krō-sthĕn′ĭk), *adj.*

mī′cro·stom′a·tous (-stŏm′ȧ-tŭs; -stō′mȧ-), *adj.* Also **mi·cros′to·mous** (mī-krŏs′tō-mŭs). [*micro* + Gr. *stoma, -atos,* mouth.] Having a small mouth.

mī′cro·stome (mī′krō-stōm), *n.* [*micro-* + *-stome.*] *Bot.* A small orifice.

mī′cro·struc′ture (-strŭk′tûr), *n.* Microscopic structure or appearance. — **mī′cro·struc′tur·al** (-tûr-ăl), *adj.*

mī′cro·sty′lous (mī′krō-stī′lŭs), *adj.* *Bot.* Short-styled; specif., having short styles and long filaments.

mī′cro·sub′li·ma′tion (-sŭb′lĭ-mā′shŭn), *n.* Sublimation for microscopic examination.

mī′cro·ta·sim′e·ter (-tȧ-sĭm′ē-tĕr), *n.* *Physics.* A tasimeter, esp. when arranged to measure minute extensions.

mī′cro·tech′nic (-tĕk′nĭk), **mī′cro·tech·nique′** (-tĕk-nēk′), *n.* Microscopic technic, micrology.

mī′cro·tel′e·phone (mī′krō-tĕl′ē-fōn), *n.* A telephone with a microphone transmitter. — **-phon′ic** (-fŏn′ĭk), *adj.*

Mī′cro·thel′y·phon′i·da (-thĕl′ĭ-fŏn′ĭ-dȧ), *n. pl.* [NL.] *Zool.* An order of Arachnida, including very minute species with a whiplash prolongation at the tip of the abdomen.

mī·croth′e·os (mī-krŏth′ē-ŏs), *n.* [NL., fr. *micro-* + Gr. *theos* god.] A divine being or personality on a small scale.

mī′cro·therm (mī′krō-thûrm), *adj.* [*micro-* + *-therm.*] *Bot.* Any plant requiring a mean annual temperature between 0° and 14° C. for full growth. Cf. MEGATHERM, MESOTHERM. — **mī′cro·ther′mic** (-thûr′mĭk), *adj.*

mī′cro·tho′rax (-thō′răks; 181), *n.* [NL., fr. *micro-* + *thorax.*] *Zool.* In insects, a membranous section in the neck region consisting of a number of small sclerites.

Mī′cro·thy′ri·a′ce·ae (-thī′rĭ-ā′sē-ē), *n. pl.* [NL., fr. *micro-* + Gr. *thyrion,* dim. of *thyra* door + *-aceae.*] *Bot.* A family of ascomycetes, with shield-shaped or radiate perithecia. See DIPLOCARPON.

mī·cro′ti·a (mī-krō′shĭ-ȧ), *n.* [NL. See MICROTUS.] *Med.* Smallness of the ear, esp. abnormal.

Mī′cro·tĭ′nae (mī′krō-tĭ′nē), *n. pl.* [NL. See MICROTUS.] *Zool.* A subfamily of rodents (family Cricetidae) including the voles and lemming mice. — **mī′cro·tine** (mī′krō-tĭn; -tīn), *adj.*

mī′cro·ti·tra′tion (-tĭ-trā′shŭn; -tĭ-), *n.* Microanalytical titration.

mī′cro·tome (mī′krō-tōm), *n.* [*micro-* + *-tome.*] An instrument for cutting sections, as of organic tissues, for microscopic examination. In the *rotary microtome* the object to be cut moves vertically downward against the knife, and in the *sliding microtome* the object is held stationary while the knife is carried obliquely across it.

Microtome. 1 Knife; 2 Object Clamp.

mī′cro·tome, *v. t.* *Biol.* To cut in sections with a microtome.

mī′cro·tom′ic (-tŏm′ĭk), **mī′cro·tom′i·cal** (-ĭ-kăl), *adj.* Of or pert. to the microtome or microtomy; cutting thin slices.

mī·crot′o·my (mī-krŏt′ō-mĭ), *n.* Art of using the microtome, or of preparing, with its aid, objects for microscopic study. — **mi·crot′o·mist** (-ō-mĭst), *n.*

Mī·cro′tus (mī-krō′tŭs), *n.* [NL., fr. *micr-* + Gr. *ous, ōtos,* ear.] *Zool.* The typical genus of the Microtinae, including many species of the Northern Hemisphere.

mī′cro·type (mī′krō-tīp), *n.* A microspecies; a micro-form. — **mī′cro·typ′al** (-tīp′ăl), *adj.* — **mī′cro·typ′i·cal** (-tĭp′ĭ-kăl), *adj.*

mī′cro·vol′ume (-vŏl′ūm), *n.* A very small volume.

mī′cro·zo′a (mī′krō-zō′ȧ), *n. pl.* [NL., fr. *micro-* + *-zoa.*] *Zool.* Microscopic animals, esp. protozoans. — **mī′cro·zo′al** (-ăl), *adj.* — **-zo′an** (-ăn), *adj. & n.* — **-zo′ic** (-zō′ĭk), *adj.*

mī′cro·zo·a′ri·a (-zō-ā′rĭ-ȧ; 79), *n. pl.* [NL., fr. *micro-* + Gr. *zōiarion,* dim. of *zōion* animal.] *Zool.* Infusoria and other minute forms of animal life. *Rare.* — **mī′cro·zo·ar′i·an** (-ār′ĭ-ăn), *adj. & n.* — **mī′cro·zo′a·ry** (-zō′ȧ-rĭ), *n.*

mī′cro·zone (mī′krō-zōn), *n.* [*micro-* + *zone.*] *Mach.* The zone within which the microdrive of an elevator is designed to function.

mī′cro·zo′oid (-zō′oid), *n.* *Biol.* One of the minute free zooids in unicellular organisms with dimorphic zooids.

mī·cro·zo′on (-zō′ŏn), *n.* [NL.] *Zool.* One of the microzoa.

mī′cro·zo′o·spore (-zō′ō-spōr; 181), *n.* *Biol.* A small motile spore; — dist. from the *macrozoospores* of the same species.

mī′cro·zyme (mī′krō-zīm), *n.* Also **mī′cro·zy′ma** (-zī′-mȧ). [*micro-* + Gr. *zymē* leaven.] A particle in protoplasm regarded as a pathogenic microorganism. — **mī′cro-zym′i·an** (-zĭm′ĭ-ăn), *adj.*

mī′crur·gy (mī′krûr-jĭ), *n.* [*micr-* + *-urgy.*] *Biol.* The science or practice of microdissection and microinjection. — **mī·crur′gic** (mī-krûr′jĭk), *adj.* — **mī·crur′gi·cal** (-jĭ-kăl), *adj.* — **mī′crur·gist** (mī′krûr-jĭst), *n.*

Mī·cru′rus (mī-krōō′rŭs), *n.* [NL., fr. *micr-* + *-urus.*] *Zool.* A genus of small, venomous elapine snakes of the Western Hemisphere. Syn. *Elaps* **a.** See CORAL SNAKE **a.**

Mic·tlan′ (mēk·tlän′), *n.* [Nahuatl.] *Aztec Relig.* The underworld, abode of the dead, presided over by **Mic·tlan′te·cu·tli** (-tȧ-kōō′tlē), the god of death. Cf. TLALOC, XIBALBA.

mic′tu·rate (mĭk′tū-rāt), *v. i.*; -RAT′ED (-rāt′ĕd; -tĭd; 119); -RAT′ING (-rāt′ĭng). [See MICTURITION.] To urinate.

mic′tu·ri′tion (mĭk′tū-rĭsh′ŭn), *n.* [L. *micturire* to desire to make water, desiderative verb fr. *mingere, mictum,* to make water. See MIXEN.] Oris., desire to urinate; hence, excessively frequent passage of urine, due to disease; also, the act of urinating.

mid (mĭd), *prep.* With. *Obs.*

mid (mĭd), *adj.*; *compar. wanting*; *superl.* MID′MOST (mĭd′-mōst). [AS. *midd*; akin to OS. *middi,* D. *mid* (in comp.), OHG. *mitti,* ON. *mithr,* Goth. *midjis,* L. *medius,* Gr.

Mī′cro·pod′i·dae (mī′krō-pŏd′ĭ-dē), *n. pl.* [NL.] *Zool.* Syn. of APODIDAE **b.** See SWIFT, *n.*, 4.

mī′cro·poi′ki·lit′ic (-poi′kĭ-lĭt′ĭk), *adj.* Also **mī′cro·poi′ci·lit′ic** (-sĭ-lĭt′ĭk), **-poe′ci·lit′ic** (-pē′sĭ-lĭt′ĭk). *Petrog.* See MICRO-.

mī′cro·po′lar·i·za′tion, *n.* See MICRO-, 4.

Mī·cro′pus (mī-krŏ′pŭs; mī′krō-pŭs), *n.* [NL.] Syn. of APUS, 1 **b.**

mī′cro·ra′di·om′e·ter, *n.* = RADIOMICROMETER. [CRO-, 2 **b.**]

mī′cro·re·ac′tion, *n.* See MICRO-, 1 **a.**

mī′cro·re′frac·tom′e·ter, *n.* See MICRO-, 1 **a.**

mī′cro·co·pal (mī-krŏ′kō-păl), *adj.* Also **mī′cro·sco′pi·al** (mī′krō-skŏ′pĭ-ăl). = MICROSCOPIC. *Rare.*

microscopic anatomy. See [ANATOMY, 2 **a.**]

mī′cro·sec′tion, *n.* See MICRO-, 2 c.

mī′cro·seme (mī′krō-sēm), *adj.* [F. *microsème,* fr. Gr. *mikros* small + *sēma* sign.] See ORBITAL INDEX.

mī′cro·so′ma (mī′krō-sō′mȧ), *n.*; *pl.* -SOMATA (-sō′mȧ-tȧ). [NL.] *Biol.* = MICROSOME.

mī′cro·sper′mae (-spûr′mē), *n. pl.* [NL. See MICRO-; 1st SPERM.] Syn. of ORCHIDALES.

mī′cro·sper′mous (-mŭs), *adj.* Having very small seeds. *Rare.*

mī′cro·spo·range′ (mī′krō-spō-răn′jĭ), *n.* = MICROSPORANGIUM.

mī′cro·spo·ri′a·sis (-spō-rī′ȧ-sĭs), *n.* [NL.] = RINGWORM, 1.

Mī·cros′po·ron (mī-krŏs′pō-rŏn), *n.* [NL.] Syn. of MICROSPORUM.

mī′cro·spo′ro·phore (mī′krō-spō′rō-fōr; 181), *n.* *Bot.* = MICROSPORANGIUM.

Mī·cros′ty·lis (mī-krŏs′tĭ-lĭs; mī′krō-stĭ′lĭs), *n.* Syn. of MALAXIS.

mī′cro·sty′lo·spore, *n.* *Bot.* See MICRO-, 3 **b.**

mī′cro·vol′u·met′ric, *adj.* See MICRO-, 4.

mī′cro·watt′ (mī′krō-wŏt′), *n.* See MICRO-, 1 **b.**

mic′tion (mĭk′shŭn), *n.* [LL. *mictio, -onis,* fr. *mingere* to urinate.] = URINATION.

---

mesos, Skr. *madhya*, MIr. *mide*, n., middle. Cf. AMID, INTERMEZZO, MEAN intermediate, MEDIATE, MEDIOCRE, MEDIUM, MERIDIAN, MIDDLE, MIDST, MIZZEN, MOIETY.] **1.** Denoting the middle part; being the part in the middle or midst; as, in *mid* ocean or *mid*-ocean.
2. Occupying a middle position; middle; as, the *mid* finger.
3. *Phonet.* Midway between *high* and *low;* half-close or half-open; — said of certain vowel sounds (ā in āle; ē in ēll; ō in ōld). See *Pron.*, § 32.

mid (mĭd), *n.* Middle. *Archaic & Dial.*

See MILITATE; cf. 1st MILL, MILLION.] A measure of distance originating with the Romans and subsequently coming into general use, with varying value, among Western nations. Abbr. *m., mi.* The ancient Roman mile was about 1,620 English yards (1,482 meters). The English ***statute mile,*** used in Great Britain, the United States, etc., is equal to 320 rods or poles, 1,760 yards, or 5,280 feet (1,609.3 meters). The old Scotch mile is 1.123, the Irish mile 1.273, statute miles. On the Continent most of the old miles have been replaced, officially at least, by the kilometer. They varied from about 1,100 yards to over 12,000 yards. The ***geographical, nautical*** or ***sea, mile*** is the length of a minute, or $\frac{1}{21600}$ of a great circle of the earth, but, because the earth is not a perfect sphere, several different values are in use. That adopted by the British Hydrographic Office is 6,080 feet (1,853.2 meters), and is called the ***Admiralty mile;*** that of the United States was formerly 6,080.20 feet (1853.248 meters) but on July 1, 1954, the international nautical mile of 6,076.103 feet (1852 meters), which had been proposed for international use in 1929 by the International Hydrographic Bureau and which has since been adopted by a number of countries, became official for the U. S.

Cf. MILCH, EMULSION.] **1.** A white or yellowish fluid secreted by the mammary glands of female mammals for the nourishment of their young, consisting of minute globules of fat suspended in a solution chiefly of casein and other protein matter, milk sugar, and inorganic salts. That secreted before delivery and for some days thereafter is called ***colostrum.*** It is yellower and richer in solids than ordinary milk, and is adapted to the special needs of the newborn offspring. Whole milk contains vitamins A, B, G, and C varying according to the food eaten. The average composition of ordinary cow's milk (***whole milk***) and some related products has been given as follows:

PRODUCT	Water	Protein	Fat	Carbohydrates	Ash	Fuel value per lb.
	Per ct.	*Per ct.*	*Per ct.*	*Per ct.*	*Per ct.*	*Calories*
Whole milk	87.0	3.3	4.0	5.0	.7	310
Skim milk	90.5	3.4	.3	5.1	.7	165
Buttermilk	91.0	3.0	.5	4.8	.7	160
Condensed milk	26.9	8.8	8.3	54.1	1.9	1,430
Cream	74.0	2.5	18.5	4.5	.5	865
Whey	93.0	1.0	.3	5.0	.7	125
Whole milk, dried	4.8	24.3	28.5	36.8	5.6	2,270

The specific gravity of ordinary cow's milk varies from 1.028 to 1.035. Because of the lower specific gravity of the fat globules as compared with the solution, or ***milk plasma,*** the product called ***cream,*** rich in fat, separates by slow rising or is separated centrifugally. Milk is capable of undergoing various fermentations, as lactic (ordinary souring of milk) and alcoholic (preparation of koumiss, kefir, etc.). Whole milk or skim milk is now dried by various processes. It is used as such or reconstituted by mixing with water.

Milk is the whole, fresh, clean lacteal secretion obtained by the complete milking of one or more healthy cows, excluding that obtained within fifteen days before and five days after calving, or such longer period as may be necessary to render the milk practically free of colostrum. The name *milk* unqualified means cow's milk.
Circular, U. S. Dept. of Agric.

MIND (commonly contrasted with *body*, sometimes with *heart* or *soul*) is the general term; INTELLECT (contrasted esp. with *feeling* or *will*) suggests rather more definitely a specific faculty; INTELLIGENCE implies quickness or readiness of comprehension; as, "an adamantine veil between his heart and *mind*" (*Shelley*); "that *mind* and soul, according well, may make one music" (*Tennyson*); "In manner . . . an *intellect* speaking to *intellects*, but with something which raised it above the mere intellectual, a subdued glow of feeling pervading all" (*J. R. Green*); "That [Montaigne's] keen-edged *intelligence*, dividing evidence so finely, like some exquisite steel instrument, with impeccable sufficiency, always leaving the last word loyally to the central *intellectual* faculty, in entire disinterestedness" (*W. Pater*). Cf. MENTAL, REASON, SOUL.

— *in, or of, two minds.* Irresolute between two choices. — *to have a mind or great, good*, etc., *mind.* To be inclined or strongly inclined in purpose; — used with an infinitive. "Sir Roger de Coverley . . . told me that he *had* a *great mind* to see the new tragedy with me." *Addison.* — *to have little* or *no mind.* To be slightly or not at all inclined; — with an infinitive. — *to keep mind.* To remember. *Scot.*

4. To dig into, for ore or metal.

mine (mēn), *n.* [F.] See MEASURE, *Table.*

mine dragging (mīn). *Mil.* = MINE SWEEPING.

mine field. *Mil.* The whole space occupied or commanded by mines either on land or in the water.

mine layer. *Naval.* A vessel especially equipped for or engaged in the laying of underwater mines.

‖**Mi'nen-wer'fer** (mē'nĕn-vĕr'fĕr), *n.* [G., lit., mine thrower.] *Mil.* **a** A German muzzle-loading rifled trench gun, mounted on wheels and designed esp. to accompany infantry in the advance, for use in destroying machine-gun strong points. **b** Loosely, any mine thrower.

mine'own'er (mīn'ōn'ĕr), *n.* A whole or part owner of a mine.

mine pig. Pig iron made wholly from ore. Cf. CINDER PIG.

min'er (mīn'ĕr), *n.* [OF. *mineor* (F. *mineur*).] **1.** One who mines; one engaged in the business of getting ore, coal, precious stones, etc., out of the earth; as, a gold *miner;* an amber *miner;* radium *miner;* broadly, anyone working underground in a mine; more narrowly, one who drills, blasts, stopes, drives levels, etc., in a mine; as, a hand *miner;* a quarry *miner.*

from which stone (as for building or for making lime) is taken. Cf. 5th QUARRY, 1; OPEN CUT. **b** Loosely, in anticipation, an ore deposit; as, a newly discovered *mine.*

2. *Mil.* A soldier employed in constructing a military mine; — not a technical term.

3. *Zool.* **a** Any of numerous insects which, in the larval state, excavate galleries in the parenchyma of leaves. **b** Any of several honey eaters of Australia and Tasmania, as *Myzantha melanocephala.*

min'er-al (mĭn'ĕr-ăl), *n.* [OF., fr. ML. *minerale.* See MINERAL, *adj.*] **1.** Any chemical element or compound occurring naturally as a product of inorganic processes. Minerals are usually solids, the only ones which are liquids at ordinary temperatures being water and mercury. Except in rare instances they have a definite molecular structure which manifests itself in crystal form, optical properties, etc. Rocks, except certain glassy forms, are either simple minerals or, more frequently, aggregates of two or more minerals. Such substances as coal and amber are not minerals in the true sense.

2. a *Obs.* A mine **b** *Colloq. Mining.* Ore.

3. Anything which is neither animal nor vegetable, as in the old general classification of things into three kingdoms (animal, vegetable, and mineral).

4. Mineral water.

min'er-al, *adj.* [F. *minéral,* fr. ML. *mineralis,* fr. *minera* ore, mine, fr. OF. *miniere,* fr. (assumed), VL., *minaria,* fr. *mina.* See MINE, *n.*] **1.** Of or pert. to mines or mining; also, versed in matters relating to mines or mining. *Obs.*

2. Of or pertaining to minerals; consisting of, or of the nature of, a mineral or minerals; inorganic.

3. Impregnated with minerals; as, *mineral* waters.

mineral acid. *Chem.* An inorganic acid.

mineral alkali. *Chem.* Soda. *Obs.*

mineral black. A permanent black pigment of ground carbonaceous shale, slate, coal, or the like.

mineral blue. 1. a The mineral azurite, or blue copper carbonate, ground and used as a pigment; also, an artificial pigment of the same composition (or one consisting chiefly of copper hydroxide). **b** Prussian blue lightened by mixture, as with white clay.

2. Either of two colors: **a** Azurite blue. **b** Antwerp blue.

mineral brown. Any of the several colors of native earths colored with iron oxide. The average is the color negro. Called also *iron brown, metallic brown.*

mineral candle. A candle made of paraffin.

mineral caoutchouc. Elaterite.

mineral chameleon. *Chem.* = CHAMELEON MINERAL.

mineral charcoal. A substance, resembling charcoal, interlaminated in silky fibrous layers in beds of ordinary bituminous coal; — called by miners *mother of coal.*

mineral coal. Coal (in sense 3).

mineral color. Any inorganic pigment.

mineral cotton. = MINERAL WOOL.

mineral gray. A color, yellow-green in hue, of very low saturation and high brilliance. Cf. COLOR.

mineral green. 1. a Malachite, or green copper carbonate, ground and used as a pigment; also, an artificial pigment of the same composition. **b** Scheele's green.

2. The color malachite green.

min'er-al-i-za'tion (mĭn'ĕr-ăl-ĭ-zā'shŭn; -ī-zā'shŭn), *n. Geol.* The process of change or metamorphism whereby minerals are secondarily developed in a rock; esp., the formation or introduction of ore minerals into previously existing rock masses; metallization; also the resultant state.

min'er-al-ize (mĭn'ĕr-ăl-īz), *v.;* -IZED (-īzd); -IZ'ING (-īz'ĭng). *Transitive:* **1.** To transform (a metal) into an ore.

2. To petrify; as, *mineralized* leaves or bones.

3. To impregnate or supply with minerals or any inorganic compound; as, *mineralized* water; to *mineralize* organic matter; to convert into mineral or inorganic form; as, *mineralized* nitrogen in soils.

——, *Intransitive:* **1.** To go on an excursion for observing and collecting minerals; to mineralogize.

2. To promote the formation of minerals.

min'er-al-iz'er (-īz'ĕr), *n.* **1.** An element which, in combination with a metal, forms an ore. Thus, in galena, or lead ore, sulphur is a *mineralizer.*

2. *Petrog. & Geol.* A dissolved gas or vapor, as water, fluorine, etc., which promotes the crystallization of minerals in a molten magma, in adjacent rock, or in veins genetically related to the intrusion of the magma.

mineral jelly. A semisolid substance from petroleum similar to petrolatum, but cruder, used as a stabilizer in explosives.

mineral kingdom. Popularly, that division of nature which embraces inorganic objects. See MINERAL, *n.,* 3.

mineral lake. A pink pigment consisting of a mixture of chromium oxide and stannic oxide.

mineral line. *Railroads.* A line that carries only minerals, esp. coal. *Eng.*

mineral naphtha. See NAPHTHA, 3.

min'er-al-og'i-cal (mĭn'ĕr-ăl-ŏj'ĭ-kăl), *adj.* Also **min'er-al-og'ic** (-ĭk). [See MINERALOGY.] Of or pertaining to mineralogy as, a *mineralogical* table; *mineralogical* chemistry. — **min'er-al-og'i-cal-ly,** *adv.*

min'er-al'o-gist (-ăl'ō-jĭst), *n.* **1.** Specialist in mineralogy.

2. A carrier snail.

min'er-al'o-gize (-ăl'ō-jīz), *v. i.* To study mineralogy.

min'er-al'o-gy (-jĭ), *n.; pl.* -GIES (-jĭz). [*mineral* + *-logy;* cf. F. *minéralogie.*] **1.** The science of minerals. It deals with their crystallography and their physical and chemical properties in general, their classification, and the ways of distinguishing them.

2. The materials of this science; minerals, collectively; the attributes of minerals or mineral formations; as, the *mineralogy* of the Black Hills.

3. A treatise on this science.

mineral oil. Any oil of mineral origin, as petroleum, shale oil, or any oil obtained from them by refining.

mineral orange. a = ORANGE LEAD. **b** = FIRE RED **a.**

mineral pigment. See DYE, *n.,* 2.

mineral pitch. = ASPHALT, *n.,* 1.

mineral pulp. A fibrous variety of talc, used as a filler in paper manufacture.

mineral purple. 1. a A dark-red pigment consisting of iron oxide. **b** Purple of Cassius.

2. The color Mars violet.

mineral red. A color, red in hue, of low saturation and low brilliance. Cf. COLOR.

mineral right. *Law.* The right or title to all, or to certain specified, minerals in a given tract.

mineral rubber. Any of certain rubbery substances of mineral origin, as asphalt; also, an asphalt artificially obtained or treated.

mineral salt. a A salt of a mineral (inorganic) acid. **b** A salt occurring as a mineral.

mineral seal oil, mineral sperm oil. A burning oil of high fire test, prepared from petroleum.

mineral spirits. A volatile petroleum product, intermediate between gasoline and kerosene, used extensively as a thinner for paints and varnishes.

mineral surveyor. *Mining.* A surveyor appointed under federal law, and authorized to make official surveys of mineral lands; — called also *deputy surveyor.*

mineral tallow. Hatchettine.

mineral tanning. See TAN, *v. t.,* 1.

mineral tar. = MALTHA, 2 **a.**

mineral violet. Manganese violet.

mineral water. Any water naturally or artificially impregnated with mineral salts or gases; as: ***acidulous alkaline water,*** containing sodium bicarbonate; ***acidulous chalybeate water,*** iron carbonate; ***alkaline water,*** sodium bicarbonate and sodium and magnesium sulphates; ***carbonated water,*** carbon dioxide; ***chalybeate water,*** iron; ***lithia water,*** lithium carbonate or chloride; ***saline water,*** magnesium and sodium sulphates and sodium chloride; ***siliceous water,*** alkali-metal silicates; ***sulphur water,*** hydrogen sulphide.

mineral wax. Ozocerite.

mineral white. a Permanent white. See BARIUM SULPHATE. **b** Gypsum, ground and used as a pigment.

mineral wool. A fibrous woollike material, resembling spun glass, made by blowing a jet of air or steam through melted slag; slag wool. It is a poor conductor of heat, and is used as a packing for steam pipes, etc.

mineral yellow. a The color yellow ocher. **b** The color lemon yellow. **c** A pigment. See LEAD OXYCHLORIDE.

min'er's a-ne'mi-a (mĭn'ĕrz). Ancylostomiasis.

miner's consumption. *Med.* Miner's phthisis.

miner's dial. = DIAL, 7.

miner's inch. See WATER-INCH.

miner's phthisis. *Med.* A morbid condition in miners resembling pulmonary tuberculosis in its symptoms, but due to prolonged inhalation of carbon and earthy particles.

miner's worm. The hookworm (*Ancylostoma duodenale*) which often infests miners and tunnel workers.

mine'-run' (66), *n.* Unassorted product of a mine. Hence, any product of common or average grade.

Mi-ner'va (mĭ-nûr'vȧ), *n.* [L.; appar. akin to Gr. *menos* force, purpose. See MIND.] **1.** *Rom. Relig.* An ancient Italian goddess whose cult probably entered Rome from Etruria. She was primarily a goddess of the handicrafts,

mine. † MIN, *v.,* to remind; MIEN. | **mine'a-ble,** *adj.* Var. of MINABLE. | **mine dial** (mīn). = DIAL, 7. | **min'er-ag'ra-phy** (mĭn'ĕr-ăg'rȧ-fĭ), *n.* [ML. *minera* ore, mine + *-graphy.*] = CHALKOGRAPHY. — | **min'er-a-graph'ic** (-ȧ-grăf'ĭk), *adj.* | **min'er-al-iz'a-ble,** *adj.* See -ABLE.

and her temple was the center of the worship of the Roman guilds. As patroness of the guild of physicians she was a health goddess. As connected with Jupiter and Juno, in a supreme triad (see JUPITER), she was a political or civic goddess. Under Greek influence she was identified with *Athena*. The *Quinquatrus*, March 19, primarily a feast of Mars, falling on the anniversary of the founding of Minerva's chief temple on the Aventine, became in popular estimation a Minerva feast and was eventually extended over five days. Cf. DI.

2. By metonymy, a province or activity of which the goddess was patron, as literature or war.

Caesar graced with both *Minervas*. *Pope.*

3. Wisdom. *Obs.*

4. A feminine proper name.

Mi·ner′va (mĭ-nûr′vȧ), *n.* *Hort.* A hardy Ghent azalea with rose-colored flowers. See AZALEA **a**.

mi·ner′val (mĭ-nûr′vȧl), *n.* [L., fr. *Minerva.*] A present made by a pupil to a teacher; also, a fee to a teacher. *Eng.*

Mi·ner′van (-vȧn), *adj.* Pertaining to or characteristic of Minerva.

Mi·ner′vic (-vĭk), *adj.* Of a kind characteristic of Minerva; — specif., with allusion to her skill in spinning. *Rare.*

min′er·y (mĭn′ĕr·ĭ), *n.* [ML. *minaria, minera.*] **1.** A place where mining is carried on.

2. Mining; also, mining materials. *Obs. Oxf. E. D.*

mines (mīnz), *n. pl.* [L. *minae.*] Threats. *Rare.*

mine ship. *Nav.* **a** *Obs.* = POWDER SHIP. **b** = MINE LAYER.

‖**mi·nes′tra** (mē·nĕs′trȧ), *n.* [It.] Italian vegetable soup; minestrone.

‖**mi′ne·stro′ne** (mē′nȧ·strō′nȧ), *n.* [It.] A rich thick soup, with barley, vermicelli, or the like, and vegetables.

mine sweeping. *Mil. & Nav.* Act of dragging a body of water for submarine or floating mines in order to remove them. — **mine sweeper.**

5. To confuse; confound. *Obs.*

—, *Intransitive:* To become mingled; to mix or blend.

Syn. — Combine, consolidate, amalgamate, fuse. — MINGLE, MIX, BLEND, MERGE, COALESCE agree in denoting the conjoining of two or more objects, with varying loss of identity, in a new product (cf. JOIN). So far as they differ MINGLE, rather than *mix,* implies that the constituent elements are distinguished in the product; MIX is apt to lay somewhat greater stress on the interpenetration (often promiscuous) of the elements combined; as, *mingled* colors, sensations; to *mix* salt and pepper, wine and water. BLEND expresses a union so intimate as to obscure the individuality of the component parts, whose qualities are shared by the resultant product; as, *blended* teas, shades; MERGE still more distinctly implies the loss in the whole of the constituent elements, or the complete absorption of one element in another; as, to *merge* the private in the general good. COALESCE differs from *merge* in suggesting more definitely the process resulting in the fusion of parts; as, two drops of water in contact *coalesce.* Cf. ATTACH.

min′gle, *n.* Act of mingling, or state of being mingled; also, that which is mingled; a mixture. *Now Rare.*

See MIRROR.] **1.** An optical phenomenon produced by the presence of a stratum of hot air of varying density across which the observer sees reflections, usually inverted and often distorted, of some distant object or objects. International symbol ><.

Mirage of the Desert. The Layers of Air *aa* are expanded by the heated ground, so that any Ray, as *PAO*, from an elevated Object *P* passing down through the denser Layers *bb*, is successively refracted so that it is concave upwards. As observed from *O* the ray would appear to come from *P'*.

When the stratum of air is immediately above the heated surface as of a desert or a tarred road, the mirage usually takes the form of a pool of water (the reflection of the sky) in which objects on the ground appear reflected. When, in high northern latitudes, the stratum is some distance above the ocean and above the observer's eye level, the mirage, as of a ship or an iceberg, appears in inverted form projected against the sky. Technically, mirages are due to the variations in refractive power of the stratum of hot air: along a line rising from the lowest point of the stratum the refractive index increases to a maximum and then decreases, so that a ray of light near the lowest point is concave upwards, and virtual images of the objects are formed. The *fata morgana* and *looming* are species of mirage.
2. An atmospheric phenomenon in which the air appears to move in ascending waves, like those above heated metal.

2. The bearing of an illegitimate child; hence, an illegitimate child; a bastard. *Scot. & Dial.*

Syn., — MISFORTUNE, MISCHANCE, MISHAP, ADVERSITY agree in the idea of ill or adverse fortune. MISFORTUNE is the most general term; MISCHANCE is often more specifically that which in any way goes wrong; MISHAP is sometimes interchangeable with *mischance,* but more frequently denotes an unlucky accident; as, "The famous maxim of Monsieur de Rochefoucault, 'In our friends' *misfortunes* there is something secretly pleasing to us'" (*Thackeray*); "By great *mischance* he heard but fragments of her later words" (*Tennyson*); "Now the doctor's skill [victorious seemed], and now — alas, for unforeseen *mishaps!* they put on a damp nightcap and relapse" (*Cowper*). ADVERSITY, the strongest of the words compared, denotes grave or continued misfortune, as, "The virtue of prosperity is temperance, the virtue of *adversity* is fortitude" (*Bacon*). Cf. ACCIDENT, DISASTER, INJURY.

miss (mĭs), *n.*; *pl.* MISSES (mĭs'ĕz; -ĭz; 119). [Contr. fr. MISTRESS.] **1.** A mistress; also, a prostitute. *Obs.*

2. [*cap.*] A title of courtesy (1) prefixed to the name of an unmarried girl or woman (except one entitled because of her rank to be addressed as "Lady," "Countess," etc.). It is customary in social usage to indicate the eldest unmarried daughter by omitting her Christian name; as, *Miss* Brown, but *Miss Emily* Brown (a younger sister). The use of *Miss* without the surname or Christian name in speaking either to or of a girl or woman is now vulgar or uncultivated. (2) Prefixed to a place name to designate the winner in a beauty contest; as, *Miss* America.

☞ There is diversity of usage in the application of this title to two or more persons of the same name. *The Misses Brown* is usually preferred in formal and business language. *The Miss Browns* is now more common in less formal language.

3. A young unmarried woman or a girl; as, a *miss* of sixteen; *misses'* shoes; — now sportive or in trade use.
